AND NEW YORK.
1883

P R E F A C E.

IN placing before the public this collection of Edgar Poe's poetical works, it is requisite to point out in what respects it differs from, and is superior to, the numerous collections which have preceded it. Until recently, all editions, whether American or English, of Poe's poems have been *verbatim* reprints of the first posthumous collection, published at New York in 1850.

In 1874 I began drawing attention to the fact that unknown and unreprinted poetry by Edgar Poe was in existence. Most, if not all, of the specimens issued in my articles have since been reprinted by different editors and publishers, but the present is the first occasion on which all the pieces referred to have been garnered into one sheaf. Besides the poems thus alluded to, this volume will be found to contain many additional pieces and extra stanzas, nowhere else published or included in Poe's works. Such verses have been gathered from printed or manuscript sources during a research extending over many years.

In addition to the new poetical matter included in this volume, attention should, also, be solicited on behalf of the

notes, which will be found to contain much matter, interesting both from biographical and bibliographical points of view.

To render this, the first annotated and complete edition of Poe's poetical works, uniform in bulk with other volumes of the series it appears in, it has been found advisable to publish with it Poe's one complete romance, the marvellous "NARRATIVE OF ARTHUR GORDON PYM."

JOHN H. INGRAM.

MEMOIR OF EDGAR ALLAN POE.

DURING the last few years every incident in the life of Edgar Poe has been subjected to microscopic investigation. The result has not been altogether satisfactory. On the one hand, envy and prejudice have magnified every blemish of his character into crime, whilst on the other, blind admiration would depict him as far "too good for human nature's daily food." Let us endeavour to judge him impartially, granting that he was as a mortal subject to the ordinary weaknesses of mortality, but that he was tempted sorely, treated badly, and suffered deeply.

The poet's ancestry and parentage are chiefly interesting as explaining some of the complexities of his character. His father, David Poe, was of Anglo-Irish extraction. Educated for the Bar, he elected to abandon it for the stage. In one of his tours through the chief towns of the United States he met and married a young actress, Elizabeth Arnold, member of an English family distinguished for its musical talents. As an actress, Elizabeth Poe acquired some reputation, but became even better known for her domestic virtues. In those days, the United States afforded little scope for dramatic energy, so it is not surprising to find that when her husband died, after a few years of married life, the young widow had a vain struggle to maintain herself and three little ones, William Henry, Edgar, and Rosalie. Before her premature death, in December 1811, the poet's mother had been reduced to the dire necessity of living on the charity of her neighbours.

Edgar, the second child of David and Elizabeth Poe, was born at Boston, in the United States, on the 19th of January 1809. Upon his mother's death at Richmond, Virginia, Edgar was adopted by a wealthy Scotch merchant, John Allan. Mr. Allan, who had married an American lady and settled in Virginia, was childless. He therefore took naturally to the brilliant and beautiful little boy, treated him as his son, and made him take his own surname. Edgar Allan, as he was now styled, after some elementary tuition in Richmond, was taken to England by his adoptive parents, and, in 1816, placed at the Manor House School, Stoke-Newington.

Under the Rev. Dr. Bransby, the future poet spent a lustrum of his life neither unprofitably nor, apparently, ungenially. Dr. Bransby, who is himself so quaintly portrayed in Poe's tale of *William Wilson*, described "Edgar Allan," by which name only he knew the lad, as "a quick and clever boy," who "would have been a very good boy had he not been spoilt by his parents," meaning, of course, the Allans. They "allowed him an extravagant amount of pocket-money, which enabled him to get into all manner of mischief. Still I liked the boy," added the tutor, "but, poor fellow, his parents spoiled him."

Poe has described some aspects of his school days in his oft-cited story of *William Wilson*. Probably there is the usual amount of poetic exaggeration in these reminiscences, but they are almost the only record we have of that portion of his career and, therefore, apart from their literary merits, are on that account deeply interesting. The description of the sleepy old London suburb, as it was in those days, is remarkably accurate, but the revisions which the story of *William Wilson* went through before it reached its present perfect state caused many of the author's details to deviate widely from their original correctness. His schoolhouse in the earliest draft was truthfully described as an "old, irregular, and cottage-built" dwelling, and so it remained until its destruction a few years ago.

The *semi-distant* William Wilson, referring to those bygone happy days spent in the English academy, says, "The teaming

Brain of childhood required no external world of incident to occupy or amuse it. The morning's awakening, the nightly summons to bed; the connings, the recitations, the periodical half-holidays and perambulations, the playground, with its broils, its pastimes, its intrigues—these, by a mental sorcery long forgotten, were made to involve a wilderness of sensation, a world of rich incident, a universe of varied emotion, of excitement the most passionate and spirit-stirring, ‘*Oh, le bon temps, que ce siècle de fer!*’”

From this world of boyish imagination Poe was called to his adoptive parents' home in the United States. He returned to America in 1821, and was speedily placed in an academy in Richmond, Virginia, in which city the Allans continued to reside. Already well grounded in the elementary processes of education, not without reputation on account of his European residence, handsome, proud, and regarded as the heir of a wealthy man, Poe must have been looked up to with no little respect by his fellow pupils. He speedily made himself a prominent position in the school, not only by his classical attainments, but by his athletic feats—accomplishments calculated to render him a leader among lads.

“In the simple school athletics of those days, when a gymnasium had not been heard of he was *faute princeps*,” is the reminiscence of his fellow pupil, Colonel T. L. Preston. Poe he remembers as “a swift runner, a wonderful leaper, and, what was more rare, a boxer, with some slight training. . . . He would allow the strongest boy in the school to strike him with full force in the chest. He taught me the secret, and I imitated him, after my measure. It was to inflate the lungs to the uttermost, and at the moment of receiving the blow to exhale the air. It looked surprising, and was, indeed, a little rough; but with a good breast-bone, and some resolution, it was not difficult to stand it. For swimming he was noted, being in many of his athletic proclivities surprisingly like Byron in his youth.”

In one of his feats Poe only came off second best. “A to a foot race” says Colonel Preston. “had been

passed between the two classical schools of the city; we selected Poe as our champion. The race came off one bright May morning at sunrise, in the Capitol Square. Historical truth compels me to add that on this occasion our school was beaten, and we had to pay up our small bets. Poe ran well, but his competitor was a long-legged, Indian-looking fellow, who would have outstripped Atalanta without the help of the golden apples."

"In our Latin exercises in school," continues the colonel, "Poe was among the first—not first without dispute. We had competitors who fairly disputed the palm, especially one, Nat Howard, afterwards known as one of the ripest scholars in Virginia, and distinguished also as a profound lawyer. If Howard was less brilliant than Poe, he was far more studious; for even then the germs of waywardness were developing in the nascent poet, and even then no inconsiderable portion of his time was given to versifying. But if I put Howard as a Latinist on a level with Poe, I do him full justice."

"Poe," says the colonel, "was very fond of the Odes of Horace, and repeated them so often in my hearing that I learned by sound the words of many before I understood their meaning. In the lilting rhythm of the Sapphics and Iambics, his ear, as yet untutored in more complicated harmonies, took special delight. Two odes, in particular, have been humming in my ear all my life since, set to the tune of his recitation:—

*'Jam satis tuis misis atque diræ
Grandioris misit Pater, et rubente,'*

And

*'Non ibi neque aureum
Mea renidet in dono lacu ar,' etc.*

"I remember that Poe was also a very fine French scholar. Yet, with all his superiorities, he was not the master spirit nor even the favourite of the school. I assign, from my recollection, this place to Howard. Poe, as I recall my impressions now, was self-willed, capricious, inclined to be imperious, and, though of generous impulses, not steadily kind, nor even

amiable ; and so what he would exact was refused to him. I add another thing which had its influence, I am sure. At the time of which I speak, Richmond was one of the most aristocratic cities on this side of the Atlantic. . . A school is, of its nature, democratic ; but still boys will unconsciously bear about the odour of their fathers' notions, good or bad. Of Edgar Poe," who had then resumed his parental cognomen, "it was known that his parents had been players, and that he was dependent upon the bounty that is bestowed upon an adopted son. All this had the effect of making the boys decline his leadership ; and, on looking back on it since, I fancy it gave him a fierceness he would otherwise not have had."

This last paragraph of Colonel Preston's recollections casts a suggestive light upon the causes which rendered unhappy the lad's early life and tended to blight his prospective hopes. Although mixing with members of the best families of the province, and naturally endowed with hereditary and native pride, — fostered by the indulgence of wealth and the consciousness of intellectual superiority,—Edgar Poe was made to feel that his parentage was obscure, and that he himself was dependent upon the charity and caprice of an alien by blood. For many lads these things would have had but little meaning, but to one of Poe's proud temperament it must have been a source of constant torment, and all allusions to it gall and wormwood. And Mr. Allan was not the man to wean Poe from such festering fancies : as a rule he was proud of the handsome and talented boy, and indulged him in all that wealth could purchase, but at other times he treated him with contumely, and made him feel the bitterness of his position.

Still Poe did maintain his leading position among the scholars at that Virginian academy, and several still living have favoured us with reminiscences of him. His feats in swimming, to which Colonel Preston has alluded, are quite a feature of his youthful career. Colonel Mayo records one daring performance in natation which is thoroughly characteristic of the lad. One day in mid-winter, when standing on the

banks of the James River, Poe dashed his comrade into jumping in, in order to swim to a certain point with him. After floundering about in the nearly frozen stream for some time, they reached the piles upon which Mayo's Bridge was then supported, and there attempted to rest and try to gain the shore by climbing up the log abutment to the bridge. Upon reaching the bridge, however, they were dismayed to find that its plank flooring overlapped the abutment by several feet, and that it was impossible to ascend it. Nothing remained for them but to let go their slippery hold and swim back to the shore. Poe reached the bank in an exhausted and benumbed condition, whilst Mayo was rescued by a boat just as he was succumbing. On getting ashore Poe was seized with a violent attack of vomiting, and both lads were ill for several weeks.

Alluding to another quite famous swimming feat of his own, the poet remarked, "Any 'swimmer in the falls' in my days would have swum the Hellespont, and thought nothing of the matter. I swam from Ludlam's Wharf to Warwick (six miles), in a hot June sun, against one of the strongest tides ever known in the river. It would have been a feat comparatively easy to swim twenty miles in still water. I would not think much," Poe added in a strain of exaggeration not unusual with him, "of attempting to swim the British Channel from Dover to Calais." Colonel Mayo, who had tried to accompany him in this performance, had to stop on the way, and says that Poe, when he reached the goal, emerged from the water with neck, face, and back blistered. The facts of this feat, which was undertaken for a wager, having been questioned, Poe, ever intolerant of contradiction, obtained and published the affidavits of several gentlemen who had witnessed it. They also certified that Poe did not seem at all fatigued, and that he walked back to Richmond immediately after the performance.

The poet is generally remembered at this part of his career to have been slight in figure and person, but to have been well made, active, sinewy, and graceful. Despite the fact that he

was thus noted among his schoolfellows and indulged at home, he does not appear to have been in sympathy with his surroundings. Already dowered with the "hate of hate, the scorn of scorn," he appears to have made foes both among those who envied him and those whom, in the pride of intellectuality, he treated with pugnacious contempt. Beneath the haughty exterior, however, was a warm and passionate heart, which only needed circumstance to call forth an almost fanatical intensity of affection. A well-authenticated instance of this is thus related by Mrs. Whitman :—

"While at the academy in Richmond, he one day accompanied a schoolmate to his home, where he saw, for the first time, Mrs. Helen Stannard, the mother of his young friend. This lady, on entering the room, took his hands and spoke some gentle and gracious words of welcome, which so penetrated the sensitive heart of the orphan boy as to deprive him of the power of speech, and for a time almost of consciousness itself. He returned home in a dream, with but one thought, one hope in life—to hear again the sweet and gracious words that had made the desolate world so beautiful to him, and filled his lonely heart with the oppression of a new joy. This lady afterwards became the confidant of all his boyish sorrows, and hers was the one redeeming influence that saved and guided him in the earlier days of his turbulent and passionate youth."

When Edgar was unhappy at home, which, says his aunt, Mrs. Clemm, "was very often the case, he went to Mrs. Stannard for sympathy, for consolation, and for advice." Unfortunately, the sad fortune which so frequently thwarted his hopes ended this friendship. The lady was overwhelmed by a terrible calamity, and at the period when her guiding voice was most requisite, she fell a prey to mental alienation. She died, and was entombed in a neighbouring cemetery, but her poor boyish admirer could not endure to think of her lying lonely and forsaken in her vaulted home, so he would leave the house at night and visit her tomb. When the nights were drear, "when the autumnal rains fell," and the

winds wailed mournfully over the graves, he lingered longest, and came away most regrettfully."

The memory of this lady, of this "one idolatrous and purely ideal love" of his boyhood, was cherished to the last. The name of Helen frequently recurs in his youthful verses, "The Pæan," now first included in his poetical works, refers to her; and to her he inscribed the classic and exquisitely beautiful stanzas beginning "Helen, thy beauty is to me."

Another important item to be noted in this epoch of his life is that he was already a poet. Among his schoolfellows he appears to have acquired some little reputation as a writer of satirical verses; but of his poetry, of that which, as he declared, had been with him "not a purpose, but a passion," he probably preserved the secret, especially as we know that at his adoptive home poesy was a forbidden thing. As early as 1821 he appears to have essayed various pieces, and some of these were ultimately included in his first volume. With Poe poetry was a personal matter—a channel through which the turbulent passions of his heart found an outlet. With feelings such as were his, it came to pass, as a matter of course, that the youthful poet fell in love. His first affair of the heart is, doubtless, reminiscently portrayed in what he says of his boyish ideal, Byron. This passion, he remarks, "if passion it can properly be called, was of the most thoroughly romantic, shadowy, and imaginative character. It was born of the hour, and of the youthful necessity to love. It had no peculiar regard to the person, or to the character, or to the reciprocating affection. . . Any maiden, not immediately and positively repulsive," he deems would have suited the occasion of frequent and unrestricted intercourse with such an imaginative and poetic youth. "The result," he deems, "was not merely natural, or merely probable; it was as inevitable as destiny itself."

Between the lines may be read the history of his own love. "The Egeria of his dreams—the Venus Aphrodite that sprang in full and supernal loveliness from the bright foam upon the storm-tormented ocean of his thoughts," was a little girl,

Elmira Royster, who lived with her father in a house opposite to the Allans in Richmond. The young people met again and again, and the lady, who has only recently passed away, recalled Edgar as "a beautiful boy," passionately fond of music, enthusiastic and impulsive, but with prejudices already strongly developed. A certain amount of love-making took place between the young people, and Poe, with his usual passionate energy, ere he left home for the University had persuaded his fair innamorata to engage herself to him. Poe left home for the University of Virginia, Charlottesville, in the beginning of 1825. He wrote frequently to Miss Royster, but her father did not approve of the affair, and, so the story runs, intercepted the correspondence, until it ceased. At seventeen, Elmira became the bride of a Mr. Shelton, and it was not until some time afterwards that Poe discovered how it was his passionate appeals had failed to elicit any response from the object of his youthful affection.

Poe's short university career was in many respects a repetition of his course at the Richmond Academy. He became noted at Charlottesville both for his athletic feats and his scholastic successes. He entered as a student on February 1, 1826, and remained till the close of the second session in December of that year. "He entered the schools of ancient and modern languages, attending the lectures on Latin, Greek, French, Spanish, and Italian. I was a member of the last three classes," says Mr. William Wertenbaker, the recently deceased librarian, "and can testify that he was tolerably regular in his attendance, and a successful student, having obtained distinction at the final examination in Latin and French, and this was at that time the highest honour a student could obtain. The present regulations in regard to degrees had not then been adopted. Under existing regulations, he would have graduated in the two languages above-named, and have been entitled to diplomas."

These statements of Poe's classmate are confirmed by Dr. Harrison, chairman of the Faculty, who remarks that the poet was a great favourite with his fellow students, and was noted

for the remarkable rapidity with which he prepared his recitations and for their accuracy, his translations from the modern languages being especially noteworthy.

Several of Poe's classmates at Charlottesville have testified to his "noble qualities" and other good endowments, but they remember that his "disposition was rather retiring, and that he had few intimate associates." Mr. Thomas Bolling, one of his fellow-students who has favoured us with reminiscences of him, says : "I was acquainted with him, but that is about all. My impression was, and is, that no one could say that he knew him. He wore a melancholy face always, and even his smile—for I do not ever remember to have seen him laugh—seemed to be forced. When he engaged sometimes with others in athletic exercises, in which, so far as high or long jumping, I believe he excelled all the rest, Poe, with the same ever sad face, appeared to participate in what was amusement to the others more as a task than sport."

Poe had no little talent for drawing, and Mr. John Willis states that the walls of his college room were covered with his crayon sketches, whilst Mr. Bolling mentions, in connection with the poet's artistic facility, some interesting incidents. The two young men had purchased copies of a handsomely-illustrated edition of Byron's poems, and upon visiting Poe a few days after this purchase, Mr. Bolling found him engaged in copying one of the engravings with crayon upon his dormitory ceiling. He continued to amuse himself in this way from time to time until he had filled all the space in his room with life-size figures which, it is remembered by those who saw them, were highly ornamental and well executed.

As Mr. Bolling talked with his associate, Poe would continue to scribble away with his pencil, as if writing, and when his visitor jestingly remonstrated with him on his want of politeness, he replied that he had been all attention, and proved that he had by suitable comment, assigning as a reason for his apparent want of courtesy that he was trying to divide his mind; to carry on a conversation and write sensibly upon a totally different subject at the same time.

Mr. Wertenbaker, in his interesting reminiscences of the poet, says : "As librarian I had frequent official intercourse with Poe, but it was at or near the close of the session before I met him in the social circle. After spending an evening together at a private house he invited me, on our return, into his room. It was a cold night in December, and his fire having gone pretty nearly out, by the aid of some tallow candles, and the fragments of a small table which he broke up for the purpose, he soon rekindled it, and by its comfortable blaze I spent a very pleasant hour with him. On this occasion he spoke with regret of the large amount of money he had wasted, and of the debts he had contracted during the session. If my memory be not at fault, he estimated his indebtedness at \$2000 and, though they were gaming debts, he was earnest and emphatic in the declaration that he was bound by honour to pay them at the earliest opportunity."

This appears to have been Poe's last night at the university. He left it never to return, yet, short as was his sojourn there, he left behind him such honourable memories that his *alma mater* is now only too proud to enrol his name among her most respected sons. Poe's adoptive father, however, did not regard his *protégé's* collegiate career with equal pleasure : whatever view he may have entertained of the lad's scholastic successes, he resolutely refused to discharge the gambling debts which, like too many of his classmates, he had incurred. A violent altercation took place between Mr. Allan and the youth, and Poe hastily quitted the shelter of home to try and make his way in the world alone.

Taking with him such poems as he had ready, Poe made his way to Boston, and there looked up some of his mother's old theatrical friends. Whether he thought of adopting the stage as a profession, or whether he thought of getting their assistance towards helping him to put a drama of his own upon the stage,—that dream of all young authors,—is now unknown. He appears to have wandered about for some time, and by some means or the other succeeded in getting a little volume of poems printed "for private circulation only." This was

towards the end of 1827, when he was nearing nineteen. Doubtless Poe expected to dispose of his volume by subscription among his friends, but copies did not go off, and ultimately the book was suppressed, and the remainder of the edition, for "reasons of a private nature," destroyed.

What happened to the young poet, and how he contrived to exist for the next year or so, is a mystery still unsolved. It has always been believed that he found his way to Europe and met with some curious adventures there, and Poe himself certainly alleged that such was the case. Numbers of mythical stories have been invented to account for this chasm in the poet's life, and most of them self-evidently fabulous. In a recent biography of Poe an attempt had been made to prove that he enlisted in the army under an assumed name, and served for about eighteen months in the artillery in a highly creditable manner, receiving an honourable discharge at the instance of Mr. Allan. This account is plausible, but will need further explanation of its many discrepancies of dates, and verification of the different documents cited in proof of it, before the public can receive it as fact. So many fables have been published about Poe, and even many fictitious documents quoted, that it behoves the unprejudiced to be wary in accepting any new statements concerning him that are not thoroughly authenticated.

On the 28th February 1829 Mrs. Allan died, and with her death the final thread that had bound Poe to her husband was broken. The adopted son arrived too late to take a last farewell of her whose influence had given the Allan residence its only claim upon the poet's heart. A kind of truce was patched up over the grave of the deceased lady, but, for the future, Poe found that home was home no longer.

* Again the young man turned to poetry, not only as a solace but as a means of earning a livelihood. Again he printed a little volume of poems, which included his longest piece, "Al Aaraaf," and several others now deemed classic. The book was a great advance upon his previous collection, but failed to obtain any amount of public praise or personal profit for its author.

Feeling the difficulty of living by literature at the same

time that he saw he might have to rely largely upon his own exertions for a livelihood, Poe expressed a wish to enter the army. After no little difficulty a cadetship was obtained for him at the West Point Military Academy, a military school in many respects equal to the best in Europe for the education of officers for the army. At the time Poe entered the Academy it possessed anything but an attractive character, the discipline having been of the most severe character, and the accommodation in many respects unsuitable for growing lads.

The poet appears to have entered upon this new course of life with his usual enthusiasm, and for a time to have borne the rigid rules of the place with unusual steadiness. He entered the institution on the 1st July 1830, and by the following March had been expelled for determined disobedience. Whatever view may be taken of Poe's conduct upon this occasion, it must be seen that the expulsion from West Point was of his own seeking. Highly-coloured pictures have been drawn of his eccentric behaviour at the Academy, but the fact remains that he wilfully, or at any rate purposely, flung away his cadetship. It is surmised with plausibility that the second marriage of Mr. Allan, and his expressed intention of withdrawing his help and of not endowing or bequeathing this adopted son any of his property, was the mainspring of Poe's action. Believing it impossible to continue without aid in a profession so expensive as was a military life, he determined to relinquish it and return to his long-cherished attempt to become an author.

Expelled from the institution that afforded board and shelter, and discarded by his former protector, the unfortunate and penniless young man yet a third time attempted to get a start in the world of letters by means of a volume of poetry. If it be true, as alleged, that several of his brother cadets aided his efforts by subscribing for his little work, there is some possibility that a few dollars rewarded this latest venture. Whatever may have resulted from the alleged aid, it is certain that in a short time after leaving the Military Academy Poe was reduced to sad straits. He disappeared for nearly two

years from public notice, and how he lived during that period has never been satisfactorily explained. In 1833 he returns to history in the character of a winner of a hundred-dollar award offered by a newspaper for the best story.

The prize was unanimously adjudged to Poe by the adjudicators, and Mr. Kennedy, an author of some little repute, having become interested by the young man's evident genius, generously assisted him towards obtaining a livelihood by literary labour. Through his new friend's introduction to the proprietor of the *Southern Literary Messenger*, a moribund magazine published at irregular intervals, Poe became first a paid contributor, and eventually the editor of the publication, which ultimately he rendered one of the most respected and profitable periodicals of the day. This success was entirely due to the brilliancy and power of Poe's own contributions to the magazine.

In March 1834 Mr. Allan died, and if our poet had maintained any hopes of further assistance from him, all doubt was settled by the will, by which the whole property of the deceased was left to his second wife and her three sons. Poe was not named.

On the 6th May 1836 Poe, who now had nothing but his pen to trust to, married his cousin, Virginia Clemm, a child of only fourteen, and with her mother as housekeeper, started a home of his own. In the meantime his various writings in the *Messenger* began to attract attention, and to extend his reputation into literary circles, but beyond his editorial salary of about one hundred guineas (i.e. \$520) brought him no pecuniary reward.

In January 1837, for reasons never thoroughly explained, Poe severed his connection with the *Messenger*, and moved with all his household goods from Richmond to New York. Southern friends state that Poe was desirous of either being admitted into partnership with his employer, or of being allowed a larger share of the profits which his own labours procured. In New York his earnings seemed to have been small and irregular, his most important work ha-

lication from the *Messenger* in book form of his Defoe-like romance entitled *Arthur Gordon Pym*. The truthful air of "The Narrative," as well as its other merits, excited public curiosity both in England and America; but Poe's remuneration does not appear to have been proportionate to its success, nor did he receive anything from the numerous European editions the work rapidly passed through.

In 1838 Poe was induced by a literary friend to break up his New York home and remove with his wife and aunt (her mother) to Philadelphia. The Quaker city was at that time quite a hotbed for magazine projects, and among the many new periodicals Poe was enabled to earn some kind of a living. To Burton's *Gentleman's Magazine* for 1837 he had contributed a few articles, but in 1840 he arranged with its proprietor to take up the editorship. Poe had long sought to start a magazine of his own, and it was probably with a view to such an eventuality that one of his conditions for accepting the editorship of the *Gentleman's Magazine* was that his name should appear upon the title-page.

Poe worked hard at the *Gentleman's* for some time, contributing to its columns much of his best work; ultimately, however, he came to loggerheads with its proprietor, Burton, who disposed of the magazine to a Mr. Graham, a rival publisher. At this period Poe collected into two volumes, and got them published as *Tales of the Grotesque and Arabesques*, twenty-five of his stories, but he never received any remuneration, save a few copies of the volumes, for the work. For some time the poet strove most earnestly to start a magazine of his own, but all his efforts failed owing to his want of capital.

The purchaser of Burton's magazine, having amalgamated it, with another, issued the two under the title of *Graham's Magazine*. Poe became a contributor to the new venture, and in November of the year 1840 consented to assume the post of editor. Under Poe's management, assisted by the liberality of Mr. Graham, *Graham's Magazine* became a grand success. To its pages Poe contributed some of his finest and most popular tales, and attracted to the publication the pens of

many of the best contemporary authors. The public was not slow in showing its appreciation of the *pabulum* put before it, and, so its directors averred, in less than two years the circulation rose from five to fifty-two thousand copies.

A great deal of this success was due to Poe's weird and wonderful stories ; still more, perhaps, to his trenchant critiques and his startling theories anent cryptology. As regards the tales now issued in *Graham's*, attention may especially be drawn to the world-famed "Murders in the Rue Morgue," the first of a series—"une espèce de trilogie," as Baudelaire styles them—illustrative of an analytic phase of Poe's peculiar mind. This *trilogie* of tales, of which the later two were "The Purloined Letter" and "The Mystery of Marie Roget," was avowedly written to prove the capability of solving the puzzling riddles of life by identifying another person's mind by our own. By trying to follow the processes by which a person would reason out a certain thing, Poe propounded the theory that another person might ultimately arrive, as it were, at that person's conclusions, indeed, penetrate the innermost arcanum of his brain and read his most secret thoughts. Whilst the public was still pondering over the startling proposition, and enjoying perusal of its apparent proofs, Poe still further increased his popularity and drew attention to his works by putting forward the attractive but less dangerous theorem that "human ingenuity could not construct a cipher which human ingenuity could not solve."

This cryptographic assertion was made in connection with what the public deemed a challenge, and Poe was inundated with ciphers more or less abstruse, demanding solution. In the correspondence which ensued in *Graham's Magazine* and other publications, Poe was universally acknowledged to have proved his case, so far as his own personal ability to unriddle such mysteries was concerned. Although he had never offered to undertake such a task, he triumphantly solved every cryptogram sent to him, with one exception, and that exception he proved conclusively was only an imposture, for which no solution was possible.

The outcome of this exhaustive and unprofitable labour was the fascinating story of "The Gold Bug," a story in which the discovery of hidden treasure is brought about by the unriddling of an intricate cipher.

The year 1841 may be deemed the brightest of Poe's chequered career. On every side acknowledged to be a new and brilliant literary light, chief editor of a powerful magazine, admired, feared, and envied, with a reputation already spreading rapidly in Europe as well as in his native continent, the poet might well have hoped for prosperity and happiness. But dark cankers were gnawing his heart. His pecuniary position was still embarrassing. His writings, which were the result of slow and careful labour, were poorly paid, and his remuneration as joint editor of *Graham's* was small. He was not permitted to have undivided control, and but a slight share of the profits of the magazine he had rendered world-famous, whilst a fearful domestic calamity wrecked all his hopes, and caused him to resort to that refuge of the broken-hearted—to that drink which finally destroyed his prospects and his life.

Edgar Poe's own account of this terrible malady and its cause was made towards the end of his career. Its truth has never been disproved, and in its most important points it has been thoroughly substantiated. To a correspondent he writes in January 1848:—"You say, 'Can you *hint* to me what was "that terrible evil" which caused the "irregularities" so profoundly lamented?' Yes, I can do more than hint. This 'evil' was the greatest which can befall a man. Six years ago, a wife whom I loved as no man ever loved before, ruptured a blood-vessel in singing. Her life was despaired of. I took leave of her for ever, and underwent all the agonies of her death. She recovered partially, and I again hoped. At the end of a year, the vessel broke again. I went through precisely the same scene. . . . Then again—again—and even once again, at varying intervals. Each time I felt all the agonies of her death—and at each accession of the disorder I loved her more dearly, and clung to her life with more desperate pertinacity. But I am constitu-

tionally sensitive—nervous in a very unusual degree. I became insane, with long intervals of horrible sanity. During these fits of absolute unconsciousness, I drank—God only knows how often or how much. As a matter of course, my enemies referred the insanity to the drink, rather than the drink to the insanity. I had, indeed, nearly abandoned all hope of a permanent cure, when I found one in the *death* of my wife. This I can and do endure as becomes a man. It was the horrible never-ending oscillation between hope and despair which I could *not* longer have endured, without total loss of reason."

The poet at this period was residing in a small but elegant little home, superintended by his ever-faithful guardian, his wife's mother—his own aunt, Mrs. Clemm, the lady whom he so gratefully addressed in after years in the well-known sonnet, as "more than mother unto me." But a change came o'er the spirit of his dream! His severance from *Graham's*, owing to we know not what causes, took place, and his fragile schemes of happiness faded as fast as the sunset. His means melted away, and he became unfitted by mental trouble and ill-health to earn more. The terrible straits to which he and his unfortunate beloved ones were reduced may be comprehended after perusal of these words from Mr. A. B. Harris's reminiscences.

Referring to the poet's residence in Spring Gardens, Philadelphia, this writer says: "It was during their stay there that Mrs. Poe, while singing one evening, ruptured a blood-vessel, and after that she suffered a hundred deaths. She could not bear the slightest exposure, and needed the utmost care; and all those conveniences as to apartment and surroundings which are so important in the case of an invalid were almost matters of life and death to her. And yet the room where she lay for weeks, hardly able to breathe, except as she was fanned, was a little narrow place, with the ceiling so low over the narrow bed that her head almost touched it. But no one dared to speak, Mr. Poe was so sensitive and irritable; 'quick as steel and flint,' said one who knew him in those days. And he would not allow a word about the danger of her dying: the mention of it drove him wild."

Is it to be wondered at, should it not indeed be forgiven him, if, impelled by the anxieties and privations at home, the unfortunate poet, driven to the brink of madness, plunged still deeper into the Slough of Despond? Unable to provide for the pressing necessities of his beloved wife, the distracted man "would steal out of the house at night, and go off and wander about the streets for hours, proud, heartsick, despairing, not knowing which way to turn, or what to do, while Mrs. Clemm would endure the anxiety at home as long as she could, and then start off in search of him."

During his calmer moments Poe exerted all his efforts to proceed with his literary labours. He continued to contribute to *Graham's Magazine*, the proprietor of which periodical remained his friend to the end of his life, and also to some other leading publications of Philadelphia and New York. A suggestion having been made to him by N. P. Willis, of the latter city, he determined to once more wander back to it, as he found it impossible to live upon his literary earnings where he was.

Accordingly, about the middle of 1845, Poe removed to New York, and shortly afterwards was engaged by Willis and his partner Morris as sub-editor on the *Evening Mirror*. He was, says Willis, "employed by us for several months as critic and sub-editor. . . . He resided with his wife and mother at Fordham, a few miles out of town, but was at his desk in the office from nine in the morning till the evening paper went to press. With the highest admiration for his genius, and a willingness to let it alone for more than ordinary irregularity, we were led by common report to expect a very capricious attention to his duties, and occasionally a scene of violence and difficulty. Time went on, however, and he was invariably punctual and industrious. With his pale, beautiful, and intellectual face, as a reminder of what genius was in him, it was impossible, of course, not to treat him always with deferential courtesy. . . . With a prospect of taking the lead in another periodical, he at last voluntarily gave up his employment with us."

• A few weeks before Poe relinquished his laborious and ill-

paid work on the *Evening Mirror*, his marvellous poem of "The Raven" was published. The effect was magical. Never before, nor, indeed, ever since, has a single short poem produced such a great and immediate enthusiasm. It did more to render its author famous than all his other writings put together. It made him the literary lion of the season ; called into existence innumerable parodies ; was translated into various languages, and, indeed, created quite a literature of its own. Poe was naturally delighted with the success his poem had attained, and from time to time read it in his musical manner in public halls or at literary receptions. Nevertheless he affected to regard it as a work of art only, and wrote his essay entitled the "Philosophy of Composition," to prove that it was merely a mechanical production made in accordance with certain set rules.

Although our poet's reputation was now well established, he found it still a difficult matter to live by his pen. Even when in good health, he wrote slowly and with fastidious care, and when his work was done had great difficulty in getting publishers to accept it. Since his death it has been proved that many months often elapsed before he could get either his most admired poems or tales published.

Poe left the *Evening Mirror* in order to take part in the *Broadway Journal*, wherein he re-issued from time to time nearly the whole of his prose and poetry. Ultimately he acquired possession of this periodical, but, having no funds to carry it on, after a few months of heartbreaking labour he had to relinquish it. Exhausted in body and mind, the unfortunate man now retreated with his dying wife and her mother to a quaint little cottage at Fordham, outside New York. Here after a time the unfortunate household was reduced to the utmost need, not even having wherewith to purchase the necessities of life. At this dire moment, some friendly hand, much to the indignation and dismay of Poe himself, made an appeal to the public on behalf of the hapless family.

The appeal had the desired effect. Old friends and new came to the rescue, and, thanks to them, and especially to Mrs. Shew, the "Marie Louise" of Poe's later poems, his

wife's dying moments were soothed, and the poet's own immediate wants provided for. In January 1846 Virginia Poe died; and for some time after her death the poet remained in an apathetic stupor, and, indeed, it may be truly said that never again did his mental faculties appear to regain their former power.

For another year or so Poe lived quietly at Fordham, guarded by the watchful care of Mrs. Clemm,—writing little, but thinking out his philosophical prose poem of "Eureka," which he deemed the crowning work of his life. His life was as abstemious and regular as his means were small. Gradually, however, as intercourse with fellow literati re-aroused his dormant energies, he began to meditate a fresh start in the world. His old and never thoroughly abandoned project of starting a magazine of his own, for the enunciation of his own views on literature, now absorbed all his thoughts. In order to get the necessary funds for establishing his publication on a solid footing, he determined to give a series of lectures in various parts of the States.

His re-entry into public life only involved him in a series of misfortunes. At one time he was engaged to be married to Mrs. Whitman, a widow lady of considerable intellectual and literary attainments; but, after several incidents of a highly romantic character, the match was broken off. In 1849 Poe revisited the South, and, amid the scenes and friends of his early life, passed some not altogether unpleasing time. At Richmond, Virginia, he again met his first love, Elmira, now a wealthy widow, and, after a short renewed acquaintance, was once more engaged to marry her. But misfortune continued to dog his steps.

A publishing affair recalled him to New York. He left Richmond by boat for Baltimore, at which city he arrived on the 3rd October, and handed his trunk to a porter to carry to the train for Philadelphia. What now happened has never been clearly explained. Previous to starting on his journey, Poe had complained of indisposition,—of chilliness and of exhaustion,—and it is not improbable that an increase or con-

tinuance of these symptoms had tempted him to drink, or to resort to some of those narcotics he is known to have indulged in towards the close of his life. Whatever the cause of his delay, the consequences were fatal. Whilst in a state of temporary mania or insensibility, he fell into the hands of a band of ruffians who were scouring the streets in search of accomplices or victims. What followed is given on undoubted authority.

His captors carried the unfortunate poet into an electioneering den, where they drugged him with whisky. It was election day for a member of Congress, and Poe, with other victims, was dragged from polling station to station, and forced to vote the ticket placed in his hand. Incredible as it may appear, the superintending officials of those days registered the proffered vote, quite regardless of the condition of the person personifying a voter. The election over, the dying poet was left in the streets to perish, but, being found ere life was extinct, he was carried to the Washington University Hospital, where he expired on the 7th of October 1849, in the forty-first year of his age.

Edgar Poe was buried in the family grave of his grandfather, General Poe, in the presence of a few friends and relatives. On the 17th November 1875 his remains were removed from their first resting-place, and, in the presence of a large number of people, were placed under a marble monument subscribed for by some of his many admirers. His wife's body has recently been placed by his side.

The story of that "fitful fever" which constituted the life of Edgar Poe leaves upon the reader's mind the conviction that he was, indeed, truly typified by that—

"Unhappy master, whom unmerciful disaster
Followed fast and followed faster till his songs one burden bore—
Till the dirges of his hope that melancholy burden bore
Of 'Never—nevermore.'"

POEMS OF LATER LIFE.

TO

THE NOBLEST OF HER SEX—

TO THE AUTHOR OF

“THE DRAMA OF EXILE”—

TO

MISS ELIZABETH BARRETT BARRETT,
OF ENGLAND,

I DEDICATE THIS VOLUME

WITH THE MOST ENTHUSIASMIC ADMIRATION AND
WITH THE MOST SINCERE ESITLM.

1845.

E. A. P.

P R E F A C E.

THESE trifles are collected and republished chiefly with a view to their redemption from the many improvements to which they have been subjected while going at random the “rounds of the press.” I am naturally anxious that what I have written should circulate as I wrote it, if it circulate at all. In defence of my own taste, nevertheless, it is incumbent upon me to say that I think nothing in this volume of much value to the public, or very creditable to myself. Events not to be controlled have prevented me from making, at any time, any serious effort in what, under happier circumstances, would have been the field of my choice. With me poetry has been not a purpose, but a passion; and the passions should be held in reverence: they must not—they cannot at will be excited, with an eye to the paltry compensations, or the more paltry commendations, of mankind.

E. A. P.

THE RAVEN.

ONCE upon a midnight dreary, while I pondered, weak and weary,
 Over many a quaint and curious volume of forgotten lore—
 While I nodded, nearly napping, suddenly there came a tapping,
 As of some one gently rapping—lapping at my chamber door.
 “Tis some visitor,” I muttered, “lapping at my chamber door—
 Only this and nothing more.”

Ah, distinctly I remember, it was in the bleak December,
 And each separate dying ember wrought its ghost upon the floor.
 Eagerly I wished the morrow;—vainly I had sought to borrow
 From my books surcease of sorrow—sorrow for the lost
 Lenore—
 For the rare and radiant maiden whom the angels name
 Lenore—
 Nameless here for evermore.

And the silken sad uncertain rustling of each purple curtain
 Thrilled me—filled me with fantastic terrors never felt before;
 So that now, to still the beating of my heart, I stood repeating
 “Tis some visitor entreating entrance at my chamber door—
 Some late visitor entreating entrance at my chamber door;—
 This it is and nothing more.”

Presently my soul grew stronger; hesitating then no longer,
 “Sir,” said I, “or Madam truly your forgiveness I implore;
 But the fact is I was napping, and so gently you came rapping,
 And so faintly you orde tapping—lapping at my chamber
 door,
 That I scarce was s^r—I heard you^s—here I opened wide the
 door.—
 D^r—kness there and nothing more.

Deep into that darkness peering, long I stood there wondering,
 fearing,
 Doubting, dreaming dreams no mortal ever dared to dream
 before ;
 But the silence was unbroken, and the darkness gave no token,
 And the only word there spoken was the whispered word,
 "Lenore!"
 This I whispered, and an echo murmured back the word,
 "Lenore!"
 Merely this and nothing more.

Back into the chamber turning, all my soul within me burning,
 Soon I heard again a tapping, somewhat louder than before.
 "Surely," said I, "surely that is something at my window
 lattice ;
 Let me see, then, what thereat is, and this mystery explore—
 Let my heart be still a moment, and this mystery explore ;—
 'Tis the wind and nothing more."

Open here I flung the shutter, when, with many a flirt and
 flutter,
 In there stopped a stately Raven of the saintly days of yore ;
 Not the least obeisance made he ; not an instant stopped or
 stayed he ;
 But, with mien of lord or lady, perched above my chamber door—
 Perched upon a bust of Pallas just above my 'chamber door—
 Perched, and sat, and nothing more.

Then this ebony bird beguiling my sad fancy into smiling,
 By the grave and stern decorum of the countenance it wore,
 "Though thy crest be shorn and shaven, thou," I said, "art
 sure no craven,
 Ghastly grim and ancient Raven wandering from the Nightly
 shore—
 Tell me what thy lordly name is on the Night's Plutonian
 shore!"
 Quoth the Raven, "Nevermore."

Much I marvelled this ungainly fowl to hear discourse so plainly,

Though its answer little meaning—little relevancy bore ;
For we cannot help agreeing that no living human being
Ever yet was blessed with seeing bird above his chamber door—

Bird or beast upon the sculptured bust above his chamber door,

With such name as “Nevermore.”

But the Raven, sitting lonely on that placid bust, spoke only
That one word, as if his soul in that one word he did outpour.
Nothing further then he uttered—not a feather then he fluttered—

Till I scarcely more than muttered, “Other friends have flown before—

On the morrow *he* will leave me, as my hopes have flown before.”

Then the bird said, “Nevermore.”

Startled at the stillness broken by reply so aptly spoken,
“Doubtless,” said I, “what it utters is its only stock and store,

Caught from some unhappy master whom unmerciful Disaster Followed fast and followed faster till his songs one burden bore—

Till the dirges of his Hope the melancholy burden bore
Of ‘Never—nevermore.’”

But the Raven still beguiling all my sad soul into smiling,
Straight I wheeled a cushioned seat in front of bird and bust and door ;

Then, upon the velvet sinking, I betook myself to linking Fancy unto fancy, thinking what this ominous bird of yore—
What this grim, ungainly, ghastly, gaunt, and ominous bird of yore

“Meant in croaking “Nevermore.”

THE RAVEN.

This I sat engaged in guessing, but no syllable expressing
To the fowl whose fiery eyes now burned into my bosom's core;
This and more I sat divining, with my head at ease reclining
On the cushion's velvet lining that the lamp-light gloated o'er,
But whose velvet violet lining with the lamp-light gloating o'er,
 She shall press, ah, nevermore !

Then, methought, the air grew denser, perfumed from an
unseen censer

Swung by Seraphim whose foot-falls tinkled on the tufted floor.
“Wretch,” I cried, “thy God hath lent thee—by these angels
 he hath sent thee

Respite—respite and nepenthé from thy memories of Lenore !
Quaff, oh quaff this kind nepenthé, and forget this lost Lenore !”

Quoth the Raven, “Nevermore.”

“Prophet !” said I, “thing of evil!—prophet still, if bird or
devil !—

Whether Tempter sent, or whether tempest tossed thee here
 ashore,

Desolate yet all undaunted, on this desert land enchanted—
On this home by Horror haunted—tell me truly, I implore—
Is there—is there balm in Gilgal?—tell me—tell me, I im-
 plore !”

Quoth the Raven, “Nevermore.”

“Prophet !” said I, “thing of evil!—prophet still, if bird or
devil !

By that Heaven that bends above us—by that God we both
 adore—

Tell this soul with sorrow laden if, within the distant Aidenn,
It shall clasp a sainted maiden whom the angels name Lenore—
Clasp a rare and radiant maiden whom the angels name Lenore.”

Quoth the Raven, “Nevermore.”

“Be that word our sign of parting, bird or fiend !” I shrieked,
 upstarting—

"Get thee back into the tempest and the Night's Plutonian shore !
 Leave no black plume as a token of that lie thy soul hath spoken !
 Leave my loneliness unbroken !—quit the bust above my door !
 Take thy beak from out my heart, and take thy form from off my door !"

Quoth the Raven, "Nevermore."

And the Raven, never flitting, still is sitting, still is sitting
 On the pallid bust of Pallas just above my chamber door ;
 And his eyes have all the seeming of a demon's that is dreaming,
 And the lamp-light o'er him streaming throws his shadow on the floor ;
 And my soul from out that shadow that lies floating on the floor

Shall be lifted—nevermore !

Published, 1845.

THE BELLS.

HEAR the sledges with the bells—
 Silver bells !
 What a world of merriment their melody foretells !
 How they tinkle, tinkle, tinkle,
 In the icy air of night !
 While the stars, that oversprinkle
 All the heavens, seem to twinkle
 With a crystalline delight ;
 Keeping time, time, time,
 In a sort of Runic rhyme,
 To the tintinnabulation that so musically wells
 From the bells, bells, bells, bells,
 Bells, bells, bells—
 From the jingling and the tinkling of the bells.

THE BELLS.

• II.

Hear the mellow wedding bells,
Golden bells !
What a world of happiness their harmony foretells !
Through the balmy air of night
How they ring out their delight !
From the molten golden-notes,
And all in tune,
What a liquid ditty floats
To the turtle-love that listens, while she gloats
On the moon !

Oh, from out the sounding cells,
What a gush of euphony voluminously wells !
How it swells !
How it dwells
On the future ! how it tells
Of the rapture that impels
To the swinging and the ringing
Of the bells, bells, Bells,
Of the bells, bells, bells, bells,
Bells, bells, bells--
To the rhyming and the chiming of the bells !

III.

Hear the loud alarum bells—
Brazen bells !
What a tale of terror now their turbulency tells !
In the startled ear of night
How they scream out their affright !
Too much horrified to speak,
They can only shriek, shriek,
Out of tune,
In a clamorous appealing to the mercy of the fire,
In a mad expostulation with the deaf and frantic fire
Leaping higher, higher, higher,
With a desperate desire,

POEMS OF LATER LIFE.

And a resolute endeavour
Now—now to sit or never,
By the side of the pale-faced moon.
Oh, the bells, bells, bells !
What a tale their terror tells
Of Despair !
How they clang, and clash, and roar !
What a horror they outpour
On the bosom of the palpitating air !
Yet the ear it fully knows,
By the twanging,
And the clangling,
How the danger ebbs and flows ;
Yet the ear distinctly tells,
In the jangling,
And the wrangling,
How the danger sinks and swells,
By the sinking or the swelling in the anger of the bells—
Of the bells—
Of the bells, bells, bells, bells,
Bells, bells, bells—
In the clamour and the clangour of the bells !

IV.

Hear the tolling of the bells—
Iron bells !

What a world of solemn thought their monody compels !

In the silence of the night,
How we shiver with affright

At the melancholy menace of their tone !

For every sound that floats
From the rust within their throats

Is a groan.

And the people—ah, the people—
They that dwell up in the steeple,

All alone,

And who tolling, tolling, tolling,
In that muffled monotone,

Feel a glory in so rolling
On the human heart a stone—

They are neither man nor woman—
They are neither brute nor human—

They are Ghouls :

And their king it is who tolls ;
And he rolls, rolls, rolls,
Rolls

A paean from the bells !
And his merry bosom swells

With the paean of the bells !
And he dances, and he yells ;
Keeping time, time, time,
In a sort of Runic rhyme,

To the paean of the bells—
Of the bells :

Keeping time, time, time,
In a sort of Runic rhyme,
To the throbbing of the bells—
Of the bells, bells, bells—

To the sobbing of the bells ;
Keeping time, time, time,

As he knells, knells, knells,
In a happy Runic rhyme,

To the rolling of the bells—
Of the bells, bells, bells—
To the tolling of the bells,
Of the bells, bells, bells, bells,
Bells, bells, bells—

To the moaning and the groaning of the bells.

• •

ULALUME.

THE skies they were ashen and sober ;
 The leaves they were crisped and sere—
 The leaves they were withering and sere ;
 It was night in the lonesome October
 Of my most immemorial year ;
 It was hard by the dim lake of Auber,
 In the misty mid region of Weir—
 It was down by the dank tarn of Auber,
 In the ghoul-haunted woodland of Weir.

Here once, through an alley Titanic,
 Of cypress, I roamed with my Soul—
 Of cypress, with Psyche, my Soul.
 Those were days when my heart was volcanic
 As the scoriae rivers that roll—
 As the lavas that restlessly roll
 Their sulphurous currents down Yaanek
 In the ultimate climes of the pole—
 That groan as they roll down Mount Yaanek
 In the realms of the boreal pole.

Our talk had been serious and sober,
 But our thoughts they were palsied and sere—
 Our memories were treacherous and sere—
 For we knew not the month was October,
 And we marked not the night of the year—
 (Ah, night of all nights in the year !)
 We noted not the dim lake of Auber—
 (Though once we had journeyed down here)—
 Remembered not the dank tarn of Auber,
 Nor the ghoul-haunted woodland of Weir.

And now, as the night was senescent
 And star-dials pointed to morn—
 As the sun-dials hinted of morn—

At the end of our path a liquefiant
 And nebulous lustre was born,
 Out of which a miraculous crescent
 Arose with a duplicate horn—
 Astarte's bediamonded crescent
 Distinct with its duplicate horn.

And I said—"She is warmer than Dian :
 She rolls through an ether of sighs—
 She revels in a region of sighs :
 She has seen that the tears are not dry on
 These cheeks, where the worm never dies,
 And has come past the stars of the Lion
 To point us the path to the skies—
 To the Lethean peace of the skies—
 Come up, in despite of the Lion,
 To shine on us with her bright eyes—
 Come up through the lair of the Lion,
 With love in her luminous eyes.'

But Psyche, uplifting her finger,
 Said—" Sadly this star I mistrust—
 Her pallor I strangely mistrust :—
 Oh, hasten !—oh, let us not linger !
 Oh, fly !—let us fly !—for we must."
 In terror she spoke, letting sink her
 Wings till they trailed in the dust.—
 In agony sobbed, letting sink her
 Plumes till they trailed in the dust—
 Till they sorrowfully trailed in the dust.

I replied—"This is nothing but dreaming :
 Let us on by this tremulous light !
 Let us bathe in this crystalline light !
 Its Sibyllic splendour is beaming
 With Hope and in Beauty to-night :—
 See !—it flickers up the sky through the night !

Ah, we safely may trust to its gleaming,
 And be sure it will lead us aright—
 We safely may trust to a gleaming
 That cannot but guide us aright,
 Since it flickers up to Heaven through the night."

Thus I pacified Psycho and kissed her,
 And tempted her out of her gloom—
 And conquered her scruples and gloom ;
 And we passed to the end of a vista,
 But were stopped by the door of a tomb—
 By the door of a legended tomb ;
 And I said—"What is written, sweet sister,
 On the door of this legended tomb ?"
 She replied—"Ulalume—Ulalume—
 'Tis the vault of thy lost Ulalume!"

Then my heart it grew ashen and sober
 As the leaves that were crisped and sere—
 As the leaves that were withering and sere ;
 And I cried—"It was surely October
 On this very night of last year
 That I journeyed—I journeyed down here—
 That I brought a dread burden down here !
 On this night of all nights in the year,
 Ah, what demon has tempted me here ?
 Well I know, now, this dim lake of Auber—
 This misty mid region of Weir—
 Well I know, now, this dank tarn of Auber,—
 This ghoul-haunted woodland of Weir."

1847.

TO HELEN.

I SAW thee once—once only—years ago :
 I must not say *how* many—but *not* many.
 It was a July midnight; and from out
 A full-orbed moor, that, like thine own soul, soaring,

TO HELE;

Sought a precipitate pathway up through heaven,
There fell a silvery-silken veil of light,
With quietude, and sultriness and slumber,
Upon the upturn'd faces of a thousand
Roses that grew in an enchanted garden,
Where no wind dared to stir, unless on tiptoe—
Fell on the upturn'd faces of these roses
That gave out, in return for the love-light,
Their odorous souls in an ecstatic death —
Fell on the upturn'd faces of these roses
That smiled and died in this parterre, enchanted
By thee, and by the poetry of thy presence.

Clad all in white, upon a violet bank
I saw thee half-reclining ; while the moon
Fell on the upturn'd faces of the roses,
And on thine own, upturn'd—alas, in sorrow !

Was it not Fate, that, on this July midnight—
Was it not Fate (whose name is also Sorrow),
That bade me pause before that garden-gate,
To breathe the incense of those slumbering roses ?
No footstep stirred : the hated world all slept,
Save only thee and me—(O Heaven !—O God !
How my heart beats in coupling those two words !)
Save only thee and me. I paused—I looked—
And in an instant all things disappeared.
(Ah, bear in mind this garden was enchanted !)
The pearly lustre of the moon went out :
The mossy banks and the meandering paths,
The happy flowers and the repining trees,
Were seen no more : the very roses' odours
Died in the arms of the adoring airs.
All—all expired save thee—save less than thou :
Save only the divine light in thine eyes—
Save but the soul in thine uplifted eyes.
I saw but them—they were the world to me.

I saw but them—saw only them for hours—
 Saw only them until the moon went down.
 What wild heart-histories seemed to lie enwritten
 Upon those crystalline, celestial spheres !
 How dark a woe ! yet how sublime a hope !
 How silently serene a sea of pride !
 How daring an ambition ! yet how deep—
 How fathomless a capacity for love !

But now, at length, dear Dian sank from sight,
 Into a western couch of thunder-cloud ;
 And thou, a ghost, amid the utombing trees
 Didst glide away. *Only thine eyes remained.*
 They *would not go*—they never yet have gone.
 Lighting my lonely pathway home that night,
They have not left me (as my hopes have) since.
 They follow me—they lead me through the years.
 They are my ministers—yet I their slave.
 Their office is to illumine and enkindle—
 My duty, *to be saved* by their bright light,
 And purified in their electric fire,
 And sanctified in their elysian fire.
 They fill my soul with Beauty (which is Hope),
 And are far up in Heaven—the stars I kneel to
 In the sad, silent watches of my night ;
 While even in the meridian glare of day
 I see them still—two sweetly scintillant
 Venuses, unextinguished by the sun !

1848.

ANNABEL LEE.

IT was many and many a year ago,
 In a kingdom by the sea,
 That a maiden there lived whom you may know—
 By the name of ANNABEL LEE ;
 And, this maiden she lived with no other thought
 Than to love and be loved by me.

I was a child and *she* was a child,
In this kingdom by the sea :
But we loved with a love that was more than love—
I and my ANNABEL LEE ;
With a love that the winged seraphs of heaven
Coveted her and me.

And this was the reason that, long ago,
In this kingdom by the sea,
A wind blew out of a cloud, chilling
My beautiful ANNABEL LEE ;
So that her highborn kinsmen came
And bore her away from me,
To shut her up in a sepulchre
In this kingdom by the sea.

The angels, not half so happy in heaven,
Went envying her and me—
Yes !—that was the reason (as all men know,
In this kingdom by the sea)
That the wind came out of the cloud by night,
Chilling and killing my ANNABEL LEE.

But our love it was stronger by far than the love
Of those who were older than we—
Of many far wiser than we—
And neither the angels in heaven above,
Nor the demons down under the sea,
Can ever dissever my soul from the soul
Of the beautiful ANNABEL LEE

For the moon never beams without bringing me dreams
Of the beautiful ANNABEL LEE ;
And the stars never rise but I see the bright eyes
Of the beautiful ANNABEL LEE ;
And so, all the night-tide, I lie down by the side
Of my darling, my darling, my life and my bride,
In her sepulchre there by the sea—
In her tomb by the side of the sea.

A VALENTINE.

FOR her this rhyme is penned, whose luminous eyes,
 Brightly expressive as the twins of Leda,
 Shall find her own sweet name, that, nestling lies
 Upon the page, unwrapped from every reader.
 Search narrowly the lines!—they hold a treasure
 Divine—a talisman—an amulet
 That must be worn *at heart*. Search well the measure—
 The words—the syllables! Do not forget
 The trivialest point, or you may lose your labour!
 And yet there is in this no Gordian knot
 Which one might not undo without a sabre,
 If one could merely comprehend the plot.
 Enwritten upon the leaf where now are peering
 Eyes scintillating soul, there lie *perdus*
 Three eloquent words oft uttered in the hearing
 Of poets by poets—as the name is a poet's, too.
 Its letters, although naturally lying
 Like the knight Pinto—Mendez Ferdinand—
 Still form a synonym for Truth—Cease trying!
 You will not read the riddle, though you do the best you
 can do.

1846.

[To discover the names in this and the following poem, read the first letter of the first line in connection with the second letter of the second line, the third letter of the third line, the fourth, of the fourth and so on to the end.]

AN ENIGMA.

“Seldom we find,” says Solomon Don Dunce,
 “Half an idea in the profoundest sonnet.
 Through all the flimsy things we see at once
 •As easily as through a Naples bonnet—
 Trash of all trash!—how can a lady don it?

Yet heavier far than your Petrarchan stuff—
 Owl-downy nonsense that the faintest puff
 Twirls into trunk-paper the while you con it.”
 And, veritably, Sol is right enough.
 The general tuckermanities are arrant
 Bubbles—ephemeral and *so* transparent—
 But *this* is, now—you may depend upon it—
 Stable, opaque, immortal—all by dint
 Of the dear names that lie concealed within’t.

[See previous page.]

1847.

TO MY MOTHER.

BECAUSE I feel that, in the Heavens above,
 The angels, whispering to one another,
 Can find, among their burning terms of love,
 None so devotional as that of “Mother,”
 Therefore by that dear name I long have called you—
 You who are more than mother unto me,
 And fill my heart of hearts, where Death installed you,
 In setting my Virginia’s spirit free.
 My mother—my own mother, who died early,
 Was but the mother of myself; but you
 Are mother to the one I loved so dearly,
 And thus are dearer than the mother I knew
 By that infinity with which my wife
 Was dearer to my soul than its soul-life.

1849.

[The above was addressed to the poet’s mother-in-law, Mrs. Clemm.—ED.]

FOR ANNIE.

THANK Heaven! the crisis—
 The danger is past,
 And the lingering illness
 Is over at last—
 And the fever called “Living”
 Is conquered at last.

Sadly, I know,
 I am shorn of my strength,
 And no muscle I move
 As I lie at full length—
 But no matter!—I feel
 I am better at length.

And I rest so composedly,
 Now in my bed,
 That any beholder
 Might fancy me dead—
 Might start at beholding me,
 Thinking me dead.

The moaning and groaning,
 The sighing and sobbing,
 Are quieted now,
 With that horrible throbbin
 At heart :—ah, that horrible,
 Horrible throbbing!

The sickness—the nausea—
 The pitiless pain—
 Have ceased, with the fever
 That maddened my brain—
 With the fever called “Læ-ning”
 That burned in my brain.

And oh! of all tortures
That torture the worst
 Has abated—the terrible
 Torture of thirst,
 For the naphthaline river
 Of Passion accurst :—
 I have drank of a water
 That quenches all thirst :—

Of a water that flows,
With a lullaby sound,
From a spring but a very few
Feet under ground—
From a cavern not very far
Down under ground.

And ah ! let it never
Be foolishly said
That my room it is gloomy
And narrow my bed—
For man never slept
In a different bed ;
And, to *sleep*, you must slumber
In just such a bed.

My tantalised spirit
Here blandly reposes,
Forgetten, or never
Regretting its roses—
Its old agitations,
Of myrtles and roses :

For now, while so quietly
Lying, it fancies
A holier odour
About it, of pansies—
A rosemary odour,
Commingled with pansies—
With rue and the beautiful
Puritan pansies.

And so it lies happily,
Bathing in many
A dream of the truth
And the beauty of Annie—
Drowned in a bath
Of the tresses of Annie.

She tenderly kissed me,
 She fondly caressed,
 And then I fell gently
 To sleep on her breast—
 Deeply to sleep
 From the heaven of her breast.

When the light was extinguished,
 She covered me warm,
 And she prayed to the angels
 To keep me from harm—
 To the queen of the angels
 To shield me from harm.

And I lie so composedly,
 Now in my bed,
 (Knowing her love)
 That you fancy me dead—
 And I rest so contentedly,
 Now in my bed,
 (With her love at my breast)
 That you fancy me dead—
 That you shudder to look at me,
 Thinking me dead.

But my heart it is brighter
 Than all of the many
 Stars in the sky,
 For it sparkles with Annie—
 It glows with the light
 Of the love of my Annie—
 With the thought of the light
 Of the eyes of my Annie.

TO F—

BELoved ! amid the earnest woes
 That crowd around my earthly path—
 (Drear path, alas ! where grows
 Not even one lonely rose)—

My soul at least a solace hath
 In dreams of thee, and therein knows
 An Eden of bland repose.

And thus thy memory is to me
 Like some enchanted far-off isle
 In some tumultuous sea—
 Some ocean throbbing far and free
 With storm—but where meanwhile
 Serenest skies continually
 Just o'er that one bright island smile

1815.

TO FRANCES S. OSGOOD.

THOU wouldst be loved ?—then let thy heart
 From its present pathway part not ;
 Being everything which now thou art,
 • Be nothing which thou art not.
 So with the world thy gentle ways,
 Thy grace, thy more than beauty,
 Shall be an endless theme of praise,
 And love a simple duty.

1845.

ELDORADO.

GAILY bedight,
 A gallant knight,
 In sunshine and in shadow,
 Had journeyed long,
 Singing a song,
 In search of Eldorado.

But he grew old—
This knight so bold—
And o'er his heart a shadow
Fell as he found
No spot of ground
That looked like Eldorado.

And, as his strength
Failed him at length,
He met a pilgrim shadow—
“Shadow,” said he,
“Where can it be—
This land of Eldorado ?”

“Over the Mountains
Of the Moon,
Down the Valley of the Shadow,
Ride, boldly ride,”
The shade replied,
“If you seek for Eldorado !”

1849.

EULALIE.

I DWELT alone
In a world of moan,
And my soul was a stagnant tide,
Till the fair and gentle Eulalie became my blushing bride—
Till the yellow-haired young Eulalie became my smiling
bride.

Ah, less—less bright
The stars of the night
Than the eyes of the radiant girl !
And never a flake
That the vapour can make
With the moon-tints of purple and pearl,
Can vie with the modest Eulalie’s most unregarded curl—
Can compare with the bright-eyed Eulalie’s most humble and
careless curl,

Now Doubt—now Pain
 Come never again,
 For her soul gives me sigh for sigh,
 And all day long
 Shines, bright and strong,
 Astarté within the sky,
 While ever to her dear Eulalie upturns her matron eye—
 While ever to her young Eulalie upturns her violet eye

1845.

A DREAM WITHIN A DREAM.

TAKE this kiss upon the brow !
 And, in parting from you now,
 Thus much let me avow—
 You are not wrong, who deem
 That my days have been a dream :
 Yet if hope has flown away
 In a night, or in a day,
 In a vision, or in none,
 Is it therefore the less *gone* ?
 All that we see or seem
 Is but a dream within a dream.

I stand amid the roar
 Of a surf-tormented shore,
 And I hold within my hand
 Grains of the golden sand—
 How few ! yet how they creep
 Through my fingers to the deep,
 While I weep—while I weep !
 O God ! can I not grasp
 Them with a tighter clasp ?
 O God ! can I not save
 One from the pitiless wave ?
 Is all that we see or seem
 But a dream within a dream ?

1849.

TO MARIE LOUISE (SHEW).

Of all who hail thy presence as the morning—
 Of all to whom thine absence is the night—
 The blotting utterly from out high heaven
 The sacred sun—of all who, weeping, bless thee
 Hourly for hope—for life—ah, above all,
 For the resurrection of deep buried faith
 In truth, in virtue, in humanity—
 Of all who, on despair's unhallowe l bed
 Lying down to die, have suddenly arisen
 At thy soft-murmured words, “Let ther o be light !”
 At thy soft murmured words that were fulfilled
 In the seraphic glancing of thine eyes —
 Of all who owe thee most, whose gratitude
 Nearest resembles worship,—oh, remember
 The truest, the most fervently devoted,
 And think that these weak lines are written by him—
 By him who, as he pens them, thrills to think
 His spirit is communing with an angel's.

1847.

TO MARIE LOUISE (SHEW).

Not long ago, the writer of these lines.
 In the mad pride of intellectuality,
 Maintained “the power of words”—denied that ever
 A thought arose within the human brain
 Beyond the utterance of the human tongue :
 And now, as if in mockery of that boast,
 Two words—two foreign soft dissyllables—
 Italian tones, made only to be murmured
 By angels dreaming in the moonlit “dew
 That hangs like chains of pearl on Hermon hill,”—
 Have stirred from out the abysses of his heart,
 Untkought-like thoughts that are the souls of thought.

Richer, far wilder, far diviner visions
 Than even the seraph harper, Israfel,
 (Who has "the sweetest voice of all God's creatures,")
 Could hope to utter. And I ! my spells are broken.
 The pen falls powerless from my shivering hand.
 With thy dear name as text, though bidden by thee,
 I cannot write —I cannot speak or think—
 Alas, I cannot feel ; for 'tis not feeling,
 This standing motionless upon the golden
 Threshold of the wide-open gate of dreams,
 Gazing, entranced, adown the gorgeous vista,
 And thrilling as I . . . e, upon the right,
 Upon the left, and all the way along,
 Amid empurpled vapours, far away
 To where the prospect terminates—*thee only!*

1818.

THE CITY IN THE SEA.

Lo ! Death has reared himself a throne
 In a strange city lying alone
 Far down within the dim West,
 Where the good and the bad and the worst and the best
 Have gone to their eternal rest.
 There shrines and palaces and towers
 (Time-eaten towers that tremble not !)
 Resemble nothing that is ours.
 Around, by lifting winds forgot,
 Resignedly beneath the sky
 The melancholy waters lie.

No rays from the holy Heaven come down
 On the long night-time of that town ;
 But light from out the lurid sea
 Streams up the turrets silently—
 Gleams up the pinnacles far and free—
 Up domes—up spires—up kingly halls—
 Up fanes—up Babylon-like walls—

Up shadowy long-forgotten bowers
 Of sculptured ivy and stone flowers—
 Up many and many a marvellous shrine
 Whose wreathed friezes intertwine
 The viol, the violet, and the vine.

Resignedly beneath the sky
 The melancholy waters lie.
 So blend the turrets and shadows there
 That all seem pendulous in air,
 While from a proud tower in the town
 Death looks gigantically down.

There open fanes and gaping graves
 Yawn level with the luminous waves ;
 But not the riches there that lie
 In each idol's diamond eye—
 Not the gaily-jewelled dead
 Tempt the waters from their bed ;
 For no ripples curl, alas !
 Along that wilderness of glass—
 No swellings tell that winds may be
 Upon some far-off happier sea—
 No heavings hint that winds have been
 On seas less hideously serene.

But lo, a stir is in the air !
 The wave—there is a movement there !
 As if the towers had thrust aside,
 In slightly sinking, the dull tide—
 As if their tops had feebly given
 A void within the filmy Heaven.
 The waves have now a redder glow—
 The hours are breathing faint and low—
 And when, amid no earthly moans,
 Down, down that town shall settle hence,
 Hell, rising from a thousand thrones,
 Shall do it reverence.

THE SLEEPER.

AT midnight, in the month of June,
I stand beneath the mystic moon.
An opiate vapour, dewy, dim,
Exhales from out her golden rim,
And, softly dripping, drop by drop,
Upon the quiet mountain top,
Steals drowsily and musically
Into the universal valley.
The rosemary nods upon the grave ;
The lily lolls upon the wave ;
Wrapping the fog about its breast,
The ruin moulders into rest ;
Locking like Lethe, see ! the lake
A conscious slumber seems to take,
And would not, for the world, awake.
All Beauty sleeps !—and do ! where lies
(Her easement open to the skies)
Irene, with her Destinies !

Oh, lady bright ! can it be right—
This window open to the night ?
The wanton airs, from the tree-top,
Laughingly through the lattice drop—
The bodiless airs, a wizard rout,
Flit through thy chamber in and out,
And wave the curtain canopy
So fitfully—so fearfully—
Above the closed and fringed lid
'Neath which thy slumb'ring soul lies hid,
That, o'er the floor and down the wall,
Like ghosts the shadows rise and fall !
Oh, lady dear, hast thou no fear ?
Why and what art thou dreaming here ?

Sure thou art come o'er far-off seas,
 A wonder to these garden trees !
 Strange is thy pallor ! strange thy dress !
 Strange, above all, thy length of tress,
 And this all-solemn silentness ! .

The lady sleeps ! Oh, may her sleep,
 Which is enduring, so be deep !
 Heaven have her in its sacred keep !
 This chamber changed for one more holy,
 This bed for one more melancholy,
 I pray to God that she may lie
 For ever with unopened eye,
 While the dim sheeted ghosts go by !

My love, she sleeps ! Oh, may her sleep,
 As it is lasting, so be deep ;
 Soft may the worms about her creep !
 Far in the forest, dim and old,
 For her may some tall vault unfold—
 Some vault that oft hath flung its black
 And winged panels fluttering back,
 Triumphant, o'er the crested palls,
 Of her grand family funerals—
 Some sepulchre, remote, alone,
 Against whose portal she hath thrown,
 In childhood many an idle stone—
 Some tomb from out whose sounding door
 She ne'er shall force an echo more,
 Thrilling to think, poor child of sin !
 It was the dead who groaned within.

BRIDAL BALLAD.

THE ring is on my hand,
 And the wreath is on my brow ;
 Satins and jewels grand
 Are all at my command,
 And I am happy now.

And my lord he loves me well ;
 But, when first he breathed his vow,
 I felt my bosom swell—
 For the words rang as a knell,
 And the voice seemed *his* who fell
 In the battle down the dell,
 And who is happy now.

But he spoke to reassure me,
 And he kissed my pallid brow,
 While a reverie came o'er me,
 And to the churchyard bore me,
 And I sighed to him before me,
 Thinking him dead D'Elormie,
 “Oh, I am happy now !”

And thus the words were spoken,
 And thus the plighted vow,
 And, though my faith be broken,
 And, though my heart be broken,
 Behold the golden token
 That *proves* me happy now !

Would to God I could awaken !
 For I dream I know not how,
 And my soul is sorely shaken
 Lest an evil step be taken,—
 Lest the dead who is forsaken
 May not be happy now.

NOTES.

1. "The Raven" was first published on the 29th January 1845, in the New York *Evening Mirror*—a paper its author was then assistant editor of. It was prefaced by the following words, understood to have been written by N. P. Willis:—"We are permitted to copy (in advance of publication) from the second number of the *American Review*, the following remarkable poem by Edgar Poe. In our opinion, it is the most effective single example of 'fugitive poetry' ever published in this country, and unsurpassed in English poetry for subtle conception, masterly ingenuity of versification, and consistent sustaining of imaginative lift and 'pokerishness.' It is one of those 'dainties bled in a book' which we feed on. It will stick to the memory of everybody who reads it." In the February number of the *American Review* the poem was published as by "Quarles," and it was introduced by the following note, evidently suggested it not written by Poe himself.

* ["The following lines from a correspondent—besides the deep, quaint strain of the sentiment, and the curious introduction of some ludicrous touches amidst the serious and impressive, as was doubtless intended by the author—appears to us one of the most solicitous specimens of unique rhyming which has for some time met our eye. The resources of English rhythm for varieties of melody, measure, and sound, producing corresponding diversities of effect, have been thoroughly studied, much more perceived, by very few poets in the language. While the classic tongues, especially the Greek, possess, by power of accent, several advantages for versification over our own, chiefly through greater abundance of spondaic feet, we have other and very great advantages of sound by the modern usage of rhyme. Alliteration is nearly the only effect of that kind which the ancients had in common with us. It will be seen that much of the melody of 'The Raven' arises from alliteration, and the studious use of similar sounds in unusual places. In regard to its measure, it may be noted that if all the verses were like the second, they might properly be placed merely in short lines, producing a now uncommon form; but the presence in all the others of one line—mostly the second in the verse* (stanza !)—"which flows continuously, with only an aspirate pause in the middle, like that before the short line in the Sapphic Adonic, while the fifth has at the middle pause no similarity of sound with any part beside, gives the versification an entirely different effect. We could wish the capacities of our noble language in prosody were better understood."—Ed. *Am. Rev.*] .

2. The bibliographical history of "The Bells" is curious. The subject, and some lines of the original version, having been suggested by the poet's friend, Mrs. Shew, Poe, when he wrote out the first draft of the poem, headed it, "The Bells, By Mrs. M. A. Shew." This draft, now the editor's property, consists of only seventeen lines, and reads thus:—

The bells !—ah, the bells !
 The little silver bells !
 How fairy-like a melody there floats
 From their throats—
 From their merry little throats —
 From the silver, tinkling throats
 Of the belly, bells, bells—
 Of the bells !

II.

The bells !— ah, the bells !
 The heavy iron bells !
 How horrid a monody there floats
 From their throats
 From their deep-toned throats —
 From their melancholy throats !
 How I shudder at the notes
 Of the bells, bells, bells—
 Of the bells !

In the autumn of 1848 Poe added another line to this poem, and sent it to the editor of the *Union Magazine*. It was not published. So, in the following February, the poet forwarded to the same periodical a much enlarged and altered transcript. Three months having elapsed without publication, another revision of the poem, similar to the current version, was sent, and in the following October was published in the *Union Magazine*.

3. This poem was first published in Colton's *American Review* for December 1847, as "To — — Ulalume : a Ballad." Being reprinted immediately in the *Home Journal*, it was copied into various publications with the name of the editor, N. P. Willis, appended, and was ascribed to him. When first published, it contained the following additional stanza which Poe subsequently, at the suggestion of Mrs. Whitman, wisely suppressed :—

Said we then—the two, then—"Ah, can it
 Have been that the woodlandish ghouls—
 The pitiful, the merciful ghouls—
 To bar up our path and to ban it
 From the secret that lies in these wold—
 Had drawn up the spectre of a planet
 From the limbo of lunary souls—
 This sinfully scintillant planet
 From the Hell of the planetary souls ?"

4. "To Helen" (Mrs. S. Helen Whitman) was not published until November 1848, although written several months earlier. It first appeared in the *Union Magazine*, and with the omission, contrary to the knowledge or desire of Poe, of the line, "Oh, God! oh, Heaven—how my heart beats in coupling those two words."

5. "Annabel Lee" was written early in 1849, and is evidently an expression of the poet's undying love for his deceased bride, although at least one of his lady admirers deemed it a response to her admiration. Poe sent a copy of the ballad to the *Union Magazine*, in which publication it appeared in January 1850, three months after the author's death. Whilst suffering from "hope deferred" as to its fate, Poe presented a copy of "Annabel Lee" to the editor of the *Southern Literary Messenger*, who published it in the November number of his periodical, a month after Poe's death. In the meantime the poet's own copy, left among his papers, passed into the hands of the person engaged to edit his works, and he quoted the poem in an obituary of Poe, in the *New York Tribune*, before any one else had an opportunity of publishing it.

6. "A Valentine," one of three poems addressed to Mrs. Osgood, appears to have been written early in 1846.

7. "An Enigma," addressed to Mrs. Sarah Anna Lewis ("Stella"), was sent to that lady in a letter, in November 1847, and the following March appeared in Saltain's *Union Magazine*.

8. The sonnet, "To My Mother" (Maria Clemm), was sent for publication to the short-lived *Flag of our Union*, early in 1849, but does not appear to have been issued until after its author's death, when it appeared in the *Leaflets of Memory* for 1850.

9. "For Annie" was first published in the *Flag of our Union*, in the spring of 1849. Poe, annoyed at some misprints in this issue, shortly afterwards caused a corrected copy to be inserted in the *Home Journal*.

10. "To F——" (Frances Sergeant Osgood) appeared in the *Broadway Journal* for April 1845. These lines are but slightly varied from those inscribed "To Mary," in the *Southern Literary Messenger* for July 1835, and subsequently republished, with the two stanzas transposed, in *Graham's Magazine* for March 1842, as "To One Departed."

11. "To F—s S. O—d," a portion of the poet's tribute to Mrs. Osgood, was published in the *Broadway Journal* for September 1845. The earliest version of these lines appeared in the *Southern Literary Messenger* for September 1835, as "Lines written in an Album," and were addressed to Eliza White, the proprietor's daughter. Slightly revised, the poem reappeared in *Burton's Gentleman's Magazine* for August 1832, as "To ——."

12. Although "Eldorado" was published during Poe's lifetime, in 1849, in the *Flag of our Union*, it does not appear to have ever received the author's finishing touches.

NOTES.

33

12. "A Song" first appears in Colton's *American Review* for

"A Dream within a Dream" does not appear to have been published as a separate poem during its author's lifetime. A portion of it was contained, in 1829, in the piece beginning, "Should my early life seem," and in 1831 some few lines of it were used as a conclusion to "Tamerlane." In 1849 the poet sent a friend all but the first nine lines of the piece as a separate poem, headed "For Annie."

13. "To M—— L—— S——," addressed to Mrs. Marie Louise Shew, was written in February 1847, and published shortly afterwards. In the first posthumous collection of Poe's poems these lines were, for some reason, included in the "Poems written in Youth," and amongst those poems they have hitherto been included.

14. "To ———," a second piece addressed to Mrs. Shew, and written in 1848, was also first published, but in a somewhat faulty form, in the above-named posthumous collection.

17. Under the title of "The Doomed City" the initial version of "The City in the Sea" appeared in the 1831 volume of Poems by Poe: it reappeared as "The City of Sin," in the *Southern Literary Messenger* for August 1835, whilst the present draft of it first appeared in Colton's *American Review* for April 1845.

18. As "Irene," the earliest known version of "The Sleeper," appeared in the 1831 volume. It reappeared in the *Literary Messenger* for May 1836, and, in its present form, in the *Broadway Journal* for May 1845.

19. "The Bridal Ballad" is first discoverable in the *Southern Literary Messenger* for January 1837, and, in its present compressed and revised form, was reprinted in the *Broadway Journal* for August 1845.

POEMS OF MANHOOD.

LENORE.

AH, broken is the golden bowl ! the spirit flown for ever !
Let the bell toll !—a saintly soul floats on the Stygian river.
And, Guy de Vere, hast *thou* no tear ?—weep now or never
more !

See ! on you drear and rigid bier low lies thy love, Lenore !
Come ! let the burial rite be read—the funeral song be sung !—
An anthem for the queenliest dead that ever died so young—
A dirge for her, the doubly dead in that she died so young.

“ Wretches ! ye loved her for her wealth and hated her for
her pride,
And when she fell in feeble health, ye blessed her—that she
died !

How *shall* the ritual, then, be read ?—the requiem how be sung
By you—by yours, the evil eye,—by yours, the slanderous tongue
That did to death the innocence that died, and died so young ? ”

Peccamus : but rave not thus ! and let a Sabbath song
Go up to God so solemnly the dead may feel no wrong !
The sweet Lenore hath “ gone before,” with Hope, that flew
beside,
Leaving thee wild for the dear child that should have been
thy bride—
For her, the fair and *débonnaire*, that now so lowly lies,
The life upon her yellow hair but not within her eyes—
The life still there, upon her hair—the death upon her eyes.

“ Avaunt ! to-night my heart is light. No dirge will I upraise,
But waft the angel on her flight with a pean of old days !

Let no bell toll!—lest her sweet soul, amid its hallowed mirth,
Should catch the note, as it doth float up from the damned Earth.
To friends above, from fiends below, the indignant ghost is
 riven—

From Hell unto a high estate far up within the Heaven—
From grief and groan to a golden throne beside the King of
Heaven.”

1844.

TO ONE IN PARADISE.

THOU wast that all to me, love,
 For which my soul did pine—
A green isle in the sea, love,
 A fountain and a shrine,
All wreathed with fairy fruits and flowers,
 And all the flowers were mine.

Ah, dream too bright to last!
Ah, starry Hope! that didst arise
But to be overcast!

A voice from out the Future cries,
“On! on!”—but o'er the Past
(Dim gulf!) my spirit hovering lies
Mute, motionless, aghast!

For, alas! alas! with me
 The light of Life is o'er!
“No more—no more—no more”—
(Such language holds the solemn sea
 To the sands upon the shore)
Shall bloom the thunder-blasted tree,
 Or the stricken eagle soar!

And all my days are trances,
 And all my nightly dreams
Are where thy dark eye glances,
 And where thy footstep gleams—
In what ethereal dances,
 By what eternal streams!

Alas ! for that accursed time
 They bore thee o'er the billow,
 From love to titled age and crime,
 And an unholy pillow !—
 From me, and from our misty clime,
 Where weeps the silver willow !

1835

THE COLISEUM.

Type of the antique Rome ! Rich reliquary
 Of lofty contemplation left to Time
 By buried centuries of pomp and power !
 At length—at length—after so many days
 Of weary pilgrimage and burning thirst,
 (Thirst for the springs of love that in thee lie,) I kneel, an altered and an humble man,
 Amid thy shadows, and so drink within
 My very soul thy grandeur, gloom, and glory !

Vastness ! and Age ! and Memories of Eld !
 Silence ! and Desolation ! and dum Night !
 I feel ye now—I feel ye in your strength—
 O spells more sure than e'er Judean king,
 Taught in the gardens of Gethsemane !
 O charms more potent than the rapt Chaldee
 Ever drew down from out the quiet stars !

Here, where a hero fell, a column falls !
 Here, where the mimic eagle glared in gold,
 A midnight vigil holds the swarthy bat !
 Here, where the dames of Rome their gilded hair
 Waved to the wind, now wave the reed and thistle !
 Here, where on golden throne the monarch lolled,
 Glides, spectre-like, unto his marble home,
 Lit by the wan light of the horned moon,
 The swift and silent lizard of the stones !

But stay ! these walls—these ivy-clad arcades—
 These mouldering plinths—these sad and blackened shafts—
 These vague entablatures—this crumbling frieze—
 These shattered cornices—this wreck—this ruin—
 These stones—alas ! these grey stones—are they all—
 All of the famed, and the colossal left
 By the corrosive Hours to Fate and me !

“ Not all ”—the Echoes answer me—“ not all !
 “ Prophetic sounds and loud, arise for ever
 “ From us, and from all Ruin, unto the wise,
 “ As melody from Memnon to the Sun.
 “ We rule the hearts of mightiest men—we rule
 “ With a despotic sway all giant minds.
 “ We are not impotent—we pallid stones.
 “ Not all our power is gone—not all our fame—
 “ Not all the magic of our high renown—
 “ Not all the wonder that encircles us—
 “ Not all the mysteries that in us lie—
 “ Not all the memories that hang upon
 “ And cling around about us as a garment,
 “ Clothing us in a robe of more than glory.”

1889.

THE HAUNTED PALACE.

In the greenest of our valleys
 By good angels tenanted,
 Once a fair and stately palace—
 Radiant palace—reared its head.
 In the monarch Thought's dominion—
 It stood there !
 Never seraph spread a pinion
 Over fabric half so fair !

 Banners yellow, glorious, golden,
 On its roof did float and flow,

(This—all this—was in the olden
 Time long ago),
 And every gentle air that dallied,
 In that sweet day,
 Along the ramparts plumed and pallid,
 A winged odour went away.

Wanderers in that happy valley,
 Through two luminous windows, saw
 Spirits moving musically,
 To a lute's well-tuned law,
 Round about a throne where, sitting
 (Porphyrogenë !)
 In state his glory well befitting,
 The ruler of the realm was seen.

And all with pearl and ruby glowing
 Was the fair palace door,
 Through which came flowing, flowing, flowing,
 And sparkling evermore,
 A troop of Echoes, whose sweet duty
 Was but to sing,
 In voices of surpassing beauty,
 The wit and wisdom of their king.

But evil things, in robes of sorrow,
 Assailed the monarch's high estate.
 (Ah, let us mourn !—for never morrow
 Shall dawn upon him desolate !)
 And round about his home the glory
 That blushed and bloomed,
 Is but a dim-remembered story
 Of the old time entombed.

And travellers, now, within that valley,
 Through the red-litten windows see
 *Vast forms, that move fantastically
 To a discordant melody,

While, like a ghastly rapid river,
 Through the pale door
 A hideous throng rush out for ever
 And laugh—but smile no more.

1838.

THE CONQUEROR WORM.

Lo ! 'tis a gala night
 Within the lonesome latter years !
 An angel throng, bewinged, bedight
 In veils, and drowned in tears,
 Sit in a theatre, to see
 A play of hopes and fears,
 While the orchestra breathes fitfully
 The music of the spheres

Mimes, in the form of God on high,
 Mutter and murmur low,
 And hither and thither fly—
 Mere puppets they, who come and go
 At bidding of vast formless things
 That shift the scenery to and fro,
 Flapping from out their Condor wings
 Invisible Wo !

That motley drama—oh, be sure
 It shall not be forgot !
 With its Phantom chased for evermore,
 By a crowd that seize it not,
 Through a circle that ever returneth in
 To the self-same spot,
 And much of Madness, and more of Sin,
 And Horror the soul of the plot.

But see, amid the mimic rout
 A crawling shape intrude !
 A blood-red thing that writhes from out
 The scenic solitude !
 It writhes !—it writhes !—with mortal pangs
 The mimes become its food,
 And the angels sob at vermin fangs
 In human gore imbued.

Out—out are the lights—out all !
 And, over each quivering form,
 The curtain, a funeral pall,
 Comes down with the rush of a storm,
 And the angels, all pallid and wan,
 Uprising, unveiling, affirm
 That the play is the tragedy, “ Man,”
 And its hero the Conqueror Worm.

1838.

“ SILENCE.

THERE are some qualities—some incorporate things,
 That have a double life, which thus is made
 A type of that twin entity which springs
 From matter and light, evinced in solid and shade.
 There is a two fold Silence—sea and shore—
 Body and soul. One dwells in lonely places,
 Newly with grass o'ergrown ; some solemn graces,
 Some human memories and tearful lore,
 Render him terrorless : his name's “ No More.”
 He is the corporate Silence : dread him not !
 No power hath he of evil in himself ;
 But should some urgent fate (untimely lot !)
 Bring thee to meet his shadow (nameless elf,
 That haunteth the lone regions where hath trod
 No foot of man), commend thyself to God !

1840.

DREAMLAND.

By a route obscure and lonely,
 Haunted by ill angels only,
 Where an Eidolon, named NIGHT,
 On a black throne reigns upright,
 I have reached these lands but newly
 From an ultimate dim Thule—
 From a wild weird clime that lieth, sublime,
 Out of SPACE—out of TIME.

Bottomless vales and boundless floods,
 And chasms, and caves, and Titan woods,
 With forms that no man can discover
 For the dews that drip all over ;
 Mountains toppling evermore
 Into seas without a shore ;
 Seas that restlessly aspire,
 Surging, unto skies of fire ;
 Lakes that endlessly outspread
 Their lone waters—lone and dead,
 Their still waters—still and chilly
 With the snows of the lolling lily.

By the lakes that thus outspread
 Their lone waters, lone and dead,—
 Their sad waters, sad and chilly
 With the snows of the lolling lily,—
 By the mountains—near the river
 Murmuring lowly, murmuring ever,—
 By the grey woods,—by the swamp
 Where the toad and the newt encamp,—
 By the dismal tarns and pools
 Where dwell the Ghouls,—
 By each spot the most unholy—
 In each nook most melancholy,—

There the traveller meets aghast
 Sheeted Memories of the Past—
 Shrouded forms that start and sigh
 As they pass the wanderer by—
 White-robed forms of friends long given,
 In agony, to the Earth—and Heaven.

For the heart whose woes are legion
 'Tis a peaceful, soothing region—
 For the spirit that walks in shadow
 'Tis—oh, 'tis an Eldorado !
 But the traveller, travelling through it,
 May not—dare not openly view it ;
 Never its mysteries are exposed
 To the weak human eye unclosed ;
 So wills its King, who hath forbid
 The uplifting of the fringed lid ;
 And thus the sad Soul that here passes
 Beholds it but through darkened glasses.

By a route obscure and lonely,
 Haunted by ill angels only,
 Where an Eidolon, named NIGHT,
 On a black throne reigns upright,
 I have wandered home but newly
 From this ultimate dim Thule.

1844.

•

TO ZANTE.

FAIR isle, that from the fairest of all flowers,
 Thy gentlest of all gentle names dost take !
 How many memories of what radiant hours
 At sight of thee and thine at once awake !
 How many scenes of what departed bliss !
 How many thoughts of what entombed hopes !
 How many visions of a maiden that is
 No more—no more upon thy verdant slopes !

*No more ! alas, that magical sad sound
 Transforming all ! Thy charms shall please no more—
 Thy memory no more ! Accursed ground
 Henceforward I hold thy flower-enamelled shore,
 O hyacinthine isle ! O purple Zante !
 “Isola d’oro ! Fior di Levante !”*

1887.

HYMN.

AT morn—at noon—at twilight dim—
 Maria ! thou hast heard my hymn !
 In joy and wo—in good and ill—
 Mother of God, be with me still !
 When the Hours flew brightly by,
 And not a cloud obscured the sky,
 My soul, lest it should truant be,
 Thy grace did guide to thine and thee ;
 Now, when storms of Fate o’ercast
 Darkly my Present and my Past,
 Let my Future radiant shine
 With sweet hopes of thee and thine !

1835.

NOTES.

20. “Lenore” was published, very nearly in the

Pioneer for 1842, but under the title of “The Pa...

in the *POEMS OF YOUTH*—the germ of it appeared in 1831.

21. “To One in Paradise” was included originally in “The Visionary” (a tale now known as “The Assignation”), in July 1835, and appeared as a separate poem entitled “To Ianthe in Heaven,” in Burton’s *Gentleman’s Magazine* for July 1839. The fifth stanza is now added, for the first time, to the piece.

22. “The Coliseum” appeared in the Baltimore *Saturday Visitor* (sic) in 1833, and was republished in the *Southern Literary Messenger* for August 1835, as “A Prize Poem.”

23. “The Haunted Palace,” originally issued in the Baltimore

American Museum for April 1838, was subsequently embodied in that much admired tale, "The Fall of the House of Usher," and published in it in Burton's *Gentleman's Magazine* for September 1839. It reappeared in that as a separate poem in the 1845 edition of Poe's Poems.

24. "The Conqueror Worm," then contained in Poe's favourite tale of "Ligeia," was first published in the *American Museum* for September 1838. As a separate poem, it reappeared in *Graham's Magazine* for January 1843.

25. The sonnet, "Silence," was originally published in Burton's *Gentleman's Magazine* for April 1840.

26. The first known publication of "Dreamland" was in *Graham's Magazine* for June 1844.

27. The "Sonnet to Zante" is not discoverable earlier than January 1837, when it appeared in the *Southern Literary Messenger*.

28. The initial version of the "Catholic Hymn" was contained in the story of "Morella," and published in the *Southern Literary Messenger* for April 1835. The lines as they now stand, and with their present title, were first published in the *Broadway Journal* for August 1845.

SCENES FROM "POLITIAN."

AN UNPUBLISHED DRAMA.

I.

ROME.—A Hall in a Palace. ALESSANDRA and CASTIGLIONE.

Alessandra. Thou art sad, Castiglione.

Castiglione. Sad!—not I.

Oh, I'm the happiest, happiest man in Rome!
A few days more, thou knowest, my Alessandra,
Will make thee mine. Oh, I am very happy!

Aless. Methinks thou hast a singular way of showing
Thy happiness—what ails thee, cousin of mine?
Why didst thou sigh so deeply?

Cas. Did I sigh?

I was not conscious of it. It is a fashion,
A silly—a most silly fashion I have
When I am *very* happy. Did I sigh? *(sighing.)*

Aless. Thou didst. Thou art not well. Thou hast
indulged

Too much of late, and I am vexed to see it.
Late hours and wine, Castiglione,—these
Will ruin thee! thou art already altered—
Thy looks are haggard—nothing so wears away
The constitution as late hours and wine.

Cas. (musing). Nothing, fair cousin, nothing—not even
deep sorrow—

Wears it away like evil hours and wine.
I will amend.

Aless. Do it! I would have thee drop
Thy riotous company, too—fellows low born
Ill suit the like of old Di Broglio's heir
And Alessandra's husband.

Cas. I will drop them.

Aless. Thou wilt—thou must. Attend thou also more
To thy dress and equipage—they are over plain
For thy lofty rank and fashion—much depends
Upon appearances.

Cas. I'll see to it.

Aless. Then see to it!—pay more attention, sir,
To a becoming carriage—much thou wantest
In dignity.

Cas. Much, much, oh, much I want
In proper dignity.

Aless. (haughtily). Thou mockest me, sir!

Cas. (unسترctedly). Sweet, gentle Lalage!

Aless. Heard I aright!
I speak to him—he speaks of Lalage!
Sir Count! (*places her hand on his shoulder*) what art thou
dreaming? He's not well!

What ails thee, sir?

Cas. (starting). Cousin! fair cousin!—madam!
I crave thy pardon—in'deed I am not well—
Your hand from off my shoulder, if you please.
This air is most oppressive!—Madam—the Duke!

Enter Di Broglio.

Di Broglio. My son, I've news for thee!—hey?—what's
the matter? (*observing Alessandra*).
I the pouts? Kiss her, Castiglione! kiss her,
You dog! and make it up, I say, this minute!
I've news for you both. Politian is expected
Hourly in Rome—Politian, Earl of Leicester!
We'll have him at the wedding. 'Tis his first visit
To the imperial city.

Aless. What! Politian
Of Britain, Earl of Leicester?

Di Brog. The same, my love.
We'll have him at the wedding. A man quite young
In years, but grey in fame. I have not seen him,

But Rumour speaks of him as of a prodigy
Pre-eminent in arts, and arms, and wealth,
And high descent. We'll have him at the wedding.

Aless. I have heard much of this Politian.
Gay, volatile and giddy—is he not,
And little given to thinking?

Di Brog. Far from it, love.
No branch, they say, of all philosophy
So deep abstruse he has not mastered it.
Learned as few are learned.

Aless. 'Tis very strange!
I have known men have seen Politian
And sought his company. They speak of him
As of one who entered madly into life,
Drinking the cup of pleasure to the dregs.

Cas. Ridiculous! Now I have seen Politian
And know him well—nor learned nor mirthful he.
He is a dreamer, and a man shut out
From common passions.

Di Brog. Children, we disagree.
Let us go forth and taste the fragrant air
Of the garden. Did I dream, or did I hear
Politian was a *melancholy* man?

(*Ezeunt.*)

II.

ROME.—A Lady's Apartment, with a window open and looking into a garden. *LALAGE*, in deep mourning, reading at a table on which lie some books and a hand-mirror. In the background *JACINTA* (a servant maid) leans carelessly upon a chair.

Lalage. Jacinta! is it thou?
Jacinta (pertly). Yes, ma'am, I'm here.
Lal. I did not know, Jacinta, you were in waiting.
Sit down!—let not my presence trouble you—
Sit down!—for I am humble, most humble.

Jac. (aside). 'Tis time.

(*Jacinta seats herself in a side-long manner upon the chair, resting her elbows upon the back, and regarding*

her mistress with a contemptuous look. Lalage continues to read.)

Lal. "It in another climate, so he said,
"Bore a bright golden flower, but not i' this soil !"
(pauses—turns over some leares, and resumes.).
"No lingering winters there, nor snow, nor shower—
"But Ocean ever to refresh mankind
"Breathes the shrill spirit of the western wind."
Oh, beautiful!—most beautiful!—how like
To what my fevered soul doth dream of Heaven!
O happy land! (pauses) She died!—the maiden died!
O still more happy maiden who couldst die!
Jacinta!

(Jacinta returns no answer, and Lalage presently resumes.)
Again!—a similar tale
Told of a beauteous dame beyond the sea!
Thus speaketh one Ferdinand in the words of the play—
"She died full young"—one Bossola answers him—
"I think not so—her infelicity
"Seemed to have years too many"—Ah, luckless lady!
Jacinta! (still no answer).

Here's a far sterner story—
But like—oh, very like in its despair—
Of that Egyptian queen, winning so easily
A thousand hearts—losing at length her own.
She died. Thus endeth the history—and her maids
Lean over her and weep—two gentle maids
With gentle names—Eiros and Charmion!
Rainbow and Dove!—Jacinta!

Jac. (pettishly). Madam, what is it?

Lal. Wilt thou, my good Jacinta, be so kind
As go down in the library and bring me
The Holy Evangelists?

Jac. Pshaw!

(Exit.)

Lal. If there be balm
For the wounded spirit in Gilead, it is there!
Dew in the night time of my bitter trouble

Will there be found—"dew sweeter far than that
Which hangs like chains of pearl on Hermon hill."

(re-enter Jacinta, and *throws a volume on the table.*)
There, ma'am, 's the book. Indeed she is very trouble-
some. (aside.)

Lal. * (astonished). What didst thou say, Jacinta ?
Have I done aught

To grieve thee or to vex thee ?—I am sorry.
For thou hast served me long and ever been
Trustworthy and respectful. (*resumes her reading.*)

Jac. I can't believe
She has any more jewels—no—no—she gave me all. (*aside*)

Lal. What didst thou say, Jacinta ? Now I bethink me
Thou hast not spoken lately of thy wedding.
How fares good Ugo ?—and when is it to be ?
Can I do aught ?—is there no further aid
Thou needest, Jacinta ?

Jac. Is there no further aid !
That's meant for me. (*aside*) I'm sure, madam, you need not
Be always throwing those jewels in my teeth.

Lal. Jewels ! Jacinta,—now indeed, Jacinta,
I thought not of the jewels

Jac. Oh, perhaps not !
But then I might have sworn it. After all,
There's Ugo says the ring is only paste,
For he's sure the Count Castiglione never
Would have given a real diamond to such as you ;
And at the best I'm certain, madam, you cannot
Have use for jewels now. But I might have sworn it. (*Exit.*)

(*Lalage bursts into tears and leans her head upon the
table—after a short pause raises it*)

Lal. Poor Lalage !—and is it come to this ?
Thy servant maid !—but courage !—'tis but a viper
Whom thou hast cherished to sting thee to the soul !

(*taking up the n*
Ha ! here at least's a friend—too much a friend
In earlier days—a friend will not deceive thee.

Fair mirror and true ! now tell me (for thou canst)
 A tale—a pretty tale—and heed thou not
 Though it be rife with woe. It answers me.
 It speaks of sunken eyes, and wasted cheeks,
 And Beauty long deceased—remembers me,
 Of Joy departed—Hope, the Seraph Hope,
 Inurned and entombed !—now, in a tone
 Low, sad, and solemn, but most audible,
 Whispers of early grave untimely yawning
 For ruined maid. Fair mirror and true !—thou liest not !
Thou hast no end to gain—no heart to break—
Castiglione lied who said he loved—
Thou true—he false !—false !—false !

(*While she speaks, a monk enters her apartment and approaches unobserved.*)

Monk. Refuge thou hast,
 Sweet daughter ! in Heaven. Think of eternal things !
 Give up thy soul to penitence, and pray !
Lal. (*arising hurriedly.*) I cannot pray !—My soul is at
 war with God !
 The frightful sounds of merriment below
 Disturb my senses—go ! I cannot pray—
 The sweet airs from the garden worry me !
 Thy presence grieves me—go !—thy priestly raiment
 Fills me with dread—thy ebony crucifix
 With horror and awe !

Monk. Think of thy precious soul !
Lal. Think of my early days !—think of my father
 And mother in Heaven ! think of our quiet home,
 And the rivulet that ran before the door !
 Think of my little sisters !—think of them !
 And think of me !—think of my trusting love
 And confidence—his vows—my ruin—think—think
 Of my unspeakable misery !—begone !
 Yet stay ! yet stay !—what was it thou saidst of prayer
 And penitence ? Didst thou not speak of faith
 And vows before the throne ?

Monk. I did.

Lal. 'Tis well.

There is a vow 'twere fitting should be made—
A sacred vow, imperative and urgent,
A solemn vow !

Monk. Daughter, this zeal is well !

Lal. Father, this zeal is anything but well !

Hast thou a crucifix fit for this thing ?

A crucifix whereon to register

This sacred vow ? (*he hands her his own.*)

Not that—Oh ! no !—no !—no ! (*shuddering*)

Not that ! Not that !—I tell thee, holy man,

Thy raiments and thy ebony cross affright me !

Stand back ! I have a crucifix myself,—

I have a crucifix ! Methinks 'twere fitting

The deed—the vow—the symbol of the deed —

And the deed's register should tally, father !

(*draws a cross-handled dagger and raises it on high.*)

Behold the cross wherewith a vow like mine

Is written in Heaven !

Monk. Thy words are madness, daughter,
And speak a purpose unholy—thy lips are livid—
Thine eyes are wild—tempt not the wrath divine !
Pause ere too late !—oh, be not—be not rash !
Swear not the oath—oh, swear it not !

Lal. 'Tis sworn !

III.

An Apartment in a Palace. POLITIAN and BALDAZZAR.

Baldazzar. Arouse thee now, Politian !

Thou must not—nay indeed, indeed, thou shalt not
Give way unto these humours. Be thyself !
Shake off the idle fancies that beset thee,
And live, for now thou diest !

Politian. Not so, Baldazzar !

Surely I live.

Bal. Politian, it doth grieve me
To see thee thus!

Pol. Baldazzar, it doth grieve me
To give thee cause for grief, my honoured friend.
Command me, sir! what wouldst thou have me do?
At thy behest I will shake off that nature
Which from my forefathers I did inherit,
Which with my mother's milk I did imbibe,
And be no more Politian, but some other.
Command me, sir!

Bal. To the field then—to the field—
To the senate or the field.

Pol. Alas! alas!
There is an imp would follow me even there!
There is an imp *hath* followed me even there!
There is—what voice was that?

Bal. I heard it not.
I heard not any voice except thine own,
And the echo of thine own.

Pol. Then I but dreamed.
Bal. Give not thy soul to dreams: the camp—the court
Befit thee—Fame awaits thee—Glory calls—
And her the trumpet-tongued thou wilt not hear
In hearkening to imaginary sounds
And phantom voices.

Pol. It is a phantom voice!
Didst thou not hear it *then*?

Bal. I heard it not.
Pol. Thou heardst it not!—Baldazzar, speak no more
To me, Politian, of thy camps and courts.
Oh! I am sick, sick, sick, even unto death,
Of the hollow and high-sounding vanities
Of the populous Earth! Bear with me yet awhile!
We have been boys together—school-fellows—
And now are friends—yet shall not be so long—
For in the Eternal City thou shalt do me
A kind and gentle office, and a Power—

A Power august, benignant, and supreme—
Shall then absolve thee of all further duties,
Unto thy friend.

Bal. Thou speakest a fearful riddle
I will not understand.

Pol. Yet now as Fate
Approaches, and the Hours are breathing low,
The sands of Time are changed to golden grains,
And dazzle me, Baldazzar. Alas! alas!
I cannot die, having within my heart
So keen a relish for the beautiful
As hath been kindled within it. Methinks the air
Is balmier now than it was wont to be—
Rich melodies are floating in the winds—
A rarer loveliness bedecks the earth—
And with a holier lustre the quiet moon
Sitteth in Heaven.—Hist! hist! thou canst not say
Thou hearest not now, Baldazzar?

Bal. Indeed I hear not.

Pol. Not hear it!—listen now—listen!—the faintest
sound

And yet the sweetest that ear ever heard!
A lady's voice!—and sorrow in the tone!
Baldazzar, it oppresses me like a spell!
Again!—again!—how solemnly it falls
'Into my heart of hearts! that eloquent voice'
Surely I never heard—yet it were well
Had I but heard it with its thrilling tones
In earlier days!

Bal. I myself hear it now.

Be still!—the voice, if I mistake not greatly,
Proceeds from yonder lattice—which you may see
Very plainly through the window—it belongs,
Does it not? unto this palace of the Duke.
The singer is undoubtedly beneath
The roof of his Excellency—and perhaps
Is even that Alessandra of whom he spoke

As the betrothed of Castiglione,
His son and heir.

Pol. Be still!—it comes again!

Voice (very faintly). “And is thy heart so strong
As for to leave me thus,
That have loved thee so long,
In wealth and woe among?
And is thy heart so strong
As for to leave me thus?

Say nay! say nay!”¹

Bal. The song is English, and I oft have heard it
In merry England—never so plaintively—
Hist! hist! it comes again!

Voice (more loudly). “Is it so strong
As for to leave me thus,
That have loved thee so long,
In wealth and woe among?
And is thy heart so strong
As for to leave me thus?

Say nay! say nay!”

Bal. ’Tis hushed and all is still!

Pol. All is not still.

Bal. Let us go down.

Pol. Go down, Baldazzar, go!

Bal. The hour is growing late—the Duke awaits us,—
Thy presence is expected in the hall

Below. What ails thee, Earl Politian?

Voice (distinctly). “Who have loved thee so long,
In wealth and woe among,
And is thy heart so strong?

Say nay! say nay!”

Bal. Let us descend!—’tis time. Politian, give
These fancies to the wind. Remember, pray,
Your bearing lately savoured much of rudeness
Unto the Duke. Arouse thee! and remember!

¹ By Sir Thomas Wyatt.—ED.

Pol. Remember? I do. Lead on! I do remember
(going).

Let us descend. Believe me I would give,
Freely would give the broad lands of my earldom
To look upon the face hidden by yon lattice—
"To gaze upon that veiled face, and hear

* Once more that silent tongue."

Bal. Let me beg you, sir,
Descend with me—the Duke may be offended.
Let us go down, I pray you.

Voice (loudly). Say nay!—say nay!

Pol. (aside). 'Tis strange '—tis very strange—I methought
the voice

Chimed in with my desires and bade me stay!

(Approaching the window.)

Sweet voice! I heed thee, and will surely stay.
Now be this Fancy, by Heaven, or be it Fate,
Still will I not descend. Baldazzar, make
Apology unto the Duke for me;
I go not down to-night.

Bal. Your lordship's pleasure
Shall be attended to. Good-night, Politian.

Pol. Good-night, my friend, good-night.

IV.

The Gardens of a Palace—Moonlight. *LALAGE and POLITIAN.*

Lalage. And dost thou speak of love
To me, Politian?—dost thou speak of love
To Lalage?—ah woe—ah woe is me!
This mockery is most cruel—most cruel indeed!

Politian. Weep not! oh, sob not thus!—thy bitter tears
Will gadden me. Oh, mourn not, Lalage—
Be comforted! I know—I know it all,
And still I speak of love. Look at me, brightest,
And beautiful Lalage!—turn here thine eyes!
Thou askest me if I could speak of love,

Knowing what I know, and seeing what I have seen.
 Thou askest me that—and thus I answer thee—
 Thus on my bended knee I answer thee. (*kneeling.*)
Sweet Lalage, I love thee—love thee—love thee;
Thro' good and ill—tho' weal and woe, I love thee.
 Not mother, with her first-born on her knee,
 Thrills with intenser love than I for thee.
 Not on God's altar, in any time or clime,
 Burned there a holier fire than burneth now
 Within my spirit for thee. And do I love ? (*arising.*)
 Even for thy woes I love thee—even for thy woes—
 Thy beauty and thy woes.

Lal. Alas, proud Earl,
 Thou dost forget thyself, remembering me !
 How, in thy father's halls, among the maidens
 Pure and reproachless of thy princely line,
 Could the dishonoured Lalage abide ?
 Thy wife, and with a tainted memory—
 My seared and blighted name, how would it tally
 With the ancestral honours of thy house,
 And with thy glory ?

Pol. Speak not to me of glory !
 I hate—I loathe the name ; I do abhor
 The unsatisfactory and ideal thing.
 Art thou not Lalage, and I Politian ?
 Do I not love—art thou not beautiful—
 What need we more ? Ha ! glory ! now speak not of it :
 By all I hold most sacred and most solemn—
 By all my wishes now—my fears hereafter—
 By all I scorn on earth and hope in heaven—
 There is no deed I would more glory in,
 Than in thy cause to scoff at this same glory
 And trample it under foot. What matters it—
 What matters it, my fairest, and my best,
 That we go down unhonoured and forgotten
 Into the dust—so we descend together ?
 Descend together—and then—and then perchance

Lal. Why dost thou pause, Politian ?

Pol. And then perchance .

Arise together, Lalage, and roam
The starry and quiet dwellings of the blest,
And still—

Lal. Why dost thou pause, Politian ?

* *Pol.* And still *together—together.*

Lal. Now, Earl of Leicester !

Thou lovest me, and in my heart of hearts
I feel thou lovest me truly.

Pol. O Lalage ! *(thrusting himself upon his knee.)*

And lovest thou me ?

Lal. Hist ! hush ! within the gloom
 Of yonder trees methought a figure passed—
 A spectral figure, solemn, and slow, and noiseless—
 Like the grim shadow Conscience, solemn and noiseless.

(all's across and returns.)

I was mistaken—'twas but a giant bough
 Stirred by the autumn wind. Politian !

Pol. My Lalage—my love ! why art thou moved ?
 Why dost thou turn so pale ? Not Conscience' self,
 Far less a shadow which thou likonest to it,
 Should shake the firm spirit thus. But the night wind
 Is chilly—and these melancholy boughs
 Throw over all things a gloom.

Lal. Politian !
 Thou speakest to me of love. Knowest thou the land
 With which all tongues are busy—a land new found—
 Miraculously found by one of Genoa—
 A thousand leagues within the golden west ?
 A fairy land of flowers, and fruit, and sunshine,—
 And crystal lakes, and over-arching forests,
 And mountains, around whose towering summits the winds
 Of Heaven untrammelled flow—which air to breathe
 Is Happiness now, and will be Freedom hereafter
 In days that are to come ?

Pol. Oh, wilt thou—wilt thou

Fly to that Paradise—my Lalage, wilt thou
 Fly thither with me ? There Care shall be forgotten,
 And Sorrow shall be no more,⁴ and Eros be all.
 And life shall then be mine, for I will live
 For thee, and in thine eyes—and thou shalt be
 No more a mourner—but the radiant Joys
 Shall wait upon thee, and the angel Hope
 Attend thee ever ; and I will kneel to thee
 And worship thee, and call thee my beloved,
 My own, my beautiful, my love, my wife,
 My all ;—oh, wilt thou—wilt thou, Lalage,
 Fly thither with me ?

Lal. A deed is to be done—
 Castiglione lives !

Pol. And he shall die ! (Exit.)
Lal. (after a pause). And—he—shall—die !—
 Castiglione die ? Who spoke the words ?
 Where am I ?—what was it he said ?—Politian !
 Thou *art* not gone—thou art not *gone*, Politian !
 I *feel* thou art not gone—yet dare not look,
 Lest I behold thee not—thou *couldst* not go
 With those words upon thy lips—oh, speak to me !
 And let me hear thy voice—one word—one word,
 To say thou art not gone,—one little sentence,
 To say how thou dost scorn—how thou dost hate
 My womanly weakness. Ha ! ha ! thou *art* not gone—
 Oh, speak to me ! I *knew* thou wouldst not go !
 I knew thou wouldst not, couldst not, *durst* not go.
 Villain, thou *art* not gone—thou mockest me !
 And thus I clutch thee—thus !—He is gone, he is *gone*—
 Gone—gone. Where am I ?—'tis well—'tis very well !
 So that the blade be keen—the blow be sure,
 'Tis well, 'tis *very* well—alas ! alas !

V.

The Suburbs. POLITIAN alone. *

Politian. This weakness grows upon me. I am faint,

SCENES FROM "POLITIAN."

1

And much I fear me ill—it will not do
To die ere I have lived!—Stay—stay thy hand,
O Azrael, yet awhile!—Prince of the Powers
Of Darkness and the Tomb, oh, pity me!
Oh, pity me! let me not perish now,
In the budding of my Paradisal Hope!
Give me to live yet—yet a little while:
'Tis I who pray for life—I who so late
Demanded but to die!—What sayeth the Count?

Enter Baldazzar.

Baldazzar. That, knowing no cause of quarrel or of feud
Between the Earl Politian and himself,
He doth decline your cartel.

Pol. What didst thou say?
What answer was it you brought me, good Baldazzar?
With what excessive fragrance the zephyr comes
Laden from yonder bowers!—a fairer day,
Or one more worthy Italy, methinks
No mortal eyes have seen!—what said the Count?

Bal. That he, Castiglione, not being aware
Of any feud existing, or any cause
Of quarrel between your lordship and himself,
Cannot accept the challenge.

Pol. It is most true—
All this is very true. When saw you, sir,
When saw you now, Baldazzar, in the frigid
Ungenial Britain which we left so lately,
A heaven so calm as this—so utterly free
From the evil taint of clouds?—and he did say?

Bal. No more, my lord, than I have told you:
The Count Castiglione will not fight,
Having no cause for quarrel.

Pol. Now this is true—
All very true. Thou art my friend, Baldazzar,
And I have not forgotten it—thou'lt do me
A piece of service; wilt thou go back and say

Unto this man, that I, the Earl of Leicester,
 Hold him a villain ?—thus much, I pr'ythee, say
 Unto the Count—it is exceeding just
 He should have cause for quarrel.

Bal. My lord !—my friend !—

Pol. (aside). 'Tis he—he comes himself ! (aloud.) Thou
 reasonest well.

I know what thou wouldest say—not send the message—
 Well !—I will think of it—I will not send it.
 Now pr'ythee, leave me—hither doth come a person
 With whom affairs of a most private nature
 I would adjust.

Bal. I go—to-morrow we meet,
 Do we not ?—at the Vatican.

Pol. At the Vatican.

(*Exit Bal.*)

Enter Castiglione.

Cas. The Earl of Leicester here !

Pol. I am the Earl of Leicester, and thou seest,
 Dost thou not, that I am here ?

Cas. My lord, some strange,
 Some singular mistake—misunderstanding—
 Hath without doubt arisen : thou hast been urged
 Thereby, in heat of anger, to address
 Some words most unaccountable, in writing,
 To me, Castiglione ; the bearer being
 Balda/zar, Duke of Surrey. I am aware
 Of nothing which might warrant thee in this thing,
 Having given thee no offence. Ha !—am I right ?
 'Twas a mistake ?—undoubtedly—we all
 Do err at times.

Pol. Draw, villain, and prate no more !

Cas. Ha !—draw !—and villain ! have at thee then ~~then strike~~.
 Proud Earl ! (Draws.)

Pol. (drawing.) Thus to the expiatory tomb,
 Untimely sepulchre, I do devote thee
 In the name of Lalage !

Cas. (letting fall his sword and recoiling to the extremity of the stage.)

Of Lalage!

Hold off—thy sacred hand!—avaunt, I say!

Avaunt—I will not fight thee—indeed I dare not.

Pol. Thou wilt not fight with me didst say, Sir Count? Shall I be baffled thus?—now this is well,
Didst say thou darest not? Ha!

Cas. I dare not—dare not—

Hold off thy hand—with that beloved name

So fresh upon thy lips I will not fight thee—

I cannot—dare not

Pol. Now, by my halidom,
I do believe thee!—coward, I do believe thee!

Cas. Ha!—coward!—this may not be!

(clutches his sword and staggers toward, Politian, but his purpose is changed before reaching him, and he falls upon his knee at the feet of the Earl)

Alas! my lord,

It is—it is—most true In such a cause

I am the veriest coward Oh, pity me!

Pol. (greatly softened). Alas!—I do—indeed I pity thee.

Cas. And Lalage—

Pol. Scoundrel!—arise and die!

Cas. It needeth not be—thus—thus—Oh, let me die
Thus on my bended knee. It were most fitting

That in this deep humiliation I perish

For in the fight I will not raise a hand

Against thee, Earl of Leicester Strike thou home—

(baring his bosom.)

Here is no let or hindrance to thy weapon—

Strike home. I will not fight thee.

Pol. Now's Death and Hell!

Am I not—am I not sorely—grievously tempted

To take thee at thy word? But mark me, sir:

Think not to fly me thus. Do thou prepare

For public insult in the streets—before

The eyes of the citizens. I'll follow thee—
 Like an avenging spirit I'll follow thee
 Even unto death. Before those whom thou lovest—
 Before all Rome I'll taunt thee, villain,—I'll taunt thee,
 Dost hear ? with cowardice—thou *wilt not* fight me ?
 Thou liest ! thou *shalt* !

(Exit.)

Cas. Now this indeed is just !
 Most righteous, and most just, avenging Heaven !

NOTE

29. Such portions of "Politian" as are known to the public first saw the light of publicity in the *Southern Literary Messenger* for December 1835 and January 1836, being styled "Scenes from Politian : an unpublished drama." These scenes were included, unaltered, in the 1845 collection of Poems by Poe. The larger portion of the original draft subsequently became the property of the present editor, but it is not considered just to the poet's memory to publish it. The work is a hasty and unrevised production of its author's earlier days of literary labour ; and, beyond the scenes already known, scarcely calculated to enhance his reputation. As a specimen, however, of the parts unpublished, the following fragment from the first scene of Act II. may be offered. The Duke, it should be premised, is uncle to Alessandria, and father of Castiglione her betrothed.

Duke. Why do you laugh ?
Castiglione. Indeed
 I hardly know myself. Stay ! Was it not
 On yesterday we were speaking of the Earl ?
 Of the Earl Politian ? Yes ! it was yesterday.
 Alessandra, you and I, you must remember !
 We were walking in the garden.

Duke. Perfectly.
 I do remember it—what of it—what then ?

Cas. O nothing—nothing at all.

Duke. Nothing at all !
 It is most singular that you should laugh
 At nothing at all !

Cas. Most singular—singular !

Duke. Look you, Castiglione, be so kind
 As tell me, sir, at once what 'tis you mean.
 What are you talking of ?

Cas. Was it not so !
 We differed in opinion touching him.
Duke. Him !—Whom ?
Cas. Why, sir, the Earl Politian.
Duke. The Earl of Leicester ! Yes !—is it he you mean ?
 We differed, indeed. If I now recollect
 The words you used were that the Earl you knew
 Was neither learned nor mirthful.

Cas. Ha ! ha !—now did I ?
Duke. That did you, sir, and well I knew at the time
 You were wrong, it being not the character
 Of the Earl—whom all the world allows to be
 A most hilarious man. Be not, my son,
 Too positive again.

Cas. 'Tis singular !
 Most singular ! I could not think it possible
 So little time could so much alter one !
 To say the truth about an hour ago,
 As I was walking with the Count San Ozzo,
 All arm in arm, we met this very man
 The Earl—he, with his friend Baldazzar,
 Having just arrived in Rome. Ha ! ha ! he is altered !
 Such an account he gave me of his journey !
 'Twould have made you die with laughter such tales he told
 Of his caprices and his merry freaks
 Along the road—such oddity—such humour—
 Such wit—such whim—such flashes of wild merriment
 Set off too in such full relief by the grave
 Demeanour of his friend—who, to speak the truth,
 Was gravity itself—

Duke. Did I not tell you ?
Cas. You did—and yet 'tis strange ! but true as strange.
 How much I was mistaken ! I always thought
 The Earl a gloomy man.

Duke. So, so, you see !
 Be not too positive. Whom have we here ?
 It cannot be the Earl !

Cas. The Earl ! Oh no !
 'Tis not the Earl—but yet it is—and leaning
 Upon his friend Baldazzar. Ah ! welcome, sir !
 (*Enter Politian and Baldazzar.*)

My lord, a second welcome let me give you
 To Rome—his Grace the Duke of Broglio.
 Father! this is the Earl Politian, Earl

Of Leicester in Great Britain. [*Politian bows haughtily.*] That, his friend Baldazar, Duke of Surrey. The Earl has letters, So please you, for Your Grace.

Duke. Ha! ha! Most welcome To Rome and to our palace, Earl Politian! And you, most noble Duke! I am glad to see you! I knew your father well, my Lord Politian. Castighone! call your cousin hither, And let me make the noble Earl acquainted With your betrothed. You come, sir, at a time Most seasonable. The wedding—

Politian. Touching those letters, sir, Your son made mention of —your son, is he not? — Touching those letters, sir, I wot not of them. If such there be, my friend Baldazzar here— Baldazzar! ah! —my friend Baldazzar here Will hand them to Your Grace. I would retire.

Duke. Retire!—So soon?

Cas. What ho! Benito! Import! His lordship's chambers—show his lordship to them! His lordship is unwell. (*Enter Benito.*)

Ben. This way, my lord! (*Exit, followed by Politian.*)

Duke. Retire! Unwell!

Bal. So please you, gr. I fear me 'Tis as you say—his lordship is unwell. The damp air of the evening—the fatigue Of a long journey—the—indeed I had better Follow his lordship. He must be unwell. I will return anon.

Duke. Return anon! Now this is very strange! Castighone! This way, my son, I wish to speak with thee. You surely were mistaken in what you said Of the Earl, mirthful, indeed!—which of us said Politian was a melancholy man? (*Exeunt.*)

INTRODUCTION TO POEMS.—1831

LETTER TO MR. B—.

"W. & P. 1831.

"DEAR B—

Believing only a portion of my former volume to be worthy a second edition—that small portion I thought it as well to include in the present book as to republish by itself. I have therefore herein combined 'Al Aaraaf' and 'Tamerlane' with other poems hitherto unprinted. Nor have I hesitated to insert from the 'Minor Poems,' now omitted, whole lines, and even passages, to the end that being placed in a fairer light, and the trash shaken from them in which they were imbedded, they may have some chance of being seen by posterity.

"It has been said that a good critique on a poem may be written by one who is no poet himself. This, according to *your* idea and *mine* of poetry, I feel to be false—the less poetical the critic, the less just the critique, and the converse. On this account, and because there are but few B—s in the world, I would be as much ashamed of the world's good opinion as proud of your own. Another than yourself might here observe, 'Shakespeare is in possession of the world's good opinion, and yet Shakespeare is the greatest of poets. It appears then that the world judge correctly, why should you be ashamed of their favourable judgment?' The difficulty lies in the interpretation of the word 'judgment' or 'opinion.' The opinion is the world's, truly, but it may be called theirs as a man would call a book his, having bought it; he did not write the book, but it is his; they did not originate the opinion, but it is theirs. A fool, for example, thinks Shakespeare a great poet—yet the fool has never read Shakespeare.

But the fool's neighbour, who is a step higher on the Andes of the mind, whose head (that is to say, his more exalted thought) is too far above the fool to be seen or understood, but whose feet (by which I mean his every-day actions) are sufficiently near to be discerned, and by means of which that superiority is ascertained, which *but* for them would never have been discovered—this neighbour asserts that Shakespeare is a great poet—the fool believes him, and it is henceforward his *opinion*. This neighbour's own opinion has, in like manner, been adopted from one above *him*, and so, ascendingly, to a few gifted individuals who kneel around the summit, beholding, face to face, the master spirit who stands upon the pinnacle.

" You are aware of the great barrier in the path of an American writer. He is read, if at all, in preference to the combined and established wit of the world. I say established; for it is with literature as with law or empire—an established name is an estate in tenure, or a throne in possession. Besides, one might suppose that books, like their authors, improve by travel—their having crossed the sea is, with us, so great a distinction. Our antiquaries abandon time for distance; our very fops glance from the binding to the bottom of the title-page, where the mystic characters which spell London, Paris, or Genoa, are precisely so many letters of recommendation.

" I mentioned just now a vulgar error as regards criticism. I think the notion that no poet can form a correct estimate of his own writings is another. I remarked before that in proportion to the poetical talent would be the justice of a critique upon poetry. Therefore a bad poet would, I grant, make a false critique, and his self-love would infallibly bias his little judgment in his favour; but a poet, who is indeed a poet, could not, I think, fail of making a just critique; whatever should be deducted on the score of self-love might be replaced on account of his intimate acquaintance with the subject; in short, we have more instances of false criticism than of just where one's own writings are the test, simply because we have more bad poets than good. There are, of course, many objections to what I say: Milton is a great example of the contrary; but his opinion with respect to the 'Paradise Regained' is by no means fairly ascertained. By what trivial circumstances men are often led to assert what they do not really believe! Perhaps an inadvertent word has descended to posterity. But, in fact, the 'Paradise Regained' is little, if at all, inferior to the 'Paradise Lost,' and is *only*

supposed so to be because men do not like epics, whatever they may say to the contrary, and reading those of Milton in their natural order, are too much wearied with the first to derive any pleasure from the second.

"I dare say Milton preferred 'Comus' to either—if so—justly.

"As I am speaking of poetry, it will not be amiss to touch slightly upon the most singular heresy in its modern history—the heresy of what is called, very foolishly, the Lake School. Some years ago I might have been induced, by an occasion like the present, to attempt a formal refutation of their doctrine; at present it would be a work of supererogation. The wise must bow to the wisdom of such men as Coleridge and Southey, but being wise, have laughed at poetical theories so prosaically exemplified.

"Aristotle, with singular assurance, has declared poetry the most philosophical of all writings*—but it required a Wordsworth to pronounce it the most metaphysical. He seems to think that the end of poetry is, or should be, instruction; yet it is a truism that the end of our existence is happiness; if so, the end of every separate part of our existence, everything connected with our existence, should be still happiness. Therefore the end of instruction should be happiness; and happiness is another name for pleasure;—therefore the end of instruction should be pleasure: yet we see the above-mentioned opinion implies precisely the reverse.

"To proceed: *ceteris paribus*, he who pleases is of more importance to his fellow-men than he who instructs, since utility is happiness, and pleasure is the end already obtained which instruction is merely the means of obtaining.

"I see no reason, then, why our metaphysical poets should blame themselves so much on the utility of their works, unless indeed they refer to instruction with eternity in view; in which case, sincere respect for their piety would not allow me to express my contempt for their judgment; contempt which it would be difficult to conceal, since their writings are professedly to be understood by the few, and it is the many who stand in need of salvation. In such case I should no doubt be tempted to think of the devil in 'Melmoth,' who labours indefatigably, through three octavo volumes, to accomplish the destruction of one or two souls, while any common devil would have demolished one or two thousand.

* *

"Against the subtleties which would make poetry a—not a passion—it becomes the metaphysician to reason—but the poet to protest. Yet Wordsworth and Coleridge are men in years, the one imbued in contemplation from his childhood; the other a giant in intellect and learning. The diffidence, then, with which I venture to dispute their authority would be overwhelming did I not feel, from the bottom of my heart, that learning has little to do with the imagination—intellect with the passions—or age with poetry.

"Trifles, like straws, upon the surface flow;
He who would search for pearls must dive below,"

are lines which have done much mischief. As regards the greater truths, men oftener err by seeking them at the bottom than at the top; Truth lies in the huge abysses where wisdom is sought—not in the palpable palaces where she is found. The ancients were not always right in hiding the goddess in a well; witness the light which Bacon has thrown upon philosophy; witness the principles of our divine faith—that moral mechanism by which the simplicity of a child may overbalance the wisdom of a man.

"We see an instance of Coleridge's liability to err, in his *Biographia Literaria*—professedly his literary life and opinions, but, in fact, a treatise *de omni scibili et quibusdam aliis*. He goes wrong by reason of his very profundity, and of his error we have a natural type in the contemplation of a star. He who regards it directly and intensely sees, it is true, the star, but it is the star without a ray—while he who surveys it less inquisitively is conscious of all for which the star is useful to us below—its brilliancy and its beauty.

"As to Wordsworth, I have no faith in him. That he had in youth the feelings of a poet I believe—for there are glimpses of extreme delicacy in his writings—and delicacy is the poet's own kingdom—his *El Dorado*)—but they have the appearance of a better day recollect; and glimpses, at best, are little evidence of present poetic fire; we know that a few straggling flowers spring up daily in the crevices of the glacier.

"He was to blame in wearing away his youth in contemplation with the end of poetizing in his manhood. With the increase of his judgment the light which should appear has faded away. His judgment consequently correct. This may not be understood,—but the ~~one~~ ~~one~~ ~~one~~ German would have understood it who used to define

Matters of importance to their State twice, once when drunk, and once when sober—sober that they might not be deficient in formality—drunk lest they should be destitute of vigour.

The long wordy discussions by which he tries to reason us into admiration of his poetry, speak very little in his favour: they are full of such assertions as this (I have opened one of his volumes at random)—‘Of genius the only proof is the act of doing well what is worthy to be done, and what was never done before;’—indeed ? then it follows that in doing what is unworthy to be done, or what has been done before, no genius can be evinced ; yet the picking of pockets is an unworthy act, pockets have been picked time immemorial, and Barrington, the pick-pocket, in point of genius, would have thought hard of a comparison with William Wordsworth, the poet.

Again, in estimating the merit of certain poems, whether they be Ossian’s or Macpherson’s can surely be of little consequence, yet, in order to prove their worthlessness, Mr. W. has expended many pages in the controversy. *Tantene animis?* Can great minds descend to such absurdity ? But worse still : that he may bear down every argument in favour of these poems, he triumphantly drags forward a passage, in his abomination with which he expects the reader to sympathise. It is the beginning of the epic poem ‘Temora.’ ‘The blue waves of Ullin roll in light ; the green hills are covered with day ; trees shake their dusty heads in the breeze.’ And this —this gorgeous, yet simple imagery, where all is alive and panting with immortality—this, William Wordsworth, the author of ‘Peter Bell,’ has selected for his contempt. We shall see what better he, in his own person, has to offer. *Imprimis :*

“ ‘ And now she’s at the pony’s tail,
And now she’s at the pony’s head,
On that side now, and now on this ;
And, almost stifled with her bliss,
A few sad tears does Betty shed. . . .
She pats the pony, where or when
She knows not . . . happy Betty Foy !
Oh, Johnny, never mind the doctor !’

Secondly :

‘ The dew was falling fast, the—stars began to blink ;
I heard a voice : it said,—“Drink, pretty creature, drink !”
And, looking o’er the hedge, be—fore me I espied
A snow-white mountain lamb, with a—maiden at its gyde.
No other sheep was near,—the lamb was all alone,
And by a slender cord was—tether’d to a stone ’

"Now, we have no doubt this is all true : we *will* believe it, indeed we *will*, Mr. W. Is it sympathy for the sheep you wish to excite ? I love a sheep from the bottom of my heart.

"But there are occasions, dear B—, there are occasions when even Wordsworth is reasonable. Even Stamboul, it is said, shall have an end, and the most unlucky blunders must come to a conclusion. Here is an extract from his preface :

"Those who have been accustomed to the phraseology of modern writers, if they persist in reading this book to a conclusion (*impossible !*) will, no doubt, have to struggle with feelings of awkwardness ; (ha ! ha ! ha !) they will look round for poetry (ha ! ha ! ha ! ha !), and will be induced to inquire by what species of courtesy these attempts have been permitted to assume that title.' Ha ! ha ! ha ! ha ! ha !

"Yet, let not Mr. W. despair ; he has given immortality to a waggon, and the beo Sophocles has transmitted to eternity a sore toe, and dignified a tragedy with a chorus of turkeys.

"Of Coleridge, I cannot speak but with reverence. His towering intellect ! his gigantic power ! To use an author quoted by himself, '*J'ai trouvé souvent que la plupart des siècles ont raison dans une bonne partie de ce qu'elles avancent, mais non pas en ce qu'elles nient ;*' and to employ his own language, he has imprisoned his own conceptions by the barrier he has erected against those of others. It is lamentable to think that such a mind should be buried in metaphysics, and, like the Nyctanthes, waste its perfume upon the night alone. In reading that man's poetry, I tremble like one who stands upon a volcano, conscious from the very darkness bursting from the crater, of the fire and the light that are weltering below.

"What is Poetry !—Poetry ! that Proteus-like idea, with as many appellations as the nine-titled Coreyra ! 'Give me,' I demanded of a scholar some time ago, 'give me a definition of poetry.' '*Très-volontiers ;*' and he proceeded to his library, brought me a Dr. Johnson, and overwhelmed me with a definition. Shade of the immortal Shakespeare ! I imagine to myself the scowl of your spiritual eye upon the profanity of that scurrilous Ursa Major. Think of poetry, dear B—, think of poetry, and then think of Dr. Samuel Johnson ! 'Think of all that is airy and fairy-like, and then of all that is hideous and unwieldy ; think of his huge bulk, the Elephant ! and then—and then think of the 'Tempest'—the 'Midsummer Night's Dream'—Prospero—Oberon—and Titania !

"A poem, in my opinion, is opposed to a work of science

by having, for its *immediate* object, pleasure, not truth; to romance, by having, for its object, an *indefinite* instead of a *definite* pleasure, being a poorn only so far as this object is attained; romance presenting perceptible images with definite, poetry with *indefinite* sensations, to which end music is an *essential*, since the comprehension of sweet sound is our most indefinite conception. Music, when combined with a pleasurable idea, is poetry; music, without the idea, is simply music; the idea, without the music, is prose, from its very definitiveness.

"What was meant by the invective against him who had no music in his soul?

"To sum up this long rigmarole, I have, dear B—, what you, no doubt, perceive, for the metaphysical poets as poets, the most sovereign contempt. That they have followers proves nothing—

" ' No Indian prince has to his palace
More followers than a thief to the gallows ' "

POEMS WRITTEN IN YOUTH.

SONNET—TO SCIENCE.

SCIENCE ! true daughter of Old Time thou art !
Who alterest all things with thy peering eyes.
Why preyst thou thus upon the poet's heart,
Vulture, whose wings are dull realities ?
How should he love thee ? or how deem thee wise,
Who wouldst not leave him in his wandering
To seek for treasure in the jewelled skies,
Albeit he soared with an undaunted wing ?
Hast thou not dragged Diana from her car ?
And driven the Hamadryad from the wood
To seek a shelter in some happier star ?
Hast thou not torn the Naiad from her flood,
The Elfin from the green grass, and from me
The summer dream beneath the tamarind tree ?

1829.

Private reasons—some of which have reference to the sin of plagiarism, and others to the date of Tennyson's first poems *—have induced me, after some hesitation, to republish these, the crude compositions of my earliest boyhood. They are printed *verbatim*—without alteration from the original edition—the date of which is too remote to be judicially acknowledged.—E. A. P. (1845).

* This refers to the accusation brought against Edgar Poe that he was a copyist of Tennyson.—ED.

AL AARAAF.*

PART I.

O ! nothing earthly save the ray
 (Thrown back from flowers) of Beauty's eye,
 As in those gardens where the day
 Springs from the gems of Circassy—
 O ! nothing earthly save the thrill
 Of melody in woodland rill—
 Or (music of the passion-hearted)
 Joy's voice so peacefully departed
 That like the murmur in the shell,
 Its echo dwelleth and will dwell—
 O ! nothing of the dross of ours—
 Yet all the beauty—all the flowers
 That list our Love, and deck our bower—
 Adorn yon world afar, afar—
 The wandering star.

'Twas a sweet time for Nesace—for there
 Her world lay lolling on the golden air,
 Near four bright suns—a temporary rest—
 An oasis in desert of the blest.
 Away—away—'mid seas of rays that roll
 Empyrean splendour o'er th' unchained soul—
 The soul that scarce (the billows are so dense)
 Can struggle to its destin'd eminence—
 To distant spheres, from time to time, she rode,
 And late to ours, the favour'd one of God—
 But, now, the ruler of an anchor'd realm,
 She throws aside the sceptre—leaves the helm,
 And, amid incense and high spiritual hymns,
 Laves in quadruple light her angel limbs.

* A star was discovered by Tycho Brahe which appeared suddenly in the heavens—attained, in a few days, a brilliancy surpassing that of Juniper—then as suddenly disappeared, and has never been seen since.

Now happiest, loveliest in yon lovely Earth,
 Whence sprang the "Idea of Beauty" into birth,
 (Falling in wreaths thro' many a startled star,
 Like woman's hair 'mid pearls, until, afar,
 It lit on hills Achaian, and there dwelt),
 She look'd into Infinity—and knelt
 Rich clouds, for canopies, about her curled—
 Fit emblems of the model of her world—
 Seen but in beauty—not impeding sight—
 Of other beauty glittering thro' the light—
 A wreath that twined each starry form around,
 And all the opal'd air in colour bound.

All hurriedly she knelt upon a bed
 Of flowers : of lilies such as rear'd the head
 On the fair Capo Deucato,* and sprang
 So eagerly around about to hang
 Upon the flying footsteps of—deep pride—
 Of her who lov'd a mortal—and so died. †
 The Sephalica, budding with young bees,
 Uprear'd its purple stem around her knees :
 And genomy flower, of Trebizond misname'd—
 Inmate of highest stars, where erst it sham'd
 All other loveliness : its honied dew
 (The fabled nectar that the heathen knew)
 Deliriously sweet, was dropp'd from Heaven,
 And fell on gardens of the unforgiven
 In Trebizond—and on a sunny flower
 So like its own above that, to this hour,
 It still remaineth, torturing the bee
 With madness, and unwonted reverie :
 In Heaven, and all its environs, the leaf
 And blossom of the fairy plant, in grief
 Disconsolate linger—grief that hangs her head

* On Santa Maura—olim Deucadia.

† Sappho

‡ This flower is much noticed by Lewenhoeck and Tournefort. The bee, feeding upon its blossom, becomes intoxicated.

Repenting follies that full long have fled,
 Heaving her white breast, to the balmy air,
 Like guilty beauty, chaste'n'd, and more fair :
 Nyctanthes too, as sacred as the light
 She fears to perfume, perfuming the night :
 And Clytia * pondering between many a sun,
 While pettish tears adown her petals run :
 And that aspiring flower that sprang on Earth —
 And died, ere scarce exalted into birth,
 Bursting its odorous heart in spirit to wing
 Its way to Heaven, from garden of a king :
 And Valisnerian lotus thither flown †
 From struggling with the waters of the Rhone ·
 And thy most lovely purple perfume, Zante ! §
 Isola d'oro !—Fior di Levante !
 And the Nelumbo bud that floats for ever ||
 With Indian Cupid down the holy river—
 Fair flowers, and fairy ! to whose care is given
 To bear the Goddess' song, in odours, up to Heaven : ¶

* Clytia—the Chrysanthemum Peruvianum, or, to employ a better-known term, the turnsol—which turns continually towards the sun, covers itself, like Peru, the country from which it comes, with dewy clouds which cool and refresh its flowers during the most violent heat of the day.—*B. de St. Pierre.*

† There is cultivated in the king's garden at Fariq, a species of serpentine aloe without prickles, whose large and beautiful flower exhales a strong odour of the vanilla, during the time of its expansion, which is very short. It does not blow till towards the month of July—you then perceive it gradually open its petals—expand them—fade and die.—*St. Pierre.*

‡ There is found, in the Rhone, a beautiful lily of the Valisnerian kind. Its stem will stretch to the length of three or four feet—thus preserving its head above water in the swellings of the river.

§ The Hyacinth.

|| It is a fiction of the Indians, that Cupid was first seen floating in one of these down the river Ganges, and that he still loves the cradle of his childhood.

¶ And golden vials full of odours which are the prayers of the saints.
—*Rev. St. John.*

"Spirit! that dwellest where,
 In the deep sky,.
 The terrible and fair,
 In beauty vie!
 Beyond the line of blue—
 The boundary of the star
 Which turneth at the view
 Of thy barrier and thy bar—
 Of the barrier overgone
 By the comets who were cast
 From their pride, and from their throne
 To be drudges till the last—
 To be carriers of fire
 (The red fire of their heart)
 With speed that may not tire
 And with pain that shall not part—
 Who livest—that we know—
 In Eternity—we feel—
 But the shadow of whose brow
 What spirit shall reveal ?
 Tho' the beings whom thy Nesace,
 Thy messenger hath known
 Have dream'd for thy Infinity
 A model of their own—*

* The Humanitarians held that God was to be understood as having really a human form.—*Vide Clarke's Sermons*, vol. i, page 26, fol. edit.

The drift of Milton's argument leads him to employ language which would appear, at first sight, to verge upon their doctrine; but it will be seen immediately, that he guards himself against the charge of having adopted one of the most ignorant errors of the dark ages of the Church.—*Dr. Sumner's Notes on Milton's Christian Doctrine*.

This opinion, in spite of many testimonies to the contrary, could never have been very general. Andeus, a Syrian of Mesopotamia, was condemned for the opinion, as heretical. He lived in the beginning of the fourth century. His disciples were called Anthropomorphites.—*Vide Dr. Pin.*

Among Milton's minor poems are these lines :—

- Dicite sacrorum praesides nemorum Deæ, etc.,
- Quis ille primus cuius ex imagine

Thy will is done, O, God !
 The star hath ridden high
 Thro' many a tempest, but she rode
 Beneath thy burning eye ;
 And here, in thought, to thee—
 In thought that can alone
 Ascend thy empire and so be
 A partner of thy throne—
 By winged Fantasy.*
 My embassy is given,
 Till secrecy shall knowledge be
 In the environs of Heaven.”

She ceas'd—and buried then her burning cheek
 Abash'd, amid the lilies there, to seek
 A shelter from the fervour of His eye ;
 For the stars trembled at the Deity.

She stirr'd not—breath'd not—for a voice was there
 How solemnly pervading the calm air !

A sound of silence on the startled ear

* Which dreamy poets name “the music of the sphere.”

Ours is a world of words : Quiet we call

“Silence”—which is the merest word of all.

All Nature speaks, and ev'n ideal things

Flap shadowy sounds from visionary wings—

But ah ! not so when, thus, in realms on high

The eternal voice of God is passing by,

And the red winds are withering in the sky !

Natura solers fixxit humanum genus ?
 Eternus, incorruptus, aequus polo,
 Ususque et universus exemplar Dei.—And afterwards,
 Non sibi profundum Cæcitas lumen dedit
 Diræsus augur vidit hunc alto sinu, etc.

* Seltsamen Tochter Jovis
 Seinem Schosskinde
 * Der Phantasia. — Goethe.

"What tho' in worlds which sightless cycles run
 Link'd to a little system, and one sun—
 Where all my love is folly, and the crowd
 Still think my terrors but the thunder cloud,
 The storm, the earthquake, and the ocean-wrath—
 (Ah! will they cross me in my angrier path?)
 What tho' in worlds which own a single sun
 The sands of Time grow dimmer as they run,
 Yet thine is my resplendency, so given
 To bear my secrets thro' the upper Heaven.
 Leave tenantless thy crystal home, and fly,
 With all thy train, athwart the moony sky—
 Apart—like fire-flies in Sicilian night, †
 And wing to other worlds another light!
 Divulge the secrets of thy embassy
 To the proud orbs that twinkle—and so be
 To ev'ry heart a barrier and a ban
 Lest the stars totter in the guilt of man!"

Up rose the maiden in the yellow night,
 The single-mooned eve!—on Earth we plight
 Our faith to one love—and one moon adore—
 The birth-place of young Beauty had no more.
 As sprang that yellow star from downy hours,
 Up rose the maiden from her shrine of flowers,
 And bent o'er sheeny mountain and dim plain
 Her way—but left not yet her Therassian reign. ‡

PART II.

HIGH on a mountain of enamell'd head—
 Such as the drowsy shepherd on his bed

Sightless—too small to be seen.—*Leyde.*

† I have often noticed a peculiar movement of the fire-flies;—they will collect in a body and fly off, from a common centre, into innumerable radii.

‡ Therassea, or Therasea, the island mentioned by Seneca, which, in a moment, arose from the sea to the eyes of astonished mariners.

Of giant pasturage lying at his ease,
 Raising his heavy eyelid, starts and sees
 With many a mutter'd "hope to be forgiven"
 What time the moon is quadrated in Heaven—
 Of rosy head, that towering far away
 Into the sunlit ether, caught the ray
 Of sunken suns at eve—at noon of night,
 While the moon danc'd with the fair stranger light—
 Uprear'd upon such height arose a pile
 Of gorgeous columns on th' unburthen'd air,
 Flashing from Parian marble that twin smile
 Far down upon the wave that sparkled there,
 And nursed the young mountain in its lair.
 Of molten stars their pavement, such as fall *
 Thro' the eth'ral air, besilvering the pall
 Of their own dissolution, while they die—
 Adorning then the dwellings of the sky.
 A dome, by linked light from Heaven let down,
 Sat gently on these columns as a crown--
 A window of one circular diamond, there,
 Look'd out above into the purple air,
 And rays from God shot down that meteor
 chain
 And hallow'd all the beauty twice again,
 Save when, between th' Empyrean and that ring,
 Some eager spirit flapp'd his dusky wing.
 But on the pillars Seraph eyes have seen
 The dimness of this world : that greyish green
 That Nature loves the best for Beauty's grave
 Lurk'd in each cornice, round each architrave—
 And every sculptur'd cherub thereabout
 That from his marble dwelling peer'd out,
 Seem'd earthly in the shadow of his niche—
 Achaian statues in a world so rich ?

* Some star which, from the ruin'd roof
 Of shak'd Olympus, by mischance did fall.—Milton

Friezes from Tadmor and Persepolis—*
 From Balbec, and the stilly, clear abyss
 Of beautiful Gomorrah ! Oh, the wave †
 Is now upon thee—but too late to save !

Sound loves to revel in a summer night :
 Witness the murmur of the grey twilight
 That stole upon the ear, in Eyraco, ‡
 Of many a wild star-gazer long ago—
 That stealeth ever on the ear of him
 Who, musing, gazeth on the distance dim,
 And sees the darkness coming as a cloud—
 Is not its form—its voice—most palpable and loud ? §

But what is this ?—it cometh—and it brings
 A music with it—'tis the rush of wings—
 A pause—and then a sweeping, falling strain,
 And Nesace is in her halls again.
 From the wild energy of wanton haste
 Her cheeks were flushing, and her lips apart ;
 The zone that clung around her gentle waist
 Had burst beneath the heaving of her heart.

* Voltaire, in speaking of Persepolis, says, "Je connois bien l'admiration qu' inspirent ces ruines—mais un palais érigé au pied d'une chaîne de rochers stériles—peut-il être un chef d'œuvre des arts ?"

† "Oh, the wave"—Ula Deguisi is the Turkish appellation; but, on its own shores, it is called Bahar Loth, or Almotanah. There were undoubtedly more than two cities engulfed in the "dead sea." In the valley of Siddim were five—Adrah, Zeboin, Zoar, Sodom and Gomorrah. Stephen of Byzantium mentions eight, and Strabo thirteen (engulfed)—but the last is out of all reason.

It is said [Tacitus, Strabo, Josephus, Daniel of St. Saba, Nas, Maundrell, Troilo, D'Aivieux], that after an excessive drought, the vestiges of columns, walls, etc., are seen above the surface. At any season, such remains may be discovered by looking down into the transparent lake, and at such distances as would argue the existence of many settlements in the space now usurped by the "Asphaltites."

‡ Eyraco—Chaldea.

§ I have often thought I could distinctly hear the sound of the darkness as it stolp over the horizon.

Within the centre of that hall to breathe
 She paus'd and panted, Zæthe ! all beneath,
 The fairy light that kiss'd her golden hair
 And long'd to rest, yet could but sparkle there !

Young flowers were whispering in melody *
 To happy flowers that night—and tree to tree ;
 Fountains were gushing music as they fell
 In many a star lit grove, or moon-light dell ;
 Yet silence came upon material things—
 Fair flowers, bright waterfalls and angel wings—
 And sound alone that from the spirit sprang
 Bore burthen to the charm the maiden sang :

“ Neath blue-bell or streamer—
 Or tufted wild spray
 That keeps, from the dreamer,
 The moonbeam away-- †
 Bright beings ! that ponder,
 With half-closing eyes, •
 On the stars which your wonder
 Hath drawn from the skies,
 Till they glance thro' the shade, and
 Come down to your brow
 Like — eyes of the maiden
 Who calls on you now—
 Arise ! from your dreaming
 In violet bowers,
 To duty beseeming
 These star-litten hours—
 And shake from your tresses
 Encumber'd with dew

* Fairies use flowers for their character.—*Merry Wives of Windsor.*

† In Scripture is this passage—“The sun shall not harm thee by day, nor the moon by night.” It is, perhaps, not generally known that the moon, in Egypt, has the effect of producing blindness to those who sleep with the face exposed to its rays, to which circumstance the passage alludes.

The breath of those kisses
 That cumber them too—
 (O ! how, without you, Love !
 Could angels be blest ?)
 Those kisses of true love
 That lull'd ye to rest !
 Up ! shake from your wing
 Each hindering thing :
 The dew of the night—
 It would weigh down your flight ;
 And true love caresses—
 O ! leave them apart !
 They are light on the tresses,
 But lead on the heart.

Ligeia ! Ligeia !
 My beautiful one !
 Whose harshest idea
 Will to melody run,
 O ! is it thy will
 On the breezes to toss ?
 Or, capriciously still,
 Like the lone Albatross,*
 Incumbent on night
 (As she on the air)
 To keep watch with delight
 On the harmony there ?

Ligeia ! wherever
 Thy image may be,
 No magic shall sever
 Thy music from thee.
 Thou hast bound many eyes
 In a dreamy sleep—
 But the strains still arise
 Which *thy* vigilance keep—
 The Albatross is said to sleep on the wing.

The sound of the rain
 Which leaps down to the flower,
 And dances again
 In the rhythm of the shower—
 The murmur that springs *
 From the growing of grass
 Are the music of things—
 But are modell'd, alas !—
 Away, then, my dearest,
 O ! hie thee away
 To springs that lie clearest
 Beneath the moon-ray—
 To lone lake that smiles,
 In its dream of deep rest,
 At the many star-isles
 That enjewel its breast—
 Where wild flowers, creeping,
 Have mingled their shade,
 On its margin is sleeping
 Full many a maid — *
 Some have left the cool glade, and
 Have slept with the bee— †
 Arouse them, my maiden,
 On moorland and lea—

* I met with this idea in an old English tale, which I am now unable to obtain and quote from memory :—"The verie essence and, as it were, springe heade and origine of all muiche is the verie pleasaunte sounde which the trees of the forest do make when they growe."

† The wild bee will not sleep in the shade if there be moonlight.

The rhyme in this verse, as in one about sixty lines before, has an appearance of affectation. It is, however, imitated from Sir W. Scott, or rather from Claud Halero—in whose mouth I admired its effect : *

O ! were there an island,
 Tho' ever so wild,
 Where woman might smile, and
 No man be beguil'd, etc.

Go ! breathe on their slumber,
 All softly in ear;
 The musical number
 They slumber'd to hear—
 For what can awaken
 An angel so soon
 Whose sleep hath been taken
 Beneath the cold moon,
 As the spell which no slumber
 Of witchery may test,
 The rhythmical number
 Which lull'd him to rest?"

Spirits in wing, and angels to the view,
 A thousand seraphs burst th' Empyrean thro',
 Young dreams still hovering on their drowsy flight—
 Seraphs in all but "Knowledge," the keen light
 That fell, refracted, thro' thy bounds afar,
 O Death ! from eye of God upon that star :
 Sweet was that error—sweeter still that death—
 Sweet was that error—ev'n with us the breath
 Of Science dims the mirror of our joy—
 To them 'twere the Simoom, and would destroy—
 For what (to them) availeth it to know
 That Truth is Falsehood—or that Bliss is Woe ?
 Sweet was their death—with them to die was rife
 With the last ecstasy of satiate life—
 Beyond that death no immortality—
 But sleep that pondereth and is not "to be"—
 And there—oh ! may my weary spirit dwell—
 Apart from Heaven's Eternity—and yet how far from Hell ! *

* With the Arabians there is a medium between Heaven and Hell, where men suffer no punishment, but yet do not attain that tranquil and even happiness which they suppose to be characteristic of heavenly enjoyment.

Un nō rompido sueno—

Un dia puro—allegre—libre

Quieta—

What guilty spirit, in what shrubbery dim,
 Heard not the stirring summons of that hymn?
 But two : they fell : for Heaven no grace imparts
 To those who hear not for their beating hearts.
 A maiden angel and her seraph-lover —
 O ! where (and ye may seek the wide skies over)
 Was Love, the blind, near sober Duty known?
 Unguided Love hath fallen—'mid “tears of perfect moan.” *

He was a goodly spirit—he who fell :
 A wanderer by moss-y-mantled well—
 A gazer on the lights that shine above —
 A dreamer in the moonbeam by his love :
 What wonder? for each star is eye-like there,
 And looks so sweetly down on Beauty's hair—
 And they, and ev'ry mossy spring were holy
 To his love haunted heart and melancholy.
 The night had found (to him a night of wo)
 Upon a mountain crag, young Angelo—
 Beetling it bends athwart the solemn sky,
 And scowls on starry worlds that down beneath it lie
 Here sate he with his love—his dark eye bent
 With eagle gaze along the firmament :
 Now turn'd it upon her—but ever then
 It trembled to the orb of EARTH again.

“ Ianthe, dearest, see ! how dim that ray !
 How lovely 'tis to look so far away !

Libre de amor—de zelo—

De odio—de esperanza—de rezelo.—*Luis Ponce de Leon.*

Sorrow is not excluded from “Al Aaraf,” but it is that sorrow which the living love to cherish for the dead, and which, in some minds, resembles the delirium of opium. The passionate excitement of Love and the buoyancy of spirit attendant upon intoxication are its less holy pleasures—the price of which, to those souls who make choice of “Al Aaraf” as their residence after life, is final death and annihilation.

* There be tears of perfect moan
 Wept for thee in Helicon.—*Milton*

She seemed not thus upon that autumn eve
 I left her gorgeous halls—for mourned to leave.
 That eve—that eve—I should remember well—
 The sun-ray dropped, in Lemnos with a spell
 On th' Arabesque carving of a gilded hall
 Wherin I sate, and on the draperied wall—
 And on my eye-lids—O, the heavy light!
 How drowsily it weighed them into night!
 On flowers, before, and mist, and love they ran
 With Persian Saadi in his Gulistan:
 But O, that light!—I slumbered—Death, the while,
 Stole o'er my senses in that lovely isle
 So softly that no single silken hair
 Awoke that slept—or knew that he was there.

“The last spot of Earth’s orb I trod upon
 Was a proud temple called the Parthenon;
 More beauty clung around her columned wall
 Than even thy glowing bosom beats withal;†
 And when old Time my wing did disenthral
 Thence sprang I—as the eagle from his tower,
 And years I left behind me in an hour.
 What time upon her airy bounds I hung,
 One half the garden of her globe was flung
 Unrolling as a chart unto my view—
 Tenantless cities of the desert too!
 Ianthe, beauty crowded on me then,
 And half I wished to be again of men.”

* My Angelo! and why of them to be?
 A brighter dwelling-place is here for thee—
 And greener fields than in yon world above,
 And woman’s loveliness—and passionate love.”

• It was entire in 1687—the most elevated spot in Athens.

† Shadwing more beauty in their airy brows

Than leave the white breasts of the queen of love.—Marlowe,

"But list, Ianthe ! when the air so soft
Failed, as my pennoned spirit leapt aloft,*
Perhaps my brain grew dizzy—but the world
I left so late was into chaos hurled,
Sprang from her station, on the winds apart,
And rolled a flame, the fiery Heaven athwart.
Methought, my sweet one, then I ceased to soar,
And fell—not swiftly as I rose before,
But with a downward, tremulous motion thro'
Light, brazen rays, this golden star unto !
Nor long the measure of my falling hours,
For nearest of all stars was thine to ours—
Dread star ! that came, amid a night of mirth,
A red Dædalion on the timid Earth."

"We came—and to thy Earth—but not to us
Be given our lady's bidding to discuss :
We came, my love ; around, above, below,
Gay fire-fly of the night we come and go,
Nor ask a reason save the angel-nod
She grants to us as granted by her God—
But, Angelo, than thine grey Time unfurled
Never his fairy wing o'er fairer world !
Dim was its little disk, and angel eyes
Alone could see the phantom in the skies,
When first Al Aaraaf knew her course to be
Headlong thitherward o'er the starry sea—
But when its glory swelled upon the sky,
As glowing Beauty's bust beneath man's eye,
We paused before the heritage of men,
And thy star trembled—as doth Beauty then !"

Thus in discourse, the lovers whiled away
The night that waned and waned and brought no day
They fell : for Heaven to them no hope imparts
Who hear not for the beating of their hearts.

1890

* Pennon, for pibion — Milton

TAMERLANE.

KIND solace in a dying hour !
 Such, father, is not (now) my theme—
 I will not madly deem that power
 Of Earth may shrive me of the sin
 Unearthly pride hath revelled in—
 I have no time to dote or dream :
 You call it hope—that fire of fire !
 It is but agony of desire :
 If I can hope—O God ! I can—
 Its fount is holier—more divine—
 I would not call thee fool, old man,
 But such is not a gift of thine.

Know thou the secret of a spirit
 Bowed from its wild pride into shame.
 O yearning heart ! I did inherit
 Thy withering portion with the fame,
 The searing glory which hath shone
 Amid the Jewels of my throne,
 Halo of Hell ! and with a pain
 Not Hell shall make me fear again—
 O craving heart, for the lost flowers
 And sunshine of my summer hours !
 The undying voice of that dead time,
 With its interminable chime,
 Rings, in the spirit of a spell,
 Upon thy emptiness—a knell.

I have not always been as now :
 The fevered diadem on my brow
 I claimed and won usurpingly—
 Hath not the same fierce heirdom given .
 Rome to the Cæsar—this to me ?
 The heritage of a kingly mind,
 And a proud spirit which hath striven
 Triumphantly with human kind.

On mountain soil I first drew life :
 The mists of the Taglay have shed
 Nightly their dews upon my head,
 And, I believe, the winged strife
 And tumult of the headlong air
 Have nestled in my very hair.

So late from Heaven—that dew—it fell
 ('Mid dreams of an unholy night)
 Upon me with the touch of Hell,
 While the red flashing of the light
 From clouds that hung, like banners, o'er,
 Appeared to my half-closing eye
 The pageantry of monarchy ;
 And the deep trumpet-thunder's roar
 Came hurriedly upon me, telling
 Of human battle, where my voice,
 My own voice, silly child !—was swelling
 (O ! how my spirit would rejoice,
 And leap within me at the cry)
 The battle-cry of Victory !

The rain came down upon my head
 Unsheltered—and the heavy wind
 • Rendered me mad and deaf and blind.
 It was but man, I thought, who shed
 Laurels upon me : and the rush—
 The torrent of the chilly air
 Gurgled within my ear the crush
 Of empires—with the captive's prayer—
 The hum of suitors—and the tone
 Of flattery 'round a sovereign's throne.

My passions, from that hapless hour,
 Usurped a tyranny which men
 Have deemed since I have reached to power,
 My innate nature—be it so :
 But, father, there lived one who, then,

POEMS WRITTEN IN YOUTH.

Then—in my boyhood—when their fire
 Burned with a still intenser glow
 (For passion must, with youth, expire)
 E'en *then* who knew this iron heart
 In woman's weakness had a part.

I have no words—alas!—to tell
 The loveliness of loving well!
 Nor would I now attempt to trace
 The more than beauty of a face
 Whose lineaments, upon my mind,
 Are —— shadows on th' unstable wind:
 Thus I remember having dwelt
 Some page of early lore upon,
 With loitering eye, till I have felt
 The letters—with their meaning—melt
 To fantasies—with none.

O, she was worthy of all love!
 Love as in infancy was mine—
 'Twas such as angel minds above
 Might envy; her young heart the shrine
 On which my every hope and thought
 Were incense—then a goodly gift,
 For they were childish and upright—
 Pure—as her young example taught.
 Why did I leave it, and, adrift,
 Trust to the fire within, for light?

We grew in age—and love—together—
 Roaming the forest, and the wild;
 My breast her shield in wintry weather—
 And, when the friendly sunshine smiled.
 And she would mark the opening skies,
I saw no Heaven—but in her eyes.
 Young Love's first lesson is —— the heart:
 • For 'mid that sunshine, and those smiles,

When, from our little cares apart,
 And laughing at her girlish wilts,
 I'd throw me on her throbbing breast,
 And pour my spirit out in tears—
 There was no need to speak the rest—
 No need to quiet any fears
 Of her—who asked no reason why,
 But turned on me her quiet eyes !

Yet *more* than worthy of the love
 My spirit struggled with, and strove,
 When, on the mountain peak, alone,
 Ambition lent it a new tone—
 I had no being—but in thee :
 The world, and all it did contain
 In the earth—the air—the sea—
 Its joy—its little lot of pain
 That was new pleasure—the ideal,
 Dim, vanities of dreams by night—
 And dimmer nothings which were real—
 (Shadows—and a more shadowy light !)
 Parted upon their misty wings,
 And, so, confusedly, became
 • Thine image and—a name—a name !
 Two separate—yet most intimate things.

I was ambitious—have you known
 The passion, father ? You have not :
 A cottager, I marked a throne
 Of half the world as all my own,
 And murmured at such lowly lot—
 But, just like any other dream,
 • Upon the vapour of the dew
 My own had past, did not the beam
 Of beauty which did while it thro'
 The minute—the hour—the day—oppress
 My mind with double loveliness.

We walked together on the crown
 Of a high mountain which looked down
 Afar from its proud natural towers
 Of rock and forest, on the hills—
 The dwindled hills! begirt with bowers
 And shouting with a thousand rills.

I spoke to her of power and pride,
 But mystically—in such guise
 That she might deem it nought beside
 The moment's converse, in her eyes
 I read, perhaps too carelessly—
 A mingled feeling with my own—
 The flush on her bright cheek, to me
 Seemed to become a queenly throne
 Too well that I should let it be
 Light in the wilderness alone.

I wrapped myself in grandeur then,
 And donned a visionary crown—
 Yet it was not that Fantasy
 Had thrown her mantle over me—
 But that, among the rabble—men,
 Lion ambition is chained down—
 And crouches to a keeper's hand—
 Not so in deserts where the grand—
 The wild—the terrible conspire
 With their own breath to fan his fire.

Look 'round thee now on Samarcand!—
 Is she not queen of Earth? her pride
 Above all cities? in her hand
 Their destinies? in all beside
 Of glory which the world hath known
 Stands she not nobly and alone?
 Falling—her veriest stepping-stone
 Shall form the pedestal of a throne—

And who her sovereign ? Timour—he
 Whom the astonished people saw
 Striding o'er empires haughtily
 A diademed outlaw !

O, human love ! thou spirit given,
 On Earth, of all we hope in Heaven !
 Which fall'st into the soul like rain
 Upon the Siroc-withered plain,
 And, failing in thy power to bless,
 But leav'st the heart a wilderness !
 Idea ! which bindest life around
 With music of so strange a sound
 And beauty of so wild a birth—
 Farewell ! for I have won the Earth.

When Hope, the eagle that towered, could see
 No cliff beyond him in the sky,
 His pinions were bent droopingly—
 And homeward turned his softened eye.
 'Twas sunset : when the sun will part
 There comes a sullenness of heart
 To him who still would look upon
 The glory of the summer sun.
 That soul will hate the ev'ning mist
 So often lovely, and will list
 To the sound of the coming darkness (known
 To those whose spirits hearken) as one
 Who, in a dream of night, *would* fly,
 But *cannot*, from a danger nigh.

What tho' the moon—tho' the white moon
 Shed all the splendour of her noon,
Her smile is chilly—and *her* beam,
 In that time of dreariness, will seem
 (So like you gather in your breath)
 A portrait taken after death.
 And boyhood is a summer sun
 Whose waning is the dreariest one—

For all we live to know is known,
 And all we seek to keep hath flown—
 Let life, then, as the day-flower, fall
 With the noon-day beauty—which is all.
 I reached my home—my home no more—
 For all had flown who made it so.
 I passed from out its mossy door,
 And, tho' my tread was soft and low,
 A voice came from the threshold stone
 Of one whom I had earlier known—
 O, I defy thee, Hell, to show
 On beds of fire that burn below,
 An humbler heart—a deeper woe.

Father, I firmly do believe—
 I know—for Death who comes for me
 From regions of the blest afar,
 Where there is nothing to deceive,
 Hath left his iron gate ajar,
 And rays of truth you cannot see
 Are flashing thro' Eternity—
 I do believe that Eblis hath
 A snare in every human path—
 Else how, when in the holy grove
 I wandered of the idol, Love,—
 Who daily scents his snowy wings
 With incense of burnt-offerings,
 From the most unpolluted things,
 Whose pleasant bowers are yet so riven
 Above with trellised rays from Heaven
 No mote may shun—no tiniest fly—
 The lightning of his eagle eye—
 How was it that Ambition crept,
 Unseen, amid the revels there,
 Till growing bold, he laughed and leapt
 In the tangles of Love's very hair ?

TO HELEN.

HELEN, thy beauty is to me
 Like those Nicean barks of yore,
 That gently, o'er a perfumed sea,
 The weary, wayworn wanderer bore
 To his own native shore.

On desperate seas long wont to roam,
 Thy hyacinth hair, thy classic face,
 Thy Naiad airs have brought me home
 To the glory that was Greece,
 To the grandeur that was Rome.

Lo ! in yon brilliant window niche,
 How statue-like I see thee stand,
 The agate lamp within thy hand !
 Ah, Psyche, from the regions which
 Are Holy Land !

1831.

THE VALLEY OF UNREST.

Once it smiled a silent dell . . .
 Where the people did not dwell ;
 They had gone unto the waste,
 Trusting to the milky-eyed stars,
 Nightly, from their azure towers,
 To keep watch above the flowers,
 In the midst of which all day
 The red sun-light lazily lay.
Now each visitor shall confess
 The sad valley's restlessness.
 Nothing there is motionless—
 Nothing save the airs that brood
 Over the magic solitude.

Ah, by no wind are stirred those trees
 That palpitate like the chill seas
 Around the misty Hebrides !
 Ah, by no wind those clouds are driven
 That rustle through the unquiet Heaven
 Unceasingly, from morn till even,
 Over the violets there that lie
 In myriad types of the human eye—
 Over the lilies there that wave
 And weep above a nameless grave !
 They wave :—from out their fragrant tops
 Eternal dews come down in drops.
 They weep :—from off their delicate stems
 Perennial tears descend in gems.

1831.

ISRAFEL.*

IN Heaven a spirit doth dwell
 “ Whose heart-strings are a lute ; ”
 None sing so wildly well
 As the angel Israfel,
 And the giddy Stars (so legends tell),
 Ceasing their hymns, attend the spell
 Of his voice, all mute.

Tottering above
 In her highest noon,
 The enamoured Moon
 blushes with love,
 While, to listen, the red levin
 (With the rapid Pleiads, even,
 Which were seven),
 Pauses in Heaven.

* And the angel Israfel, whose heart-strings are a lute, and who has the sweetest voice of all God's creatures.—Koran.

And they say (the starry choir
 And the other listening things)
 That Israfeli's fire
 Is owing to that lyre
 By which he sits and sings—
 The trembling living wire
 Of those unusual strings.

But the skies — angel trod,
 Where deep thoughts are a duty—
 Where Love's a grow-up God—
 Where the Houri glances are
 Imbued with all the beauty
 Which we worship in a star.

Therefore, thou art not wrong,
 Israfeli, who despisest
 An unimpassioned song ;
 To thee the laurels belong,
 Best bard, because the wisest !
 Merrily live and long !

The ecstasies above
 With thy burning measures suit—
 Thy grief, thy joy, thy hate, thy love,
 With the fervour of thy lute—
 Well may the stars be mute !

Yea, Heaven is thine ; but this
 Is a world of sweets and sours ;
 Our flowers are merely—flowers,
 And the shadow of thy perfect bliss
 Is the sunshine of ours.

If I could dwell
 Where Israfel
 Hath dwelt, and he where I,

He might not sing so wildly well
 A mortal melody;—
 While a bolder note than this might swell
 From my lyre within the sky.

1836.

TO —

I HEED not that my earthly lot
 Hath—little of Earth in it—
 That years of love have been forgot
 In the hatred of a minute :—
 I mourn not that the desolate
 Are happier, sweet, than I,
 But that *you* sorrow for *my* fate
 Who am a passer-by.

1829.

TO —

THE bowers whereat, in dreams, I see
 The wantonest singing birds,
 Are lips—and all thy melody
 Of lip-begotten words—

Thine eyes, in Heaven of heart enshrined
 Then desolately fall,
 O God ! on my funereal mind
 Like starlight on a pall—

Thy heart—*thy* heart !—I wake and sigh,.
 And sleep to dream till day
 Of the truth that gold can never buy—
 Of the baubles that it may.

1829.

TO THE RIVER —

FAIR river ! in thy bright, clear flow
 Of crystal, wandering water,
 Thou art an emblem of the glow
 Of beauty—the unhidden heart—
 The playful maziness of art
 In old Alberto's daughter ;

But when within thy wave she looks—
 Which glistens then, and trembles—
 Why, then, the prettiest of brooks
 Her worshipper resembles ;
 For in his heart, as in thy stream,
 Her image deeply lies—
 His heart which trembles at the beam
 Of her soul-searching eyes.

1829.

SONG.

I SAW thee on thy bridal day—
 When a burning blush came o'er thee,
 Though happiness around thee lay,
 The world all love before thee :
 And in thine eye a kindling light
 (Whatever it might be)
 Was all on Earth my aching sight
 Of Loveliness could see.

That blush, perhaps, was maiden shame—
 As such it well may pass—
 Though its glow hath raised a fiercer flame
 In the breast of him, alas !
 Who saw thee on that bridal day,
 When that deep blush *would* come o'er thee,
 Though happiness around thee lay,
 The world all love before thee.

1827.

SPIRITS OF THE DEAD.

THY soul shall find itself alone
 'Mid dark thoughts of the grey tomb-stone—
 Not one, of all the crowd, to pry
 Into thine hour of secrecy.
 Be silent in that solitude
 Which is not loneliness—for then
 The spirits of the dead who stood
 In life before thee are again
 In death around thee—and their will
 Shall overshadow thee : be still.
 The night—tho' clear—shall frown—
 And the stars shall not look down
 From their high thrones in the Heaven,
 With light like Hope to mortals given—
 But their red orbs, without beam,
 To thy weariness shall seem
 As a burning and a fever
 Which would cling to thee for ever.
 Now are thoughts thou shalt not banish—
 Now are visions ne'er to vanish—
 From thy spirit shall they pass
 No more—like dew-drops from the grass.
 The breeze—the breath of God—is still—
 And the mist upon the hill
 Shadowy—shadowy—yet unbroken,
 Is a symbol and a token—
 How it hangs upon the trees,
 A mystery of mysteries !

1827.

A DREAM.

IN visions of the dark night
 I have dreamed of joy departed—
 But a waking dream of life and light
 Hath left me broken-hearted.

Ah ! what is not a dream by day
 To him whose eyes are cast
 On things around him with a ray
 Turned back upon the past ?

That holy dream—that holy dream,
 While all the world were chiding,
 Hath cheered me as a lovely beam,
 A lonely spirit guiding.

What though that light, thro' storm and night,
 So trembled from afar—
 What could there be more purely bright
 In Truth's day-star ?

1827.

ROMANCE.

ROMANCE, who loves to nod and sing,
 With drowsy head and folded wing,
 Among the green leaves as they shake
 Far down within some shadowy lake,
 To me a painted paroquet
 Hath been—a most familiar bird—
 Taught me my alphabet to say—
 To lisp my very earliest word
 While in the wild wood I did lie,
 A child—with a most knowing eye.

Of late, eternal Condor years
 So shake the very Heaven on high
 With tumult as they thunder by,
 I have no time for idle cares
 Though gazing on the unquiet sky.
 And when an hour with calmer wings
 Its down upon my spirit flings—
 That little time with lyre and rhyme
 To while away—forbidden things !
 My heart would feel to be a crime
 Unless it trembled with the strings.

1829.

FAIRYLAND.

DIM vales—and shadowy floods—
And cloudy-looking woods,
Whose forms we can't discover
For the tears that drip all over
Huge moons there wax and wane—
Again—again—again—
Every moment of the night—
For ever changing places—
And they put out the star-light
With the breath from their pale faces.
About twelve by the moon-dial
One more filmy than the rest
(A kind which, upon trial,
They have found to be the best)
Comes down—still down—and down
With its centre on the crown
Of a mountain's eminence,
While its wide circumference
In easy drapery falls
Over hamlets, over halls,
Wherever they may be—
O'er the strange woods—o'er the sea—
Over spirits on the wing—
Over every drowsy thing—
And buries them up quite
In a labyrinth of light—
And then, how deep!—O, deep!
Is the passion of their sleep.
In the morning they arise,
And their moony covering
Is soaring in the skies,
With the tempests as they toss,
Like—almost any thing—
Or a yellow Albatross.

They use that moon no more
For the same end as before—
Videlicet a tent—
Which I think extravagant :
Its atomies, however,
Into a shower disperse,
Of which those butterflies,
Of Earth, who seek the skies,
And so come down again
(Never-contented things !)
Have brought a specimen
Upon their quivering wings.

1831.

THE LAKE. TO —

IN spring of youth it was my lot
To haunt of the wide world a spot
The which I could not love the less—
So lovely was the loneliness
Of a wild lake, with black rock bound,
And the tall pines that towered around

But when the Night had thrown her pall
Upon that spot, as upon all,
And the mystic wind went by
Murmuring in melody—
Then—ah, then, I would awake
To the terror of the lone lake.

*Yet that terror was not fright,
But a tremulous delight—
A feeling not the jewelled mine
Could teach or bribe me to define—
Nor Love—although the Love were thine.

Death was in that poisonous wave,
 And in its gulf a fitting grave
 For him who thence could solace bring
 To his lone imagining—
 Whose solitary soul could make
 An Eden of that dim lake.

1827.

EVENING STAR.

'TWAS noon tide of summer,
 And midtime of night,
 And stars, in their orbits,
 Shone pale, through the light
 Of the brighter, cold moon.
 'Mid planets her slaves,
 He himself in the Heavens,
 Her beam on the waves.

I gazed awhile
 On her cold smile ;
 Too cold—too cold for me—
 There passed, as a shroud,
 A fleecy cloud,
 And I turned away to thee,
 Proud Evening Star,
 In thy glory afar
 And dearer thy beam shall be ;
 For joy to my heart
 Is the proud part
 Thou bearest in Heaven at night,
 And more I admire
 Thy distant fire,
 Than that colder, lowly light.

• 1827.

IMITATION.

A DARK unfathomed tide
Of interminable pride—
A mystery, and a dream,
Should my early life seem ;
I say that dream was fraught
With a wild and waking thought
Of beings that have been,
Which my spirit hath not seen,
Had I let them pass me by,
With a dreaming eye !
Let none of earth inherit
That vision on my spirit ;
Those thoughts I would control,
As a spell upon his soul :
For that bright hope at last
And that light time have past,
And my woldly rest hath gone
With a sigh as it passed on :
I care not though it perish
With a thought I then did cherish.

.1827.

“THE HAPPIEST DAY.”

I.

THE happiest day—the happiest hour
My seared and blighted heart hath known,
The highest hope of pride and power,
I feel hath flown.

•

II.

Of power ! said I ? Yes ! such I ween
But they have vanished long, alas !
The visions of my youth have been—
But let them pass.

III.

And pride, what have I now with thee ?
 Another brow may ev'n inherit
 The venom thou hast poured on me—
 Be still my spirit !

IV.

The happiest day—the happiest hour
 Mine eyes shall see—have ever seen
 The brightest glance of pride and power
 I feel have been :

V.

But were that hope of pride and power
 Now offered with the pain
 Ev'n then I felt—that brightest hour
 I would not live again :

VI.

For on its wing was dark alloy
 And as it fluttered—fell
 An essence—powerful to destroy
 A soul that knew it well.

1827.

Translation from the Greek.

HYMN TO ARISTOGEITON AND HARMODIUS.

I.

WREATHED in myrtle, my sword I'll conceal,
 Like those champions devoted and brave,
 When they plunged in the tyrant their steel,
 And to Athens deliverance gave.

II.

Beloved heroes ! your deathless souls roam
 In the joy breathing isles of the blest ;
 Where the mighty of old have their home—
 Where Achilles and Diomed rest.

III.

In fresh myrtle my blade I'll entwine,
 Like Harmodius, the gallant and good,
 When he made at the tutelar shrine
 • A libation of Tyranny's blood.

IV.

Ye deliverers of Athens from shame !
 Ye avengers of Liberty's wrongs !
 Endless ages shall cherish your fame,
 Embalmed in their echoing songs !

1827 *

DREAMS.

OH ! that my young life were a lasting dream !
 My spirit not awakening, till the beam
 Of an Eternity should bring the morrow.
 Yes ! though that long dream were of hopeless sorrow,
 'Twere better than the cold reality
 Of waking life, to him whose heart must be,
 And hath been still, upon the lovely earth,
 A chaos of deep passion, from his birth.
 But should it be—that dream eternally
 Continuing—as dreams have been to me
 In my young boyhood—should it thus be given,
 'Twere folly still to hope for higher Heaven.
 For I have revelled when the sun was bright
 I' the summer sky, in dreams of living light
 And loveliness,—have left my very heart
 Inclines of my imaginary apart *
 From mine own home, with beings that have been
 Of mine own thought—what more could I have seen
 'Twas once—and only once—and the wild hour
 From my remembrance shall not pass—some power—

* In climes of mine imagining apart !—ED.

Or spell had bound me—'twas the chilly wind
 Came o'er me in the night, and left behind
 Its image on my spirit—or the moon
 Shone on my slumbers in her lofty noon
 Too coldly—or the stars—howe'er it was.
 That dream was as that night-wind—let it pass.
I have been happy, though in a dream.
 I have been happy—and I love the theme:
 Dreams! in their vivid colouring of life
 As in that fleeting, shadowy, misty strife
 Of semblance with reality which brings
 To the delirious eye, more lovely things
 Of Paradise and Love—and all my own!—
 Than young Hope in his sunniest hour hath known.

"IN YOUTH I HAVE KNOWN ONE."

*How often we forget all time, when lone
 Admiring Nature's universal throne,
 Her woods—her wilds—her mountains—the intense
 Reply of Hers to Our intelligence!*

I.

IN youth I have known one with whom the Earth
 In secret communing held—as he with it,
 In daylight, and in beauty, from his birth.
 Whose fervid, flickering torch of life was lit
 From the sun and stars, whence he had drawn forth
 A passionate light such for his spirit was fit—
 And yet that spirit knew—not in the hour
 Of its own fervour—what had o'er it power.

II.

Perhaps it may be that my mind is wroight.
 To a fervor* by the moonbeam that hangs o'er,
 But I will half believe that wild light fraught
 —With more of sovereignty than ancient lore

* Query "fervour"!—ED.

Hath ever told—or is it of a thought
 The unembodied essence, and no more
 That with a quickening spell doth o'er us pass
 As dew of the night-time, o'er the summer grass ? .

III.

Doth o'er us pass, when, as th' expanding eye
 To the loved object—so the tear to the lid
 Will start, which lately slept in apathy ?
 And yet it need not be—that object) hid
 From us in life—but common—which doth lie
 Each hour before us—but then only bid
 With a strange sound, as of a harp-string broken
 T' awake us—'Tis a symbol and a token—

IV.

Of what in other worlds shall be—and given
 In beauty by our God, to those alone
 Who otherwise would fall from life and Heaven
 Drawn by their heart's passion, and that tone,
 That high tone of the spirit which hath striven
 Though not with Faith—with godliness—whose throne
 With desperate energy 't hath beaten down ;
 Wearing its own deep feeling as a crown.

A PÆAN.

I.

How shall the burial rite be read ?
 The solemn song be sung ?
 The requiem for the loveliest dead,
 That ever died so young ?

II.

Her friends are gazing on her,
 And on her gaudy bier,
 And weep !—oh ! to dishonour
 Dead beauty with a tear !

III.

They loved her for her wealth—
 And they hated her for her pride—
 But she grew in feeble health,
 And they *love* her—that she died. •

IV.

They tell me (while they speak
 Of her “costly broider’d pall”)
 That my voice is growing weak—
 That I should not sing at all—

V.

Or that my tone should be
 Tun’d to such solemn song
 So mournfully—so mournfully,
 That the dead may feel no wrong.

VI.

But she is gone above,
 With young Hope at her side,
 And I am drunk with love
 Of the dead, who is my bride.—

VII.

Of the dead—dead who lies
 All perfum’d there,
 With the death upon her eyes,
 And the life upon her hair.

VIII.

Thus on the coffin loud and long
 I strike—the murmur sent
 Through the grey chambers to my song,
 Shall be the accompaniment.

IX.

Thou diedst in thy life’s June—
 But thou didst not die too fair :
 Thou didst not die too soon,
 Nor with too calm an air.

X.

From more than friends on earth,
 Thy life and love are riven,
 To join the untainted mirth
 Of more than thrones in heaven

XI.

Therefore, to thee this night
 I will no requiem raise,
 But waft thee on thy flight,
 With a Pæan of old days.

NOTES.

30. On the "Poems written in Youth" little comment is needed. This section includes the pieces printed for first volume of 1827 (which was subsequently suppressed), such poems from the first and second published volumes of 1829 and 1831 as have not already been given in their revised versions, and a few others collected from various sources. "Al Aaraaf" first appeared, with the sonnet "To Silence" prefixed to it, in 1829, and is, substantially, as originally issued. In the edition for 1831, however, this poem, its author's longest, was introduced by the following twenty-nine lines, which have been omitted in all subsequent collections :—

AL AARAAF.

Mysterious star !
 Thou wert my dream
 All a long summer night—
 Be now my theme !
 By this clear stream,
 Of thee will I write ;
 Meantime from afar
 Bathe me in light !

Thy world has not the dross of ours,
 Yet all the beauty—all the flowers
 That list our love or deck our bowers
 In dreamy gardens, where do lie
 Dreamy maidens all the day ;
 While the silver winds of Circassy
 On violet couches faint away.

Little—oh! little dwells in thee
 Like unto what on earth we see :
 Beauty's eye is here the bluest
 In the falsest and untruest—
 On the sweetest air doth float
 The most sad and solemn note—
 If with thee be broken hearts,
 Joy so peacefully departs,
 That its echo still doth dwell,
 Like the murmur in the shell.
 Thou ! thy truest type of grief
 Is the gently falling leaf—
 Thou ! thy framing is so holy
 Sorrow is not melancholy

31. The earliest version of "Tamerlane" was included in the suppressed volume of 1827, but differs very considerably from the poem as now published. The present draft, besides innumerable verbal alterations and improvements upon the original, is more carefully punctuated, and, the lines being indented, presents a more pleasing appearance, to the eye at least.

32. "To Helen" first appeared in the 1831 volume, as did also "The Valley of Unrest" (as "The Valley Ni,"), "Israfel," and one or two others of the youthful pieces. The poem styled "Romance" constituted the Preface of the 1829 volume, but with the addition of the following lines —

Succeding years, too wild for song,
 Then rolled like tropic storms along,
 Where, though the ganish lights that fly
 Dying along the troubled sky,
 Lay bare, through vistas thunder riven,
 The blackness of the general Heaven,
 That very blackness yet doth fling
 Light on the lightning's silver wing.

For being an idle boy lang sync,
 Who read Anacreon and drank wine,
 I early found Anacreon rhymes
 Were almost passionate sometimes—
 And by strange alchemy of brain
 His pleasures always turned to pain—
 His naïveté to wild desire—
 His wit to love—his wine to fire—
 And so, being young and dipt in folly,
 I fell in love with melancholy,

And used to throw my earthly rest
And quiet all away in jest—
I could not love except where Death
Was mingling his with Beauty's breath—
Or Hymen, Time, and Destiny,
Were stalking between her and me.

But *now* my soul hath too much room—
Gone are the glory and the gloom—
The black hath mellow'd into grey,
And all the fires are fading away.

My draught of passion hath been deep
I revell'd, and I now would sleep—
And after drunkenness of soul
Succeeds the gloom of the bowl—
An idle longing night and day
To dream my very life away

But dreams—of those who dream as I,
Aspiringly, are damned, and die :
Yet should I swear I mean alone,
By notes so very shrilly blown,
To break upon Time's monotone,
While yet my vapid joy and grief
Are tintless of the yellow leaf—
Why not an imp the greybeard hath,
Will shake his shadow in my path—
And e'en the greybeard will o'erlook
Connivingly my dreaming book.

DOUBTFUL POEMS.

ALONE.

FROM childhood's hour I have not been
As others were—I have not seen
As others saw—I could not bring
My passions from a common spring—
From the same source I have not taken
My sorrow—I could not awaken
My heart to joy at the same tone—
And all I loved—I loved alone—
Thou—in my childhood—in the dawn
Of a most stormy life—was drawn
From every depth of good and ill
The mystery which binds me still—
From the torrent, or the fountain—
From the red cliff of the mountain—
From the sun that round me roll'd
In its autumn tint of gold—
From the lightning in the sky
As it passed me flying by—
From the thunder and the storm—
And the cloud that took the form
(When the rest of Heaven was blue)
Of a demon in my view.

TO ISADORE.

I.

BENEATH the vine-clad eaves,
 Whose shadows fall before
 Thy lowly cottage door—
 Under the lilac's tremulous leaves—
 Within thy snowy clasp'd hand
 The purple flowers it bore.
 Last eve in dreams, I saw thee stand,
 Like queenly nymph from Fairy-land—
 Enchantress of the flowery wand,
 Most beauteous Isadore !

II.

And when I bade the dream
 Upon thy spirit flee,
 Thy violet eyes to me
 Upturned, did overflowing seem*
 With the deep, untold delight
 Of Love's serenity ;
 Thy classic brow, like lilies white
 And pale as the Imperial Night
 Upon her throne, with stars bedight,
 Entranced my soul to thee !

III.

Ah ! ever I behold
 Thy dreamy, passionate eyes,
 Blue as the languid skies
 Hung with the sunset's fringe of gold ;
 Now strangely clear thine image grows,
 And olden memories
 Are startled from their long repose
 Like shadows on the silent snows
 When suddenly the night-wind blows
 Where quiet moonlight lies.

IV.

Like music heard in dreams,
 Like strains of harps unknown,
 Of birds for ever flown—
 Audible as the voice of streams
 That murmur in some leafy dell,
 I hear thy gentlest tone,
 And Silence cometh with her spell
 Like that which on my tongue doth dwell,
 When tremulous in dreams I tell
 My love to thee alone !

V.

In every valley heard,
 Floating from tree to tree,
 Less beautiful to me,
 The music of the radiant bird,
 Than artless accents such as thine
 Whose echoes never flee !
 Ah ! how for thy sweet voice I pine :—
 For uttered in thy tones benign
 (Enchantress !) this rude name of mine
 Doth seem a melody !

THE VILLAGE STREET.

IN these rapid, restless shadows,
 Once I walked at eventide,
 When a gentle, silent maiden,
 Walked in beauty at my side.
 She alone thereto walked beside me
 All in beauty, like a bride.

Pallidly the moon was shining
 On the dewy meadows nigh ;
 On the silvery, silent rivers,
 On the mountains far and high,—

On the ocean's star-lit waters,
Where the winds,a-weary die.

Slowly, silently we wandered
From the open cottage door,
•Underneath the elm's long branches
To the pavement bending o'er ;
Underneath the mossy willow
And the dying sycamore.

With the myriad stars in beauty
All bedight, the heavens were seen,
Radiant hopes were bright around me,
Like the light of stars serene ;
Like the mellow midnight splendour
Of the Night's irradiate queen.

Audibly the elm-leaves whispered
Peaceful, pleasant melodies,
Like the distant murmured music
Of unquiet, lovely seas ;
While the winds were hushed in slumber
In the fragrant flowers and trees.

Wondrous and unwonted beauty
Still adorning all did seem,
While I told my love in fables
'Neath the willows by the stream ;
Would the heart have kept unspoken
Love that was its rarest dream !

Instantly away we wandered
In the shadowy twilight tide,
She, the silent, scornful maiden,
Walking calmly at my side,
With a step serene and stately,
All in beauty, all in pride.

Vacantly I walked beside her.

On the earth mixt eyes were cast ;
Swift and keen there came unto me
Bitter memories of the past—
On me, like the rain in Autumn
On the dead leaves, cold and fast.

Underneath the elms we parted,
By the lowly cottage door ;
One brief word alone was uttered—
Never on our lips before ;
And away I walked forlornly,
Broken-hearted evermore.

Slowly, silently I loitered,
Homeward, in the night, alone ;
Sudden anguish bound my spirit,
That my youth had never known ;
Wild unrest, like that which cometh
When the Night's first dream hath flown.

Now, to me the elm-leaves whisper
Mad, discordant melodies,
And keen melodies like shadows
Haunt the moaning willow trees,
And the sycamores with laughter
Mock me in the nightly breeze.

Sad and pale the Autumn moonlight
Through the sighing foliage streams ;
And each morning, midnight shadow,
Shadow of my sorrow seems ;
Strive, O heart, forget thine idol !
And, O soul, forget thy dreams !

THE FOREST REVERIE.

'Tis said that when
The hands of men
Tamed this primeval wood,
And hoary trees with groans of wo,
Like warriors by an unknown foe,
Were in their strength subdued,
The virgin Earth
Gave instant birth
To springs that ne'er did flow—
That in the sun
Did rivulets run,
And all around rare flowers did blow—
The wild rose pale
Perfumed the gale,
And the queenly lily adown the dale
(Whom the sun and the dew
And the winds did woo),
With the gourd and the grape luxuriant grew

So when in tears
The love of years
Is wasted like the snow,
And the fine fibrils of its life
By the rude wrong of instant strife
Are broken at a blow—
Within the heart
Do springs upstart
Of which it doth now know,
And strange, sweet dreams,
Like silent streams
That from new fountains overflow,
With the earlier tide
Of rivers glide

Deep in the heart whose hope has died—
 Quenching the fires its ashes hide,—
 Its ashes, whence will spring and grow
 Sweet flowers, ere long,—
 The rare and radiant flowers of song !

NOTES.

Of the many verses from time to time ascribed to the pen of Edgar Poe, and not included among his known writings, the lines entitled "Alone" have the chief claim to our notice. *Fac-simile* copies of this piece had been in possession of the present editor some time previous to its publication in *Scribner's Magazine* for September 1875; but as proofs of the authorship claimed for it were not forthcoming, he refrained from publishing it as requested. The desired proofs have not yet been adduced, and there is, at present, nothing but internal evidence to guide us. "Alone" is stated to have been written by Poe in the album of a Baltimore lady (Mrs. Balderstone!), on March 17th, 1829, and the *fac-simile* given in *Scribner's* is alleged to be of his handwriting. If the calligraphy be Poe's, it is different in all essential respects from all the many specimens known to us, and strongly resembles that of the writer of the heading and dating of the manuscript, both of which the contributor of the poem acknowledges to have been recently added. The lines, however, if not by Poe, are the most successful imitation of his early mannerisms yet made public, and, in the opinion of one well qualified to speak, "are not unworthy on the whole of the parentage claimed for them."

Whilst Edgar Poe was editor of the *Broadway Journal*, some lines "To Isadore" appeared therein, and, like several of his known pieces, bore no signature. They were at once ascribed to Poe, and in order to satisfy questioners, an editorial paragraph subsequently appeared, saying they were by "A. Ide, junior." Two previous poems had appeared in the *Broadway Journal* over the signature of "A. M. Ide," and whoever wrote them was also the author of the lines "To Isadore." In order, doubtless, to give a show of variety, Poe was then publishing some of his known works in his journal over *noms de plume*, and as no other writings whatever can be traced to any person bearing the name of "A. M. Ide," it is not impossible that the poems now republished in this collection may be by the author of "The Raven." Having been published without his usual elaborate revision, Poe may have wished to *hide* his hasty work under an assumed name. The three pieces are included in the present collection, so the reader can judge for himself what pretensions they possess to be by the author of "The Raven."

PROSE POEMS.

THE ISLAND OF THE FAY.

"Nullus enim locus sine genio est."—*Serinus.*

"*La musique*," says Marmontel, in those "*Contes Moraux*"* which in all our translations we have insisted upon calling "*Moral Tales*," as if in mockery of their spirit—" *la musique est le seul des talents qui jouisse de lui-même. tous les autres veulent des témoins.*" He here confounds the pleasure derivable from sweet sounds with the capacity for creating them. No more than any other *talent*, is that for music susceptible of complete enjoyment where there is no second party to appreciate its exercise; and it is only in common with other talents that it produces *effects* which may be fully enjoyed in solitude. The idea which the *raconteur* has either failed to entertain clearly, or has sacrificed in its expression to his national love of *point*, is doubtless the very tenable one that the higher order of music is the most thoroughly estimated when we are exclusively alone. The proposition in this form will be admitted at once by those who love the lyre for its own sake and for its spiritual uses. But there is one pleasure still within the reach of fallen mortality, and perhaps only one, which owes even more than does music to the accessory sentiment of seclusion. I mean the happiness experienced in the contemplation of natural scenery. In truth, the man who would behold aright the glory of God upon earth must in solitude behold that glory. To me at least the presence, not of human life only, but of life in any other form than that of the green

* *Moraux* is here derived from *mœurs*, and its meaning is "*fashion-
able*," or, more strictly, "*of manners*."

things which grow upon the soil and are voiceless, is a stain upon the landscape, is at war with the genius of the scene. I love, indeed, to regard the dark valleys, and the grey rocks, and the waters that silently smile, and the forests that sigh in uneasy slumbers, and the proud watchful mountains that look down upon all,—I love to regard these as themselves but the colossal members of one vast animate and sentient whole—a whole whose form (that of the sphere) is the most perfect and most inclusive of all; whose path is among associate planets; whose meek handmaiden is the moon; whose mediate sovereign is the sun; whose life is eternity; whose thought is that of a god; whose enjoyment is knowledge; whose destinies are lost in immensity; whose cognisance of ourselves is akin with our own cognisance of the *animalculæ* which infest the brain, a being which we in consequence regard as purely inanimate and material, much in the same manner as these *animalculæ* must thus regard us.

Our telescopes and our mathematical investigations assure us on every hand, notwithstanding the cant of the more ignorant of the priesthood, that space, and therefore that bulk, is an important consideration in the eyes of the Almighty. The cycles in which the stars move are those best adapted for the evolution, without collision, of the greatest possible number of bodies. The forms of those bodies are accurately such as within a given surface to include the greatest possible amount of matter; while the surfaces themselves are so disposed as to accommodate a denser population than could be accommodated on the same surfaces otherwise arranged. Nor is it any argument against bulk being an object with God that space itself is infinite; for there may be an infinity of matter to fill it; and since we see clearly that the endowment of matter with vitality is a principle—indeed, as far as our judgments extend, the *leading* principle in the operations of Deity, it is scarcely logical to imagine it confined to the regions of the minute, where we daily trace it, and not extending to those of the august. As we find cycle within cycle without end, yet all revolving around one far-distant

centre which is the Godhead, may we not analogically suppose, in the same manner, life within life, the less within the greater, and all within the Spirit Divine? In short, we are madly erring through self-esteem in believing man, in either his temporal or future destinies, to be of more moment in the universe than that vast "clod of the valley" which he tills and contemns, and to which he denies a soul, for no more profound reason than that he does not behold it in operation.*

These fancies, and such as these, have always given to my meditations among the mountains and the forests, by the rivers and the ocean, a tinge of what the every-day world would not fail to term the fantastic. My wanderings amid such scenes have been many and far-searching, and often solitary; and the interest with which I have strayed through many a dim deep valley, or gazed into the reflected heaven of many a bright lake, has been an interest greatly deepened by the thought that I have strayed and gazed alone. What flippant Frenchman † was it who said, in allusion to the well-known work of Zimmermann, that "*la solitude est une belle chose ; mais il faut quelqu'un pour vous dire que la solitude est une belle chose*"? The epigram cannot be gainsaid; but the necessity is a thing that does not exist.

It was during one of my lonely journeyings, amid a far-distant region of mountain locked within mountain, and sad rivers and melancholy tarns writhing or sleeping within all, that I chanced upon a certain rivulet and island. I came upon them suddenly in the leafy June, and threw myself upon the turf beneath the branches of an unknown odorous shrub, that I might doze as I contemplated the scene. I felt that thus only should I look upon it, such was the character of phantasm which it wore.

On all sides, save to the west where the sun was about sinking, arose the verdant walls of the forest. The little

* Speaking of the tides, Pomponius Mela, in his treatise, *De Sive Orbis*, says, "Either the world is a great animal, or," &c.

† Bæbie, in substance; I do not remember the words

river which turned sharply in its course, and was thus immediately lost to sight, seemed to have no exit from its prison, but to be absorbed by the deep green foliage of the trees to the east; while in the opposite quarter (so it appeared to me as I lay at length and glanced upward) there poured down noiselessly and continuously into the valley a rich golden and crimson waterfall from the sunset fountains of the sky.

About midway in the short vista which my dreamy vision took in, one small circular island, profusely verdured, reposed upon the bosom of the stream.

So blended bank and shadow there,
That each seemed pendulous in air—

so mirror-like was the glassy water, that it was scarcely possible to say at what point upon the slope of the emerald turf its crystal dominion began.

My position enabled me to include in a single view both the eastern and western extremities of the islet, and I observed a singularly-marked difference in their aspects. The latter was all one radiant harem of garden beauties. It glowed and blushed beneath the eye of the slant sunlight, and fairly laughed with flowers. The grass was short, springy, sweet-scented, and Asphodel-interspersed. The trees were lithe, mirthful, erect, bright, slender, and graceful, of eastern figure and foliage, with bark smooth, glossy, and parti-coloured. There seemed a deep sense of life and joy about all, and although no airs blew from out the heavens, yet everything had motion through the gentle sweepings to and fro of innumerable butterflies, that might have been mistaken for tulips with wings.*

The other or eastern end of the isle was whelmed in the blackest shade. A sombre, yet beautiful and peaceful gloom, here pervaded all things. The trees were dark in colour and mournful in form and attitude—wreathing themselves into sad, solemn, and spectral shapes, that conveyed ideas of mortal sorrow and untimely death. The grass wore the deep

* "Florem putares nare per liquidum æthera."—P. Commire.

tint of the cypress, and the heads of its blades hung droopingly, and hither and thither among it were many small unsightly hillocks, low and narrow, and not very long, that had the aspect of graves, but were not, although over and all about them the rue and the rosemary clambered. The shade of the trees fell heavily upon the water, and seemed to bury itself therein, impregnating the depths of the element with darkness. I fancied that each shadow, as the sun descended lower and lower, separated itself sullenly from the trunk that gave it birth, and thus became absorbed by the stream, while other shadows issued momently from the trees, taking the place of their predecessors thus entombed.

This idea having once seized upon my fancy, greatly excited it, and I lost myself forthwith in reverie. "If ever island were enchanted," said I to myself, "this is it. This is the haunt of the few gentle Fays who remain from the wreck of the race. Are these green tombs theirs?—or do they yield up their sweet lives as mankind yield up their own? In dying, do they not rather waste away mournfully, rendering unto God little by little their existence, as these trees render up shadow after shadow, exhausting their substance unto dissolution? What the wasting tree is to the water that imbibes its shade, growing thus blacker by what it preys upon, may not the life of the Fay be to the death which engulfs it?"

As I thus mused, with half shut eyes, while the sun sank rapidly to rest, and eddying currents careered round and round the island, bearing upon their bosom large dazzling white flakes of the bark of the sycamore, flakes which, in their multiform positions upon the water, a quick imagination might have converted into anything it pleased; while I thus mused, it appeared to me that the form of one of those very Fays about whom I had been pondering, made its way slowly into the darkness from out the light at the western end of the island. She stood erect in a singularly fragile canoe, and urged it with the mere phantom of an oar. While within the influence of the lingering sunbeams, her attitude seemed indicative of joy, but sorrow deformed it as she passed within

the shade. Slowly she glided along, and at length rounded the islet and re-entered the region of light. "The revolution which has just been made by the Fay," continued I musingly, "is the cycle of the brief year of her life. She has floated through her winter and through her summer. She is a year nearer unto death : for I did not fail to see that as she came into the shade, her shadow fell from her, and was swallowed up in the dark water, making its blackness more black."

And again the boat appeared and the Fay, but about the attitude of the latter there was more of care and uncertainty and less of elastic joy. She floated again from out the light and into the gloom (which deepened momently), and again her shadow fell from her into the ebony water, and became absorbed into its blackness. And again and again she made the circuit of the island (while the sun rushed down to his slumbers), and at each issuing into the light there was more sorrow about her person, while it grew feebler and far fainter and more indistinct, and at each passage into the gloom there fell from her a darker shade, which became whelmed in a shadow more black. But at length, when the sun had utterly departed, the Fay, now the mere ghost of her former self, went disconsolately with her boat into the region of the ebony flood, and that she issued thence at all I cannot say, for darkness fell over all things, and I beheld her magical figure no more.

THE POWER OF WORDS.

Oinos. Pardon, Agathos, the weakness of a spirit newly fledged with immortality !

Agathos. You have spoken nothing, my Oinos, for which pardon is to be demanded. Not even here is knowledge a thing of intuition. For wisdom, ask of the angels freely, that it may be given !

Oinos. But in this existence I dreamed that I should be at once cognisant of all things, and thus at once happy in being cognisant of all.

Agathos. Ah, not in knowledge is happiness, but in the acquisition of knowledge! In ~~for~~ ever knowing, we are for ever blessed; but to know all, were the curse of a fiend.

Oinos. But does not The Most High know all?

Agathos. That (since he is The Most Happy) must be still the *one* thing unknown even to Him.

Oinos. But, since we grow hourly in knowledge, must not at last all things be known?

Agathos. Look down into the abysmal distances!—attempt to force the gaze down the multitudinous vistas of the stars, as we sweep slowly through them thus—and thus—and thus! Even the spiritual vision, is it not at all points arrested by the continuous golden walls of the universe?—the walls of the myriads of the shining bodies that mere number has appeared to blend into unity?

Oinos. I clearly perceive that the infinity of matter is no dream.

Agathos. There are *no* dreams in Aidenn—but it is here whispered that, of this infinity of matter, the *sole* purpose is to afford infinite springs at which the soul may allay the thirst to know which is for ever unquenchable within it—since to quench it would be to extinguish the soul's self. Question me then, my Oinos, freely and without fear. Come! we will leave to the left the loud harmony of the Pleiades, and swoop outward from the throne into the starry meadows beyond Orion, where, for pansies and violets, and heart's-ease, are the beds of the triplicate and triple-tinted suns.

Oinos. And now, Agathos, as we proceed, instruct me!—speak to me in the earth's familiar tones! I understand not what you hinted to me just now of the modes or of the methods of what, during mortality, we were accustomed to call Creation. Do you mean to say that the Creator is not God?

Agathos. I mean to say that the Deity does not create.

Oinos. Explain!

Agathos. In the beginning *only*, he created. The ~~scien~~^{sci} creatures which are now throughout the universe so perpetually

springing into being can only be considered as the mediate or indirect, not as the direct or immediate results of the Divine creative power.

Oinos. Among men, my Agathos, this idea would be considered heretical in the extreme.

Agathos. Among angels, my Oinos, it is seen to be simply true.

Oinos. I can comprehend you thus far—that certain operations of what we term Nature, or the natural laws, will, under certain conditions, give rise to that which has all the *appearance* of creation. Shortly before the final overthrow of the earth, there were, I well remember, many very successful experiments in what some philosophers were weak enough to denominate the creation of animalculæ.

Agathos. The cases of which you speak were, in fact, instances of the secondary creation, and of the *only* species of creation which has ever been since the first word spoke into existence the first law.

Oinos. Are not the starry worlds that, from the abyss of nonentity, burst hourly forth into the heavens—are not these stars, Agathos, the immediate handiwork of the King?

Agathos. Let me endeavour, my Oinos, to lead you, step by step, to the conception I intend. You are well aware that, as no thought can perish, so no act is without infinite result. We moved our hands, for example, when we were dwellers on the earth, and in so doing we gave vibration to the atmosphere which engirdled it. This vibration was indefinitely extended till it gave impulse to every particle of the earth's air, which thenceforward, *and for ever*, was actuated by the one movement of the hand. This fact the mathematicians of our globe well knew. They made the special effects, indeed, wrought in the fluid by special impulses, the subject of exact calculation—so that it became easy to determine in what precise period ~~an~~ impulse of given extent would engirdle the orb, and impress (for ever) every atom of the atmosphere circumambient. Retracing, they found no difficulty, from a given effect, under given conditions, in determining the value of the original.

impulse. Now the mathematicians who saw that the results of any given impulse were absolutely endless—and who saw that a portion of these results were accurately traceable through the agency of algebraic analysis—who saw, too, the facility of the retrogradation—these men saw, at the same time, that this species of analysis itself had within itself a capacity for indefinite progress—that there were no bounds conceivable to its advancement and applicability, except within the intellect of him who advanced or applied it. But at this point our mathematicians paused.

Oinos. And why, Agathos, should they have proceeded ?

Agathos. Because there were some considerations of deep interest beyond. It was deducible from what they knew, that to a being of infinite understanding—one to whom the *perfection* of the algebraic analysis lay unfolded—there could be no difficulty in tracing every impulse given the air—and the ether through the air—to the remotest consequences at any even infinitely remote epoch of time. It is indeed demonstrable that every such impulse *given the air*, must *in the end* impress every individual thing that exists *within the universe*;—and the being of infinite understanding—the being whom we have imagined—might trace the remote undulations of the impulse—trace them upward and onward in their influences upon all particles of all matter—upward and onward for ever in their modifications of old forms—or, in other words, *in their creation of new*—until he found them reflected—unimpressive *at last*—back from the throne of the Godhead. And not only could such a being do this, but at any epoch, should a given result be afforded him—should one of these numberless comets, for example, be presented to his inspection—he could have no difficulty in determining, by the analytic retrogradation, to what original impulse it was due. This power of retrogradation in its *absolute fulness and perfection*—this faculty of referring *at all epochs, all effects to all causes*—is of course the prerogative of the Deity alone—but in every variety of degree, short of

the absolute perfection, is the power itself exercised by the whole host of the Angelic Intelligences.

Oinos. But you speak merely of impulses upon the air.

Agathos. In speaking of the air, I referred only to the earth: but the general proposition has reference to impulses upon the ether—which, since it pervades, and alone pervades all space, is thus the great medium of *creation*.

Oinos. Then all motion, of whatever nature, creates?

Agathos. It must: but a true philosophy has long taught that the source of all motion is thought—and the source of all thought is—

Oinos. God.

Agathos. I have spoken to you, Oinos, as to a child, of the fair Earth which lately perished—of impulses upon the atmosphere of the earth.

Oinos. You did.

Agathos. And while I thus spoke, did there not cross your mind some thought of the *physical power of words*? Is not every word an impulse on the air?

Oinos. But why, Agathos, do you weep—and why, oh, why do your wings droop as we hover above this fair star—which is the greenest and yet most terrible of all we have encountered in our flight? Its brilliant flowers look like a fairy dream—but its fierce volcanoes like the passions of a turbulent heart.

Agathos. They *are!*—they *are!* This wild star—it is now three centuries since, with clasped hands, and with streaming eyes, at the feet of my beloved—I spoke it—with a few passionate sentences—into birth. Its brilliant flowers *are* the dearest of all unfulfilled dreams, and its raging volcanoes *are* the passions of the most turbulent and unhallowed of hearts!

THE COLLOQUY OF MONOS AND UNA.

Μέλλοντα επιντά.

These things are in the future.

Sophocles—Antig.

Una. "Born again?"

Monos. Yes, fairest and best beloved Una, "born again." These were the words upon whose mystical meaning I had so long pondered, rejecting the explanations of the priesthood, until Death itself resolved for me the secret.

Una. Death!

Monos. How strangely, sweet Una, you echo my words! I observe, too, a vacillation in your step, a joyous inquietude in your eyes. You are confused and oppressed by the majestic novelty of the Life Eternal. Yes, it was of Death I spoke. And here how singularly sounds that word which of old was wont to bring terror to all hearts, throwing a mildew upon all pleasures!

Una. Ah, Death, the spectre which sate at all feasts! How often, Monos, did we lose ourselves in speculations upon its nature! How mysteriously did it act as a check to human bliss, saying unto it, "thus far, and no farther!" That earnest mutual love, my own Monos, which burned within our bosoms, how vainly did we flatter ourselves, feeling happy in its first upspringing that our happiness would strengthen with its strength! Alas, as it grew, so grew in our hearts the dread of that evil hour which was hurrying to separate us for ever! Thus in time it became painful to love. Hate would have been mercy then.

Monos. Speak not here of these griefs, dear Una—mine, mine for ever now!

Una. But the memory of past sorrow, is it not present joy? I have much to say yet of the things which have been. Above all, I burn to know the incidents of your own passage through the dark Valley and Shadow.

Monos. And when did the radiant Una ask anything of her Monos in vain? I will be minute in relating all, but at what point shall the weird narrative begin?

Una. At what point?

Monos. You have said.

Una. Monos, I comprehend you. In Death we have both learned the propensity of man to define the indefinable. I will not say, then, commence with the moment of life's cessation—but commence with that sad, sad instant when, the fever having abandoned you, you sank into a breathless and motionless torpor, and I pressed down your pallid eyelids with the passionate fingers of love.

Monos. One word first, my Una, in regard to man's general condition at this epoch. You will remember that one or two of the wise among our forefathers—wise in fact, although not in the world's esteem—had ventured to doubt the propriety of the term "improvement," as applied to the progress of our civilisation. There were periods in each of the five or six centuries immediately preceding our dissolution when arose some vigorous intellect, boldly contending for those principles whose truth appears now, to our disenchanted reason, so utterly obvious—principles which should have taught our race to submit to the guidance of the natural laws rather than attempt their control. At long intervals some master-minds appeared, looking upon each advance in practical science as a retrogradation in the true utility. Occasionally the poetic intellect—that intellect which we now feel to have been the most exalted of all—since those truths which to us were of the most enduring importance could only be reached by that *analogy* which speaks in proof-tones to the imagination alone, and to the unaided reason bears no weight—occasionally did this poetic intellect proceed a step farther in the evolving of the vague idea of the philosophic, and find in the mystic parable that tells of the tree of knowledge, and of its forbidden fruit, death-producing, a distinct intimation that knowledge was not meet for man in the infant condition of his soul. And these men—the poets—living and perishing

'amid the scorn of the "utilitarians"—of rough pedants, who arrogated to themselves a title which could have been properly applied only to the scorned—these men, the poets, pondered piningly, yet not unwisely, upon the ancient days when our wants were not more simple than our enjoyments were keen—days when *mirth* was a word unknown, so solemnly deptoned was happiness—holy, august, and blissful days, when blue rivers ran undammed, between hills unhewn, into far forest solitudes, primeval, odorous, and unexplored. Yet these noble exceptions from the general misrule served but to strengthen it by opposition. Alas! we had fallen upon the most evil of all our evil days. The great "movement"—that was the cant term—went on: a diseased commotion, moral and physical. Art—the Arts—arose supreme, and once enthroned, cast chains upon the intellect which had elevated them to power. Man, because he could not but acknowledge the majesty of Nature, fell into childish exultation at his acquired and still-increasing dominion over her elements. Even while he stalked a God in his own fancy, an infantine imbecility came over him. As might be supposed from the origin of his disorder, he grew infected with system, and with abstraction. He enwrapped himself in generalities. Among other odd ideas, that of universal equality gained ground: and in the face of analogy and of God—in despite of the loud warning voice of the laws of *graduation* so visibly pervading all things in Earth and Heaven—wild attempts at an omnipresent Democracy were made. Yet this evil sprang necessarily from the leading evil, Knowledge. Man could not both know and succumb. Meantime huge smoking cities arose, innumerable. Green leaves shrank before the hot breath of furnaces. The fair face of Nature was deformed as with the ravages of some loathsome disease. And methinks, sweet Una, even our slumbering sense of the forced and of the far-fetched might have arrested us here. But now it appears that we had worked out our own destruction in the perversion of our *taste*, or rather in the blind neglect of its culture in the schools. For, in truth, it was at this crisis

that taste alone—that faculty which, holding a middle position between the pure intellect and the moral sense, could never safely have been disregarded—it was now that taste alone could have led us gently back to Beauty, to Nature, and to Life. But alas for the pure contemplative spirit and majestic intuition of Plato! Alas for the *μουσική* which he justly regarded as an all-sufficient education for the soul! Alas for him and for it!—since both were most desperately needed when both were most entirely forgotten or despised.*

Pascal, a philosopher whom we both love, has said, how truly!—“*Que tout notre raisonnement se réduit à céder au sentiment,*” and it is not impossible that the sentiment of the natural, had time permitted it, would have regained its old ascendancy over the harsh mathematical reason of the schools. But this thing was not to be. Prematurely induced by intemperance of knowledge, the old age of the world drew near. This the mass of mankind saw not, or, living lustily although unhappily, affected not to see. But, for myself, the Earth’s records had taught me to look for widest ruin as the price of highest civilisation. I had imbibed a prescience of our Fate from comparison of China the simple and enduring, with Assyria the architect, with Egypt the astrologer, with Nubia, more crafty than either, the turbulent mother of all

* “It will be hard to discover a better [method of education] than that which the experience of so many ages has already discovered: and this may be summed up as consisting in gymnastics for the body, and *music* for the soul.”—*Repub.* lib. 2. “For this reason is a musical education most essential; since it causes Rhythm and Harmony to penetrate most intimately into the soul, taking the strongest hold upon it, filling it with *beauty* and making the man *beautiful-minded*. . . . He will praise and admire the *beautiful*, will receive it with joy into his soul, will feed upon it, and assimilate his own condition with it.”—*Ibid.* lib. 3. Music (*μουσική*) had, however, among the Athenians, a far more comprehensive signification than with us. It included not only the harmonies of time and of tune, but the poetic diction, sentiment and creation, each in its widest sense. The study of *music* was with them, in fact, the general cultivation of the taste—of that which recognises the beautiful—in contradistinction from reason, which deals only with the true.

Arts. In the history * of these regions I met with a ray from the Future. The individual artificialities of the three latter were local diseases of the Earth, and in their individual overthrows we had seen local remedies applied; but for the infected world at large I could anticipate no regeneration save in death. That man, as a race, should not become extinct, I saw that he must be "*born again*."

And now it was, fairest and dearest, that we wrapped our spirits, daily, in dreams. Now it was that, in twilight, we discoursed of the days to come, when the Art-scarred surface of the Earth, having undergone that purification † which alone could efface its rectangular obscenities, should clothe itself anew in the verdure and the mountain-slopes and the smiling waters of Paradise, and be rendered at length a fit dwelling-place for man:—for man the Death-purged—for man to whose now exalted intellect there should be poison in knowledge no more—for the redeemed, regenerated, blissful, and now immortal, but still for the *material*, man.

Una. Well do I remember these conversations, dear Monos; but the epoch of the fiery overthrow was not so near at hand as we believed, and as the corruption you indicate did surely warrant us in believing. Men lived; and died individually. You yourself sickened, and passed into the grave; and thither your constant Una speedily followed you. And though the century which has since elapsed, and whose conclusion brings us thus together once more, tortured our slumbering senses with no impatience of duration, yet, my Monos, it was a century still.

Monos. Say, rather, a point in the vague infinity. Unquestionably, it was in the Earth's dotage that I died. Wearied at heart with anxieties which had their origin in the general turmoil and decay, I succumbed to the fierce fever. After some few days of pain, and many of dreamy delirium replete with ecstasy, the manifestations of which you mistook for

* "History," from *ἱστορεῖν*, to contemplate.

† The word "purification" seems here to be used with reference to its root in the Greek *πυρ*, fire.

pain, while I longed but was impotent to undeceive you—after some days there came upon me, as you have said, a breathless and motionless torpor; and this was termed *Denth* by those who stood around me.

Words are vague things. My condition did not deprive me of sentience. It appeared to me not greatly dissimilar to the extreme quiescence of him, who, having slumbered long and profoundly, lying motionless and fully prostrate in a mid-summer noon, begins to steal slowly back into consciousness, through the mere sufficiency of his sleep, and without being awakened by external disturbances.

I breathed no longer. The pulses were still. The heart had ceased to beat. Volition had not departed, but was powerless. The senses were unusually active, although eccentrically so—assuming often each other's functions at random. The taste and the smell were inextricably confounded, and became one sentiment, abnormal and intense. The rose-water with which your tenderness had moistened my lips to the last, affected me with sweet fancies of flowers—fantastic flowers, far more lovely than any of the old Earth, but whose prototypes we have here blooming around us. The cyclids, transparent and bloodless, offered no complete impediment to vision. As volition was in abeyance, the balls could not roll in their sockets—but all objects within the range of the visual hemisphere were seen with more or less distinctness; the rays which fell upon the external retina, or into the corner of the eye, producing a more vivid effect than those which struck the front or interior surface. Yet, in the former instance, this effect was so far anomalous that I appreciated it only as *sound*—sound sweet or discordant as the matters presenting themselves at my side were light or dark in shade—curved or angular in outline. The hearing, at the same time, although excited in degree, was not irregular in action—estimating real sounds with an extravagance of precision, not less than of sensibility. Touch had undergone a modification more peculiar. Its impressions were tardily received, but pertinaciously retained, and resulted always in the highest physical pleasure.

Thus the pressure of your sweet fingers upon my eyelids, at first only recognised through vision, at length, long after their removal, filled my whole being with a sensual delight immeasurable. I say with a sensual delight. *All* my perceptions were purely sensual. The materials furnished the passive brain by the senses were not in the least degree wrought into shape by the deceased understanding. Of pain there was some little ; of pleasure there was much ; but of moral pain or pleasure none at all. Thus your wild sobs floated into my ear with all their mournful cadences, and were appreciated in their every variation of sad tone ; but they were soft musical sounds and no more ; they conveyed to the extinct reason no intimation of the sorrows which gave them birth ; while large and constant tears which fell upon my face, telling the bystanders of a heart which broke, thrilled every fibre of my frame with ecstasy alone. And this was in truth the *Death* of which these bystanders spoke reverently, in low whispers—you, sweet Una, gaspingly, with loud cries.

They attired me for the coffin—three or four dark figures which flitted busily to and fro. As these crossed the direct line of my vision they affected me as *forms* ; but upon passing to my side their images impressed me with the idea of shrieks, groans, and other dismal expressions of terror, of horror, or of woe. You alone, habited in a white robe, passed in all directions musically about.

The day waned ; and, as its light faded away, I became possessed by a vague uneasiness—an anxiety such as the sleeper feels when sad real sounds fall continuously within his ear—low distant bell-tones, solemn, at long but equal intervals, and commingling with melancholy dreams. Night arrived ; and with its shadows a heavy discomfort. It oppressed my limbs with the oppression of some dull weight, and was palpable. There was also a moaning sound, not unlike the distant reverberation of surf, but more continuous, which, beginning with the first twilight, had grown in strength with the darkness. Suddenly lights were brought into the room, and this reverberation became forthwith interrupted into

frequent unequal bursts of the same sound, but less dreary and less distinct. The ponderous oppression was in a great measure relieved ; and, issuing from the flame of each lamp (for there were many) there flowed unbrokenly into my ears a strain of melodious monotone. And when now, dear Una, approaching the bed upon which I lay outstretched, you sat gently by my side, breathing odour from your sweet lips, and pressing them upon my brow, there arose tremulously within my bosom, and mingling with the merely physical sensations which circumstances had called forth, a something akin to sentiment itself—a feeling that, half appreciating, half responded to your earnest love and sorrow ; but this feeling took no root in the pulseless heart, and seemed indeed rather a shadow than a reality, and faded quickly away, first into extreme quiescence, and then into a purely sensual pleasure as before.

And now, from the wreck and the chaos of the usual senses, there appeared to have arisen within me a sixth, all perfect. In its exercise I found a wild delight—yet a delight still physical, inasmuch as the understanding had in it no part. Motion in the animal frame had fully ceased. No muscle quivered ; no nerve thrilled ; no artery throbbed. But there seemed to have sprung up in the brain *that* of which no words could convey to the merely human intelligence even an indistinct conception. Let me term it a mental pendulous pulsation. It was the moral embodiment of man's abstract idea of *Time*. By the absolute equalization of this movement—or of such as this—had the cycles of the firmamental orbs themselves been adjusted. By its aid I measured the irregularities of the clock upon the mantel, and of the watches of the attendants. Their tickings came sonorously to my ears. The slightest deviations from the true proportion—and these deviations were omnipresent—affected me just as violations of abstract truth were wont on earth to affect the moral sense. Although no two of the timepieces in the chamber struck the individual seconds accurately together, yet I had no difficulty in holding steadily in mind the tones, and the respective momentary errors of each. And this—this keen, perfect self-existing

sentiment of *durātion*—this sentiment existing (as man could not possibly have conceived it to exist) independently of any succession of events—this idea—this sixth sense, upspringing from the ashes of the rest, was the first obvious and certain step of the intemporal soul upon the threshold of the temporal eternity.

It was midnight ; and you still sat by my side. All others had departed from the chamber of Death. They had deposited me in the coffin. The lamps burned flickeringly ; for this I knew by the treinulousness of the monotonous strains. But suddenly these strains diminished in distinctness and in volume. Finally they ceased. The perfume in my nostrils died away. Forms affected my vision no longer. The oppression of the Darkness uplifted itself from my bosom. A dull shot like that of electricity pervaded my frame, and was followed by total loss of the idea of contact. All of what man has termed sense was merged in the sole consciousness of entity, and in the one abiding sentiment of duration. The mortal body had been at length stricken with the hand of the deadly *Decay*.

Yet had not all of sentience departed ; for the consciousness and the sentiment remaining supplied some of its functions by a lethargic intuition. I appreciated the direful change now in operation upon the flesh, and, as the dreamer is sometimes aware of the bodily presence of one who leans over him, so, sweet Una, I still dully felt that you sat by my side. So, too, when the noon of the second day came, I was not unconscious of those movements which displaced you from my side, which confined me within the coffin, which deposited me within the hearse, which bore me to the grave, which lowered me within it, which heaped heavily the mould upon me, and which thus left me, in blackness and corruption, to my sad and solemn slumbers with the worm.

And here in the prison-house which has few secrets to disclose, there rolled away days and weeks and months ; and the soul watched narrowly each second as it flew, and, without effort, took record of its flight—without effort and without object.

A year passed. The consciousness of *being* had grown hourly more indistinct, and that of *where locality* had in great measure usurped its position. The idea of entity was becoming merged in that of *place*. The narrow space immediately surrounding what had been the body was now growing to be the body itself. At length, as often happens to the sleeper (by sleep and its world alone is *Death* imaged)—at length, as sometimes happened on Earth to the deep slumberer, when some flitting light half startled him into awaking, yet left him half enveloped in dreams—so to me, in the strict embrace of the *Shadow*, came that light which alone might have had power to startle—the light of enduring *Love*. Men toiled at the grave in which I lay darkling. They upthrew the damp earth. Upon my mouldering bones there descended the coffin of *Una*.

And now again all was void. That nebulous light had been extinguished. That feeble thrill had vibrated itself into quiescence. Many *lustra* had supervened. Dust had returned to dust. The worm had food no more. The sense of being had at length utterly departed, and there reigned in its stead—instead of all things, dominant and perpetual—the autocrats *Place* and *Time*. For that which *was not*—for that which had no form—for that which had no thought—for that which had no sentience—for that which was soundless, yet of which matter formed no portion—for all this nothingness, yet for all this immortality, the grave was still a home, and the corrosive hours, co-mates.

THE CONVERSATION OF EIROS AND CHARMION.

Ilup eis aporresim
I will bring fire to thee.

Euripides.—*Androm.*

Eiros. Why do you call me Eiros?

Charmion. So henceforward will you always be called. You must forget, too, my earthly name, and speak to me as Charmion,

Eiros. This is indeed no dream!

Charmion. Dreams are with us no more;—but of these mysteries anon. I rejoice to see you looking life-like and rational. The film of the shadow has already passed from off your eyes. Be of heart, and fear nothing. Your allotted days of stupor have expired, and to-morrow I will myself induct you into the full joys and wonders of your novel existence.

Eiros. True—I feel no stupor—none at all. The wild sickness and the terrible darkness have left me, and I hear no longer that mad, rushing, horrible sound, like the “voice of many waters.” Yet my senses are bewildered, Charmion, with the keenness of their perception of the new.

Charmion. A few days will remove all this;—but I fully understand you, and feel for you. It is now ten earthly years since I underwent what you undergo—yet the remembrance of it hangs by me still. You have now suffered all of pain, however, which you will suffer in Aidenn.

Eiros. In Aidenn?

Charmion. In Aidenn.

Eiros. O God!—pity me, Charmion!—I am overburthened with the majesty of all things—of the unknown now known—of the speculative Future merged in the august and certain Present.

Charmion.—Grapple not now with such thoughts. Tomorrow we will speak of this. Your mind wavers, and its agitation will find relief in the exercise of simple memories. Look not around, nor forward—but back. I am burning with anxiety to hear the details of that stupendous event which threw you among us. Tell me of it. Let us converse of familiar things, in the old familiar language of the world which has so fearfully perished.

Eiros. Most fearfully, fearfully!—this is indeed no dream.

Charmion. Dreams are no more. Was I much mourned, my Eiros?

Eiros. Mourned, Charmion?—oh, deeply. To that last hour of all there hung a cloud of intense gloom and devout sorrow over your household.

Charmion. And that last hour—speak of it. Remember that, beyond the naked fact of the catastrophe itself, I know nothing. When, coming out from among mankind, I passed into Night through the Grave—at that period, if I remember aright, the calamity which overwhelmed you was utterly unanticipated. But, indeed, I knew little of the speculative philosophy of the day.

Eiros.—The individual calamity was, as you say, entirely unanticipated; but analogous misfortunes had been long a subject of discussion with astronomers. I need scarce tell you, my friend, that, even when you left us, men had agreed to understand those passages in the most holy writings which speak of the final destruction of all things by fire as having reference to the orb of the earth alone. But in regard to the immediate agency of the ruin, speculation had been at fault from that epoch in astronomical knowledge in which the comets were divested of the terrors of flame. The very moderate density of these bodies had been well established. They had been observed to pass among the satellites of Jupiter without bringing about any sensible alteration either in the masses or in the orbits of these secondary planets. We had long regarded the wanderers as vapoury creations of inconceivable tenuity, and as altogether incapable of doing injury to our substantial globe, even in the event of contact. But contact was not in any degree dreaded; for the elements of all the comets were accurately known. That among them we should look for the agency of the threatened fiery destruction had been for many years considered an inadmissible idea. But wonders and wild fancies had been of late days strangely rife among mankind; and, although it was only with a few of the ignorant that actual apprehension prevailed, upon the announcement by astronomers of a *new* comet, yet this announcement was generally received with I know not what of agitation and mistrust.

The elements of the strange orb were immediately calculated, and it was at once conceded by all observers that its path, at perihelion, would bring it into very close proximity with the

earth. There were two or three astronomers of secondary note who resolutely maintained, that a contact was inevitable. I cannot very well express to you the effect of this intelligence upon the people. For a few short days they would not believe an assertion which their intellect, so long employed among worldly considerations, could not in any manner grasp. But the truth of a vitally important fact soon makes its way into the understanding of even the most stolid. Finally, all men saw that astronomical knowledge lied not, and they awaited the comet. Its approach was not at first seemingly rapid, nor was its appearance of very unusual character. It was of a dull red, and had little perceptible train. For seven or eight days we saw no material increase in its apparent diameter, and but a partial alteration in its colour. Meantime, the ordinary affairs of men were discarded, and all interest absorbed in a growing discussion instituted by the philosophic in respect to the cometary nature. Even the grossly ignorant aroused their sluggish capacities to such considerations. The learned now gave their intellect—their soul—to no such points as the allaying of fear, or to the sustenance of loved theory. They sought—they panted for right views. They groaned for perfected knowledge. *Truth* arose in the purity of her strength and exceeding majesty, and the wise bowed down and adored.

That material injury to our globe or to its inhabitants would result from the apprehended contact was an opinion which hourly lost ground among the wise; and the wise were now freely permitted to rule the reason and the fancy of the crowd. It was demonstrated that the density of the comet's *nucleus* was far less than that of our rarest gas; and the harmless passage of a similar visitor among the satellites of Jupiter was a point strongly insisted upon, and which served greatly to allay terror. Theologists, with an earnestness fear-enkinned, dwelt upon the biblical prophecies, and expounded them to the people with a directness and simplicity of which no previous instance had been known. That the final destruction of the earth must be brought about by the agency of fire, was urged

with a spirit that enforced everywhere conviction ; and that the comets were of no fiery nature (as all men now knew) was a truth which relieved all, in a great measure, from the apprehension of the great calamity foretold. It is noticeable that the popular prejudices and vulgar errors in regard to pestilences and wars—errors which were wont to prevail upon every appearance of a comet—were now altogether unknown, as if by some sudden convulsive exertion reason had at once hurled superstition from her throne. The feeblest intellect had derived vigour from excessive interest.

What minor evils might arise from the contact were points of elaborate question. The learned spoke of slight geological disturbances, of probable alterations in climate, and consequently in vegetation ; of possible magnetic and electric influences. Many held that no visible or perceptible effect would in any manner be produced. While such discussions were going on, their subject gradually approached, growing larger in apparent diameter, and of a more brilliant lustre. Mankind grew paler as it came. All human operations were suspended.

There was an epoch in the course of the general sentiment when the comet had attained, at length, a size surpassing that of any previously recorded visitation. The people now, dismissing any lingering hope that the astronomers were wrong, experienced all the certainty of evil. The chimerical aspect of their terror was gone. The hearts of the stoutest of our race beat violently within their bosoms. A very few days suffered, however, to merge even such feelings in sentiments more unendurable. We could no longer apply to the strange orb *any accustomed* thoughts. Its *historical* attributes had disappeared. It oppressed us with a hideous *novelty* of emotion. We saw it not as an astronomical phenomenon in the heavens, but as an incubus upon our hearts and a shadow upon our brains. It had taken, with unconceivable rapidity, the character of a gigantic mantle of rare flame, extending from horizon to horizon.

Yet a day, and men breathed with greater freedom. It was clear that we were already within the influence of the comet :

yet we lived. We even felt an unusual elasticity of frame and vivacity of mind. The exceeding tenuity of the object of our dread was apparent; for all heavenly objects were plainly visible through it. Meantime, our vegetation had perceptibly altered; and we gained faith, from this predicted circumstance, in the foresight of the wise. A wild luxuriance of foliage, utterly unknown before, burst out upon every vegetable thing.

Yet another day—and the evil was not altogether upon us. It was now evident that its nucleus would first reach us. A wild change had come over all men; and the first sense of *pain* was the wild signal for general lamentation and horror. The first sense of pain lay in a rigorous constriction of the breast and lungs, and an insufferable dryness of the skin. It could not be denied that our atmosphere was radically affected; the conformation of this atmosphere and the possible modifications to which it might be subjected, were now the topics of discussion. The result of investigation sent an electric thrill of the intensest terror through the universal heart of man.

It had been long known that the air which encircled us was a compound of oxygen and nitrogen gases, in the proportion of twenty-one measures of oxygen and seventy-nine of nitrogen in every one hundred of the atmosphere. Oxygen, which was the principle of combustion, and the vehicle of heat, was absolutely necessary to the support of animal life, and was the most powerful and energetic agent in nature. Nitrogen, on the contrary, was incapable of supporting either animal life or flame. An unnatural excess of oxygen would result, it had been ascertained, in just such an elevation of the animal spirits as we had latterly experienced. It was the pursuit, the extension of the idea, which had engendered awe. What would be the result of a *total extraction of the nitrogen?* A combustion irresistible, all-devouring, omni-prevalent, immediate;—the entire fulfilment, in all their minute and terrible details, of the fiery and horror-inspiring denunciations of the prophecies of the Holy Book.

Why need I paint, Charmion, the now disenchained frenzy of mankind? That tenuity in the comet which had previously

inspired us with hope, was now the source of the bitterness of despair. In its impalpable gaseous character we clearly perceived the consummation of Fate. Meantime a day again passed-- bearing away with it the last shadow of Hope. We gasped in the rapid modification of the air. The red blood bounded tumultuously through its strict channels. A furious delirium possessed all men ; and with arms rigidly outstretched towards the threatening heavens, they trembled and shrieked aloud. But the nucleus of the destroyer was now upon us ;— even here in Aidenn I shudder while I speak. Let me be brief—brief as the ruin that overwhelmed. For a moment there was a wild lurid light alone, visiting and penetrating all things. Then—let us bow down, Charmion, before the excessive majesty of the great God !—then, there came a shouting and pervading sound, as if from the mouth itself of HIM ; while the whole incumbent mass of ether in which we existed, burst at once into a species of intense flame, for whose surpassing brilliancy and all-servid heat even the angels in the high Heaven of pure knowledge have no name. Thus ended all.

SHADOW.—A PARABLE.

Yea ! though I walk through the valley of the *Shadow*.
—*Psalms of David.*

YE who read are still among the living ; but I who write shall have long since gone my way into the region of shadows. For indeed strange things shall happen, and secret things be known, and many centuries shall pass away, ere these memorials be seen of men. And, when seen, there will be some to disbelieve and some to doubt, and yet a few who will find much to ponder upon in the characters here graven with a stylus of iron.

The year had been a year of terror, and of feelings more intense than terror for which there is no name upon the earth. For many prodigies and signs had taken place, and far and

wide, over sea and land, the black wings of the Pestilence were spread abroad. To those nevertheless, cunning in the stars, it was not unknown that the heavens wore an aspect of ill ; and to me, the Greek Omos, among others, it was evident that now had arrived the alternation of that seven hundred and ninety-fourth year when, at the entrance of Aries, the planet Jupiter is enjoined with the red ring of the terrible Saturnus. The peculiar spirit of the skies, if I mistake not greatly, made itself manifest, not only in the physical orb of the earth, but in the souls, imaginations, and meditations of mankind.

Over some flasks of the red Chian wine, within the walls of a noble hall, in a dim city called Ptolemais, we sat, at night, a company of seven. And to our chamber there was no entrance save by a lofty door of brass : and the door was fashioned by the artisan Corinno, and, being of rare workmanship, was fastened from within. Black draperies, likewise, in the gloomy room, shut out from our view the moon, the lurid stars, and the peopleless streets—but the boding and the memory of Evil, they would not be so excluded. There were things around us and about of which I can render no distinct account —things material and spiritual—heaviness in the atmosphere—a sense of suffocation—anxiety—and, above all, that terrible state of existence which the nervous experience when the senses are keenly living and awake, and meanwhile the powers of thought lie dormant. A dead weight hung upon us. It hung upon our limbs—upon the household furniture—upon the goblets from which we drank ; and all things were depressed, and borne down thereby—all things save only the flames of the seven iron lamps which illuminated our revel. Uprearing themselves in tall slender lines of light, they thus remained burning all pallid and motionless ; and in the mirror which their lustre formed upon the round table of ebony at which we sat each of us there assembled beheld the pallor of his own countenance, and the unquiet glare in the downcast eyes of his companions. Yet we laughed and were merry in our proper way—which was hysterical ; and sang the songs of

Anacreon—which are madness ; and drank deeply—although the purple wine reminded us of blood. For there was yet another tenant of our chamber in the person of young Zoilus. Dead and at full length he lay, enshrouded ;—the genius and the demon of the scene. Alas ! he bore no portion in our mirth, save that his countenance, distorted with the plague, and his eyes in which Death had but half extinguished the fire of the pestilence, seemed to take such an interest in our merriment as the dead may haply take in the merriment of those who are to die. But although I, Oinos, felt that the eyes of the departed were upon me, still I forced myself not to perceive the bitterness of their expression, and gazing down steadily into the depths of the ebony mirror, sang with a loud and sonorous voice the songs of the son of Teos. But gradually my songs they ceased, and their echoes, rolling afar off among the sable draperies of the chamber, became weak, and undistinguishable, and so faded away. And lo ! from among those sable draperies, where the sounds of the song departed, there came forth a dark and undefined shadow—a shadow such as the moon, when low in heaven, might fashion from the figure of a man : but it was the shadow neither of man, nor of God, nor of any familiar thing. And quivering awhile among the draperies of the room, it at length rested in full view upon the surface of the door of brass. But the shadow was vague, and formless, and indefinite, and was the shadow neither of man nor God—neither God of Greece, nor God of Chaldea, nor any Egyptian God. And the shadow rested upon the brazen doorway, and under the arch of the entablature of the door and moved not, nor spoke any word, but there became stationary and remained. And the door whereupon the shadow rested was, if I remember aright, over against the feet of the young Zoilus enshrouded. But we, the seven there assembled, having seen the shadow as it came out from among the draperies, dared not steadily behold it, but cast down our eyes, and gazed continually into the depths of the mirror of ebony. And at length I, Oinos, speaking some low words, demanded of the shadow its dwelling and its

appellation. And the shadow answered, "I am SHADOW, and my dwelling is near to the Catacombs of Ptolemais, and hard by those dim plains of Helusion which border upon the foul Charonian canal." And then did we, the seven, start from our seats in horror, and stand trembling, and shuddering, and aghast: for the tones in the voice of the shadow were not the tones of any one being, but of a multitude of beings, and varying in their cadences from syllable to syllable, fell duskily upon our ears in the well remembered and familiar accents of many thousand departed friends.

SILENCE.—A FABLE.

‘Ειδενσιν δ' ορ νν κενθα τι και φραγγις
ΙΙρωτε τι και χερπόρας

ALCMAN.

The mountain pinnacles slumber; valleys, cings, and caves are silent.

"LISTEN to me," said the Demon, as he placed his hand upon my head. "The region of which I speak is a dreary region in Libya, by the borders of the river Zaire. And there is no quiet there, nor silence.

"The waters of the river have a sallow and sickly hue; and they flow not onward to the sea, but palpitate for ever and for ever beneath the red eye of the sun with a tumultuous and convulsive motion. For many miles on either side of the river's oozy bed is a pale desert of gigantic water-lilies. They sigh one unto the other in that solitude, and stretch towards the heaven their long and ghastly necks, and nod to and fro their everlasting heads. And there is an indistinct murmur which cometh out from among them like the rushing of subterranean water. And they sigh one unto the other,

"But there is a boundary to their realm—the boundary of the dark, horrible, lofty forest. There, like the waves about the Hebrides, the low underwood is agitated continually.

But there is no wind throughout the heaven. And the tall primeval trees rock eternally hither and thither with a crashing and mighty sound. And from their high summits, one by one, drop everlasting dews. And at the roots, strange poisonous flowers lie writhing in perturbed slumber. And overhead, with a rustling and loud noise, the grey clouds rush westwardly for ever, until they roll, a cataract, over the fiery wall of the horizon. But there is no wind throughout the heaven. And by the shores of the river Zaire there is neither quiet nor silence.

"It was night, and the rain fell; and, falling, it was rain, but, having fallen, it was blood. And I stood in the morass among the tall lilies, and the rain fell upon my head—and the lilies sighed one unto the other in the solemnity of their desolation.

"And, all at once, the moon arose through the thin ghastly mist, and was crimson in colour. And mine eyes fell upon a huge grey rock which stood by the shore of the river, and was lighted by the light of the moon. And the rock was grey, and ghastly, and tall,—and the rock was grey. Upon its front were characters engraven in the stone; and I walked through the morass of water-lilies, until I came close unto the shore, that I might read the characters upon the stone. But I could not decipher them. And I was going back into the morass, when the moon shone with a fuller red, and I turned and looked again upon the rock, and upon the characters;—and the characters were DESOLATION.

"And I looked upwards, and there stood a man upon the summit of the rock; and I hid myself among the water-lilies that I might discover the actions of the man. And the man was tall and stately in form, and was wrapped up from his shoulders to his feet in the toga of old Rome. And the outlines of his figure were indistinct—but his features were the features of a deity; for the mantle of the night, and of the mist, and of the moon, and of the dew, had left uncovered the features of his face. And his brow was lofty with thought, and his eye wild with care; and, in the few furrows upon him

cheek, I read the fables of sorrow, and weariness, and disgust with mankind, and a longing after solitude.

"And the man sat upon the rock, and leaned his head upon his hand, and looked out upon the desolation. He looked down into the low unquiet shrubbery, and up into the tall primeval trees, and up higher at the rustling heaven, and into the crimson moon. And I lay close within shelter of the lilies, and observed the actions of the man. And the man trembled in the solitude ;—but the night waned, and he sat upon the rock.

"And the man turned his attention from the heaven, and looked out upon the dreary river Zaire, and upon the yellow ghastly waters, and upon the pale legions of the water-lilies. And the man listened to the sighs of the water-lilies, and to the murmur that came up from among them. And I lay close within my covert and observed the actions of the man. And the man trembled in the solitude ;—but the night waned, and he sat upon the rock.

"Then I went down into the recesses of the morass, and waded afar in among the wilderness of the lilies, and called unto the hippopotami which dwelt among the fens in the recesses of the morass. And the hippopotami heard my call, and came, with the behemoth, unto the foot of the rock, and roared loudly and fearfully beneath the moon. And I lay close within my covert and observed the actions of the man. And the man trembled in the solitude ;—but the night waned, and he sat upon the rock.

"Then I cursed the elements with the curse of tumult ; and a frightful tempest gathered in the heaven, where before there had been no wind. And the heaven became livid with the violence of the tempest—and the rain beat upon the head of the man—and the floods of the river came down—and the river was tormented into foam—and the water-lilies shrieked within their beds—and the forest crumbled before the wind—and the thunder rolled—and the lightning fell—and the rock rocked to its foundation. And I lay close within my covert and observed the actions of the man. And the man trembled in the solitude ;—but the night waned, and he sat upon the rock.

"Then I grew angry and cursed, with the curse of silence, the river, and the lilies, and the wind, and the forest, and the heaven, and the thunder, and the sighs of the water-lilies. And they became accursed, and *were still*. And the moon ceased to totter up its pathway to heaven—and the thunder died away—and the lightning did not flash—and the clouds hung motionless—and the waters sunk to their level and remained—and the trees ceased to rock—and the water-lilies sighed no more—and the murmur was heard no longer from among them, nor any shadow of sound throughout the vast illimitable desert. And I looked upon the characters of the rock, and they were changed ;—and the characters were SILENCE.

"And mine eyes fell upon the countenance of the man, and his countenance was wan with terror. And, hurriedly, he raised his head from his hand, and stood forth upon the rock and listened. But there was no voice throughout the vast illimitable desert, and the characters upon the rock were SILENCE. And the man shuddered, and turned his face away, and fled afar off, in haste, so that I beheld him no more."

Now there are fine tales in the volumes of the Magi—in the iron-bound, melancholy volumes of the Magi. Therein, I say, are glorious histories of the Heaven, and of the Earth, and of the mighty Sea—and of the Genii that overruled the sea, and the earth, and the lofty heaven. There was much lore, too, in the sayings which were said by the sybils; and holy, holy things were heard of old by the dim leaves that trembled around Dodona—but, as Allah liveth, that fable which the demon told me as he sat by my side in the shadow of the tomb, I hold to be the most wonderful of all! And as the Demon made an end of his story, he fell back within the cavity of the tomb and laughed. And I could not laugh with the Demon, and he cursed me because I feare not laugh. And the lynx which dwelleth for ever in mist, nb, came out therefrom, and lay down at the feet of the feature and looked at him steadily in the face.
and his

ESSAYS.

THE POETIC PRINCIPLE.

IN speaking of the Poetic Principle, I have no design to be either thorough or profound. While discussing very much at random the essentiality of what we call Poetry, my principal purpose will be to cite for consideration some few of those minor English or American poems which best suit my own taste, or which, upon my own fancy, have left the most definite impression. By "minor poems" I mean, of course, poems of little length. And here, in the beginning, permit me to say a few words in regard to a somewhat peculiar principle, which, whether rightfully or wrongfully, has always had its influence in my own critical estimate of the poem. I hold that a long poem does not exist. I maintain that the phrase, "a long poem," is simply a flat contradiction in terms.

I need scarcely observe that a poem deserves its title only inasmuch as it excites, by elevating the soul. The value of the poem is in the ratio of this elevating excitement. But all excitements are, through a psychal necessity, transient. That degree of excitement which would entitle a poem to be so called at all, cannot be sustained throughout a composition of any great length. After the lapse of half an hour, at the very utmost, it flags—fails—a revulsion ensues—and then the poem is, in effect, and in fact, no longer such.

There are, no doubt, many who have found difficulty in reconciling the critical dictum that the "Paradise Lost" is to be devoutly admired throughout, with the absolute impossibility of maintaining for it, during perusal, the amount of

enthusiasm which that critical dictum would demand. This great work, in fact, is to be regarded as poetical only when, losing sight of that vital requisite in all works of Art, Unity, we view it merely as a series of minor poems. If, to preserve its Unity—its totality of effect or impression—we read it (as would be necessary) at a single sitting, the result is but a constant alternation of excitement and depression. After a passage of what we feel to be true poetry, there follows, inevitably, a passage of platitude which no critical pre-judgment can force us to admire; but if, upon completing the work, we read it again; omitting the first book—that is to say, commencing with the second—we shall be surprised at now finding that admirable which we before condemned—that damnable which we had previously so much admired. It follows from all this that the ultimate, aggregate, or absolute effect of even the best epic under the sun, is a nullity—and this is precisely the fact.

In regard to the Iliad, we have, if not positive proof, at least very good reason, for believing it intended as a series of lyrics; but, granting the epic intention, I can say only that the work is based in an imperfect sense of Art. The modern epic is, of the supposititious ancient model, but an inconsiderate and blindfold imitation. But the day of these artistic anomalies is over. If, at any time, any very long poem were popular in reality—which I doubt—it is at least clear that no very long poem will ever be popular again.

That the extent of a poetical work is, *ceteris paribus*, the measure of its merit, seems undoubtedly, when we thus state it, a proposition sufficiently absurd—yet we are indebted for it to the Quarterly Reviews. Surely there can be nothing in mere size, abstractly considered—there can be nothing in mere bulk, so far as a volume is concerned, which has so continuously elicited admiration from these saturnine pamphlets! A mountain, to be sure, by the mere sentiment of physical magnitude which it conveys, *does* impress us with a sense of the sublime—but no man is impressed after *this fashion* by the material grandeur of even “The Columbiad.” Even the

Quarterlies have not instructed us to be so impressed by it. *As yet*, they have not insisted on our estimating Lamartine by the cubic foot, or Pollock by the pound—but what else are we to infer from their continual prating about “sustained effort”? If, by “sustained effort,” any little gentleman has accomplished an epic, let us frankly commend him for the effort—if this indeed be a thing commendable—but let us forbear praising the epic on the effort’s account. It is to be hoped that common sense, in the time to come, will prefer deciding upon a work of Art rather by the impression it makes—by the effect it produces—than by the time it took to impress the effect, or by the amount of “sustained effort” which had been found necessary in effecting the impression. The fact is, that perseverance is one thing and genius quite another—nor can all the Quarterlies in Christendom confound them. By and by, this proposition, with many which I have been just urging, will be received as self-evident. In the meantime, by being generally condemned as falsities, they will not be essentially damaged as truths.

On the other hand, it is clear that a poem may be improperly brief. Undue brevity degenerates into mere epigrammatism. A very short poem, while now and then producing a brilliant or vivid, never produces a profound or enduring effect. There must be the steady pressing down of the stamp upon the wax. De Béranger has wrought innumerable things, pungent and spirit-stirring, but in general they have been too imponderous to stamp themselves deeply into the public attention, and thus, as so many feathers of fancy, have been blown aloft only to be whistled down the wind.

A remarkable instance of the effect of undue brevity in depressing a poem, in keeping it out of the popular view, is afforded by the following exquisite little Serenade:—

I arise from dreams of thee
In the first sweet sleep of night
When the winds are breathing low,
And the stars are shining bright.

I arise from dreams of thee,
 And a spirit in my feet
 Has led me — who knows how? —
 To thy chamber-window, sweet!

The wandering airs they faint
 On the dark the silent stream—
 The champak odours fail
 Like sweet thoughts in a dream;
 The nightingale's complaint,
 It dies upon her heart,
 As I must die on thine,
 O, beloved as thou art!

O, lift me from the grass!
 I die, I faint, I fail!
 Let thy love in kisses rain
 On my lips and eyehds pale.
 My cheek is cold and white, alas!
 My heart beats loud and fast:
 O! press it close to thine again,
 Where it will break at last!

Very few perhaps are familiar with these lines, yet no less a poet than Shelley is their author. Their warm, yet delicate and ethereal imagination will be appreciated by all, but by none so thoroughly as by him who has himself arisen from sweet dreams of one beloved to bathe in the aromatic air of a southern midsummer night.

One of the finest poems by Willis, the very best in my opinion which he has ever written, has no doubt, through this same defect of undue brevity, been kept back from its proper position, not less in the critical than in the popular view:—

The shadows lay along Broadway,
 'Twas near the twilight-tide—
 And slowly there a lady fair
 Was walking in her pride.
 Alone walk'd she; but, viewlessly,
 Walk'd spirits at her side.

Peace charm'd the street beneath her feet,
 And Honour charm'd the air ;
 And all astir looked kind on her,
 And called her good as fair—
 For all God ever gave to her
 She kept with chary care.

She kept with care her beauties rare
 From lovers warm and true—
 For heart was cold to all but gold,
 And the rich came not to woo—
 But honou'ld well her charms to sell,
 It priests the selling do.

Now walking there was one more fair—
 A slight girl, lily-pale ;
 And she had unseen company
 To make the spirit qual—
 'Twixt Want and Scorn she walk'd forlorn
 And nothing could avail.

No mercy now can clear her brow
 From this world's price to pray,
 For as love's wild prayer dissolved in air,
 Her woman's heart gave way !—
 But the sin forgiven by Christ in Heaven,
 By man is cursed alway !

In this composition we find it difficult to recognise the Willis who has written so many mere "verses of society." The lines are not only richly ideal but full of energy, while they breathe an earnestness, an evident sincerity of sentiment, for which we look in vain throughout all the other works of this author.

While the epic mania, while the idea that to merit in poetry prolixity is indispensable, has for some years past been gradually dying out of the public mind, by mere dint of its own absurdity, we find it succeeded by a heresy too palpably false to be long tolerated, but one which, in the brief period it has already endured, may be said to have accomplished more in the corruption of our Poetical Literature than all its other

enemies combined. I allude to the heresy of *The Didactic*. It has been assumed, tacitly and avowedly, directly and indirectly, that the ultimate object of all Poetry is Truth. Every poem, it is said, should inculcate a moral, and by this moral is the poetical merit of the work to be adjudged. We Americans especially have patronized this happy idea, and we Bostonians very especially have developed it in full. We have taken it into our heads that to write a poem simply for the poem's sake, and to acknowledge such to have been our design, would be to confess ourselves radically wanting in the true poetic dignity and force:—but the simple fact is that would we but permit ourselves to look into our own souls we should immediately there discover that under the sun there neither exists nor *can* exist any work more thoroughly dignified, more supremely noble, than this very poem, this poem *per se*, this poem which is a poem and nothing more, this poem written solely for the poem's sake.

With as deep a reverence for the True as ever inspired the bosom of man, I would nevertheless limit, in some measure, its modes of inculcation. I would limit to enforce them. I would not enfeeble them by dissipation. The demands of Truth are severe. She has no sympathy with the myrtles. All *that* which is so indispensable in Song is precisely all *that* with which *she* has nothing whatever to do. It is but making her a flaunting paradox to wreath her in genus and flowers. In enforcing a truth we need severity rather than efflorescence of language. We must be simple, precise, terse. We must be cool, calm, unimpassioned. In a word, we must be in that mood which, as nearly as possible, is the exact converse of the poetical. He must be blind indeed who does not perceive the radical and chasmal difference between the truthful and the poetical modes of inculcation. He must be theory-mad beyond redemption who, in spite of these differences, shall still persist in attempting to reconcile the obstinate oils and waters of Poetry and Truth.

Dividing the world of mind into its three most immediately obvious distinctions, we have the Pure Intellect, Taste, and the

Moral Sense. I place Taste in the middle because it is just this position which in the mind it occupies. It holds intimate relations with either extreme; but from the Moral Sense is separated by so faint a difference that Aristotle has not hesitated to place some of its operations among the virtues themselves. Nevertheless we find the *offices* of the trio marked with a sufficient distinction. Just as the Intellect concerns itself with Truth, so Taste informs us of the Beautiful, while the Moral Sense is regardful of Duty. Of this latter, while Conscience teaches the obligation, and Reason the expediency, Taste contents herself with displaying the charms, waging war upon Vice solely on the ground of her deformity, her disproportion, her animosity to the fitting, to the appropriate, to the harmonious, in a word, to Beauty.

An immortal instinct deep within the spirit of man is thus plainly a sense of the Beautiful. This it is which administers to his delight in the manifold forms, and sounds, and odours, and sentiments amid which he exists. And just as the lily is repeated in the lake, or the eyes of Amaryllis in the mirror, so is the mere oral or written repetition of these forms, and sounds, and colours, and odours, and sentiments a duplicate source of delight. But this mere repetition is not poetry. He who shall simply sing, with however glowing enthusiasm, or with however vivid a truth of description, of the sights, and sounds, and odours, and colours, and sentiments which greet *him* in common with all mankind—he, I say, has yet failed to prove his divine title. There is still a something in the distance which he has been unable to attain. We have still a thirst unquenchable, to allay which he has not shown us the crystal spring. This thirst belongs to the immortality of Man. It is at once a consequence and an indication of his perennial existence. It is the desire of the moth for the star. It is no mere appreciation of the Beauty before us, but a wild effort to reach the Beauty above. Inspired by an ecstatic prescience of the glories beyond the grave, we struggle by multiform combinations among the things and thoughts of Time to attain a portion of that Loveliness whose very elements

perhaps appertain to eternity alone. And thus when by Poetry, or when by Music, the most entrancing of the poetic moods, we find ourselves melted into tears, we weep then, not as the Abbate Gravina supposes, through excess of pleasure, but through a certain petulant, impatient sorrow at our inability to grasp *now*, wholly, here on earth, at once and for ever, those divine and rapturous joys of which *through* the poem, or *through* the music, we attain to but brief and indeterminate glimpses.

The struggle to apprehend the supernal Loveliness—this struggle, on the part of souls fittingly constituted—has given to the world all *that* which it (the world) has ever been enabled at once to understand and *to feel* as poetic.

The Poetic Sentiment, of course, may develop itself in various modes—in Painting, in Sculpture, in Architecture, in the Dance—very especially in Music—and very peculiarly, and with a wide field, in the composition of the Landscape Garden. Our present theme, however, has regard only to its manifestation in words. And here let me speak briefly on the topic of rhythm. Contenting myself with the certainty that Music, in its various modes of metric, rhythm, and rhyme, is of so vast a moment in Poetry as never to be wisely rejected—is so vitally important an adjunct, that he is simply silly who declines its assistance, I will not now pause to maintain its absolute essentiality. It is in Music perhaps that the soul most nearly attains the great end for which when inspired by the Poetic Sentiment, it struggles—the creation of supernal Beauty. It *may* be, indeed, that here this sublime end is, now and then, attained in *fact*. We are often made to feel, with a shivering delight, that from an earthly harp are stricken notes which *cannot* have been unfamiliar to the angels. And thus there can be little doubt that in the union of Poetry with Music in its popular sense, we shall find the widest field for the Poetic development. The old Bards and Minnesingers had advantages which we do not possess—and Thomas Moore, singing his own songs, was, in the most legitimate manner, perfecting them as poems.

To recapitulate then:—I would define, in brief, the Poetry of words as *The Rhythmic Creation of Beauty*. Its sole arbiter is Taste. With the Intellect or with the Conscience it has only collateral relations. Unless incidentally, it has no concern whatever either with Duty or with Truth.

A few words, however, in explanation. That pleasure which is at once the most pure, the most elevating, and the most intense, is derived, I maintain, from the contemplation of the Beautiful. In the contemplation of Beauty we alone find it possible to attain that pleasurable elevation, or excitement of the soul, which we recognise as the Poetic Sentiment, and which is so easily distinguished from Truth, which is the satisfaction of the Reason, or from Passion, which is the excitement of the heart. I make Beauty, therefore—using the word as inclusive of the sublime—I make Beauty the province of the poem, simply because it is an obvious rule of Art that effects should be made to spring as directly as possible from their causes:—no one as yet having been weak enough to deny that the peculiar elevation in question is at least *most readily* attainable in the poem. It by no means follows, however, that the incitements of Passion, or the precepts of Duty, or even the lessons of Truth, may not be introduced into a poem, and with advantage; for they may subserve incidentally, in various ways, the general purposes of the work: but the true artist will always contrive to tone them down in proper subjection to that *Beauty* which is the atmosphere and the real essence of the poem.

I cannot better introduce the few poems which I shall present for your consideration, than by the citation of the Proem to Longfellow's "Waif":—

The day is done, and the darkness
Falls from the wings of Night,
As a feather is wasted downward
From an Eagle in his flight.

I see the lights of the village
Gleam through the rain and the mist,
And a feeling of sadness comes o'er me,
That my soul cannot resist;

A feeling of sadness and longing,
 That is not akin to pain,
 And resembles sorrow only
 As the mist resembles the rain.

Come, read to me some poem,
 Some simple and heartfelt lay,
 That shall soothe this restless feeling,
 And banish the thoughts of day.

Not from the grand old masters,
 Not from the bards sublime,
 Whose distant footsteps echo
 Through the corridors of Time

For, like strains of martial music,
 Their mighty thoughts suggest
 Life's endless toil and endeavour ;
 And to-night I long for rest.

Read from some humbler poet,
 Whose songs gushed from his heart,
 As showers from the clouds of summer,
 Or tears from the eyelids start ;

Who through long days of labour,
 And nights devoid of ease,
 Still heard in his soul the music
 Of wonderful melodies.

Such songs have power to quiet
 The restless pulse of care,
 And come like the benediction
 That follows after prayer.

Then read from the treasured volume
 The poem of thy choice,
 And lend to the rhyme of the poet
 The beauty of thy voice.

And the night shall be filled with music,
 And the cares that infest the day,
 Shall fold their tents like the Arabs,
 And as silently steal away.

With no great range of imagination, these lines have been justly admired for their delicacy of expression. Some of the images are very effective. Nothing can be better than—

————— the bards sublime,
Whose distant footsteps echo
Down the corridors of Time.

The idea of the last quatrain is also very effective. The poem on the whole, however, is chiefly to be admired for the graceful *insouciance* of its metre, so well in accordance with the character of the sentiments, and especially for the *ease* of the general manner. This “*ease*” or naturalness, in a literary style, it has long been the fashion to regard as ease in appearance alone—as a point of really difficult attainment. But not so:—a natural manner is difficult only to him who should never meddle with it—to the unnatural. It is but the result of writing with the understanding, or with the instinct, that *the tone*, in composition, should always be that which the mass of mankind would adopt—and must perpetually vary, of course, with the occasion. The author who, after the fashion of *The North American Review*, should be upon *all* occasions merely “quiet,” must necessarily upon *many* occasions be simply silly, or stupid; and has no more right to be considered “easy” or “natural” than a Cockney exquisite, or than the sleeping Beauty in the waxworks.*

Among the minor poems of Bryant, none has so much impressed me as the one which he entitles “June.” I quote only a portion of it:—

There, through the long, long summer hours,
The golden light should lie,
And thick young herbs and groups of flowers
Stand in their beauty by.
The oriole should build and tell
His love-tale, close beside my cell;
The idle butterfly
Should rest him there, and there be heard
The housewife bee and humming bird.

And what, if cheerful shouts at noon,
 Come, from the village sent,
 Or songs of maids, beneath the moon,
 With fairy laughter blent?
 And what if, in the evening light,
 Beloved lovers walk in sight
 Of my low monument?
 I would the lovely scene around
 Might know no sadder sight nor sound.

I know, I know I should not see
 The season's glorious show,
 Nor would its brightness shine for me;
 Nor its wild music flow,
 But if, around my place of sleep,
 The friends I love should come to weep,
 They might not hest to go
 Soft airs and song and light and bloom,
 Should keep them lingering by my tomb.

Those to their soften'd hearts should be,
 The thought of what has been,
 And speak of one who cannot share
 The gladness of the scene,
 Whose part in all the pomp that fills
 The circuit of the summer hills,
 Is—that his grave is green,
 And deeply would their hearts rejoice
 To hear again his living voice.

The rhythmical flow here is even voluptuous—nothing could be more melodious. The poem has always affected me in a remarkable manner. The intense melancholy which seems to well up, perforce, to the surface of all the poet's cheerful sayings about his grave, we find thrilling us to the soul—while there is the truest poetic elevation in the thrill. The impression left is one of a pleasurable sadness. And if, in the remaining compositions which I shall introduce to you, there be more or less of a similar tone always apparent, let me remind you that (how or why we know not) this certain

taint of sadness is inseparably connected with all the higher manifestations of true Beauty. • It is, nevertheless,

A feeling of sadness and longing
That is not akin to pain,
And resembles sorrow only
As the mist resembles the rain.

The taint of which I speak is clearly perceptible even in a poem so full of brilliancy and spirit as "The Health" of Edward Coote Pinkney :—

I fill this cup to one made up
Of loveliness alone,
A woman, of her gentle sex
The seeming paragon ;
To whom the better elements
And kindly stars have given
A form so fair, that like the air,
'Tis less of earth than heaven.

Her every tone is music's own,
Like those of morning birds,
And something more than melody
Dwells ever in her words ;
The courage of her heart are they,
And from her lips each flows
As one may see the burden'd bee
Forth issue from the rose

Affections are as thoughts to her,
The measures of her hours ,
Her feelings have the fragrance,
The freshness of young flowers ;
And lovely passions, changin' oft,
So fill her, she appears
The image of themselves by turns,—
The idol of past years !

Of her bright face one glance will trace
A picture on the brain,
And of her voice in echoing hearts
A sound must long remain ,
But memory, such as mine of her,
So very much endears,
When death is nigh my latest sigh
Will not be life's, but hers.

I fill'd this cup to one made up
Of loveliness alone,
A woman, of her gentle sex
The seeming paragon—
Her health ! and would on earth there stood,
Some more of such a frame,
That life might be all poetry,
And weariness a name.

It was the misfortune of Mr. Pinkney to have been born too far south. Had he been a New Englander, it is probable that he would have been ranked as the first of American lyrists by that magnanimous cabal which has so long controlled the destinies of American Letters, in conducting the thing called *The North American Review*. The poem just cited is especially beautiful; but the poetic elevation which it induces we must refer chiefly to our sympathy in the poet's enthusiasm. We pardon his hyperboles for the evident earnestness with which they are uttered.

It was by no means my design, however, to expatiate upon the *merits* of what I should read you. These will necessarily speak for themselves. Boccalini, in his *Advertisements from Parnassus*, tells us that Zoilus once presented Apollo a very caustic criticism upon a very admirable book:—whereupon the god asked him for the beauties of the work. He replied that he only busied himself about the errors. On hearing this, Apollo, handing him a sack of unwinnowed wheat, bade him pick out *all the chaff* for his reward.

Now this fable answers very well as a hit at the critics—but I am by no means sure that the god was in the right. I am by no means certain that the true limits of the critical duty are not grossly misunderstood. Excellence, in a poem especially, may be considered in the light of an axiom, which need only be properly *put*, to become self-evident. It is *not* excellence if it require to be demonstrated as such:—and thus to point out too particularly the merits of a work of Art, is to admit that they are *not* merits altogether.

Among the “Melodies” of Thomas Moore is one whose

distinguished character as a poem proper seems to have been singularly left out of view. I allude to his lines beginning—“Come, rest in this bosom.” The intense energy of their expression is not surpassed by anything in Byron. There are two of the lines in which a sentiment is conveyed that embodies^s the *all in all* of the divine passion of Love—a sentiment which, perhaps, has found its echo in more, and in more passionate, human hearts than any other single sentiment ever embodied in words :—

Come, rest in this bosom, my own stricken deer,
Though the herd have fled from thee, thy home is still here ;
Here still is the smile, that no cloud can o'ercast,
And a heart and a hand all thy own to the last.

Oh ! what was love made for, if 'tis not the same
Through joy and through torment, through glory and shame ?
I know not, I ask not, if guilt's in that heart,
I but know that I love thee, whatever thou art.

Thou hast call'd me thy Angel in moments of bliss,
And thy Angel I'll be, 'mid the horrors of this,—
Through the furnace, unshrinking, thy steps to pursue,
And shild thee, and save thee, —or perish there too !

It has been the fashion of late days to deny Moore Imagination, while granting him Fancy—a distinction originating with Coleridge—than whom no man more fully comprehended the great powers of Moore. The fact is, that the fancy of this poet so far predominates over all his other faculties, and over the fancy of all other men, as to have induced, very naturally, the idea that he is fanciful *only*. But never was there a greater mistake. Never was a grosser wrong done the fame of a true poet. In the compass of the English language I can call to mind no poem more profoundly—more weirdly *imaginative*, in the best sense, than the lines commencing—“I would I were by that dim lake”—which are the composition of Thomas Moore. I regret that I am unable to remember them.

One of the noblest—and, speaking of Fancy—one of the most

singularly fanciful of modern poets, was Thomas Hood. His "Fair Ines" had always for me an inexpressible charm:—

O saw ye not fair Ines ?
 She's gone into the West,
 To dazzle when the sun is down.
 And rob the world of rest :
 She took our daylight with her,
 The smiles that we love best,
 With morning blushes on her cheek,
 And pearls upon her breast.

O turn again, fair Ines,
 Before the fall of night,
 For fear the moon should shine alone,
 And stars unrivall'd bright ;
 And blessed will the lover be
 That walks beneath their light,
 And breathes the love against thy cheek
 I dare not even write !

Would I had been, fair Ines,
 That gallant cavalier,
 Who rode so gaily by thy side,
 And whisper'd thee so near !
 Were there no bonny dames at home,
 Or no true lovers here,
 That he should cross the seas to win
 The dearest of the dear ?

I saw thee, lovely Ines,
 Descend along the shore,
 With bands of noble gentlemen,
 And banners waved before ;
 And gentle youth and maidens gay,
 And snowy plumes they wore ;
 It would have been a beauteous dream,
 If it had been no more !

Alas, alas, fair Ines,
 She went away with song,
 With Music waiting on her steps,
 And shoutings of the throng :

*
THE 'POETIC PRINCIPLE'

100

But some were sad and felt no mirth,
 But only Music's wrong,
In sounds that sang Farewell, Farewell,
 To her you've loved so long.

Farewell, farewell, fair Ines,
 That vessel never bore
So fair a lady on its deck,
 Nor danced so light before,—
Alas for pleasure on the sea,
 And sorrow on the shore !
The smile that blest one lover's heart
 Has broken many more !

"The Haunted House," by the same author, is one of the truest poems ever written,—one of the *truest*, one of the most unexceptionable, one of the most thoroughly artistic, both in its theme and in its execution. It is, moreover, powerfully ideal—imaginative. I regret that its length renders it unsuitable for the purposes of this lecture. In place of it permit me to offer the universally appreciated "Bridge of Sighs":—

One more Unfortunate,
Weary of breath,
Rashly importunate
Gone to her death !

Take her up tenderly,
Lift her with care ;—
Fashion'd so tenderly,
Young and so fair !

I look at her garments
Clinging like cerements ;
Whilst the wave constantly
Drips from her clothing ;
Take her up instantly,
Loving, not loathing

Touch her not scornfully ;
Think of her mournfully,
Gently and humanly ;
Not of the stains of her,
All that remains of her
Now is pure womanly.

Make no deep scrutiny
Into her mutiny
Rash and undutiful,
Past all dishonour,
Death has left on her
Only the beautiful.

Where the lamps quiver
So far in the river,
With many a light
From window and casement
From garret to basement,
She stood, with amazement,
Houseless by night.

The bleak wind of March
Made her tremble and shiver ;
But not the dark arch,
Or the black flowing river :
Mad from life's history,
Glad to death's mystery,
Swift to be hurl'd—
Anywhere, anywhere
Out of the world !

In she plunged boldly,
No matter how coldly
The rough river ran,—
Over the brink of it,
Picture it,—think of it,
Dissolute Man !
Love in it, drink of it
Then, if you can !

Still, for all slips of hers,
One of Eve's family—
Wipe those poor lips of hers
Oozing so clamminly,
Loop up her tresses
Escaped from the comb,
Her fair auburn tresses ;
Whilst wonderment gusses
Where was her home ?

Who was her father ?
Who was her mother ?
Had she a sister ?
Had she a brother ?
Or was there a dearer one
Still, and a nearer one
Yet, than all other ?

Alas ! for the rarity
Of Christian charity
Under the sun !
Oh ! it was pitiful !
Near a whole city full,
Home she had none.

Sisterly, brotherly,
Fatherly, motherly,
Feelings had changed :

Love, by harsh evidence,
Thrown from its eminence ;
Even God's providence
Seeming estranged.

Take her up tenderly ;
Lift her with care ;
Fashion'd so slenderly,
Young, and so fair !
Ere her limbs frigidly
Stiffen too rigidly,
Decently,—kindly,—
Smooth and compose
them ;
And her eyes, close them,
Staring so blindly !

Dreadfully staring
Through muddy impurity,
As when with the daring
Last look of despairing
Fixed on futurity.

Perishing gloomily,
Spurred by contumely,
Cold inhumanity,
Burning insanity,
Into her rest,—
Cross her hands humbly,
As if praying dumbly,
Over her breast !
Owning her weakness,
Her evil behaviour,
And leaving, with meek-
ness,
Her sins to her Saviour !

The vigour of this poem is no less remarkable than its pathos. The versification, although carrying the fanciful to the very verge of the fantastic, is nevertheless admirably adapted to the wild insanity which is the thesis of the poem.

Among the minor poems of Lord Byron is one which has

never received from the critics the praise which it undoubtedly deserves :—

Though the day of my destiny's over,
 And the star of my fate hath declined,
 Thy soft heart refused to discover
 The faults which so many could find ;
 Though thy soul with my grief was acquainted,
 It shrunk not to share it with me,
 And the love which my spirit hath painted
 It never hath found but in *thee*.

Then when nature around me is smiling,
 'The last smile which answers to mine,
 I do not believe it beguiling,
 Because it reminds me of thine ;
 And when winds are at war with the ocean,
 As the breasts I believed in with me,
 If their billows excite an emotion,
 It is that they bear me from *thee*.

Though the rock of my last hope is shivered,
 And its fragments are sunk in the wave,
 Though I feel that my soul is delivered
 To pain—it shall not be its slave.
 There is many a pang to pursue me :
 They may crush, but they shall not condemn —
 They may torture, but shall not subdue me —
 'Tis of *thee* that I think—not of them.

Though human, thou didst not deceive me,
 Though woman, thou didst not forsake,
 Though loved, thou forborest to grieve me,
 Though slandered, thou never couldst shake,—
 Though trusted, thou didst not disclaim me,
 Though parted, it was not to fly,
 Though watchful, 'twas not to defame me,
 Nor mute, that the world might belie.

Yet I blame not the world, nor despise it,
 Nor the war of the many with one—
 If my soul was not fitted to prize it,
 'Twas folly not sooner to shun :

And if dearly that error hath cost me,
 And more than I once could foresee,
 I have found that whatever it lost me,
 It could not deprive me of *thee*.

From the wreck of the past, which hath perished,
 Thus much I at least may recall,
 It hath taught me that which I most cherished
 Deserved to be dearest of all :
 In the desert a fountain is springing,
 In the wide waste there still is a tree,
 And a bird in the solitude singing,
 Which speaks to my spirit of *thee*.

Although the rhythm here is one of the most difficult, the versification could scarcely be improved. No nobler *theme* ever engaged the pen of poet. It is the soul-elevating idea that no man can consider himself entitled to complain of Fate while in his adversity he still retains the unwavering love of woman.

From Alfred Tennyson, although in perfect sincerity I regard him as the noblest poet that ever lived, I have left myself time to cite only a very brief specimen. I call him, and *think* him the noblest of poets, *not* because the impressions he produces are at *all* times the most profound—*not* because the poetical excitement which he induces is at *all* times the most intense—but because it is at all times the most ethereal—in other words, the most elevating and most pure. No poet is so little of the earth, earthly. What I am about to read is from his last long poem, “The Princess:”—

Tears, idle tears, I know not what they mean,
 Tears from the depth of some divine despair
 Rise in the heart, and gather to the eyes,
 In looking on the happy Autumn fields,
 And thinking of the days that are no more.

Fresh as the first beam glittering on a sail,
 That brings our friends up from the underworld,
 Sad as the last which reddens over one
 That sinks with all we love below the verge ;
 So sad, so fresh, the days that are no more.

Ah, sad and strange as in dark summer dawns
The earliest pipe of half awaken'd birds
To dying ears, when unto dying eyes
The casement slowly grows a glimmering square ;
So sad, so strange, the days that are no more.

¶ Dear as rememb'r'd kisses after death,
And sweet as those by hopeless fancy sign'd
On lips that are for others, deep as love,
Deep as first love, and wild with all regret ;
O Death in Life, the days that are no more.

Thus, although in a very cursory and imperfect manner, I have endeavoured to convey to you my conception of the Poetic Principle. It has been my purpose to suggest that, while this Principle itself is strictly and simply the Human Aspiration for Supernal Beauty, the manifestation of the Principle is always found in *an elevating excitement of the soul*, quite independent of that passion which is the intoxication of the Heart, or of that truth which is the satisfaction of the Reason. For in regard to passion, alas ! its tendency is to degrade rather than to elevate the Soul. Love, on the contrary—Love—the true, the divine Eros—the Uranian as distinguished from the Dionæan Venus—is unquestionably the purest and truest of all poetical themes. And in regard to Truth, if, to be sure, through the attainment of a truth we are led to perceive a harmony where none was apparent before, we experience at once the true poetical effect, but this effect is referable to the harmony alone, and not in the least degree to the truth which merely served to render the harmony manifest.

We shall reach, however, more immediately a distinct conception of what the true Poetry is, by mere reference to a few of the simple elements which induce in the Poet himself the true poetical effect. He recognises the ambrosia which nourishes his soul in the bright orbs that shine in Heaven, in the volutes of the flower, in the clustering of low shrubberies, in the waving of the grain-fields, in the slanting of tall eastern trees, in the blue distance of mountains, in the grouping of islands, in the twinkling of half-hidden brooks, in the gleaming of silver rivers, in the repose of sequestered lakes, in the star-

mirroring depths of lonely wells. He perceives it in the songs of birds, in the harp of *Aeolus*, in the sighing of the night-wind, in the repining voice of the forest, in the surf that complains to the shore, in the fresh breath of the woods, in the scent of the violet, in the voluptuous perfume of the hyacinth, in the suggestive odour that comes to him at eventide from far-distant undiscovered islands, over dim oceans, illimitable and unexplored. He owns it in all noble thoughts, in all unworldly motives, in all holy impulses, in all chivalrous, generous, and self-sacrificing deeds. He feels it in the beauty of woman, in the grace of her step, in the lustre of her eye, in the melody of her voice, in her soft laughter, in her sigh, in the harmony of the rustling of her robes. He deeply feels it in her winning endearments, in her burning enthusiasms, in her gentle charities, in her meek and devotional endurances, but above all, ah, far above all, he kneels to it, he worships it in the faith, in the purity, in the strength, in the altogether divine majesty of her *love*.

Let me conclude by the recitation of yet another brief poem, one very different in character from any that I have before quoted. It is by Motherwell, and is called "The Song of the Cavalier." With our modern and altogether rational ideas of the absurdity and impiety of warfare, we are not precisely in that frame of mind best adapted to sympathize with the sentiments, and thus to appreciate the real excellence of the poem. To do this fully we must identify ourselves in fancy with the soul of the old cavalier :—

A steed ! a steed ! of matchless speede !
 A sword of metal keen :
 Al else to noble heartes is drosse—
 Al else on earth is meane.
 The neighynghe of the war-horse pownde,
 The rowleing of the drum,
 The clangour of the trumpet lowde—
 Be soundes from heaven that come.
 And oh ! the thundering pressc of knighteis,
 Whon as their war-cryes well,
 May tolfe from heaven an angel bright,
 And rowse a fiend from hell.

Then mounte ! then mounte, brave gallants all,
 And don your helmes amaine :
 Deathe's couriers, Fame and Honour, call
 Us to the field againe.
 No shrewish teates shall fill y our eye
 When the sword-hilt's in our hand,—
 • Heart-whole we'll part, and no whit sighes
 For the layest of the land ;
 Let piping swaine, and craven wight,
 Thus weepe and paling eye,
 Our business is like men to fight,
 And home like to die !

THE PHILOSOPHY OF COMPOSITION.

CHARLES DICKENS, in a note now lying before me, alluding to an examination I once made of the mechanism of *Barnaby Rudge*, says—"By the way, are you aware that Godwin wrote his *Caleb Williams* backwards? He first involved his hero in a web of difficulties, forming the second volume, and then, for the first, cast about him for some mode of accounting for what had been done.'

I cannot think this the *precise* mode of procedure on the part of Godwin—and indeed what he himself acknowledges is not altogether in accordance with Mr. Dickens's idea—but the author of *Caleb Williams* was too good an artist not to perceive the advantage derivable from at least a somewhat similar process. Nothing is more clear than that every plot, worth the name, must be elaborated to its *dénouement* before anything be attempted with the pen. It is only with the *dénouement* constantly in view that we can give a plot its indispensable air of consequence, or causation, by making the incidents, and especially the tone at all points, tend to the development of the intention.

There is a radical error, I think, in the usual mode of constructing a story. Either history affords a thesis—or one is suggested by an incident of the day—or, at best, the author

sets himself to work in the combination of striking events to form merely the basis of his narrative—designing, generally, to fill in with description, dialogue, or authorial comment, whatever crevices of fact or action may, from page to page, render themselves apparent.

I prefer commencing with the consideration of an *effect*. Keeping originality *always* in view—for he is false to himself who ventures to dispense with so obvious and so easily attainable a source of interest—I say to myself, in the first place, “Of the innumerable effects or impressions of which the heart, the intellect, or (more generally) the soul is susceptible, what one shall I, on the present occasion, select?” Having chosen a novel first, and secondly, a vivid effect, I consider whether it can be best wrought by incident or tone—whether by ordinary incidents and peculiar tone, or the converse, or by peculiarity both of incident and tone—afterwards looking about me (or rather within) for such combinations of event or tone as shall best aid me in the construction of the effect.

I have often thought how interesting a magazine paper might be written by any author who would—that is to say, who could—detail, step by step, the processes by which any one of his compositions attained its ultimate point of completion. Why such a paper has never been given to the world, I am much at a loss to say—but perhaps the authorial vanity has had more to do with the omission than any one other cause. Most writers—poets in especial—prefer having it understood that they compose by a species of fine frenzy—an ecstatic intuition—and would positively shudder at letting the public take a peep behind the scenes, at the elaborate and vacillating crudities of thought—at the true purposes seized only at the last moment—at the innumerable glimpses of idea that arrived not at the maturity of full view—at the fully-matured fancies discarded in despair as unmanageable—at the cautious selections and rejections—at the painful erasures and interpolations,—in a word, at the wheels and pinions, the tackle for scene-shifting, the step ladders and demon-traps, the cock’s feathers, the red paint, and the black patches, which, in ninety-nine

cases out of the hundred, constitute the properties of the literary *histrio*.

I am aware, on the other hand, that the case is by no means common, in which an author is at all in condition to retrace the steps by which his conclusions have been attained. In general, suggestions, having arisen pell-mell, are pursued and forgotten in a similar manner.

For my own part, I have neither sympathy with the repugnance alluded to, nor, at any time, the least difficulty in recalling to mind the progressive steps of any of my compositions; and, since the interest of an analysis, or reconstruction, such as I have considered a *desideratum*, is quite independent of any real or fancied interest in the thing analysed, it will not be regarded as a breach of decorum on my part to show the *modus operandi* by which some one of my own works was put together. I select "The Raven" as most generally known. It is my design to render it manifest that no one point in its composition is referrible either to accident or intuition—that the work proceeded, step by step, to its completion with the precision and rigid consequence of a mathematical problem.

Let us dismiss, as irrelevant to the poem, *per se*, the circumstance—or say the necessity—which, in the first place, gave rise to the intention of composing a poem that should suit at once the popular and the critical taste.

We commence, then, with this intention.

The initial consideration was that of extent. If any literary work is too long to be read at one sitting, we must be content to dispense with the immensely important effect derivable from unity of impression—for, if two sittings be required, the affairs of the world interfere, and everything like totality is at once destroyed. But since, *ceteris paribus*, no poet can afford to dispense with anything that may advance his design, it but remains to be seen whether there is, in extent, any advantage to counterbalance the loss of unity which attends it. Here I say no, at once. What we term a long poem is, in fact, merely a succession of brief ones—that is to say, of brief poetical effects. It is needless to demonstrate that a

poem is such only inasmuch as it intensely excites, by elevating the soul; and all intense excitements are, through a psychal necessity, brief. For this reason, at least one-half of the "Paradise Lost" is essentially prose—a succession of poetical excitements interspersed, *inevitably*, with corresponding depressions—the whole being deprived, through the extremeness of its length, of the vastly important artistic element, totality, or unity of effect.

It appears evident, then, that there is a distinct limit, as regards length, to all works of literary art—the limit of a single sitting—and that, although in certain classes of prose composition, such as *Robinson Crusoe* (demanding no unity), this limit may be advantageously overpassed, it can never properly be overpassed in a poem. Within this limit, the extent of a poem may be made to bear mathematical relation to its merit—in other words, to the excitement or elevation—again, in other words, to the degree of the true poetical effect which it is capable of inducing; for it is clear that the brevity must be in direct ratio of the intensity of the intended effect—this, with one proviso—that a certain degreee of duration is absolutely requisite for the production of any effect at all.

Holding in view these considerations, as well as that degree of excitement which I deemed not above the popular, while not below the critical taste, I reached at once what I conceived the proper *length* for my intended poem—a length of about one hundred lines. It is, in fact, a hundred and eight.

My next thought concerned the choice of an impression, or effect, to be conveyed: and here I may as well observe that, throughout the construction, I kept steadily in view the design of rendering the work *universally* appreciable. I should be carried too far out of my immediate topic were I to demonstrate a point upon which I have repeatedly insisted, and which, with the poetical, stands not in the slightest need of demonstration—the point, I mean, that Beauty is the sole legitimate province of the poem. A few words, however, in elucidation of my real meaning, which some of my friends have evinced a disposition to misrepresent. That pleasure

which is at once the most intense, the most elevating, and the most pure, is, I believe, found in the contemplation of the beautiful. When, indeed, men speak of Beauty, they mean, precisely, not a quality, as is supposed, but an effect—they refer, in short, just to that intense and pure elevation of *soul*—not of intellect, or of heart—upon which I have commented, and which is experienced in consequence of contemplating “the beautiful.” Now I designate Beauty as the province of the poem, merely because it is an obvious rule of Art that effects should be made to spring from direct causes—that objects should be attained through means best adapted for their attainment—no one as yet having been weak enough to deny that the peculiar elevation alluded to, is *most readily* attained in the poem. Now the object Truth, or the satisfaction of the intellect, and the object Passion, or the excitement of the heart, are, although attainable to a certain extent in poetry, far more readily attainable in prose. Truth, in fact, demands a precision, and Passion a *homeliness* (the truly passionate will comprehend me) which are absolutely antagonistic to that Beauty which, I maintain, is the excitement, or pleasurable elevation, of the soul. It by no means follows from anything here said that passion, or even truth, may not be introduced, and even profitably introduced, into a poem—for they may serve in elucidation, or aid the general effect, as do discords in music, by contrast—but the true artist will always contrive, first, to tone them into proper subservience to the predominant aim, and, secondly, to envelop them, as far as possible, in that Beauty which is the atmosphere and the essence of the poem.

Regarding, then, Beauty as my province, my next question referred to the *tone* of its highest manifestation—and all experience has shown that this tone is one of *sadness*. Beauty of whatever kind, in its supreme development, invariably excites the sensitive soul to tears. Melancholy is thus the most legitimate of all the poetical tones.

The length, the province, and the tone being thus determined, I betook myself to ordinary induction, with the view

of obtaining some artistic piquancy which might serve me as a key-note in the construction of the poem—some pivot upon which the whole structure might turn. In carefully thinking over all the usual artistic effects—or more properly *points*, in the theatrical sense—I did not fail to perceive immediately that no one had been so universally employed as that of the *refrain*. The universality of its employment sufficed to assure me of its intrinsic value, and spared me the necessity of submitting it to analysis. I considered it, however, with regard to its susceptibility of improvement, and soon saw it to be in a primitive condition. As commonly used, the *refrain*, or burden, not only is limited to lyric verse, but depends for its impression upon the force of monotony—both in sound and thought. The pleasure is deduced solely from the sense of identity—of repetition. I resolved to diversify, and so heighten the effect, by adhering in general to the monotony of sound, while I continually varied that of thought: that is to say, I determined to produce continuously novel effects, by the variation of the application of the *refrain*—the *refrain* itself remaining, for the most part, unvaried.

These points being settled, I next bethought me of the *nature* of my *refrain*. Since its application was to be repeatedly varied, it was clear that the *refrain* itself must be brief, for there would have been an insurmountable difficulty in frequent variations of application in any sentence of length. In proportion to the brevity of the sentence would of course be the facility of the variation. This led me at once to a single word as the best *refrain*.

The question now arose as to the *character* of the word. Having made up my mind to a *refrain*, the division of the poem into stanzas was of course a corollary, the *refrain* forming the close to each stanza. That such a close, to have force, must be sonorous and susceptible of protracted emphasis, admitted no doubt, and these considerations inevitably led me to the long *o* as the most sonorous vowel in connection with *r* as the most producible consonant.

The sound of the *refrain* being thus determined, it became

necessary to select a word embodying this sound, and at the same time in the fullest possible keeping with that melancholy which I had predetermined as the tone of the poem. In such a search it would have been absolutely impossible to overlook the word "Nevermore." In fact, it was the very first which presented itself.

The next *desideratum* was a pretext for the continuous use of the one word "nevermore." In observing the difficulty which I at once found in inventing a sufficiently plausible reason for its continuous repetition, I did not fail to perceive that this difficulty arose solely from the pre-assumption that the word was to be so continuously or monotonously spoken by a *human* being—I did not fail to perceive, in short, that the difficulty lay in the reconciliation of this monotony with the exercise of reason on the part of the creature repeating the word. Here, then, immediately arose the idea of a *non-reasoning* creature capable of speech; and very naturally, a parrot, in the first instance, suggested itself, but was superseded forthwith by a Raven as equally capable of speech, and infinitely more in keeping with the intended *tone*.

I had now gone so far as the conception of a Raven, the bird of ill-omen, monotonously repeating the one word "Nevermore" at the conclusion of each stanza in a poem of melancholy tone, and in length about one hundred lines. Now, never losing sight of the object *supremeness* or perfection at all points, I asked myself—"Of all melancholy topics what, according to the *universal* understanding of mankind, is the *most* melancholy?" Death, was the obvious reply. "And when," I said, "is this most melancholy of topics most poetical?" From what I have already explained at some length, the answer here also is obvious—"When it most closely allies itself to *Beauty*: the death, then, of a beautiful woman is unquestionably the most poetical topic in the world, and equally is it beyond doubt that the lips best suited for such topic are those of a bereaved lover."

I had now to combine the two ideas of a lover lamenting his deceased mistress and a Raven continuously repeating the word "Nevermore." I had to combine these, bearing in mind

my design of varying at every turn the *application* of the word repeated, but the only intelligible mode of such combination is that of imagining the Raven employing the word in answer to the queries of the lover. And here it was that I saw at once the opportunity afforded for the effect on which I had been depending, that is to say, the effect of the *variation of application*. I saw that I could make the first query propounded by the lover—the first query to which the Raven should reply “Nevermore”—that I could make this first query a commonplace one, the second less so, the third still less, and so on, until at length the lover, startled from his original *non-balancé* by the melancholy character of the word itself, by its frequent repetition, and by a consideration of the ominous reputation of the fowl that uttered it, is at length excited to superstition, and wildly propounds queries of a far different character—queries whose solution he has passionately at heart—propounds them half in superstition and half in that species of despair which delights in self-torture—propounds them not altogether because he believes in the prophetic or demoniac character of the bird (which reason assures him is merely repeating a lesson learned by rote), but because he experiences a frenzied pleasure in so modelling his questions as to receive from the *expected* “Nevermore” the most delicious because the most intolerable of sorrow. Perceiving the opportunity thus afforded me, or, more strictly, thus forced upon me in the progress of the construction, I first established in mind the climax or concluding query—that query to which “Nevermore” should be in the last place an answer—that query in reply to which this word “Nevermore” should involve the utmost conceivable amount of sorrow and despair.

Here then the poem may be said to have its beginning, at the end where all works of art should begin; for it was here at this point of my preconsiderations that I first put pen to paper in the composition of the stanza:—

“Prophet,” said I, “thing of evil! prophet still if bird or devil!
By that heaven that bends above us—by that God we both adore,
Tell this soul with sorrow laden, it within the distant AIdenn.”

It shall clasp a sainted maiden whom the angels name Lenore—
Clasp a rare and radiant maiden whom the angels name Lenore.”
Quoth the Raven, “Nevermore.”

I composed this stanza, at this point, first that, by establishing the climax, I might the better vary and graduate, as regards seriousness and importance, the preceding queries of the lover, and secondly, that I might definitely settle the rhythm, the metre, and the length and general arrangement of the stanza, as well as graduate the stanzas which were to precede, so that none of them might surpass this in rhythmical effect. Had I been able in the subsequent composition to construct more vigorous stanzas, I should without scruple have purposely enfeebled them so as not to interfere with the climacteric effect.

And here I may as well say a few words of the versification. My first object (as usual) was originality. The extent to which this has been neglected in versification is one of the most unaccountable things in the world. Admitting that there is little possibility of variety in mere *rhythm*, it is still clear that the possible varieties of metre and stanza are absolutely infinite; and yet, *for centuries, no man, in verse, has ever done, or ever seemed to think of doing, an original thing*. The fact is that originality (unless in minds of very unusual force) is by no means a matter, as some suppose, of impulse or intuition. In general, to be found, it must be elaborately sought, and, although a positive merit of the highest class, demands in its attainment less of invention than negation.

Of course I pretend to no originality in either the rhythm or metre of the “Raven.” The former is trochaic—the latter is octametre acatalectic, alternating with heptametre catalectic repeated in the *refrain* of the fifth verse, and terminating with tetrametre catalectic. Less pedantically, the feet employed throughout (trochees) consist of a long syllable followed by a short; the first line of the stanza consists of eight of these feet, the second of seven and a half (in effect two-thirds), the third of eight, the fourth of seven and a half, the fifth the same, the sixth three and a half. Now, each of these lines

taken individually has been employed before, and what originality the "Raven" has, is in their *combination into stanza*; nothing even remotely approaching this combination has ever been attempted. The effect of this originality of combination is aided by other unusual and some altogether novel effects, arising from an extension of the application of the principles of rhyme and alliteration.

The next point to be considered was the mode of bringing together the lover and the Raven—and the first branch of this consideration was the *locale*. For this the most natural suggestion might seem to be a forest, or the fields—but it has always appeared to me that a close *circumscription of space* is absolutely necessary to the effect of insulated incident—it has the force of a frame to a picture. It has an indisputable moral power in keeping concentrated the attention, and, of course, must not be confounded with mere unity of place.

I determined, then, to place the lover in his chamber—in a chamber rendered sacred to him by memories of her who had frequented it. The room is represented as richly furnished—this in mere pursuance of the ideas I have already explained on the subject of Beauty, as the sole true poetical thesis.

The *locale* being thus determined, I had now to introduce the bird—and the thought of introducing him through the window was inevitable. The idea of making the lover suppose, in the first instance, that the flapping of the wings of the bird against the shutter, is a "tapping" at the door, originated in a wish to increase, by prolonging, the reader's curiosity, and in a desire to admit the incidental effect arising from the lover's throwing open the door, finding all dark, and thence adopting the half-fancy that it was the spirit of his mistress that knocked.

I made the night tempestuous, first to account for the Raven's seeking admission, and secondly, for the effect of contrast with the (physical) serenity within the chamber.

I made the bird alight on the bust of Pallas, also for the effect of contrast between the marble and the plumage—it being understood that the bust was absolutely *suggested by the*.

bird—the bust of *Pallas* being chosen, first, as most in keeping with the scholarship of the lover, and, secondly, for the sonorousness of the word, *Pallas*, itself

About the middle of the poem, also, I have availed myself of the force of contrast, with a view of deepening the ultimate impressioñ. For example, an air of the fantastic—approaching as nearly to the ludicrous as was admissible—is given to the Raven's entrance. He comes in “with many a flirt and flutter”

*Not the last o'erance made he—not a moment stop ped or stayed he,
But with mi n of lord or lady, perch I above my chamber door*

In the two stanzas which follow, the design is more obviously carried out —

*Then this chony bird beguiling my sad fancy into smiling
By the grave and stern d comu n of the countenance it m ,
“Though thy cry be shorn and shaven thou I sul, ‘ ut me no craven,
Ghastly grim and ancient Raven wari ng from the mighty shore —
Tell me what thy lordly name is in the Night’s flat man shoit !”*

Quoth the Raven, “Nevermore

*Much I marvelli l this ungainly soul to bear discourse so plainly,
Though its answer little meaning—little relevancy bore ,
For we cannot help agreeing that no living human being
Ever yet was bl sed with seeing bud above his chamber door —
Bud or beast uy on the sculptured bust above his chamber door ,
With such name as “Nevermore ”*

The effect of the *dénouement* being thus provided for, I immediately drop the fantastic for a tone of the most profound seriousness — this tone commencing in the stanza directly following the one last quoted, with the line,

But the Raven, sitting lonely on that placid bust, spoke only, etc.

From this epoch the lover no longer jests —no longer sees anything even of the fantastic in the Raven's demeanour. He speaks of him as a “grim, ungainly, ghastly, gaunt, and ominous bird of yore,” and feels the “fiery eyes” burning into his “bosom - core.” This revolution of thought, or fancy, on

the lover's part, is intended to induce a similar one on the part of the reader—to bring the mind into a proper frame for the *dénouement*—which is now brought about as rapidly and as directly as possible.

With the *dénouement* proper—with the Raven's reply, “Nevermore,” to the lover's final demand if he shall meet his mistress in another world—the poem, in its obvious phase, that of a simple narrative, may be said to have its completion. So far, everything is within the limits of the accountable—of the real. A raven, having learned by rote the single word “Nevermore,” and having escaped from the custody of its owner, is driven at midnight, through the violence of a storm, to seek admission at a window from which a light still gleams—the chamber-window of a student, occupied half in pouring over a volume, half in dreaming of a beloved mistress deceased. The casement being thrown open at the fluttering of the bird's wings, the bird itself perches on the most convenient seat out of the immediate reach of the student, who, amused by the incident and the oddity of the visitor's demeanour, demands of it, in jest and without looking for a reply, its name. The Raven addressed, answers with its customary word, “Nevermore”—a word which finds immediate echo in the melancholy heart of the student, who, giving utterance aloud to certain thoughts suggested by the occasion, is again startled by the fowl's repetition of “Nevermore.” The student now guesses the state of the case, but is impelled, as I have before explained, by the human thirst for self-torture, and in part by superstition, to propound such queries to the bird as will bring him, the lover, the most of the luxury of sorrow, through the anticipated answer “Nevermore.” With the indulgence, to the extreme, of this self-torture, the narration, in what I have termed its first or obvious phase, has a natural termination, and so far there has been no overstepping of the limits of the real.

But in subjects so handled, however skilfully, or with however vivid an array of incident, there is always a certain hardness or nakedness which repels the artistical eye. Two things are invariably required—first, some amount of com-

plexity, or more properly, adaptation ; and, secondly, some amount of suggestiveness—some undercurrent, however indefinite, of meaning. It is this latter, in especial, which imparts to a work of art so much of that richness (to borrow from colloquy a forcible term) which we are too fond of confounding with *the ideal*. It is the excess of the suggested meaning—it is the rendering this the upper instead of the under current of theme—which turns into prose (and that of the very flattest kind) the so-called poetry of the so-called transcendentalists.

Holding these opinions, I added the two concluding stanzas of the poem—their suggestiveness being thus made to pervade all the narrative which has preceded them. The undercurrent of meaning is rendered first apparent in the lines—

“Take thy beak from out my heart, and take thy form from off my door !”

Quoth the Raven, “Nevermore !”

It will be observed that the words, “from out my heart,” involve the first metaphorical expression in the poem. They, with the answer, “Nevermore,” dispose the mind to seek a moral in all that has been previously narrated. The reader begins now to regard the Raven as emblematical—but it is not until the very last line of the very last stanza, that the intonation of making him emblematical of *Mournful and never-ending Remembrance* is permitted distinctly to be seen :

And the Raven, never flitting, still is sitting, still is sitting
On the pallid bust of Pallas just above my chamber door ;
And his eyes have all the seeming of a demon’s that is dreaming,
And the lamplight o’er him streaming throws his shadow on the floor ;
And my soul from out that shadow that lies floating on the floor
Shall be lifted—nevermore !

OLD ENGLISH POETRY.*

It should not be doubted that at least one-third of the affection with which we regard the elder poets of Great Britain should be attributed to what is, in itself, a thing apart from poetry—we mean to the simple love of the antique—and that, again, a third of even the proper *poetic sentiment* inspired by their writings, should be ascribed to a fact which, while it has strict connection with poetry in the abstract, and with the old British poems themselves, should not be looked upon as a merit appertaining to the authors of the poems. Almost every devout admirer of the old bards, if demanded his opinion of their productions, would mention vaguely, yet with perfect sincerity, a sense of dreamy, wild, indefinite, and he would perhaps say, indefinable delight; on being required to point out the source of this so shadowy pleasure, he would be apt to speak of the quaint in phraseology and in general handling. This quaintness is, in fact, a very powerful adjunct to ideality, but in the case in question it arises independently of the author's will, and is altogether apart from his intention. Words and their rhythm have varied. Verses which affect us to-day with a vivid delight, and which delight, in many instances, may be traced to the one source, quaintness, must have worn in the days of their construction a very commonplace air. This is, of course, no argument against the poems now—we mean it only as against the poets *then*. There is a growing desire to overrate them. The old English muse was frank, guileless, sincere, and although very learned, still learned without art. No general error evinces a more thorough confusion of ideas than the error of supposing Donne and Cowley metaphysical in the sense wherein Wordsworth and Coleridge are so. With the two former ethics were the end—with the two latter the means. The poet of the "Creation" wished, by highly artificial verse, to inculcate what he supposed to be moral truth—the poet thing . . . "The Book of Genius." Edited by S. C. Hall. . .

of the "Ancient Mariner" to infuse the Poetic Sentiment through channels suggested by analysis. The one finished by complete failure what he commenced in the grossest misconception; the other, by a path which could not possibly lead him astray, arrived at a triumph which is not the less glorious because hidden from the profane eyes of the multitude. But in this view even the "metaphysical verse" of Cowley is but evidence of the simplicity and single heartedness of the man. And he was in this but a type of his school—for we may as well designate in this way the entire class of writers whose poems are bound up in the volume before us, and throughout all of whom there runs a very perceptible general character. They used little art in composition. Their writings sprang immediately from the soul—and partook intensely of that soul's nature. Nor is it difficult to perceive the tendency of this *abandon*—to elevate immeasurably all the energies of mind—but, again, so to mingle the greatest possible fire, force, delicacy, and all good things, with the lowest possible bathos, baldness, and imbecility, as to render it not a matter of doubt that the average results of mind in such a school will be found inferior to those results in one (*celeris partibus*) more artificial.

We cannot bring ourselves to believe that the selections of the "Book of Genius" are such as will impart to a poetical reader the clearest possible idea of the beauty of the school—but if the intention had been merely to show the school's character, the attempt might have been considered successful in the highest degree. There are long passages now before us of the most despicable trash, with no merit whatever beyond that of their antiquity. The criticisms of the editor do not particularly please us. His enthusiasm is too general and too vivid not to be false. His opinion, for example, of Sir Henry's Wotton's "Verses on the Queen of Bohemia"—that "there are few finer things in our language," is untenable and absurd.

In such lines we can perceive not one of those higher attributes of Poesy which belong to her in all circumstances and throughout all time. Here everything is art, nakedly, or

but awkwardly concealed. No prepossession for the mere antique (and in this case we can imagine no other prepossession) should induce us to dignify with the sacred name of poetry, a series, such as this, of elaborate and threadbare compliments, stitched, apparently, together, without fancy, without plausibility, and without even an attempt at adaptation.

In common with all the world, we have been much delighted with "The Shepherd's Hunting" by Withers—a poem partaking, in a remarkable degree, of the peculiarities of *Il Penseroso*. Speaking of Poesy, the author says :—

" By the murmur of a spring,
 Or the least boughs rustling,
 By a daisy whose leaves spread,
 Shut when Titan goes to bed,
 Or a shady bush or tree,
 She could more infuse in me
 Than all Nature's beauties can
 In some other wiser man.
 By her help I also now
 Make this churlish place allow
 Something that may sweeten gladness
 In the very gall of sadness—
 The dull lowness, the black shade,
 That these hanging vaults have made
 The strange music of the waves
 Beating on these hollow caves,
 This black den which rocks emboss,
 Overgrown with eldest moss,
 The rude portals that give light
 More to terror than delight,
 This my chamber of neglect
 Walled about with disrespect ;
 From all these and this dull air
 A fit object for despair,
 She hath taught me by her might
 To draw comfort and delight."

But these lines, however good, do not bear with them much of the general character of the English antique. Something more of this will be found in Corbet's "Farewell to the

Fairies!" We copy a portion of Marvell's "Maiden lamenting for her Fawn," which we prefer—not only as a specimen of the elder poets, but in itself as a beautiful poem, abounding in pathos, exquisitely delicate imagination and truthfulness—to anything of its species:—

"It is a wondrous thing how fleet
 'I was on those little silver feet,
 With what a pretty skipping gait
 It oft would challenge me the race,
 And when it had left me far away
 'I would stay, and run again, and stay,
 For it was nimbler much than hinds,
 And trod as it on the foul winds
 I have a garden of my own,
 But so with roses overgrown,
 And lilies, that you would it guess
 To be a little wilderness,
 And all the spring time of the year
 It only loved to be there
 Among the beds of lilies I
 Have sought it oft where it should lie,
 Yet could not, till itself would rise,
 Find it, although before mine eyes.
 For in the flaxen lilies shade
 It like a bank of lilies laid,
 Upon the roses it would feed
 Until its lips even seemed to bleed,
 And then to me 'twould boldly trip,
 And print those roses on my lip,
 But all its chief delight was still
 With roses thus itself to fill,
 And its pure virgin limbs to fold
 In whitest sheets of lilies cold
 Had it lived long, it would have been
 Lilies without, roses within."

How truthful an air of lamentations hangs here upon every syllable! It pervades all. It comes over the sweet melody of the words—over the gentleness and grace which we fancy in the little maiden herself—even over the half playful, half-petulant air with which she lingers on the beauties and good qualities of her favourite—like the cool shadow of a summer

cloud over a bed of lilies and violets, "and all sweet flowers." The whole is redolent with poetry of a very lofty order. Every line is an idea conveying either the beauty and playfulness of the fawn, or the artlessness of the maiden, or her love, or her admiration, or her grief, or the fragrance and warmth and *appropriateness* of the little nest-like bed of lilies and roses which the fawn devoured as it lay upon them, and could scarcely be distinguished from them by the once happy little damscl who went to seek her pet with an arch and rosy smile on her face. Consider the great variety of truthful and delicate thought in the few lines we have quoted—the wonder of the little maiden at the fleetness of her favourite—the "little silver feet"—the fawn challenging his mistress to a race with "a pretty skipping grace," running on before, and then, with head turned back, awaiting her approach only to fly from it again—can we not distinctly perceive all these things? How exceedingly vigorous, too, is the line,

"And trod as if on the four winds!"

a vigour apparent only when we keep in mind the artless character of the speaker and the four feet of the favourite, one for each wind. Then consider the garden of "my own," so overgrown, entangled with roses and lilies, as to be "a little wilderness"—the fawn loving to be there, and there "only"—the maiden seeking it "where it *should* lie"—and not being able to distinguish it from the flowers until "itself would rise"—the lying among the lilies "like a bank of lilies"—the loving to "fill itself with roses,"

"And its pure virgin limbs to fold
In whitest sheets of lilies cold,"

and these things being its "chief" delights—and then the prominent beauty and naturalness of the concluding lines, whose very hyperbole only renders them more true to nature when we consider the innocence, the artlessness, the enthusiasm, the passionate girl, and more passionate admiration of the bereaved child—

"Had it lived long, it would have been
Lilies without, roses within."

THE NARRATIVE
OF
ARTHUR GORDON PYM.

THE NARRATIVE
OF
ARTHUR GORDON PYM OF NANTUCKET;
COMPRISING

THE DETAILS OF A MUTINY AND ATROCIOUS BUTCHERY ON BOARD THE AMERICAN BRIG "GRAMPUS," ON HER WAY TO THE SOUTH SEAS—WITH AN ACCOUNT OF THE RECAPTURE OF THE VESSEL BY THE SURVIVORS; THEIR SHIPWRECK, AND SUBSEQUENT HORRIBLE SUFFERINGS FROM FAMINE; THEIR DELIVERANCE BY MEANS OF THE BRITISH SCHOONER "JANE GUY"; THE BRIEF CRUISE OF THIS LATTER VESSEL IN THE ANTARCTIC OCEAN; HER CAPTURE, AND THE MASSACRE OF HER CREW AMONG A GROUP OF ISLANDS IN THE 84TH PARALLEL OF SOUTHERN LATITUDE, TOGETHER WITH THE INCREDIBLE ADVENTURES AND DISCOVERIES STILL FURTHER SOUTH, TO WHICH THAT DISTRESSING CALAMITY GAVE RISE.

PRELIMINARY NOTICE.

UPON my return to the United States a few months ago, after the extraordinary series of adventure in the South Seas and elsewhere, of which an account is given in the following pages, accident threw me into the society of several gentlemen in Richmond, Va., who felt deep interest in all matters relating to the regions I had visited, and who were constantly urging

it upon me, as a duty, to give my narrative to the public. I had several reasons, however, for declining to do so, some of which were of a nature altogether private, and concern no person but myself; others not so much so. One consideration which deterred me was that, having kept no journal during a greater portion of the time in which I was absent, I feared I should not be able to write from mere memory a statement so minute and connected as to have the *appearance* of that truth it would really possess, barring only the natural and unavoidable exaggeration to which all of us are prone when detailing events which have had powerful influence in exciting the imaginative faculties. Another reason was, that the incidents to be narrated, were of a nature so positively marvellous, that, unsupported as my assertions must necessarily be (except by the evidence of a single individual, and he a half-breed Indian), I could only hope for belief among my family and those of my friends who have had reason through life to put faith in my veracity—the probability being that the public at large would regard what I should put forth as merely an impudent and ingenious fiction. A distrust in my own abilities as a writer was, nevertheless, one of the principal causes which prevented me from complying with the suggestions of my advisers.

Among those gentlemen in Virginia who expressed the greatest interest in my statement, more particularly in regard to that portion of it which related to the Antarctic Ocean, was Mr. Poe, lately editor of the *Southern Literary Messenger*, a monthly magazine, published by Mr. Thomas W. White, in the city of Richmond. He strongly advised me, among others, to prepare at once a full account of what I had seen and undergone, and trust to the shrewdness and common sense of the public—insisting with great plausibility that however roughly, as regards mere authorship, my book should be got up, its very uncouthness, if there were any, would give it all the better chance of being received as truth.

Notwithstanding this representation, I did not make up my mind to do as he suggested. He afterwards proposed (finding

that I would not stir in the matter) that I should allow him to draw up in his own words a narrative of the earlier portion of my adventures, from facts afforded by myself, publishing it in the *Southern Messenger under the garb of fiction*. To this, perceiving no objection, I consented, stipulating only that my real name should be retained. Two numbers of the pretended fiction appeared consequently in the *Messenger* for January and February (1837); and in order that it might certainly be regarded as fiction, the name of Mr. Poe was affixed to the articles in the table of contents of the magazine.

The manner in which this use was received has induced me at length to undertake a regular compilation and publication of the adventures in question; for I found that, in spite of the air of fable which had been so ingeniously thrown around that portion of my statement which appeared in the *Messenger* (without altering or distorting a single fact), the public were still not at all disposed to receive it as fable, and several letters were sent to Mr. P.'s address, distinctly expressing a conviction to the contrary. I thence concluded that the facts of my narrative would prove of such a nature as to carry with them sufficient evidence of their own authenticity, and that I had consequently little to fear on the score of popular incredulity.

This *épōse* being made, it will be seen at once how much of what follows I claim to be my own writing; and it will also be understood that no fact is misrepresented in the first few pages, which were written by Mr. Poe. Even to those readers who have not seen the *Messenger*, it will be unnecessary to point out where his portion ends and my own commences; the difference in point of style will be readily perceived.

A. G. PYM.

NEW YORK, July 1838.

CHAPTER I.

MY name is Arthur Gordon Pym. My father was a respectable trader in sea-stores at Nantucket, where I was born. My maternal grandfather was an attorney in good practice. He was fortunate in everything, and had speculated very successfully in stocks of the Edgerton New Bank, as it was formerly called. By these and other means he had managed to lay by a tolerable sum of money. He was more attached to myself, I believe, than to any other person in the world, and I expected to inherit the most of his property at his death. He sent me, at six years of age, to the school of old Mr. Ricketts, a gentleman with only one arm, and of eccentric manners—he is well known to almost every person who has visited New Bedford. I stayed at his school until I was sixteen, when I left him for Mr. E. Ronald's academy on the hill. Here I became intimate with the son of Mr. Barnard, a sea captain, who generally sailed in the employ of Lloyd and Vredenburgh; Mr. Barnard is also very well known in New Bedford, and has many relations, I am certain, in Edgerton. His son was named Augustus, and he was nearly two years older than myself. He had been on a whaling voyage with his father in the *John Donaldson*, and was always talking to me of his adventures in the South Pacific Ocean. I used frequently to go home with him, and remain all day, and sometimes all night. We occupied the same bed, and he would be sure to keep me awake until almost light, telling me stories of the natives of the island of Tinian, and other places he had visited in his travels. At last I could not help being interested in what he said, and by degrees I felt the greatest desire to go to sea. I owned a sail-boat, called the *Ariel*, and worth about seventy-five dollars. She had a half-deck or cuddy, and was rigged sloop-fashion—I forget her tonnage, but she would hold ten persons without much crowding. In this boat we were in the habit of going on some of the maddest freaks in the world; and, when I now

think of them, it appears to me a thousand wonders that I am alive to-day.

I will relate one of these adventures by way of introduction to a longer and more momentous narrative. One night there was a party at Mr. Barnard's, and both Augustus and myself were not a little intoxicated towards the close of it. As usual in such cases, I took part of his bed in preference to going home. He went to sleep, as I thought, very quietly (it being near one when the party broke up), and without saying a word on his favourite topic. It might have been half an hour from the time of our getting in bed, and I was just about falling into a doze, when he suddenly started up, and swore with a terrible oath that he would not go to sleep for any Arthur Pym in Christendom when there was so glorious a breeze from the south-west. I never was so astonished in my life, not knowing what he intended, and thinking that the wines and liquors he had drunk had set him entirely beside himself. He proceeded to talk very coolly, however, saying he knew that I supposed him intoxicated, but that he was never more sober in his life. He was only tired, he added, of lying in bed on such a fine night like a dog, and was determined to get up and dress, and go out on a frolic with the boat. I can hardly tell what possessed me, but the words were no sooner out of his mouth than I felt a thrill of the greatest excitement and pleasure, and thought his mad idea one of the most delightful and most reasonable things in the world. It was blowing almost a gale, and the weather was very cold—it being late in October. I sprang out of bed, nevertheless, in a kind of ecstasy, and told him I was quite as brave as himself, and quite as tired as he was of lying in bed like a dog, and quite as ready for any fun or frolic as any Augustus Barnard in Nantucket.

We lost no time in getting on our clothes and hurrying down to the boat. She was lying at the old decayed wharf by the lumber-yard of Pankey & Co., and almost thumping her sides out against the rough logs. Augustus got into her and baled her, for she was nearly half full of water. This

being done, we hoisted jib and mainsail, kept full, and started boldly out to sea.

The wind, as I before said, blew freshly from the south-west. The night was very clear and cold. Augustus had taken the helm, and I stationed myself by the mast on the deck of the cuddy. We flew along at a great rate, neither of us having said a word since casting loose from the wharf. I now asked my companion what course he intended to steer, and what time he thought it probable we should get back. He whistled for a few minutes, and then said crustily, "*I am going to sea, you may go home if you think proper.*" Turning my eyes upon him, I perceived at once that, in spite of his assumed nonchalance, he was greatly agitated. I could see him distinctly by the light of the moon, his face was paler than any marble, and his hand shook so excessively that he could scarcely retain hold of the tiller. I found that something had gone wrong, and became seriously alarmed. At this period I knew little about the management of a boat, and was now depending entirely upon the nautical skill of my friend. The wind, too, had suddenly increased, and we were fast getting out of the lee of the land, still I was ashamed to betray any trepidation, and for almost half an hour maintained a resolute silence. I could stand it no longer, however, and spoke to Augustus about the propriety of turning back. As before, it was nearly a minute before he made answer, or took any notice of my suggestion. "By and by," said he at length,—"time enough —home by and by." I had expected such a reply, but there was something in the tone of these words which filled me with an indescribable feeling of dread. I again looked at the speaker attentively. His lips were perfectly livid, and his knees shook so violently together that he seemed scarcely able to stand. "For God's sake, Augustus," I screamed, now heartily frightened, "what ails you? what is the matter? what are you going to do?" "Matter!" he stammered, in the greatest apparent surprise, letting go the tiller at the same moment, and falling forward into the bottom of the boat—"matter!—why, nothing is the—matter—going home—d—d—"

—don't you see?" The whole truth now flashed upon me. I flew to him and raised him up. He was drunk beastly drunk ; he could no longer either stand, speak, or see. His eyes were perfectly glazed ; and as I let him go in the extremity of my despair, he rolled like a mere log into the bilge-water from which I had lifted him. It was evident that during the evening he had drunk far more than I suspected, and that his conduct in bed had been the result of a highly concentrated state of intoxication — a state which, like madness, frequently enables the victim to imitate the outward demeanour of one in perfect possession of his senses. The coolness of the night air, however, had had its usual effect—the mental energy began to yield before its influence—and the confused perception which he no doubt then had of his perilous situation had assisted in hastening the catastrophe. He was now thoroughly insensible, and there was no probability that he would be otherwise for many hours.

It is hardly possible to conceive the extremity of my terror. The fumes of the wine lately taken had evaporated, leaving me doubly timid and irresolute. I knew that I was altogether incapable of managing the boat, and that a fierce wind and strong ebb tide were hurrying us to destruction. A storm was evidently gathering behind us ; we had neither compass nor provisions, and it was clear that, if we held our present course, we should be out of sight of land before daybreak. These thoughts, with a crowd of others equally fearful, flashed through my mind with a bewildering rapidity, and for some moments paralysed me beyond the possibility of making any exertion. The boat was going through the water at a terrible rate, full before the wind, no reef in either jib or mainsail, running her bows completely under the foam. It was a thousand wonders she did not broach to—Augustus having let go the tiller, as I said before, and I being too much agitated to think of taking it myself. By good luck, however, she kept steady, and gradually I recovered some degree of presence of mind. Still the wind was increasing fearfully ; and whenever we rose from a plunge forward, the sea behind fell combing

over our counter, and deluged us with water. I was so utterly benumbed, too, in every limb, as to be nearly unconscious of sensation. At length I summoned up the resolution of despair, and, running to the mainsail, let it go by the run. As might have been expected, it flew over the bows, and, getting drenched with water, carried away the mast shot off by the board. This latter accident alone saved me from instant destruction. Under the jib only I now boomed along before the wind, shipping heavy seas occasionally, but relieved from the terror of immediate death. I took the helm, and breathed with greater freedom as I found that there yet remained to us a chance of ultimate escape. Augustus still lay senseless in the bottom of the boat, and as there was imminent danger of his drowning (the water being nearly a foot deep just where he fell), I contrived to raise him partially up, and keep him in a sitting position, by passing a rope round his waist, and lashing it to a ring-bolt in the deck of the cuddy. Having thus arranged everything as well as I could in my chilled and agitated condition, I recommended myself to God, and made up my mind to bear whatever might happen with all the fortitude in my power.

Hardly had I come to this resolution, when, suddenly, a loud and long scream or yell, as if from the throats of a thousand demons, seemed to pervade the whole atmosphere around and above the boat. Never while I live shall I forget the intense agony of terror I experienced at that moment. My hair stood erect on my head—I felt the blood congealing in my veins—my heart ceased utterly to beat, and without having once raised my eyes to learn the source of my alarm, I tumbled headlong and insensible upon the body of my fallen companion.

I found myself, upon reviving, in the cabin of a large whaling-ship (*the Penguin*) bound to Nantucket. Several persons were standing over me, and Augustus, paler than death, was busily occupied in chafing my hands. Upon seeing me open my eyes, his exclamations of gratitude and joy excited alternate laughter and tears from the rough-looking personages who were present. The mystery of our being in existence was now soon explained. We had been run down by the whaling-ship, which was close-

hauled, beating up to Nantucket with every sail she could venture to set, and consequently running almost at right angles to our own course. Several men were on the look-out forward, but did not perceive our boat until it was an impossibility to avoid coming in contact—their shouts of warning upon seeing us were what so terribly alarmed me. The huge ship, I was told, rode immediately over us with as much ease as our own little vessel would have passed over a feather, and without the least perceptible impediment to her progress. Not a scream arose from the deck of the victim; there was a slight grating sound to be heard mingling with the roar of wind and water, as the frail bark which was swallowed up rubbed for a moment along the keel of her destroyer; but this was all. Thinking our boat (which it will be remembered was dismasted) some mere shell cut adrift as useless, the captain (Captain E. T. V. Block, of New London) was for proceeding on his course without troubling himself further about the matter. Luckily, there were two of the look-out who swore positively to having seen some person at our helm, and represented the possibility of yet saving him. A discussion ensued, when Block grew angry, and, after a while, said that "it was no business of his to be eternally watching for egg-shells; that the ship should *not* put about for any such nonsense; and if there was a man run down, it was nobody's fault but his own; he might drown and be d—d," or some language to that effect. Henderson, the first mate, now took the matter up, being justly indignant, as well as the whole ship's crew, at a speech evincing such a degree of heartless atrocity. He spoke plainly, seeing himself upheld by the men, told the captain he considered him a fit subject for the gallows, and that he would disobey his orders if he were hanged for it the moment he set his foot on shore. He strode aft, jostling Block (who turned very pale, and made no answer) on one side, and seizing the helm, gave the word, in a firm voice, *Hard-a-lee!* The men flew to their posts, and the ship went cleverly about. All this had occupied nearly five minutes, and it was supposed to be hardly within the bounds of possibility that any individual could be saved—allowing any

to have been on board the boat. Yet, as the reader has seen, both Augustus and myself were rescued ; and our deliverance seemed to have been brought about by two of those almost inconceivable pieces of good fortune which are attributed by the wise and pious to the special interference of Providence.

While the ship was yet in stays, the mate lowered the jolly-boat and jumped into her with the very two men, I believe, who spoke up as having seen me at the helm. They had just left the lee of the vessel (the moon still shining brightly) when she made a long and heavy roll to windward, and Henderson, at the same moment, starting up in his seat, bawled out to his crew to *back water*. He would say nothing else—repeating his cry impatiently, *back water! back water!* The men put back as speedily as possible ; but by this time the ship had gone round and gotten fully under headway, although all hands on board were making great exertions to take in sail. In despite of the danger of the attempt, the mate clung to the main-chains as soon as they came within his reach. Another huge lurch now brought the starboard side of the vessel out of water nearly as far as her keel, when the cause of his anxiety was rendered obvious enough. The body of a man was seen to be affixed in the most singular manner to the smooth and shining bottom (the *Penguin* was coppered and copper-fastened), and beating violently against it with every movement of the hull. After several ineffectual efforts, made during the lurches of the ship, and at the imminent risk of swamping the boat, I was finally disengaged from my perilous situation, and taken on board, for the body proved to be my own. It appeared that one of the timber-bolts having started and broken a passage through the copper, it had arrested my progress as I passed, under the ship, and fastened me in so extraordinary a manner to her bottom. The head of the bolt had made its way through the collar of the green baize jacket I had on, and through the back part of my neck, forcing itself out between two sinews and just below the right ear. I was immediately put to bed—although life seemed to be totally extinct. There was no surgeon on board. The captain, however, treated me with

every attention—to make amends, I presume, in the eyes of his crew, for his atrocious behaviour in the previous portion of the adventure.

In the meantime, Henderson had again put off from the ship, although the wind was now blowing almost a hurricane. He had not been gone many minutes when he fell in with some fragments of our boat, and shortly afterwards one of the men with him asserted that he could distinguish a cry for help at intervals amid the roaring of the tempest. This induced the hardy seamen to persevere in their search for more than half an hour, although repeated signals to return were made them by Captain Block, and although every moment on the water in so frail a boat was fraught to them with the most imminent and deadly peril. Indeed, it is nearly impossible to conceive how the small jolly they were in could have escaped destruction for a single instant. She was built, however, for the whaling service, and was fitted, as I have since had reason to believe, with air-boxes, in the manner of some life-boats used on the coast of Wales.

After searching in vain for about the period of time just mentioned, it was determined to get back to the ship. They had scarcely made this resolve when a feeble cry arose from a dark object that floated rapidly by. They pursued and soon overtook it. It proved to be the entire deck of the *Ariel's* cuddy. Augustus was struggling near it, apparently in the last agonies. Upon getting hold of him, it was found that he was attached by a rope to the floating timber. This rope, it will be remembered, I had myself tied round his waist, and made fast to a ring-bolt, for the purpose of keeping him in an upright position, and my so doing, it appeared, had been ultimately the means of preserving his life. The *Ariel* was slightly put together, and in going down, her frame naturally went to pieces; the deck of the cuddy, as might have been expected, was lifted, by the force of the water rushing in, entirely from the main timbers, and floated (with other fragments, no doubt) to the surface—Augustus was buoyed up with it, and thus escaped a terrible death.

It was more than an hour after being taken on board the *Penguin* before he could give any account of himself, or be made to comprehend the nature of the accident which had befallen our boat. At length he became thoroughly aroused, and spoke much of his sensations while in the water. Upon his first attaining any degree of consciousness, he found himself beneath the surface, whirling round and round with inconceivable rapidity, and with a rope wound in three or four folds tightly about his neck. In an instant afterwards he felt himself going rapidly upward, when, his head striking violently against a hard substance, he again relapsed into insensibility. Upon once more reviving, he was in fuller possession of his reason ; this was still, however, in the greatest degree clouded and confused. He now knew that some accident had occurred, and that he was in the water, although his mouth was above the surface, and he could breathe with some freedom. Possibly, at this period, the deck was drifting rapidly before the wind, and drawing him after it, as he floated upon his back. Of course, as long as he could have retained this position, it would have been nearly impossible that he should be drowned. Presently a surge threw him directly athwart the deck ; and this post he endeavoured to maintain, screaming at intervals for help. Just before he was discovered by Mr. Henderson, he had been obliged to relax his hold through exhaustion, and, falling into the sea, had given himself up for lost. During the whole period of his struggles he had not the faintest recollection of the *Ariel*, nor of any matters in connection with the source of his disaster. A vague feeling of terror and despair had taken entire possession of his faculties. When he was finally picked up, every power of his mind had failed him ; and, as before said, it was nearly an hour after getting on board the *Penguin* before he became fully aware of his condition. In regard to myself, I was resuscitated from a state bordering very nearly upon death (and after every other means had been tried in vain for three hours and a half) by vigorous friction with flannels bathed in hot oil, a proceeding suggested by Augustus. The wound in my neck, although of an ugly appearance, proved

of little real consequence, and I soon recovered from its effects.

The *Penguin* got into port about nine o'clock in the morning, after encountering one of the severest gales ever experienced off Nantucket. Both Augustus and myself managed to appear at Mr. Barnard's in time for breakfast—which, luckily, was somewhat late, owing to the party overnight. I suppose, all at the table were too much fatigued themselves to notice our jaded appearance—of course, it would not have borne a very rigid scrutiny. Schoolboys, however, can accomplish wonders in the way of deception, and I verily believe not one of our friends in Nantucket had the slightest suspicion that the terrible story told by some sailors in town of their having run down a vessel at sea, and drowned some thirty or forty poor devils, had reference either to the *Ariel*, my companion, or myself. We two have since very frequently talked the matter over—but never without a shudder. In one of our conversations Augustus frankly confessed to me, that in his whole life he had at no time experienced so excruciating a sense of dismay, as when on board our little boat he first discovered the extent of his intoxication, and felt himself sinking beneath its influence.

CHAPTER II.

IN no affairs of mere prejudice, *pro* or *con*, do we deduce inferences with entire certainty, even from the most simple data. It might be supposed that a catastrophe such as I have just related would have effectually cooled my incipient passion for the sea. On the contrary, I never experienced a more ardent longing for the wild adventures incident to the life of a navigator than within a week after our miraculous deliverance. This short period proved amply long enough to erase from my memory the shadows, and bring out in vivid light all the

pleasurable exciting points of colour, all the picturesqueness of the late perilous accident." My conversations with Augustus grew daily more frequent and more intensely full of interest. He had a manner of relating his stories of the ocean (more than one half of which I now suspect to have been sheer fabrications) well adapted to have weight with one of my enthusiastic temperament, and somewhat gloomy, although glowing imagination. It is strange, too, that he most strongly enlisted my feelings in behalf of the life of a seaman, when he depicted his more terrible moments of suffering and despair. For the bright side of the painting I had a limited sympathy. My visions were of shipwreck and famine; of death or captivity among barbarian hordes; of a lifetime dragged out in sorrow and tears, upon some grey and desolate rock, in an ocean unapproachable and unknown, such visions or desires—for they amounted to desires--are common, I have since been assured, to the whole numerous race of the melancholy among men --at the time of which I speak, I regarded them only as prophetic glimpses of a destiny, which I felt myself in a measure bound to fulfil. Augustus thoroughly entered into my state of mind. It is probable, indeed, that our intimate communion had resulted in a partial interchange of character.

About eighteen months after the period of the *Ariel's* disaster, the firm of Lloyd and Vredenburgh (a house connected in some manner with the Messieurs Enderby, I believe, of Liverpool) were engaged in repairing and fitting out the brig *Grampus* for a whaling voyage. She was an old hulk, and scarcely seaworthy when all was done to her that could be done. I hardly know why she was chosen in preference to other and good vessels belonging to the same owners—but so it was. Mr. Barnard was appointed to command her, and Augustus was going with him. While the brig was getting ready, he frequently urged upon me the excellency of the opportunity now offered for indulging my desire of travel. He found me by no means an unwilling listener; yet the matter could not be so easily arranged. My father made no direct opposition; but my mother went into hysterics at the

bare mention of the design ; and, more than all, my grandfather, from whom I expected much, vowed to cut me off with a shilling if I should ever breach the subject to him again. These difficulties, however, so far from abating my desire, only added fuel to the flame. I determined to go at all hazards ; and, having made known my intention to Augustus, we set about arranging a plan by which it might be accomplished. In the meantime I forbore speaking to any of my relations in regard to the voyage, and, as I busied myself ostensibly with my usual studies, it was supposed that I had abandoned the design. I have since frequently examined my conduct on this occasion with sentiments of displeasure as well as of surprise. The intense hypocrisy I made use of for the furtherance of my project—an hypocrisy pervading every word and action of my life for so long a period of time—could only have been rendered tolerable to myself by the wild and burning expectation with which I looked forward to the fulfilment of my long-cherished visions of travel.

In pursuance of my scheme of deception, I was necessarily obliged to leave much to the management of Augustus, who was employed for the greater part of every day on board the *Grampus*, attending to some arrangements for his father in the cabin and cabin-hold. At night, however, we were sure to have a conference, and talk over our hopes. After nearly a month passed in this manner, without our hitting upon any plan we thought likely to succeed, he told me at last that he had determined upon everything necessary. I had a relation living in New Bedford, a Mr. Ross, at whose house I was in the habit of spending occasionally two or three weeks at a time. The brig was to sail about the middle of June (June 1827), and it was agreed that, a day or two before her putting to sea, my father was to receive a note as usual from Mr. Ross, asking me to come over and spend a fortnight with Robert and Emmet (his sons). Augustus charged himself with the inditing of this note and getting it delivered. Having set out, as supposed, for New Bedford, I was then to report myself to my companion, who would contrive a hiding-place for me in

the *Grampus*. This hiding-place, he assured me, would be rendered sufficiently comfortable for a residence of many days, during which I was not to make my appearance. When the brig had proceeded so far on her course as to make any turning back a matter out of question, I should then, he said, be formally installed in all the comforts of the cabin; and as to his father, he would only laugh heartily at the joke. Vessels enough would be met with, by which a letter might be sent home explaining the adventure to my parents.

The middle of June at length arrived, and everything had been matured. The note was written and delivered, and on a Monday morning I left the house for the New Bedford packet, as supposed. I went, however, straight to Augustus, who was waiting for me at the corner of a street. It had been our original plan that I should keep out of the way until dark, and then slide on board the brig; but as there was now a thick fog in our favour, it was agreed to lose no time in secreting me. Augustus led the way to the wharf, and I followed at a little distance, enveloped in a thick seaman's cloak which he had brought with him, so that my person might not be easily recognised. Just as we turned the second corner, after passing Mr. Edmund's well, who should appear, standing right in front of me, and looking me full in the face, but old Mr. Peterson, my grandfather. "Why, bless my soul, Gordon," said he, after a long pause, "why, why,—*whose* dirty cloak is that you have on?" "Sir!" I replied, assuming, as well as I could, in the exigency of the moment, an air of offended surprise, and talking in the gruffest of all imaginable tones—"sir! you are a sum'mat mistaken; my name, in the first place, been't nothing at all like Goddin, and I'd want you for to know better, you blackguard, than to call my new obercoat a darty one." For my life I could hardly refrain from screaming with laughter at the odd manner in which the old gentleman received this handsome rebuke. He started back two or three steps, turned first pale and then excessively red, threw up his spectacles, then, putting them down, ran full tilt at me with his umbrella uplifted. He stopped short, however; in his

career, as if struck with a sudden recollection ; and presently, turning round, hobbled off down the street, shaking all the while with rage, and muttering between his teeth, " Won't do —new glasses—thought it was Gordon— d—d good-for-nothing salt water Long Tom."

After this narrow escape we proceeded with greater caution, and arrived at our point of destination in safety. There were only one or two of the hands on board, and those were busy forward, doing something to the forecastle combings. Captain Barnard, we knew very well, was engaged at Lloyd and Vredenburgh's, and would remain there until late in the evening, so we had little to apprehend on his account. Augustus went first up the vessel's side, and in a short while I followed him, without being noticed by the men at work. • We proceeded at once into the cabin, and found no person there. It was fitted up in the most comfortable style—a thing somewhat unusual in a whaling vessel. There were four very excellent state-rooms, with wide and convenient berths. There was also a large stove, I took notice, and a remarkably thick and valuable carpet covering the floor of both the cabin and state-rooms. The ceiling was full seven feet high, and, in short, everything appeared of a more roomy and agreeable nature than I had anticipated. Augustus, however, would allow me but little time for observation, insisting upon the necessity of my concealing myself as soon as possible. He led the way into his own state-room, which was on the starboard side of the brig, and next to the bulkheads. Upon entering, he closed the door and bolted it. I thought I had never seen a nicer little room than the one in which I now found myself. It was about ten feet long, and had only one berth, which, as I said before, was wide and convenient. In that portion of the closet nearest the bulkheads there was a space of four feet square, containing a table, a chair, and a set of hanging shelves full of books, chiefly books of voyages and travels. There were many other little comforts in the room, among which I ought not to forget a kind of safe or refrigerator, in which Augustus pointed out

to me a host of delicacies, both in the eating and drinking department.

He now pressed with his knuckles upon a certain spot of the carpet in one corner of the space just mentioned, letting me know that a portion of the flooring, about sixteen inches square, had been neatly cut out and again adjusted. As he pressed, this portion rose up at one end sufficiently to allow the passage of his finger beneath. In this manner he raised the mouth of the trap (to which the carpet was still fastened by tacks), and I found that it led into the after-hold. He next lit a small taper by means of a phosphorus match, and, placing the light in a dark lantern, descended with it through the opening, bidding me follow. I did so, and he then pulled the cover upon the hole by means of a nail driven into the under side ; the carpet, of course, resuming its original position on the floor of the state room, and all traces of the aperture being concealed.

The taper gave out so feeble a ray that it was with the greatest difficulty I could grope my way through the confused mass of lumber among which I now found myself. By degrees, however, my eyes became accustomed to the gloom, and I proceeded with less trouble, holding on to the skirts of my friend's coat. He brought me, at length, after creeping and winding through innumerable narrow passages, to an iron-bound box, such as is used sometimes for packing fine earthenware. It was nearly four feet high, and full six long, but very narrow. Two large empty oil-casks lay on the top of it, and above these again a vast quantity of straw matting, piled up as high as the floor of the cabin. In every other direction around was wedged as closely as possible, even up to the ceiling, a complete chaos of almost every species of ship furniture, together with a heterogeneous medley of crates, hampers, barrels, and bales, so that it seemed a matter no less than miraculous that we had discovered any passage at all to the box. I afterward found that Augustus had purposely arranged the stowage in this hold with a view to affording me a thorough concealment.

having had only one assistant in the labour, a man not going out in the brig.

My companion now showed me that one of the ends of the box could be removed at pleasure. He slipped it aside and displayed the interior, at which I was excessively amused. A mattress from one of the cabin berths covered the whole of its bottom, and it contained almost every article of mere comfort which could be crowded into so small a space, allowing me, at the same time, sufficient room for my accommodation, either in a sitting position or lying at full length. Among other things, there were some books, pen, ink, and paper, three blankets, a large jug full of water, a keg of sea biscuit, three or four immense Bologna sausages, an enormous ham, a cold leg of roast mutton, and half-a-dozen bottles of cordials and liquors. I proceeded immediately to take possession of my little apartment, and this with feelings of higher satisfaction, I am sure, than any monarch ever experienced upon entering a new palace. Augustus now pointed out to me the method of fastening the open end of the box, and then, holding the taper close to the deck, showed me a piece of dark whipecord lying along it. This, he said, extended from my hiding-place throughout all the necessary windings among the lumber, to a nail which was driven into the deck of the hold, immediately beneath the trap-door leading into his state-room. By means of this cord I should be enabled readily to trace my way out without his guidance, provided any unlooked-for accident should render such a step necessary. He now took his departure, leaving with me the lantern, together with a copious supply of tapers and phosphorus, and promising to pay me a visit as often as he could contrive to do so without observation. This was on the seventeenth of June.

I remained three days and nights (as nearly as I could guess) in my hiding-place without getting out of it at all, except twice for the purpose of stretching my limbs by standing erect between two crates just opposite the opening. During the whole period I saw nothing of Augustus; but this occasioned me little uneasiness, as I knew the brig was expected to put

to sea every hour, and in the bustle he would not easily find opportunities of coming down to me. At length I heard the trap open and shut, and presently he called in a low voice, asking if all was well, and if there was anything I wanted. "Nothing," I replied; "I am as comfortable as can be; when will the brig sail?" "She will be under weigh in less than half an hour," he answered. "I came to let you know, and for fear you should be uneasy at my absence. I shall not have a chance of coming down again for some time—perhaps for three or four days more. All is going on right aboveboard. After I go up and close the trap, do you creep along by the whipcord to where the nail is driven in. You will find my watch there—it may be useful to you, as you have no daylight to keep time by. I suppose you can't tell how long you have been buried--only three days—this is the twentieth. I would bring the watch to your box, but am afraid of being missed." With this he went up.

In about an hour after he had gone I distinctly felt the brig in motion, and congratulated myself upon having at length fairly commenced a voyage. Satisfied with this idea, I determined to make my mind as easy as possible, and await the course of events until I should be permitted to exchange the box for the more roomy, although hardly more comfortable, accommodations of the cabin. My first care was to get the watch. Leaving the taper burning, I groped along in the dark, following the cord through windings innumerable, in some of which I discovered that, after toiling a long distance, I was brought back within a foot or two of a former position. At length I reached the nail, and securing the object of my journey, returned with it in safety. I now looked over the books which had been so thoughtfully provided, and selected the expedition of Lewis and Clarke to the mouth of the Columbia. With this I amused myself for some time, when, growing sleepy, I extinguished the light with great care, and soon fell into a sound slumber.

Upon awaking I felt strangely confused in mind, and some time elapsed before I could bring to recollection all the variotis

circumstances of my situation. By degrees, however, I remembered all. Striking a light, I looked at the watch; but it was run down, and there were, consequently, no means of determining how long I had slept. My limbs were greatly cramped, and I was forced to relieve them by standing between the crates. Presently feeling an almost ravenous appetite, I bethought myself of the cold mutton, some of which I had eaten just before going to sleep, and found excellent. What was my astonishment at discovering it to be in a state of absolute putrefaction? This circumstance occasioned me great disquietude; for, connecting it with the disorder of mind I experienced upon awaking, I began to suppose that I must have slept for an inordinately long period of time. The close atmosphere of the hold might have had something to do with this, and might, in the end, be productive of the most serious results. My head ached excessively; I fancied that I drew every breath with difficulty; and, in short, I was oppressed with a multitude of gloomy feelings. Still I could not venture to make any disturbance by opening the trap or otherwise, and, having wound up the watch, contented myself as well as possible.

Throughout the whole of the next tedious twenty-four hours no person came to my relief, and I could not help accusing Augustus of the grossest inattention. What alarmed me chiefly was, that the water in my jug was reduced to about half a pint, and I was suffering much from thirst, having eaten freely of the Bologna sausages after the loss of my mutton. I became very uneasy, and could no longer take any interest in my books. I was overpowered, too, with a desire to sleep, yet trembled at the thought of indulging it, lest there might exist some pernicious influence, like that of burning charcoal, in the confined air of the hold. In the meantime the roll of the brig told me that we were far in the main ocean, and a dull humming sound, which reached my ears as if from an immense distance, convinced me no ordinary gale was blowing. I could not imagine a reason for the absence of Augustus. We were surely far enough advanced on our voyage to allow of my

going up. Some accident might have happened to him—but I could think of none which would account for his suffering me to remain so long a prisoner, except, indeed, his having suddenly died or fallen overboard, and upon this idea I could not dwell with any degree of patience. It was possible that we had been baffled by head winds, and were still in the near vicinity of Nantucket. This notion, however, I was forced to abandon; for such being the case, the brig must have frequently gone about; and I was entirely satisfied, from her continual inclination to the larboard, that she had been sailing all along with a steady breeze on her starboard quarter. Besides, granting that we were still in the neighbourhood of the island, why should not Augustus have visited me and informed me of the circumstance? Pondering in this manner upon the difficulties of my solitary and cheerless condition, I resolved to wait yet another twenty-four hours, when, if no relief were obtained, I would make my way to the trap, and endeavour either to hold a parley with my friend, or get at least a little fresh air through the opening, and a further supply of water from his state-room. While occupied with this thought, however, I fell, in spite of every exertion to the contrary, into a state of profound sleep, or rather stupor. My dreams were of the most terrific description. Every species of calamity and horror befell me. Among other miseries, I was smothered to death between huge pillows by demons of the most ghastly and ferocious aspect. Immense serpents held me in their embrace, and looked earnestly in my face with their fearfully shining eyes. Then deserts, limitless, and of the most forlorn and awe-inspiring character, spread themselves out before me. Immensely tall trunks of trees, grey and leafless, rose up in endless succession as far as the eye could reach. Their roots were concealed in wide-spreading morasses, whose dreary water lay intensely black, still, and altogether terrible, beneath. And the strange trees seemed endowed with a human vitality, and waving to and fro their skeleton arms, were crying to the silent waters for mercy, in the shrill and piercing accents of the most acute agony and despair. The scene changed; and I,

stood, naked and alone, amid the burning sand-plains of Zahara. At my feet lay crouched a fierce lion of the tropics. Suddenly his wild eyes opened and fell upon me. With a convulsive bound he sprang to his feet, and bared bare his horrible teeth. In another instant there burst from his red throat a roar like the thunder of the firmament, and I fell impetuously to the earth. Stifling in a paroxysm of terror, I at last found myself partially awake. My dream, then, was not all a dream. Now, at least, I was in possession of my senses. The paws of some huge and real monster were pressing heavily upon my bosom—his hot breath was in my ear—and his white and ghastly fangs were gleaming upon me through the gloom.

Had a thousand lives hung upon the movement of a limb or the utterance of a syllable, I could have neither stirred nor spoken. The beast, whatever it was, retained his position without attempting any immediate violence, while I lay in an utterly helpless, and, I fancied, a dying condition beneath him. I felt that my powers of body and mind were fast leaving me—in a word, that I was perishing, and perishing of sheer fright. My brain swam—I grew deadly sick—my vision failed—even the glaring eyeballs above me grew dim. Making a last strong effort, I at length breathed a faint ejaculation to God, and resigned myself to die. The sound of my voice seemed to arouse all the latent fury of the animal. He precipitated himself at full length upon my body; but what was my astonishment, when, with a long and low whine, he commenced licking my face and hands with the greatest eagerness, and with the most extravagant demonstrations of affection and joy! I was bewildered, utterly lost in amazement; but I could not forget the peculiar whine of my Newfoundland dog Tiger, and the odd manner of his caresses I well knew. It was he. I experienced a sudden rush of blood to my temples—a giddy and overpowering sense of deliverance and reanimation. I rose hurriedly from the mattress upon which I had been lying, and, throwing myself upon the neck of my faithful follower and friend,

the long oppression of my bosom in a flood of the most passionate tears.

As upon a former occasion, my conceptions were in a state of the greatest indistinctness and confusion after leaving the mattress. For a long time I found it nearly impossible to connect any ideas; but, by very slow degrees, my thinking faculties returned, and I again called to memory the several incidents of my condition. For the presence of Tiger I tried in vain to account; and after busying myself with a thousand different conjectures respecting him, was forced to content myself with rejoicing that he was with me to share my dreary solitude, and render me comfort by his caresses. Most people love their dogs, but for Tiger I had an affection far more ardent than common; and never, certainly, did any creature more truly deserve it. For seven years he had been my inseparable companion, and in a multitude of instances had given evidence of all the noble qualities for which we value the animal. I had rescued him, when a puppy, from the clutches of a malignant little villain in Nantucket, who was leading him, with a rope round his neck, to the water; and the grown dog repaid the obligation about three years afterward by saving me from the bludgeon of a street robber.

Getting now hold of the watch, I found upon applying it to my ear that it had again run down; but at this I was not at all surprised, being convinced, from the peculiar state of my feelings, that I had slept, as before, for a very long period of time; how long, it was of course impossible to say. I was burning up with fever, and my thirst was almost intolerable. I felt about the box for my little remaining supply of water, for I had no light, the taper having burnt to the socket of the lantern, and the phosphorus-box not coming readily to hand. Upon finding the jug, however, I discovered it to be empty—Tiger, no doubt, having been tempted to drink it, as well as to devour the remnant of mutton, the bone of which lay, well picked, by the opening of the box. The spoiled meat I could well spare, but my heart sank as I thought of the water. I was feeble in the extreme, so much so that I shook all over as

with an ague at the slightest movement or exertion. To add to my troubles, the brig was pitching and rolling with great violence, and the oil-casks which lay upon my box were in momentary danger of falling down, so as to block up the only way of ingress or egress. I felt also terrible sufferings from sea-sickness. These considerations determined me to make my way at all hazards to the trap, and obtain immediate relief before I should be incapacitated from doing so altogether. Having come to this resolve, I again felt about for the phosphorus box and tapers. The former I found after some little trouble, but not discovering the tapers as soon as I had expected (for I remembered very nearly the spot in which I had placed them), I gave up the search for the present, and, bidding Tiger lie quiet, began at once my journey towards the trap.

In this attempt my great feebleness became more than ever apparent. It was with the utmost difficulty I could crawl along at all, and very frequently my limbs sank suddenly from beneath me; when falling prostrate on my face, I would remain for some minutes in a state bordering on insensibility. Still I struggled forward by slow degrees, dreading every moment that I should swoon amid the narrow and intricate windings of the lumber, in which event I had nothing but death to expect as the result. At length, upon making a push forward with all the energy I could command, I struck my forehead violently against the sharp corner of an iron-bound crate. The accident only stunned me for a few moments, but I found to my inexpressible grief that the quick and violent roll of the vessel had thrown the crate entirely across my path, so as effectually to block up the passage. With my utmost exertions I could not move it a single inch from its position, it being closely wedged in among the surrounding boxes and ship furniture. It became necessary therefore, enfeebled as I was, either to leave the guidance of the whipcord and seek out a new passage, or to climb over the obstacle and resume the path on the other side. The former alternative presented too many difficulties and dangers to be thought of without a shudder. In my present weak state of

both mind and body I should infallibly lose my way if I attempted it, and perish miserably amid the dismal and disgusting labyrinths of the hold. I proceeded therefore without hesitation to summon up all my remaining strength and fortitude, and endeavour, as I best might, to clamber over the crate.

Upon standing erect, with this end in view, I found the undertaking even a more serious task than my fears had led me to imagine. On each side of the narrow passage arose a complete wall of various heavy lumber, which the least blunder on my part might be the means of bringing down upon my head; or if this accident did not occur, the path might be effectually blocked up against my return by the descending mass, as it was in front by the obstacle there. The crate itself was a long and unwieldy box, upon which no foothold could be obtained. In vain I attempted, by every means in my power, to reach the top, with the hope of being thus enabled to draw myself up. Had I succeeded in reaching it, it is certain that my strength would have proved utterly inadequate to the task of getting over, and it was better in every respect that I failed. At length, in a desperate effort to force the crate from its ground, I felt a strong vibration in the side next me. I thrust my hand eagerly to the edge of the planks and found that a very large one was loose. With my pocket-knife which, luckily, I had with me, I succeeded after great labour in prying it entirely off; and getting through the aperture, discovered to my exceeding joy that there were no boards on the opposite side—in other words that the top was wanting, it being the bottom through which I had forced my way. I now met with no important difficulty in proceeding along the line until I finally reached the nail. With a beating heart I stood erect, and with a gentle touch pressed against the cover of the trap. It did not rise as soon as I had expected, and I pressed it with somewhat more determination, still dreading lest some other person than Augustus might be in his state-room. The door, however, to my astonishment remained steady, and I became somewhat uneasy, for I knew that it had formerly required little or no effort to remove it.

I pushed it strongly—it was nevertheless firm ; with all my strength—it still did not give way ; with rage, with fury, with despair—it set at defiance my utmost efforts ; and it was evident, from the unyielding nature of the resistance, that the hole had either been discovered and effectually nailed up, or that some immense weight had been placed upon it, which it was useless to think of removing.

My sensations were those of extreme horror and dismay. In vain I attempted to reason on the probable cause of my being thus entombed. I could summon up no connected chain of reflection, and, sinking on the floor, gave way unresistingly to the most gloomy imaginings, in which the dreadful deaths of thirst, famine, suffocation, and premature interment crowded upon me as the prominent disasters to be encountered. At length there returned to me some portion of presence of mind. I arose, and felt with my fingers for the seams or cracks of the aperture. Having found them, I examined them closely to ascertain if they emitted any light from the state-room ; but none was visible. I then forced the pen-blade of my knife through them, until I met with some hard obstacle. Scraping against it, I discovered it to be a solid mass of iron, which, from its peculiar wavy feel as I passed the blade along it, I concluded to be a chain-cable. The only course now left me was to retrace my way to the box, and there either yield to my sad fate, or try so to tranquillize my mind as to admit of my arranging some plan of escape. I immediately set about the attempt, and succeeded, after innumerable difficulties, in getting back. As I sank utterly exhausted upon the mattress, Tiger threw himself at full length by my side, and seemed as if desirous, by his caresses, of consoling me in my troubles, and urging me to bear them with fortitude.

The singularity of his behaviour at length forcibly arrested my attention. After licking my face and hands for some minutes, he would suddenly cease doing so, and utter a low whine. Upon reaching out my hand towards him, I then invariably found him lying on his back, with his paws uplifted. This conduct, so frequently repeated, appeared strange, and I

could in no manner account for it. As the dog seemed distressed, I concluded that he had received some injury ; and taking his paws in my hands, I examined them one by one, but found no sign of any hurt. I then supposed him hungry, and gave him a large piece of ham, which he devoured with avidity—afterward, however, resuming his extraordinary manœuvres. I now imagined that he was suffering, like myself, the torments of thirst, and was about adopting this conclusion as the true one, when the idea occurred to me that I had as yet only examined his paws, and that there might possibly be a wound upon some portion of his body or head. The latter I felt carefully over, but found nothing. On passing my hand, however, along his back, I perceived a slight erection of the hair extending completely across it. Probing this with my finger, I discovered a string, and tracing it up, found that it encircled the whole body. Upon a closer scrutiny, I came across a small slip of what had the feeling of letter-paper, through which the string had been fastened in such a manner as to bring it immediately beneath the left shoulder of the animal.

CHAPTER III.

THE thought instantly occurred to me that the paper was a note from Augustus, and that some unaccountable accident having happened to prevent his relieving me from my dungeon, he had devised this method of acquainting me with the true state of affairs. Trembling with eagerness, I now commenced another search for my phosphorus matches and tapers. I had a confused recollection of having put them carefully away just before falling asleep ; and, indeed, previously to my last journey to the trap, I had been able to remember the exact spot where I had deposited them. But now I endeavoured in vain to call it to mind, and busied myself for a full hour in a

fruitless and vexatious search for the missing articles ; never, surely, was there a more tantalizing state of anxiety and suspense. At length, while groping about, with my head close to the ballast, near the opening of the box, and outside of it, I perceived a faint glimmering of light in the direction of the steerage. Greatly surprised, I endeavoured to make my way towards it, as it appeared to be but a few feet from my position. Scarcely had I moved with this intention when I lost sight of the glimmer entirely, and, before I could bring it into view again, was obliged to feel along by the box until I had exactly resumed my original situation. Now, moving my head with caution to and fro, I found that by proceeding slowly, with great care, in an opposite direction to that in which I had at first started, I was enabled to draw near the light, still keeping it in view. Presently I came directly upon it (having squeezed my way through innumerable narrow windings), and found that it proceeded from some fragments of my matches lying in an empty barrel turned upon its side. I was wondering how they came in such a place, when my hand fell upon two or three pieces of taper-wax, which had been evidently mumbled by the dog. I concluded at once that he had devoured the whole of my supply of candles, and I felt hopeless of being ever able to read the note of Augustus. The small remnants of the wax were so mashed up among other rubbish in the barrel, that I despaired of deriving any service from them, and left them as they were. The phosphorus, of which there was only a speck or two, I gathered up as well as I could, and returned with it after much difficulty to my box, where Tiger had all the while remained.

What to do next I could not tell. The hold was so intensely dark that I could not see my hand, however close I would hold it to my face. The white slip of paper could barely be discerned, and not even that when I looked at it directly ; by turning the exterior portions of the retina towards it, that is to say, by surveying it slightly askance, I found that it became in some measure perceptible. Thus the gloom of my prison may be imagined, and the note of my friend, if indeed it were

a note from him, seemed only likely to throw me into further trouble, by disquieting to no purpose my already enfeebled and agitated mind. In vain I revolved in my brain a multitude of absurd expedients for procuring light—such expedients precisely as a man in the perturbed sleep occasioned by opium would be apt to fall upon for a similar purpose—each and all of which appear by turns to the dreamer the most reasonable and the most preposterous of conceptions, just as the reasoning or imaginative faculties flicker alternately one above the other. At last an idea occurred to me which seemed rational, and which gave me cause to wonder, very justly, that I had not entertained it before. I placed the slip of paper on the back of a book, and collecting the fragments of the phosphorus matches which I had brought from the barrel, laid them together upon the paper. I then, with the palm of my hand, rubbed the whole over quickly, yet steadily. A clear light diffused itself immediately throughout the whole surface; and had there been any writing upon it, I should not have experienced the least difficulty, I am sure, in reading it. Not a syllable was there, however—nothing but a dreary and unsatisfactory blank; the illumination died away in a few seconds, and my heart died away within me as it went.

I have before stated more than once that my intellect, for some period prior to this, had been in a condition nearly bordering on idiocy. There were, to be sure, momentary intervals of perfect sanity, and now and then even of energy, but these were few. It must be remembered that I had been, for many days certainly, inhaling the almost pestilential atmosphere of a close hole in a whaling vessel, and a long portion of that time but scantily supplied with water. For the last fourteen or fifteen hours I had none—nor had I slept during that time. Salt provisions of the most exciting kind had been my chief, and indeed, since the loss of the mutton, my only supply of food, with the exception of the sea-biscuit, and these latter were utterly useless to me, as they were too dry and hard to be swallowed in the swollen and parched condition of my throat. I was now in a high state of fever, and in ev-

respect exceedingly ill. This will account for the fact that many miserable hours of despondency elapsed after my last adventure with the phosphorus before the thought suggested itself that I had examined only one side of the paper. I shall not attempt to describe my feelings of rage (for I believe I was more angry than anything else) when the egregious oversight I had committed flashed suddenly upon my perception. The blunder itself would have been unimportant had not my own folly and impetuosity rendered it otherwise—in my disappointment at not finding some words upon the slip, I had childishly torn it in pieces and thrown it away, it was impossible to say where.

From the worst part of this dilemma I was relieved by the sagacity of Tiger. Having got, after a long search, a small piece of the note, I put it to the dog's nose, and endeavoured to make him understand that he must bring me the rest of it. To my astonishment (for I had taught him none of the usual tricks for which his breed are famous), he seemed to enter at once into my meaning, and, rummaging about for a few moments, soon found another considerable portion. Bringing me this, he paused a while, and, rubbing his nose against my hand, appeared to be waiting for my approval of what he had done. I patted him on the head, when he immediately made off again. It was now some minutes before he came back—but when he did come, he brought with him a largo slip, which proved to be all the paper missing—it having been torn, it seems, only into three pieces. Luckily, I had no trouble in finding what few fragments of the phosphorus were left—being guided by the indistinct glow one or two of the particles still emitted. My difficulties had taught me the necessity of caution, and I now took time to reflect upon what I was about to do. It was very probable, I considered, that some words were written upon that side of the paper which had not been examined—but which side was that? Fitting the pieces together gave me no clue in this respect, although it assured me that the words (if there were any) would be found all on one side, and connected in a proper manner, as written. There was the greater necessity

of ascertaining the point in question beyond a doubt, as the phosphorus remaining would be altogether insufficient for a third attempt should I fail in the one I was now about to make. I placed the paper on a book as before, and sat for some minutes, thoughtfully revolving the matter over in my mind. At last I thought it barely possible that the written side might have some unevenness on its surface, which a delicate sense of feeling might enable me to detect. I determined to make the experiment, and passed my finger very carefully over the side which first presented itself—nothing, however, was perceptible, and I turned the paper, adjusting it on the book. I now again carried my forefinger cautiously along, when I was aware of an exceedingly slight, but still discernible glow, which followed as it proceeded. This, I knew, must arise from some very minute remaining particles of the phosphorus with which I had covered the paper in my previous attempt. The other, or under side, then, was that on which lay the writing, if writing there should finally prove to be. Again I turned the note, and went to work as I had previously done. Having rubbed in the phosphorus, a brilliancy ensued as before—but this time several lines of MS. in a large hand, and apparently in red ink, became distinctly visible. The glimmer, although sufficiently bright, was but momentary. Still, had I not been too greatly excited, there would have been ample time enough for me to peruse the whole three sentences before me—for I saw there were three. In my anxiety, however, to read all at once, I succeeded only in reading the seven concluding words, which thus appeared—“*blood—your life depends upon lying close.*”

Had I been able to ascertain the entire contents of the note—the full meaning of the admonition which my friend had thus attempted to convey, that admonition, even although it should have revealed a story of disaster the most unspeakable, could not, I am firmly convinced, have imbued my mind with one tithe of the harrowing and yet indefinable horror with which I was inspired by the fragmentary warning thus received. And “*blood,*” too, that word of all words—so ripe at all times with mystery, and suffering, and terror—how trebly full of import

did it now appear—how chillily and heavily (disjointed, as it thus was, from any foregoing words to qualify or render it distinct) did its vague syllables fall, amid the deep gloom of my prison, into the innermost recesses of my soul ! *

Augustus had, undoubtedly, good reasons for wishing me to remain concealed, and I formed a thousand surmises as to what they could be—but I could think of nothing affording a satisfactory solution of the mystery. Just after returning from my last journey to the trap, and before my attention had been otherwise directed by the singular conduct of Tiger, I had come to the resolution of making myself heard at all events by those on board, or, if I could not succeed in this directly, of trying to cut my way through the orlop deck. The half certainty which I felt of being able to accomplish one of these two purposes in the last emergency had given me courage (which I should not otherwise have had) to endure the evils of my situation. The few words I had been able to read, however, had cut me off from these final resources, and I now, for the first time, felt all the misery of my fate. In a paroxysm of despair I threw myself again upon the mattress, where, for about the period of a day and night, I lay in a kind of stupor, relieved only by momentary intervals of reason and recollection.

At length I once more arose, and busied myself in reflection upon the horrors which encompassed me. For another twenty-four hours it was barely possible that I might exist without water—for a longer time I could not do so. During the first portion of my imprisonment I had made free use of the cordials with which Augustus had supplied me, but they only served to excite fever, without in the least degree assuaging my thirst. I had now only about a gill left, and this was of a species of strong peach liqueur at which my stomach revolted. The sausages were entirely consumed ; of the ham nothing remained but a small piece of the skin ; and all the biscuit, except a few fragments of one, had been eaten by Tiger. To add to my troubles, I found that my headache was increasing momentarily, and with it the species of delirium which had distressed me more or less since my first falling asleep. For some hours

past it had been with the greatest difficulty I could breathe at all, and now each attempt at so doing was attended with the most distressing spasmodic action of the chest. But there was still another and very different source of disquietude, and one, indeed, whose harassing terrors had been the chief means of arousing me to exertion from my stupor on the mattress. It arose from the demeanour of the dog.

I first observed an alteration in his conduct while rubbing in the phosphorus on the paper in my last attempt. As I rubbed, he ran his nose against my hand with a slight snarl, but I was too greatly excited at the time to pay much attention to the circumstance. Soon afterwards, it will be remembered, I threw myself on the mattress, and fell into a species of lethargy. Presently I became aware of a singular hissing sound close at my ears, and discovered it to proceed from Tiger, who was panting and wheezing in a state of the greatest apparent excitement, his eyeballs flashing fiercely through the gloom. I spoke to him, when he replied with a low growl, and then remained quiet. Presently I relapsed into my stupor, from which I was again awakened in a similar manner. This was repeated three or four times, until finally his behaviour inspired me with so great a degree of fear that I became fully aroused. He was now lying close by the door of the box, snarling fearfully, although in a kind of undertone, and gunding his teeth as if strongly convulsed. I had no doubt whatever that the want of water or the confined atmosphere of the hold had driven him mad and I was at a loss what course to pursue. I could not endure the thought of killing him, yet it seemed absolutely necessary for my own safety. I could distinctly perceive his eyes fastened upon me with an expression of the most deadly animosity, and I expected every instant that he would attack me. At last I could endure my terrible situation no longer, and determined to make my way from the box at all hazards, and despatch him, if his opposition should render it necessary for me to do so. To get out, I had to pass directly over his body, and he already seemed to anticipate my design—raising himself upon his fore-legs (as

I perceived by the altered position of his eyes), and displayed the whole of his white fangs, which were easily discernible. I took the remains of the ham-skin, and the bottle containing the liqueur, and secured them about my person, together with a large carving knife which Augustus had left me—then, folding my cloak as closely around me as possible, I made a movement towards the mouth of the box. No sooner did I do this, than the dog sprang with a loud growl towards my throat. The whole weight of his body struck me on the right shoulder, and I fell violently to the left, while the enraged animal passed entirely over me. I had fallen upon my knees, with my head buried among the blankets, and these protected me from a second furious assault, during which I felt the sharp teeth pressing vigorously upon the woollen which enveloped my neck—yet, luckily, without being able to penetrate all the folds. I was now beneath the dog, and a few moments would place me completely in his power. Despair gave me strength, and I rose boldly up, shaking him from me by main force, and dragging with me the blankets from the mattress. These I now threw over him, and before he could extricate himself I had got through the door and closed it effectually against his pursuit. In this struggle, however, I had been forced to drop the morsel of ham-skin, and I now found my whole stock of provisions reduced to a single gill of liqueur. As this reflection crossed my mind, I felt myself actuated by one of those fits of perverseness which might be supposed to influence a spoiled child in similar circumstances, and, raising the bottle to my lips, I drained it to the last drop, and dashed it furiously upon the floor.

Scarcely had the echo of the crash died away, when I heard my name pronounced in an eager but subdued voice, issuing from the direction of the steerage. So unexpected was anything of the kind, and so intense was the emotion excited within me by the sound, that I endeavoured in vain to reply. My powers of speech totally failed, and, in an agony of terror lest my friend should conclude me dead, and return without attempting to reach me, I stood up between the crates near

the door of the box trembling convulsively, and gasping and struggling for utterance. Had a thousand worlds depended upon a syllable, I could not have spoken it. There was a slight movement now audible among the lumber somewhere forward of my station. The sound presently grew less distinct, then again less so, and still less. Shall I ever forget my feelings at this moment? He was going—my friend, my companion, from whom I had a right to expect so much—he was going—he would abandon me—he was gone! He would leave me to perish miserably, to expire in the most horrible and loathsome of dungeons—and one word, one little syllable, would save me, yet that single syllable I could not utter! I felt, I am sure, more than ten thousand times the agonies of death itself. My brain reeled, and I fell deadly sick against the end of the box.

As I fell, the carving knife was shaken out from the waistband of my pantaloons, and dropped with a rattling sound to the floor. Never did any strain of the richest melody come so sweetly to my ears! With the intensest anxiety I listened to ascertain the effect of the noise upon Augustus, for I knew that the person who called my name could be no one but himself. All was silent for some moments. At length I again heard the word *Lithur!* repeated in a low tone, and one full of hesitation. Reviving hope loosened at once my powers of speech, and I now screamed at the top of my voice, "*Augustus!* *O Augustus!*" "Hush! for God's sake be silent!" he replied, in a voice trembling with agitation, "I will be with you immediately, as soon as I can make my way through the hold." For a long time I heard him moving among the lumber, and every moment seemed to me an age. At length I felt his hand upon my shoulder, and he placed, at the same moment, a bottle of water to my lips. Those only who have been suddenly redeemed from the jaws of the tomb, or who have known the insufferable torments of thirst under circumstances as aggravated as those which encompassed me in my dreary prison, can form any idea of the unutterable transports which that one long draught of the richest of all physical luxuries afforded.

When I had in some degree satisfied my thirst, Augustus produced from his pocket three or four cold boiled potatoes, which I devoured with the greatest avidity. He had brought with him a light in a dark lantern, and the grateful rays afforded me scarcely less comfort than the food and drink. But I was impatient to learn the cause of his protracted absence, and he proceeded to recount what had happened on board during my incarceration.

CHAPTER IV.

THE brig put to sea, as I had supposed, in about an hour after he had left the watch. This was on the twentieth of June. It will be remembered that I had then been in the hold for three days, and during this period there was so constant a bustle on board, and so much running to and fro, especially in the cabin and state rooms, that he had had no chance of visiting me without the risk of having the secret of the trap discovered. When at length he did come, I had assured him that I was doing as well as possible, and therefore for the two next days he felt but little uneasiness on my account - still, however, watching an opportunity of going down. It was not until *the fourth day* that he found one. Several times during this interval he had made up his mind to let his father know of the adventure, and have me come up at once, but we were still within reaching distance of Nantucket, and it was doubtful, from some expressions which had escaped Captain Barnard, whether he would not immediately put back if he discovered me to be on board. Besides, upon thinking the matter over, Augustus, so he told me, could not imagine that I was in immediate want, or that I would hesitate in such case to make myself heard at the trap. When, therefore, he considered everything, he concluded to let me stay until he could meet with an opportunity of visiting me unobserved. This,

as I said before, did not occur until the fourth day after his bringing me the watch, and the seventh since I had first entered the hold. He then went down without taking with him any water or provisions, intending in the first place merely to call my attention, and get me to come from the box to the trap, when he would go up to the state-room and thence hand me down a supply. When he descended for this purpose he found that I was asleep, for it seems that I was snoring very loudly. From all the calculations I can make on the subject, this must have been the slumber into which I fell just after my return from the trap with the watch, and which, consequently, must have lasted *for more than three entire days and nights* at the very least. Latterly I have had reason, both from my own experience and the assurance of others, to be acquainted with the strong soporific effects of the stench arising from old fish-oil when closely confined; and when I think of the condition of the hold in which I was imprisoned, and the long period during which the brig had been used as a whaling vessel, I am more inclined to wonder that I awoke at all after once falling asleep, than that I should have slept uninterruptedly for the period specified above.

Augustus called to me at first in a low voice and without closing the trap—but I made him no reply. He then shut the trap, and spoke to me in a louder, and finally in a very loud tone—still I continued to snore. He was now at a loss what to do. It would take him some time to make his way through the lumber to my box, and in the meanwhile his absence would be noticed by Captain Barnard, who had occasion for his services every minute in arranging and copying papers connected with the business of the voyage. He determined therefore upon reflection to ascend, and await another opportunity of visiting me. He was the more easily induced to this resolve, as my slumber appeared to be of the most tranquil nature, and he could not suppose that I had undergone any inconvenience from my incarceration. He had just made up his mind on these points, when his attention was arrested by an unusual bustle, the sound of which proceeded apparently .

from the cabin. He sprang through the trap as quickly as possible, closed it, and threw open the door of his state-room. No sooner had he put his foot over the threshold than a pistol flashed in his face, and he was knocked down at the same moment by a blow from a handspike.

A strong hand held him on the cabin-floor, with a tight grasp upon his throat; still he was able to see what was going on around him. His father was tied hand and foot, and lying along the steps of the companion-way, with his head down, and a deep wound in the forehead, from which the blood was flowing in a continued stream. He spoke not a word, and was apparently dying. Over him stood the first mate, eyeing him with an expression of fiendish derision, and deliberately searching his pockets, from which he presently drew forth a large wallet and a chronometer. Seven of the crew (among whom was the cook, a negro) were rummaging the state-rooms on the larboard for arms, where they soon equipped themselves with muskets and ammunition. Besides Augustus and Captain Barnard, there were nine men altogether in the cabin, and these among the most ruffianly of the brig's company. The villains now went upon deck, taking my friend with them, after having secured his arms behind his back. They proceeded straight to the forecastle, which was fastened down—two of the mutineers standing by it with axes—two also at the main hatch. The mate called out in a loud voice—"Do you hear there below? tumble up with you, one by one—now, mark that—and no grumbling!" It was some minutes before any one appeared;—at last an Englishman, who had shipped as a raw hand, came up, weeping pitifully, and entreating the mate, in the most humble manner, to spare his life. The only reply was a blow on the forehead from an axe. The poor fellow fell to the deck without a groan, and the black cook lifted him up in his arms as he would a child, and tossed him deliberately into the sea. Hearing the blow and the plunge of the body, the men below could now be induced to venture on deck neither by threats nor promises, until a proposition was made to smoke them out. A general rush then ensued, and for a

moment it seemed possible that the brig might be retaken. The mutineers, however, succeeded at last in closing the forecastle effectually before more than six of their opponents could get up. These six, finding themselves so greatly outnumbered and without arms, submitted after a brief struggle. The mate gave them fair words—no doubt with a view of inducing those below to yield, for they had no difficulty in hearing all that was said on deck. The result proved his sagacity, no less than his diabolical villainy. All in the forecastle presently signified their intention of submitting, and, ascending one by one, were pinioned and thrown on their backs, together with the first six—there being, in all of the crew who were not concerned in the mutiny, twenty-seven.

A scene of the most horrible butchery ensued. The bound seamen were dragged to the gangway. Here the cook stood with an axe, striking each victim on the head as he was forced over the side of the vessel by the other mutineers. In this manner twenty-two perished, and Augustus had given himself up for lost, expecting every moment his own turn to come next. But it seemed that the villains were now either weary, or in some measure disgusted with their bloody labour, for the four remaining prisoners, together with my friend, who had been thrown on the deck with the rest, were respite while the mate sent below for rum, and the whole murderous party held a drunken carouse, which lasted until sunset. They now fell to disputing in regard to the fate of the survivors, who lay not more than four paces off, and could distinguish every word said. Upon some of the mutineers the liquor appeared to have a softening effect, for several voices were heard in favour of releasing the captives altogether on condition of joining the mutiny and sharing the profits. The black cook, however (who in all respects was a perfect demon, and who seemed to exert as much influence, if not more, than the mate himself), would listen to no proposition of the kind, and rose repeatedly for the purpose of resuming his work at the gangway. Fortunately, he was so far overcome by intoxication as to be easily restrained by the less bloodthirsty of the party, among whom was a line-

manager, who went by the name of Dirk Peters. This man was the son of an Indian woman of the tribe of Upsarokas, who live among the fastnesses of the Black Hills, near the source of the Missouri. His father was a fur-trader, I believe, or at least connected in some manner with the Indian trading-posts on Lewis river. Peters himself was one of the most ferocious-looking men I ever beheld. He was short in stature, not more than four feet eight inches high, but his limbs were of Herculean mould. His hands, especially, were so enormously thick and broad as hardly to retain a human shape. His arms, as well as legs, were *bowed* in the most singular manner, and appeared to possess no flexibility whatever. His head was equally deformed, being of immense size, with an indentation on the crown (like that on the head of most negroes), and entirely bald. To conceal this latter deficiency, which did not proceed from old age, he usually wore a wig formed of any hair-like material which presented itself—occasionally the skin of a Spanish dog or American grizzly bear. At the time spoken of he had on a portion of one of these bear-skins, and it added no little to the natural ferocity of his countenance, which betook of the Upsaroka character. The mouth extended nearly from ear to ear; the lips were thin, and seemed, like some other portions of his frame, to be devoid of natural pliancy, so that the ruling expression never varied under the influence of any emotion whatever. This ruling expression may be conceived when it is considered that the teeth were exceedingly long and protruding, and never even partially covered in any instance by the lips. To pass this man with a casual glance one might imagine him to be convulsed with laughter, but a second look would induce a shuddering acknowledgment that if such an expression were indicative of merriment, the merriment must be that of a demon. Of this singular being many anecdotes were prevalent among the seafaring men of Nantucket. Those anecdotes went to prove his prodigious strength when under excitement, and some of them had given rise to a doubt of his sanity. But on board the *Grampus* it seems he was regarded at the time of the mutiny with feelings more of

derision than of anything else. I have been thus particular in speaking of Dirk Peters, because, ferocious as he appeared, he proved the main instrument in preserving the life of Augustus, and because I shall have frequent occasion to mention him hereafter in the course of my narrative—a narrative, let me here say, which, in its latter portions, will be found to include incidents of a nature so entirely out of the range of human experience, and for this reason so far beyond the limits of human credulity, that I proceed in utter hopelessness of obtaining credence for all that I shall tell, yet confidently trusting in time and progressing science to verify some of the most important and most improbable of my statements.

After much indecision and two or three violent quarrels, it was determined at last that all the prisoners (with the exception of Augustus, whom Peters insisted in a jocular manner upon keeping as his clerk) should be set adrift in one of the smallest whale-boats. The mate went down into the cabin to see if Captain Barnard was still living—for, it will be remembered, he was left below when the mutineers came up. Presently the two made their appearance, the captain pale as death, but somewhat recovered from the effects of his wound. He spoke to the men in a voice hardly articulate, entreated them not to set him adrift, but to return to their duty, and promising to land them wherever they chose, and to take no steps for bringing them to justice. He might as well have spoken to the winds. Two of the russians seized him by the arms and hurled him over the brig's side into the boat, which had been lowered while the mate went below. The four men who were lying on the deck were then untied and ordered to follow, which they did without attempting any resistance—Augustus being still left in his painful position, although he struggled and prayed only for the poor satisfaction of being permitted to bid his father farewell. A handful of sea-biscuit and a jug of water were now handed down, but neither mast, sail, oar, nor compass. The boat was towed astern for a few minutes, during which the mutineers held another consultation

it was then finally cut adrift. By this time night had come on—there were neither moon nor stars visible, and a short and ugly sea was running, although there was no great deal of wind. The boat was instantly out of sight, and little hope could be entertained for the unfortunate sufferers who were in it. This event happened, however, in latitude $35^{\circ} 30'$ north, longitude $61^{\circ} 20'$ west, and consequently at no very great distance from the Bermuda Islands. Augustus therefore endeavoured to console himself with the idea that the boat might either succeed in reaching the land, or come sufficiently near to be fallen in with by vessels off the coast.

All sail was now put upon the brig, and she continued her original course to the south-west—the mutineers being bent upon some piratical expedition, in which, from all that could be understood, a ship was to be intercepted on her way from the Cape Verd Islands to Porto Rico. No attention was paid to Augustus, who was untied and suffered to go about anywhere forward of the cabin companion-way. Dirk Peters treated him with some degree of kindness, and on one occasion saved him from the brutality of the cook. His situation was still one of the most precarious, as the men were continually intoxicated, and there was no relying upon their continued good-humour or carelessness in regard to himself. His anxiety on my account he represented, however, as the most distressing result of his condition ; and indeed I had never reason to doubt the sincerity of his friendship. More than once he had resolved to acquaint the mutineers with the secret of my being on board, but was restrained from so doing, partly through recollection of the atrocities he had already beheld, and partly through a hope of being able soon to bring me relief. For the latter purpose he was constantly on the watch, but, in spite of the most constant vigilance, three days elapsed after the boat was cut adrift before any chance occurred. At length, on the night of the third day, there came on a heavy blow from the eastward, and all hands were called up to take in sail. During the confusion which ensued, he made his way below unobserved, and into the state-room. What was his grief and horror in

discovering that the latter had been rendered a place of deposit for a variety of sea-stores and ship furniture, and that several fathoms of old chain-cable, which had been stowed away beneath the companion-ladder, had been dragged thence to make room for a chest, and were now lying immediately upon the trap! To remove it without discovery was impossible, and he returned on deck as quickly as he could. As he came up the mate seized him by the throat, and demanding what he had been doing in the cabin, was about flinging him over the larboard bulwark, when his life was again preserved through the interference of Dirk Peters. Augustus was now put in handcuffs (of which there were several pairs on board), and his feet lashed tightly together. He was then taken into the steerage, and thrown into a lower berth next to the forecastle bulkheads, with the assurance that he should never put his foot on deck again "until the brig was no longer a brig." This was the expression of the cook, who threw him into the berth; it is hardly possible to say what precise meaning was intended by the phrase. The whole affair, however, proved the ultimate means of my relief, as will presently appear.

CHAPTER V.

FOR some minutes after the cook had left the forecastle, Augustus abandoned himself to despair, never hoping to leave the berth alive. He now came to the resolution of acquainting the first of the men who should come down with my situation, thinking it better to let me take my chance with the mutineers than perish of thirst in the hold—for it had been ten days since I was first imprisoned, and my jug of water was not a plentiful supply even for four. As he was thinking on this subject, the idea came all at once into his head that it might be possible to communicate with me by the way of the main

hold. In any other circumstances, the difficulty and hazard of the undertaking would have prevented him from attempting it; but now he had, at all events, little prospect of life, and consequently little to lose—he bent his whole mind therefore upon the task.

His handcuffs were the first consideration. At first he saw no method of removing them, and feared that he should thus be baffled in the very outset; but upon a closer scrutiny, he discovered that the irons could be slipped off and on at pleasure with very little effort or inconvenience, merely by squeezing his hands through them—this species of manacle being altogether ineffectual in confining young persons, in whom the smaller bones readily yield to pressure. He now untied his feet, and leaving the cord in such a manner that it could easily be readjusted in the event of any person's coming down, proceeded to examine the bulkhead where it joined the berth. The partition here was of soft pine board, an inch thick, and he saw that he should have little trouble in cutting his way through. A voice was now heard at the forecastle companion-way, and he had just time to put his right hand into its handcuff (the left had not been removed), and to draw the rope in a slip-knot around his ankle, when Dirk Peters came below, followed by Tiger, who immediately leaped into the berth, and lay down. The dog had been brought on board by Augustus, who knew my attachment to the animal, and thought it would give me pleasure to have him with me during the voyage. He went up to our house for him immediately after first taking me into the hold, but did not think of mentioning the circumstance upon his bringing the watch. Since the mutiny, Augustus had not seen him before his appearance with Dirk Peters, and had given him up for lost, supposing him to have been thrown overboard by some of the malignant villains belonging to the mate's gang. It appeared afterwards that he had crawled into a hole beneath a whale-boat, from which, not having room to turn round, he could not extricate himself. Peters at last let him out, and with a species of good feeling which my friend knew well how to appreciate, had now

brought him to him in the forecastle as a companion, leaving at the same time some salt junk and potatoes, with a can of water : he then went on deck, promising to come down with something more to eat on the next day.

When he had gone, Augustus freed both hands from the manacles and unfastened his feet. He then turned down the head of the mattress on which he had been lying, and with his penknife (for the Russians had not thought it worth while to search him) commenced cutting vigorously across one of the partition planks, as closely as possible to the floor of the berth. He chose to cut here because, if suddenly interrupted, he would be able to conceal what had been done by letting the head of the mattress fall into its proper position. For the remainder of the day, however, no disturbance occurred, and by night he had completely divided the plank. It should here be observed that none of the crew occupied the forecastle as a sleeping-place, living altogether in the cabin since the mutiny, drinking the wines, and feasting on the sea stores of Captain Barnard, and giving no more heed than was absolutely necessary to the navigation of the brig. These circumstances proved fortunate both for myself and Augustus ; for, had matters been otherwise, he would have found it impossible to reach me. As it was, he proceeded with confidence in his design. It was near day-break, however, before he completed the second division of the board (which was about a foot above the first cut), thus making an aperture quite large enough to admit his passage through with facility to the main orlop deck. Having got here, he made his way with but little trouble to the lower main hatch, although in so doing he had to scramble over tiers of oil-casks piled nearly as high as the upper deck, there being barely room enough left for his body. Upon reaching the hatch, he found that Tiger had followed him below, squeezing between two rows of the casks. It was now too late, however, to attempt getting to me before dawn, as the chief difficulty lay in passing through the close stowage in the lower hold. He therefore resolved to return, and wait till the next night. With this design, he proceeded to loosen the hatch, so that he

might have as little detention as possible when he should come again. No sooner had he loosened it than Tiger sprang eagerly to the small opening produced, snuffed for a moment, and then uttered a long whine, scratching at the same time, as if anxious to remove the covering with his paws. There could be no doubt from his behaviour that he was aware of my being in the hold, and Augustus thought it possible that he would be able to get to me if he put him down. He now hit upon the expedient of sending the note, as it was especially desirable that I should make no attempt at forcing my way out, at least under existing circumstances, and there could be no certainty of his getting to me himself on the morrow, as he intended. After events proved how fortunate it was that the idea occurred to him as it did; for, had it not been for the receipt of the note, I should undoubtedly have fallen upon some plan, however desperate, of alarming the crew, and both our lives would most probably have been sacrificed in consequence.

Having concluded to write, the difficulty was now to procure the materials for so doing. An old toothpick was soon made into a pen; and this by means of feeling altogether, for the between-decks were as dark as pitch. Paper enough was obtained from the back of a letter—a duplicate of the forged letter from Mr. Ross. This had been the original draft, but the handwriting not being sufficiently well imitated, Augustus had written another, thrusting the first, by good fortune, into his coat pocket, where it was now most opportunely discovered. Ink alone was thus wanting, and a substitute was immediately found for this by means of a slight incision with the penknife on the back of a finger just above the nail—a copious flow of blood ensuing, as usual, from wounds in that vicinity. The note was now written, as well as it could be in the dark, and under the circumstances. It briefly explained that a mutiny had taken place; that Captain Barnard was set adrift; and that I might expect immediate relief as far as provisions were concerned, but must not venture upon making any disturbance. It concluded with these words: “*I have*

“*This with blood—your life depends upon lying close.*”

The slip of paper being tied upon the dog, he was now put down the hatchway, and Augustus made the best of his way back to the forecastle, where he found no reason to believe that any of the crew had been in his absence. To conceal the hole in the partition, he drove his knife in just above it, and hung up a pea-jacket which he found in the berth. His handcuffs were then replaced, also the rope around his ankles.

These arrangements were scarcely completed when Dirk Peters came below, very drunk, but in excellent humour, and bringing with him my friend's allowance of provision for the day. This consisted of a dozen large Irish potatoes roasted, and a pitcher of water. He sat for some time on a chest by the berth, and talked freely about the mate and the general concerns of the brig. His demeanour was exceedingly capricious, and even grotesque. At one time Augustus was much alarmed by his odd conduct. At last, however, he went on deck, muttering a promise to bring his prisoner a good dinner on the morrow. During the day two of the crew (harpooners) came down, accompanied by the cook, all three in nearly the last stage of intoxication. Like Peters, they made no scruple of talking unreservedly about their plans. It appeared that they were much divided among themselves as to their ultimate course, agreeing in no point except the attack on the ship from the Cape Verd Islands, with which they were in hourly expectation of meeting. As far as could be ascertained, the mutiny had not been brought about altogether for the sake of booty; a private pique of the chief mate's against Captain Barnard having been the main instigation. There now seemed to be two principal factions among the crew—one headed by the mate, the other by the cook. The former party were for seizing the first suitable vessel which should present itself, and equipping it at some of the West India Islands for a piratical cruise. The latter division, however, which was the stronger, and included Dirk Peters among its partisans, were bent upon pursuing the course originally laid out for the brig into the

South Pacific ; there either to take whale, or act otherwise, as circumstances should suggest. The representations of Peters, who had frequently visited these regions, had great weight apparently with the mutineers, wavering as they were between half-engendered notions of profit and pleasure. He dwelt on the world of novelty and amusement to be found among the innumerable islands of the Pacific, on the perfect security and freedom from all restraint to be enjoyed, but more particularly on the deliciousness of the climate, on the abundant means of good living, and on the voluptuous beauty of the women. As yet, nothing had been absolutely determined upon, but the pictures of the hybrid line-manager were taking strong hold upon the ardent imaginations of the seamen, and there was every probability that his intentions would be finally carried into effect.

The three men went away in about an hour, and no one else entered the forecastle all day. Augustus lay quiet until nearly night. He then freed himself from the rope and irons, and prepared for his attempt. A bottle was found in one of the berths, and this he filled with water from the pitcher left by Peters, storing his pockets at the same time with cold potatoes. To his great joy, he also came across a lantern with a small piece of tallow candle in it. This he could light at any moment, as he had in his possession a box of phosphorus matches. When it was quite dark he got through the hole in the bulkhead, having taken the precaution to arrange the bedclothes in the berth so as to convey the idea of a person covered up. When through, he hung up the pea-jacket on his knife as before, to conceal the aperture—this manœuvre being easily effected as he did not readjust the piece of plank taken out until afterwards. He was now on the main orlop deck, and proceeded to make his way as before between the upper deck and the oil-casks to the main hatchway. Having reached this, he lit the piece of candle and descended, groping with extreme difficulty among the compact stowage of the hold. In a few moments he became alarmed at the insufferable stench and the closeness of the atmosphere. He could not think it possible that I had

survived my confinement for so long a period breathing so oppressive an air. He called my name repeatedly, but I made him no reply, and his apprehensions seemed thus to be confirmed. The brig was rolling violently, and there was so much noise in consequence, that it was useless to listen for any weak sound, such as those of my breathing or snoring. He threw open the lantern, and held it as high as possible whenever an opportunity occurred, in order that by observing the light I might, if alive, be aware that succour was approaching. Still nothing was heard from me, and the supposition of my death began to assume the character of certainty. He determined, nevertheless, to force a passage, if possible, to the box, and at least ascertain beyond a doubt the truth of his surmises. He pushed on for some time in a most pitiable state of anxiety, until at length he found the pathway utterly blocked up, and that there was no possibility of making any farther way by the course in which he had set out. Overcome now by his feelings, he threw himself among the lumber in despair, and wept like a child. It was at this period that he heard the crash occasioned by the bottle which I had thrown down. Fortunate, indeed, was it that the incident occurred—for upon this incident, trivial as it appears, the thread of my destiny depended. Many years elapsed, however, before I was aware of this fact. A natural shame and regret for his weakness and indecision prevented Augustus from confiding to me at once what a more intimate and unreserved communion afterwards induced him to reveal. Upon finding his farther progress in the hold impeded by obstacles which he could not overcome, he had resolved to abandon his attempt at reaching me, and return at once to the forecastle. Before condemning him entirely on this head, the harassing circumstances which embarrassed him should be taken into consideration. The night was fast wearing away, and his absence from the forecastle might be discovered, and indeed would necessarily be so if he should fail to get back to the berth by daybreak. His candle was expiring in the socket, and there would be the greatest difficulty in retracing his way to the hatchway in the dark. It must be allowed, too, that

he had every good reason to believe me dead ; in which event no benefit could result to me from his reaching the box, and a world of danger would be encountered to no purpose by himself. He had repeatedly called, and I had made him no answer. I had been now eleven days and nights with no more water than that contained in the jug which he had left with me—a supply which it was not at all probable I had hoarded in the beginning of my confinement, as I had had every cause to expect a speedy release. The atmosphere of the hold, too, must have appeared to him, coming from the comparatively open air of the steerage, of a nature absolutely poisonous, and by far more intolerable than it had seemed to me upon my first taking up my quarters in the box—the hatchways at that time having been constantly open for many months previous. Add to these considerations that of the scene of bloodshed and terror so lately witnessed by my friend ; his confinement, privations, and narrow escapes from death, together with the frail and equivocal tenure by which he still existed—circumstances all so well calculated to prostrate every energy of mind—and the reader will be easily brought, as I have been, to regard his apparent falling off in friendship and in faith with sentiments rather of sorrow than of anger.

The crash of the bottle was distinctly heard, yet Augustus was not sure that it proceeded from the hold. The doubt, however, was sufficient inducement to persevere. He clambered up nearly to the orlop deck by means of the stowage, and then, watching for a lull in the pitchings of the vessel, he called out to me in as loud a tone as he could command, regardless for the moment of the danger of being overheard by the crew. It will be remembered that on this occasion the voice reached me, but I was so entirely overcome by violent agitation as to be incapable of reply. Confident now that his worst apprehensions were well founded, he descended with a view of getting back to the forecastle without loss of time. In his haste, some small boxes were thrown down, the noise occasioned by which I heard, as will be recollect ed. He had made considerable progress on his return, when the fall of the knife

again caused him to hesitate. He retraced his steps immediately, and, clambering up the stowage a second time, called out my name, loudly as before, having watched for a lull. This time I found voice to answer. Overjoyed at discovering me to be still alive, he now resolved to brave every difficulty and danger in reaching me. Having extricated himself as quickly as possible from the labyrinth of lumber by which he was hemmed in, he at length struck into an opening which promised better, and finally, after a series of struggles, arrived at the box in a state of utter exhaustion.

CHAPTER VI.

THE leading particulars of this narration were all that Augustus communicated to me while we remained near the box. It was not until afterwards that he entered fully into all the details. He was apprehensive of being missed, and I was wild with impatience to leave my detested place of confinement. We resolved to make our way at once to the hole in the bulkhead, near which I was to remain for the present, while he went through to reconnoitre. To leave Tiger in the box was what neither of us could endure to think of ; yet, how to act otherwise was the question. He now seemed to be perfectly quiet, and we could not even distinguish the sound of his breathing upon applying our ears closely to the box. I was convinced that he was dead, and determined to open the door. We found him lying at full length, apparently in a deep stupor, yet still alive. No time was to be lost, yet I could not bring myself to abandon an animal who had now been twice instrumental in saving my life, without some attempt at preserving him. We therefore dragged him along with us as well as we could, although with the greatest difficulty and fatigue; Augustus, during part of the time, being forced to clamber

over the impediments in our way with the huge dog in his arms—a feat to which the feebleness of my frame rendered me totally inadequate. At length we succeeded in reaching the hole, when Augustus got through, and Tiger was pushed in afterwards. All was found to be safe, and we did not fail to return sincere thanks to God for our deliverance from the imminent danger we had escaped. For the present, it was agreed that I should remain near the opening, through which my companion could readily supply me with a part of his daily provision, and where I could have the advantages of breathing an atmosphere comparatively pure.

In explanation of some portions of this narrative, wherein I have spoken of the stowage of the brig, and which may appear ambiguous to some of my readers who may have seen a proper or regular stowage, I must here state that the manner in which this most important duty had been performed on board the *Grampus* was a most shameful piece of neglect on the part of Captain Barnard¹, who was by no means as careful or as experienced a seaman as the hazardous nature of the service on which he was employed would seem necessarily to demand. A proper stowage cannot be accomplished in a careless manner, and many most disastrous accidents, even within the limits of my own experience, have arisen from neglect or ignorance in this particular. Coasting vessels, in the frequent hurry and bustle attendant upon taking in or discharging cargo, are the most liable to mishap from the want of a proper attention to stowage. The great point is to allow no possibility of the cargo or ballast's shifting position even in the most violent rollings of the vessel. With this end, great attention must be paid not only to the bulk taken in but to the nature of the bulk, and whether there be a full or only a partial cargo. In most kinds of freight the stowage is accomplished by means of a screw. Thus, in a load of tobacco or flour, the whole is screwed so tightly into the hold of the vessel that the barrels or hogsheads upon discharging are found to be completely flattened, and take some time to regain their original shape. This screwing, however, is resorted to principally with a view

of obtaining more room in the hold ; for, in a *full* load of any such commodities as flour or tobacco, there can be no danger of any shifting whatever, at least none from which inconvenience can result. There have been instances indeed where this method of screwing has resulted in the most lamentable consequences, arising from a cause altogether distinct from the danger attendant upon a shifting of cargo. A load of cotton, for example, tightly screwed while in certain conditions, has been known, through the expansion of its bulk, to rend a vessel asunder at sea. There can be no doubt, either, that the same result would ensue in the case of tobacco while undergoing its usual course of fermentation, were it not for the interstices consequent upon the rotundity of the hogsheads.

It is when a partial cargo is received that danger is chiefly to be apprehended from shifting, and that precautions should be always taken to guard against such misfortune. Only those who have encountered a violent gale of wind, or rather who have experienced the rolling of a vessel in a sudden calm after the gale, can form an idea of the tremendous force of the plunges, and of the consequent terrible impetus given to all loose articles in the vessel. It is then that the necessity of a cautious stowage, when there is a partial cargo, becomes obvious. When lying to (especially with a small head sail), a vessel which is not properly modelled in the bows is frequently thrown upon her beam-ends ; this occurring even every fifteen or twenty minutes upon an average, yet without any serious consequences resulting, *provided there be a proper stowage*. If this, however, has not been strictly attended to, in the first of these heavy lurches the whole of the cargo tumbles over to the side of the vessel which lies upon the water, and, being thus prevented from regaining her equilibrium, as she would otherwise necessarily do, she is certain to fill in a few seconds and go down. It is not too much to say that at least one-half of the instances in which vessels have foundered in heavy gales at sea may be attributed to a shifting of cargo or of ballast.

When a partial cargo of any kind is taken on board, the whole, after being first stowed as compactly as may be, should

be covered with a layer of stout shifting boards, extending completely across the vessel. Upon these boards strong temporary stanchions should be erected, reaching to the timbers above, and thus securing everything in its place. In cargoes consisting of grain, or any similar matter, additional precautions are requisite. A hold filled entirely with grain upon leaving port will be found not more than three fourths full upon reaching its destination, this, too, although the freight, when measured bushel by bushel by the consignee, will overrun by a vast deal (on account of the swelling of the grain) the quantity consigned. This result is occasioned by *settling* during the voyage, and is the more perceptible in proportion to the roughness of the weather experienced. If grain loosely thrown in a vessel, then, is ever so well secured by shifting boards and stanchions, it will be liable to shift in a long passage so greatly as to bring about the most distressing calamities. To prevent these, every method should be employed before leaving port to *settle* the cargo as much as possible, and for this there are many contrivances, among which may be mentioned the driving of wedges into the grain. Even after all this is done, and unusual pains taken to secure the shifting boards, no seaman who knows what he is about will feel altogether secure in a gale of any violence with a cargo of grain on board, and least of all with a partial cargo. Yet there are hundreds of our coasting vessels, and it is likely many more from the ports of Europe, which sail daily with partial cargoes, even of the most dangerous species, and without any precautions whatever. The wonder is that no more accidents occur than do actually happen. A lamentable instance of this heedlessness occurred to my knowledge in the case of Captain Joel Rice of the schooner *Fairy*, which sailed from Richmond, Virginia, to Madeira, with a cargo of corn, in the year 1825. The captain had gone many voyages without serious accident, although he was in the habit of paying no attention whatever to his stowage, more than to secure it in the ordinary manner. He had never before sailed with a cargo of grain, and on this occasion had the corn thrown on board loosely, when it did not much more than half fill the

vessel. For the first portion of the voyage he met with nothing more than light breezes, but when within a day's sail of Madeira there came on a strong gale from N.N.E. which forced him to lie to. He brought the schooner to the wind under a double-reefed foresail alone, when she rode as well as any vessel could be expected to do, and shipped not a drop of water. Towards night the gale somewhat abated, and she rolled with more unsteadiness than before, but still did very well, until a heavy lurch threw her upon her beam-ends to starboard. The corn was then heard to shift bodily, the force of the movement bursting open the main hatchway. The vessel went down like a shot. This happened within hail of a small sloop from Madeira, which picked up one of the crew (the only person saved), and which rode out the gale in perfect security, as indeed a jolly-boat might have done under proper management.

The stowage on board the *Grampus* was most clumsily done, if stowage that could be called which was little better than a promiscuous huddling together of oil-casks* and ship furniture. I have already spoken of the condition of articles in the hold. On the orlop deck there was space enough for my body (as I have stated) between the oil-casks and the upper deck, a space was left open around the main hatchway, and several other large spaces were left in the stowage. Near the hole cut through the bulkhead by Augustus there was room enough for an entire cask, and in this space I found myself comfortably situated for the present.

By the time my friend had got safely into the berth, and readjusted his handcuffs and the rope, it was broad daylight. We had made a narrow escape indeed, for scarcely had he arranged all matters when the mate came below with Dirk Potters and the cook. They talked for some time about the vessel from the Cape Verds, and seemed to be excessively anxious for her appearance. At length the cook came to the berth in which Augustus was lying, and seated himself in it near the head. I could see and hear everything from my hiding-

* Whaling vessels are usually fitted with iron oil-tanks; why the *Grampus* was not I have never been able to ascertain.

place, for the piece cut out had not been put back, and I was in momentary expectation that the negro would fall against the pea-jacket which was hung up to conceal the aperture, in which case all would have been discovered, and our lives would, no doubt, have been instantly sacrificed. Our good fortune prevailed, however, and although he frequently touched it as the vessel rolled, he never pressed against it sufficiently to bring about a discovery. The bottom of the jacket had been carefully fastened to the bulkhead, so that the hole might not be seen by its swinging to one side. All this time Tiger was lying in the foot of the berth, and appeared to have recovered in some measure his faculties, for I could see him occasionally open his eyes and draw a long breath.

After a few minutes the mate and cook went above, leaving Dirk Peters behind, who, as soon as they were gone, came and sat himself down in the place just occupied by the mate. He began to talk very sociably with Augustus, and we could now see that the greater part of his apparent intoxication, while the two others were with him, was a feint. He answered all my companion's questions with perfect freedom; told him that he had no doubt of his father's having been picked up, as there were no less than five sail in sight just before sundown on the day he was cut adrift; and used other language of a consolatory nature, which occasioned me no less surprise than pleasure. Indeed, I began to entertain hopes, that through the instrumentality of Peters we might be finally enabled to regain possession of the brig, and this idea I mentioned to Augustus as soon as I found an opportunity. He thought the matter possible, but urged the necessity of the greatest caution in making the attempt, as the conduct of the hybrid appeared to be instigated by the most arbitrary caprice alone; and, indeed, it was difficult to say if he was at any moment of sound mind. Peters went upon deck in about an hour, and did not return again until noon, when he brought Augustus a plentiful supply of junk beef and pudding. Of this, when we were left alone, I partook heartily, without returning through the hole. No one else came down into the forecastle during

the day, and at night I got into Augustus's berth, where I slept soundly and sweetly until nearly daybreak, when he awakened me upon hearing a stir upon deck, and I regained my hiding place as quickly as possible. When the day was fully broke, we found that Tiger had recovered his strength almost entirely, and gave no indications of hydrophobia, drinking a little water that was offered him with great apparent eagerness. During the day he regained all his former vigour and appetite. His strange conduct had been brought on, no doubt, by the deleterious quality of the air of the hold, and had no connection with canine madness. I could not sufficiently rejoice that I had persisted in bringing him with me from the box. This day was the thirtieth of June, and the thirteenth since the *Giompus* made sail from Nantucket.

On the second of July the mate came below, drunk as usual, and in an excessively good humour. He came to Augustus's berth, and, giving him a slap on the back, asked him if he thought he could behave himself if he let him loose, and whether he would promise not to be going into the cabin again. To this, of course, my friend answered in the affirmative, when the Russian set him at liberty, after making him drink from a flask of rum which he drew from his coat-pocket. Both now went on deck, and I did not see Augustus for about three hours. He then came below with the good news that he had obtained permission to go about the brig as he pleased anywhere forward of the mainmast, and that he had been ordered to sleep, as usual, in the forecastle. He brought me, too, a good dinner, and a plentiful supply of water. The brig was still cruising for the vessel from the Cape Verds, and a sail was now in sight, which was thought to be the one in question. As the events of the ensuing eight days were of little importance, and had no direct bearing upon the main incidents of my narrative, I will here throw them into the form of a journal, as I do not wish to omit them altogether.

July 3rd. Augustus furnished me with three blankets, with which I contrived a comfortable bed in my hiding-place. No one came below, except my companion, during the day. Tiger took his station in the berth,

just by the aperture, and slept heavily, as if not yet entirely recovered from the effects of his sickness. Towards night a flaw of wind struck the brig before sail could be taken in, and very nearly capsized her. The puff died away immediately, however, and no damage was done beyond the splitting of the foretopsail. Dirk Peters treated Augustus all this day with great kindness, and entered into a long conversation with him respecting the Pacific Ocean, and the islands he had visited in that region. He asked him whether he would not like to go with the mutineers on a kind of exploring and pleasure voyage in those quarters, and said that the men were gradually coming over to the mate's views. To this Augustus thought it best to reply that he would be glad to go on such an adventure, since nothing better could be done, and that anything was preferable to a piratical life.

July 4th. The vessel in sight proved to be a small brig from Liverpool, and was allowed to pass unchallenged. Augustus spent most of his time on deck, with a view of obtaining all the information in his power respecting the intentions of the mutineers. They had frequent and violent quarrels among themselves, in one of which a harpooner, Jim Bonner, was thrown overboard. The party of the mate was gaining ground. Jim Bonner belonged to the cook's gang, of which Peters was a partisan.

July 5th. About laybreak there came on a stiff breeze from the west, which at noon freshened into a gale, so that the brig could carry nothing more than hertrysail and foresail. In taking in the foretopsail, Simms, one of the common hands, and belonging also to the cook's gang, fell overboard, being very much in liquor, and was drowned, no attempt being made to save him. The whole number of persons on board was now thirteen, to wit: Dirk Peters; Seymour, the black cook; — Jones; — Greely; Hartman Rogers; and William Allen, of the cook's party; the mate, whose name I never learned; Alsalom Hicks; — Wilson; John Hunt; and Richard Parker, of the mate's party—besides Augustus and myself.

July 6th. The gale lasted all this day, blowing in heavy squalls, accompanied with rain. The brig took in a good deal of water through her seams, and one of the pumps was kept continually going, Augustus being forced to take his turn. Just at twilight a large ship passed close by us, without having been discovered until within hail. This ship was supposed to be the one for which the mutineers were on the look-out. The mate hailed her, but the reply was drowned in the roaring of the gale. At eleven, a sea was shipped amidships, which tore away a great portion of the larboard bulwarks, and did some other slight damage. Towards morning the weather moderated, and at sunrise there was very little wind.

July 7th. There was a heavy swell running all this day, during which the brig, being light, rolled excessively, and many articles broke loose in the hold, as I could hear distinctly from my hiding place. I suffered a

great deal from sea-sickness. Peters had a long conversation this day with Augustus, and told him that two of his gang, Greely and Allen, had gone over to the mate, and were resolved to turn pirates. He put several questions to Augustus which he did not then exactly understand. During a part of this evening the leak gained upon the vessel ; and little could be done to remedy it, as it was occasioned by the brig's straining, and taking in the water through her seams. A sail was thrummed, and got under the bows, which aided us in some measure, so that we began to gain upon the leak.

July 8th. A light breeze sprung up at sunrise from the eastward, when the mate headed the brig to the south-west, with the intention of making some of the West India Islands, in pursuance of his piratical designs. No opposition was made by Peters or the cook--at least none in the hearing of Augustus. All idea of taking the vessel from the Cape Verds was abandoned. The leak was now easily kept under by one pump going every three-quarters of an hour. The sail was drawn from beneath the bows. Spoke two small schooners during the day.

July 9th. Fine weather. All hands employed in repairing bulwarks. Peters had again a long conversation with Augustus, and spoke more plainly than he had done heretofore. He said nothing should induce him to come into the mate's views, and even hinted his intention of taking the brig out of his hands. He asked my friend if he could depend upon his aid in such case, to which Augustus said, "Yes," without hesitation. Peters then said he would sound the others of his party upon the subject, and went away. During the remainder of the day Augustus had no opportunity of speaking with him privately.

CHAPTER VII.

JULY 10. Spoke a brig from Rio, bound to Norfolk. Weather hazy, with a light baffling wind from the eastward. To-day Hartman Rogers died, having been attacked on the eighth with spasms after drinking a glass of grog. This man was of the cook's party, and one upon whom Peters placed his main reliance. He told Augustus that he believed the mate had poisoned him, and that he expected, if he did not be on the look-out, his own turn would come shortly. There were now

only himself, Jones, and the cook belonging to his own gang —on the other side there were five. He had spoken to Jones about taking the command from the mate; but the project having been coolly received, he had been deterred from pressing the matter any further, or from saying anything to the cook. It was well, as it happened, that he was so prudent, for in the afternoon the cook expressed his determination of siding with the mate, and went over formally to that party; while Jones took an opportunity of quarrelling with Peters, and hinted that he would let the mate know of the plan in agitation. There was now, evidently, no time to be lost, and Peters expressed his determination of attempting to take the vessel at all hazards, provided Augustus would lend him his aid. My friend at once assured him of his willingness to enter into any plan for that purpose, and, thinking the opportunity a favourable one, made known the fact of my being on board. At this the hybrid was not more astonished than delighted, as he had no reliance whatever upon Jones, whom he already considered as belonging to the party of the mate. They went below immediately, when Augustus called to me by name, and Peters and myself were soon made acquainted. It was agreed that we should attempt to retake the vessel upon the first good opportunity, leaving Jones altogether out of our councils. In the event of success, we were to run the brig into the first port that offered, and deliver her up. The desertion of his party had frustrated Peters' design of going into the Pacific —an adventure which could not be accomplished without a crew, and he depended upon either getting acquitted upon trial on the score of insanity (which he solemnly averred had actuated him in lending his aid to the mutiny), or upon obtaining a pardon, if found guilty, through the representations of Augustus and myself. Our deliberations were interrupted for the present by the cry of "all hands take in sail," and Peters and Augustus ran up on deck.

As usual, the crew were nearly all drunk, and before sail could be properly taken in a violent squall laid the brig on her beam-ends. By keeping her away, however, she righted,

having shipped a good deal of water. Scarcely was everything secure when another squall took the vessel, and immediately afterward another—no damage being done. There was every appearance of a gale of wind, which indeed shortly came on with great fury from the northward and westward. All was made as snug as possible, and we laid to, as usual, under a close reefed foresail. As night drew on, the wind increased in violence, with a remarkably heavy sea. Peters now came into the forecastle with Augustus, and we resumed our deliberations.

We agreed that no opportunity could be more favourable than the present for carrying our design into effect, as an attempt at such a moment would never be anticipated. As the brig was snugly laid to, there would be no necessity of manoeuvring her until good weather, when, if we succeeded in our attempt, we might liberate one, or perhaps two of the men, to aid us in taking her into port. The main difficulty was the great disproportion in our forces. There were only three of us, and in the cabin there were nine. All the arms on board, too, were in their possession, with the exception of a pair of small pistols which Peters had concealed about his person, and the large seaman's knife which he always wore in the waistband of his pantaloons. From certain indications, too—such, for example, as there being no such thing as an axe or a hand spike lying in their customary places—we began to fear that the mate had his suspicions, at least in regard to Peters, and that he would let slip no opportunity of getting rid of him. It was clear, indeed, that what we should determine to do could not be done too soon. Still the odds were too much against us to allow of our proceeding without the greatest caution.

Peters proposed that he should go up on deck and enter into conversation with the watch (Allen), when he would be able to throw him into the sea without trouble, and without making any disturbance, by seizing a good opportunity; that Augustus and myself should then come up and endeavour to provide ourselves with some kind of weapons from the deck; and that we should then make a rush together and secure the

companion-way before any opposition could be offered. I objected to this, because I could not believe that the mate (who was a cunning fellow in all matters which did not affect his superstitious prejudices) would suffer himself to be so easily entrapped. The very fact of there being a watch on deck at all was sufficient proof that he was upon the alert—it not being usual, except in vessels where discipline is most rigidly enforced, to station a watch on deck when a vessel is lying to in a gale of wind. As I address myself principally, if not altogether, to persons who have never been to sea, it may be as well to state the exact condition of a vessel under such circumstances. Lying to, or, in sea-parlance, "laying to," is a measure resorted to for various purposes, and effected in various manners. In moderate weather it is frequently done with a view of merely bringing the vessel to a stand still, to wait for another vessel, or any similar object. If the vessel which lies to is under full sail, the manœuvre is usually accomplished by throwing round some portion of her sails, so as to let the wind take them aback, when she becomes stationary. But we are now speaking of lying to in a gale of wind. This is done when the wind is ahead, and too violent to admit of carrying sail without danger of capsizing; and sometimes even when the wind is fair but the sea too heavy for the vessel to be put before it. If a vessel be suffered to scud before the wind in a very heavy sea, much damage is usually done her by the shipping of water over her stern, and sometimes by the violent plunges she makes forward. This manœuvre, then, is seldom resorted to in such cases unless through necessity. When the vessel is in a leaky condition, she is often put before the wind even in the heaviest seas; for when lying to her seams are sure to be greatly opened by her violent straining, and it is not so much the case when scudding. Often, too, it becomes necessary to scud a vessel, either when the blast is so exceedingly furious as to tear in pieces the sail which is employed with a view of bringing her head to the wind, or when, through the false modelling of the frame or other causes, this main object cannot be effected.

Vessels in a gale of wind are laid to in different manners according to their peculiar construction. Some lie to best under a foresail, and this, I believe, is the sail most usually employed. Large square-rigged vessels have sails for the express purpose, called storm-staysails. But the jib is occasionally employed by itself—sometimes the jib and foresail, or a double-reefed foresail, and not unfrequently the aftersails are made use of. Foretopsails are very often found to answer the purpose better than any other species of sail. The *Grampus* was generally laid to under a close-reefed foresail.

When a vessel is to be laid to, her head is brought up to the wind just so nearly as to fill the sail under which she lies, when hauled flat aft, that is, when brought diagonally across the vessel. This being done, the bows point within a few degrees of the direction from which the wind issues, and the windward bow of course receives the shock of the waves. In this situation a good vessel will ride out a very heavy gale of wind without shipping a drop of water, and without any further attention being requisite on the part of the crew. The helm is usually lashed down, but this is altogether unnecessary (except on account of the noise it makes when loose), for the rudder has no effect upon the vessel when lying to. Indeed, the helm had far better be left loose than lashed very fast, for the rudder is apt to be torn off by heavy seas if there be no room for the helm to play. As long as the sail holds, a well-modelled vessel will maintain her situation and ride every sea as if instinct with life and reason. If the violence of the wind, however, should tear the sail into pieces (a feat which it requires a perfect hurricane to accomplish under ordinary circumstances), there is then imminent danger. The vessel falls off from the wind, and, coming broadside to the sea, is completely at its mercy: the only resource in this case is to put her quietly before the wind, letting her scud until some other sail can be set. Some vessels will lie to under no sail whatever, but such are not to be trusted at sea.

But to return from this digression. It had never been customary with the mate to have any watch on deck when

lying to in a gale of wind, and the fact that he had now one, coupled with the circumstances of the missing axes and hand-spikes, fully convinced us that the crew were too well on the watch to be taken by surprise in the manner Peters had suggested. Something, however, was to be done, and that with as little delay as practicable, for there could be no doubt that a suspicion having been once entertained against Peters, he would be sacrificed upon the earliest occasion, and one would certainly be either found or made upon the breaking of the gale.

Augustus now suggested that if Peters could contrive to remove, under any pretext, the piece of chain-cable which lay over the trap in the state-room, we might possibly be able to come upon them unawares by means of the hold; but a little reflection convinced us that the vessel rolled and pitched too violently for any attempt of that nature.

By good fortune I at length hit upon the idea of working upon the superstitious terrors and guilty conscience of the mate. It will be remembered that one of the crew, Hartman Rogers, had died during the morning, having been attacked two days before with spasms after drinking some spirits and water. Peters had expressed to us his opinion that this man had been poisoned by the mate, and for this belief he had reasons, so he said, which were incontrovertible, but which he could not be prevailed upon to explain to us—this wayward refusal being only in keeping with other points of his singular character. But whether or not he had any better grounds for suspecting the mate than we had ourselves, we were easily led to fall in with his suspicion, and determined to act accordingly.

Rogers had died about eleven in the forenoon, in violent convulsions; and the corpse presented in a few minutes after death one of the most horrid and loathsome spectacles I ever remember to have seen. The stomach was swollen immensely, like that of a man who has been drowned and lain under water for many weeks. The hands were in the same condition, while the face was shrunken, shrivelled, and of a chalky whiteness, except where relieved by two or three glaring red splotches, like those occasioned by the erysipelas; one of these splotches

extended diagonally across the face, completely covering up an eye as if with a band of red velvet. In this disgusting condition the body had been brought up from the cabin at noon to be thrown overboard, when the mate getting a glimpse of it (for he now saw it for the first time), and being either touched with remorse for his crime, or struck with terror at so horrible a sight, ordered the men to sew the body up in its hammock, and allow it the usual rites of sea burial. Having given these directions, he went below, as if to avoid any further sight of his victim. While preparations were making to obey his orders, the gale came on with great fury, and the design was abandoned for the present. The corpse, left to itself, was washed into the larboard scuppers, where it still lay at the time of which I speak, floundering about with the furious lurches of the brig. Having arranged our plan, we set about putting it in execution as speedily as possible. Peters went upon deck, and, as he had anticipated, was immediately accosted by Allen, who appeared to be stationed more as a watch upon the forecastle than for any other purpose. The fate of this villain, however, was speedily and silently decided ; for Peters, approaching him in a careless manner, as if about to address him, seized him by the throat, and before he could utter a single cry tossed him over the bulwarks. He then called to us, and we came up. Our first precaution was to look about for something with which to arm ourselves, and in doing this we had to proceed with great care, for it was impossible to stand on deck an instant without holding fast, and violent seas broke over the vessel at every plunge forward. It was indispensable, too, that we should be quick in our operations, for every minute we expected the mate to be up to set the pumps going, as it was evident the brig must be taking in water very fast. After searching about for some time, we could find nothing more fit for our purpose than the two pump-handles, one of which Augustus took, and I the other. Having secured these, we stripped off the shirt of the corpse and dropped the body overboard. Peters and myself then went below, leaving Augustus to watch upon deck, where he took his station just where Allen

had been placed, and with his back to the cabin companion-way, so that if any one of the mate's gang should come up he might suppose it was the watch.

As soon as I got below I commenced disguising myself so as to represent the corpse of Rogers. The shirt which we had taken from the body aided us very much, for it was of singular form and character, and easily recognisable, a kind of smock which the deceased wore over his other clothing. It was a blue stockinett, with large white stripes running across. Having put this on, I proceeded to equip myself with a false stomach, in imitation of the horrible deformity of the swollen corpse. This was soon effected by means of stuffing with some bedclothes. I then gave the same appearance to my hands by drawing on a pair of white woollen mittens, and filling them in with any kind of rags that offered themselves. Peters then arranged my face, first rubbing it well over with white chalk, and afterwards splotching it with blood, which he took from a cut in his finger. The streak across the eye was not forgotten, and presented a most shocking appearance.

CHAPTER VIII

As I viewed myself in a fragment of looking-glass which hung up in the cabin, and by the dim light of a kind of battle lantern, I was so impressed with a sense of vague awe at my appearance, and at the recollection of the terrific reality which I was thus representing, that I was seized with a violent tremor, and could scarcely summon resolution to go on with my part. It was necessary, however, to act with decision, and Peters and myself went upon deck.

We there found everything safe, and, keeping close to the bulwarks, the three of us crept to the cabin companion-way

It was only partially closed, precautions having been taken to prevent its being suddenly pushed to from without, by means of placing billets of wood on the upper step, so as to interfere with the shutting. We found no difficulty in getting a full view of the interior of the cabin through the cracks where the hinges were placed. It now proved to have been very fortunate for us that we had not attempted to take them by surprise, for they were evidently on the alert. Only one was asleep, and he lying just at the foot of the companion-ladder with a musket by his side. The rest were seated on several mattresses which had been taken from berths and thrown on the floor. They were engaged in earnest conversation, and although they had been carousing, as appeared from two empty jugs with some tin tumblers which lay about, they were not as much intoxicated as usual. All had knives, one or two of them pistols, and a great many muskets were lying in a berth close at hand.

We listened to their conversation for some time before we could make up our minds how to act, having as yet resolved on nothing determinate, except that we would attempt to paralyse their exertions, when we should attack them by means of the apparition of Rogers. They were discussing their piratical plans, in which all we could hear distinctly was that they would unite with the crew of a schooner *Hornet*, and, if possible, get the schooner herself into their possession preparatory to some attempt on a large scale, the particulars of which could not be made out by either of us.

One of the men spoke of Peters, when the mate replied to him in a low voice which could not be distinguished, and afterwards added more loudly that "he could not understand his being so much forward with the captain's brat in the forecastle, and he thought the sooner both of them were overboard the better." To this no answer was made, but we could easily perceive that the hint was well received by the whole party, and more particularly by Jones. At this period I was excessively agitated, the more so as I could see that neither Augustus nor Peters could determine how to act. I made up my mind,

however, to sell my life as dearly as possible, and not to suffer myself to be overcome by any feelings of trepidation.

The tremendous noise made by the roaring of the wind in the rigging, and the washing of the sea over the deck, prevented us from hearing what was said except during momentary lulls. In one of these we all distinctly heard the mate tell one of the men to "go forward, and order the d—d lubbers to come into the cabin, where he could have an eye upon them, for he wanted no such secret doings on board the brig." It was well for us that the pitching of the vessel at this moment was so violent as to prevent this order from being carried into instant execution. The cook got up from his mattress to go for us, when a tremendous lurch, which I thought would carry away the masts, threw him headlong against one of the larboard state-room doors, bursting it open, and creating a good deal of other confusion. Luckily neither of our party was thrown from his position, and we had time to make a precipitate retreat to the forecastle and arrange a hurried plan of action before the messenger made his appearance, or rather before he put his head out of the companion hatch, for he did not come on deck. From this station he could not notice the absence of Allen, and he accordingly bawled out, as if to him, repeating the orders of the mate. Peters cried out "Ay, ay," in a disguised voice, and the cook immediately went below without entertaining a suspicion that all was not right.

My two companions now proceeded boldly aft and down into the cabin, Peters closing the door after him in the same manner he had found it. The mate received them with feigned cordiality, and told Augustus that since he had behaved himself so well of late he might take up his quarters in the cabin, and be one of them for the future. He then poured him out a tumbler half full of rum, and made him drink it. All this I saw and heard, for I followed my friends to the cabin as soon as the door was shut, and took up my old point of observation. I had brought with me the two pump-handles, one of which I secured near the companion-way to be ready for use when required.

I now steeled myself as well as possible so as to have a

good view of all that was passing within, and endeavoured to nerve myself to the task of descending among the mutineers when Peters should make a signal to me as agreed upon. Presently he contrived to turn the conversation upon the bloody deeds of the mutiny, and by degrees led the men to talk of the thousand superstitions which are so universally current among seamen. I could not make out all that was said, but I could plainly see the effects of the conversation in the countenances of those present. The mate was evidently much agitated, and presently, when some one mentioned the terrific appearance of Roger's corpse, I thought he was upon the point of swooning. Peters now asked him if he did not think it would be better to have the body thrown overboard at once, as it was too horrible a sight to see it floundering about in the scuppers. At this the villain absolutely gasped for breath, and turned his head slowly round upon his companions, as if imploring some one to go up and perform the task. No one, however, stirred, and it was quite evident that the whole party were wound up to the highest pitch of nervous excitement. Peters now made me the signal. I immediately threw open the door of the companion-way, and, descending without uttering a syllable, stood erect in the midst of the party.

The intense effect produced by this sudden apparition is not at all to be wondered at when the various circumstances are taken into consideration. Usually, in cases of a similar nature, there is left in the mind of the spectator some glimmering of doubt as to the reality of the vision before his eyes; a degree of hope, however feeble, that he is the victim of chicanery, and that the apparition is not actually a visitant from the world of shadows. It is not too much to say that such remnants of doubt have been at the bottom of almost every such visitation, and that the appalling horror which has sometimes been brought about, is to be attributed, even in the cases most in point, and where most suffering has been experienced, more to a kind of anticipative horror lest the apparition *might possibly be real*, than to an unwavering belief in its reality. But, in the present instance, it will be seen immediately, that in the minds of

the mutineers there was not even the shadow of a basis upon which to rest a doubt that the apparition of Rogers was indeed a revivification of his disgusting corpse, or at least its spiritual image. The isolated situation of the brig, with its entire inaccessibility on account of the gale, confined the apparently possible means of deception within such narrow and definite limits, that they must have thought themselves enabled to survey them all at a glance. They had now been at sea twenty-four days without holding more than a speaking communication with any vessel whatever. The whole of the crew, too—at least all whom they had the most remote reason for suspecting to be on board—were assembled in the cabin, with the exception of Allen, the watch; and his gigantic stature (he was six feet six inches high) was too familiar in their eyes to permit the notion that he was the apparition before them to enter their minds, even for an instant. Add to these considerations the awe inspiring nature of the tempest, and that of the conversation brought about by Peters, the deep impression which the loathsome ness of the actual corpse had made in the morning; upon the imaginations of the men, the excellency of the imitation in my person, and the uncertain and wavering light in which they behold me, as the glare of the cabin lantern, swinging violently to and fro, fell dubiously and fitfully upon my figure, and there will be no reason to wonder that the deception had even more than the entire effect which we had anticipated. The mate sprang up from the mattress on which he was lying, and, without uttering a syllable, fell back stone dead upon the cabin floor, and was hurled to the leeward like a log by a heavy roll of the brig. Of the remaining seven, there were but three who had at first any degree of presence of mind. The four others sat for some time rooted apparently to the floor—the most pitiable objects of horror and utter despair my eyes ever encountered. The only opposition we experienced at all was from the cook, John Hunt, and Richard Parker, but they made but a feeble and irresolute defence. The two former were shot instantly by Peters, and I felled Parker with a blow on the head from the pump-handle which I had brought with me. In the meantime,

Augustus seized one of the muskets lying on the floor, and shot another mutineer (—— Wilson) through the breast. There were now but three remaining; but by this time they had become aroused from their lethargy, and perhaps began to see that a deception had been practised upon them, for they fought with great resolution and fury, and, but for the immense muscular strength of Peters, might have ultimately got the better of us. These three men were —— Jones, —— Greely, and Absalom Hicks. Jones had thrown Augustus on the floor, stabbed him in several places along the right arm, and would no doubt have soon despatched him (as neither Peters nor myself could immediately get rid of our own antagonists), had it not been for the timely aid of a friend, upon whose assistance we surely had never depended. This friend was no other than Tiger. With a low growl, he bounded into the cabin, at a most critical moment for Augustus, and throwing himself upon Jones, pinned him to the floor in an instant. My friend, however, was now too much injured to render us any aid whatever, and I was so encumbered with my disguise that I could do but little. The dog would not leave his hold upon the throat of Jones—Peters, nevertheless, was far more than a match for the two men who remained, and would no doubt have despatched them sooner had it not been for the narrow space in which he had to act, and the tremendous lurches of the vessel. Presently he was enabled to get hold of a heavy stool, several of which lay about the floor. With this he beat out the brains of Greely as he was in the act of discharging a musket at me, and immediately afterwards a roll of the brig throwing him in contact with Hicks, he seized him by the throat, and by dint of sheer strength, strangled him instantaneously. Thus, in far less time than I have taken to tell it, we found ourselves masters of the brig.

The only person of our opponents who was left alive was Richard Parker. This man, it will be remembered, I had knocked down with a blow from the pump-handle at the commencement of the attack. He now lay motionless by the door of the shattered state-room; but upon Peters touching

him with his foot he spoke, and entreated for mercy. His head was only slightly cut, and otherwise he had received no injury, having been merely stunned by the blow. He now got up, and for the present we secured his hands behind his back. The dog was still growling over Jones, but upon examination we found him completely dead, the blood issuing in a stream from a deep wound in the throat, inflicted no doubt by the sharp teeth of the animal.

It was now about one o'clock in the morning, and the wind was still blowing tremendously. The brig evidently laboured much more than usual, and it became absolutely necessary that something should be done with a view of easing her in some measure. At almost every roll to leeward she shipped a sea, several of which came partially down into the cabin during our scuttle, the hatchway having been left open by myself when I descended. The entire range of bulwarks to larboard had been swept away, as well as the caboose, together with the jolly-boat from the counter. The creaking and working of the mainmast, too, gave indication that it was nearly sprung. To make room for more stowage in the after hold, the heel of this mast had been stepped between decks (a very reprehensible practice, occasionally resorted to by ignorant shipbuilders), so that it was in imminent danger of working from its step. But, to crown all our difficulties, we plumbed the well and found no less than seven feet water.

Leaving the bodies of the crew lying in the cabin, we got to work immediately at the pumps—Parker, of course, being set at liberty to assist us in the labour. Augustus's arm was bound up as well as we could effect it, and he did what he could, but that was not much. However, we found that we could just manage to keep the leak from gaining upon us by having one pump constantly going. As there were only four of us, this was severe labour; but we endeavoured to keep up our spirits, and looked anxiously for daybreak, when we hoped to lighten the brig by cutting away the mainmast.

In this manner we passed a night of terrible anxiety and fatigue, and, when the day at length broke, the gale had

neither abated in the least, nor were there any signs of its abating. We now dragged the bodies on deck and threw them overboard. Our next care was to get rid of the main-mast. The necessary preparations having been made, Peters cut away at the mast (having found axes in the cabin), while the rest of us stood by the stays and lanyards. As the brig gave a tremendous lee lurch, the word was given to cut away the weather lanyards; which being done, the whole mass of wood and rigging plunged into the sea clear of the brig, and without doing any material injury. We now found that the vessel did not labour quite as much as before, but our situation was still exceedingly precarious, and, in spite of the utmost exertions, we could not gain upon the leak without the aid of both pumps. The little assistance which Augustus could render us was not really of any importance. To add to our distress, a heavy sea, striking the brig to windward, threw her off several points from the wind, and before she could regain her position another broke completely over her, and hurled her full upon her beam ends. The ballast now shifted in a mass to leeward (the stowage had been knocking about perfectly at random for some time), and for a few moments we thought nothing could save us from capsizing. Presently, however, we partially righted, but the ballast still retaining its place to larboard, we lay so much along that it was useless to think of working the pumps, which, indeed, we could not have done much longer in any case, as our hands were entirely raw with the excessive labour we had undergone, and were bleeding in the most horrible manner.

Contrary to Parker's advice, we now proceeded to cut away the foremast, and at length accomplished it after much difficulty, owing to the position in which we lay. In going overboard, the wreck took with it the bowsprit, and left us a complete hulk.

So far we had had reason to rejoice in the escape of our long-boat, which had received no damage from any of the huge seas which had come on board. But we had not long to congratulate ourselves; for, the foremast having gone, and of course the foresail with it, by which the brig had been steadied every

sea now made a complete breach over us, and in five minutes our deck was swept from stem to stern, the long-boat and starboard bulwarks torn off, and even the windlass shattered into fragments. It was indeed hardly possible for us to be in a more pitiable condition.

At noon there seemed to be some slight appearance of the gale's abating, but in this we were sadly disappointed, for it only lulled for a few minutes to blow with redoubled fury. About four in the afternoon it was utterly impossible to stand up against the violence of the blast: and as the night closed in upon us, I had not a shadow of hope that the vessel would hold together until morning.

By midnight we had settled very deep in the water, which was now up to the orlop deck. The rudder went soon afterwards, the sea which tore it away lifting the after portion of the brig entirely from the water, against which she thumped in her descent with such a concussion as would be occasioned by going ashore. We had all calculated that the rudder would hold its own to the last, as it was unusually strong, being rigged as I have never seen one rigged either before or since. Down its main timber there ran a succession of stout iron hooks, and others in the same manner down the stern-post. Through these hooks there extended a very thick wrought-iron rod, the rudder being thus held to the stern-post, and swinging freely on the rod. The tremendous force of the sea which tore it off may be estimated by the fact that the hooks in the stern-post, which ran entirely through it, being clinched on the inside, were drawn every one of them completely out of the solid wood.

We had scarcely time to draw breath after the violence of this shock, when one of the most tremendous waves I had then ever known broke right on board of us, sweeping the companion-way clear off, bursting in the hatchways, and filling every inch of the vessel with water.

CHAPTER IX.

LUCKILY, just before night, all four of us had lashed ourselves firmly to the fragments of the windlass, lying in this manner as flat upon the deck as possible. This precaution alone saved us from destruction. As it was, we were all more or less stunned by the immense weight of water which tumbled upon us, and which did not roll from above us until we were nearly exhausted. As soon as I could recover breath, I called aloud to my companions. Augustus alone replied, saying, "It is all over with us, and may God have mercy upon our souls." By and by both the others were enabled to speak, when they exhorted us to take courage, as there was still hope; it being impossible from the nature of the cargo that the brig could go down, and there being every chance that the gale would blow over by the morning. These words inspired me with new life; for, strange as it may seem, although it was obvious that a vessel with a cargo of empty oil-casks would not sink, I had been hitherto so confused in mind as to have overlooked this consideration altogether, and the danger which I had for some time regarded as the most imminent was that of foundering. As hope revived within me, I made use of every opportunity to strengthen the lashings which held me to the remains of the windlass, and in this occupation I soon discovered that my companions were also busy. The night was as dark as it could possibly be, and the horrible shrieking din and confusion which surrounded us it is useless to attempt describing. Our deck lay level with the sea, or rather we were encircled with a towering ridge of foam, a portion of which swept over us every instant. It is not too much to say that our heads were not fairly out of water more than one second in three. Although we lay close together, no one of us could see the other, or indeed any portion of the brig itself upon which we were so tempestuously hurled about. At intervals we called one to

the other, thus endeavouring to keep alive hope, and render consolation and encouragement to such of us as stood most in need of it. The feeble condition of Augustus made him an object of solicitude with us all; and as, from the lacerated condition of his right arm, it must have been impossible for him to secure his lashings with any degree of firmness, we were in momentary expectation of finding that he had gone overboard, yet to render him aid was a thing altogether out of the question. Fortunately, his station was more secure than that of any of the rest of us; for the upper part of his body lying just beneath a portion of the shattered windlass, the seas as they tumbled in upon him were greatly broken in their violence. In any other situation than this (into which he had been accidentally thrown after having lashed himself in a very exposed spot) he must inevitably have perished before morning. Owing to the brig's lying so much along, we were all less liable to be washed off than otherwise would have been the case. The heel, as I have before stated, was to larboard, about one-half of the deck being constantly under water. The seas therefore which struck us to starboard were much broken by the vessel's side, only reaching us in fragments as we lay flat on our faces, while those which came from larboard, being what are called back-water seas, and obtaining little hold upon us on account of our posture, had not sufficient force to drag us from our fastenings.

In this frightful situation we lay until the day broke so as to show us more fully the horrors which surrounded us. The brig was a mere log, rolling about at the mercy of every wave; the gale was upon the increase if anything, blowing indeed a complete hurricane, and there appeared to us no earthly prospect of deliverance. For several hours we held on in silence, expecting every moment that our lashings would either give way, that the remains of the windlass would go by the board, or that some of the huge seas which roared in every direction around us and above us would drive the hulk so far beneath the water that we should be drowned before it could regain the surface. By the mercy of God, however, we were

preserved from these imminent dangers, and about midday were cheered by the light of the blessed sun. Shortly afterwards we could perceive a sensible diminution in the force of the wind, when, now for the first time since the latter part of the evening before, Augustus spoke, asking Peters, who lay closest to him, if he thought there was any possibility of our being saved. As no reply was at first made to this question, we all concluded that the hybrid had been drowned where he lay; but presently, to our great joy, he spoke, although very feebly, saying that he was in great pain, being so cut by the tightness of his lashings across the stomach, that he must either find means of loosening them or perish, as it was impossible that he could endure his misery much longer. This occasioned us great distress, as it was altogether useless to think of aiding him in any manner while the sea continued washing over us as it did. We exhorted him to bear his sufferings with fortitude, and promised to seize the first opportunity which should offer itself to relieve him. He replied that it would soon be too late, that it would be all over with him before we could help him; and then, after moaning for some minutes, lay silent, when we concluded that he had perished.

As the evening drew on, the sea had fallen so much that scarcely more than one wave broke over the hulk from windward in the course of five minutes, and the wind had abated a great deal, although still blowing a severe gale. I had not heard any of my companions speak for hours, and now called to Augustus. He replied, although very feebly, so that I could not distinguish what he said. I then spoke to Peters and to Parker, neither of whom returned any answer.

Shortly after this period I fell into a state of partial insensibility, during which the most pleasing images floated in my imagination; such as green trees, waving meadows of ripe grain, processions of dancing-girls, troops of cavalry, and other phantasies. I now remember that in all which passed before my mind's eye, motion was a predominant idea. Thus I never fancied any stationary object, such as a house,

mountain, or anything of that kind, but windmills, ships, large birds, balloons, people on horseback, carriages driving furiously, and similar moving objects presented themselves in endless succession. When I recovered from this state, the sun was, as near as I could guess, an hour high. I had the greatest difficulty in bringing to recollection the various circumstances connected with my situation, and for some time remained firmly convinced that I was still in the hold of the brig, near the box, and that the body of Parker was that of Tiger.

When I at length completely came to my senses, I found that the wind blew no more than a moderate breeze, and that the sea was comparatively calm, so much so that it only washed over the brig amidships. My left arm had broken loose from its lashings, and was much cut about the elbow; my right was entirely benumbed, and the hand and wrist swollen prodigiously by the pressure of the rope, which had worked from the shoulder downward. I was also in great pain from another rope which went about my waist, and had been drawn to an insufferable degree of tightness. Looking round upon my companions, I saw that Peters still lived, although a thick line was pulled so forcibly around his loins as to give him the appearance of being cut nearly in two; as I stirred he made a feeble motion to me with his hand, pointing to the rope. Augustus gave no indication of life whatever, and was bent nearly double across a splinter of the windlass. Parker spoke to me when he saw me moving, and asked me if I had not sufficient strength to release him from his situation, saying, that if I would summon up what spirits I could, and contrive to untie him, we might yet save our lives, but that otherwise we must all perish. I told him to take courage and I would endeavour to free him. Feeling in my pantaloons pocket, I got hold of my penknife, and, after several ineffectual attempts, at length succeeded in opening it. I then, with my left hand, managed to free my right from its fastenings, and afterwards cut the other ropes which held me. Upon attempting, however, to move from my position, I found that my legs failed me altogether, and that I could not get up, neither could

I move my right arm in any direction. Upon mentioning this to Parker, he advised me to lie quiet for a few minutes, holding on to the windlass with my left hand, so as to allow time for the blood to circulate. Doing this, the numbness presently began to die away, so that I could move first one of my legs and then the other, and shortly afterwards I regained the partial use of my right arm. I now crawled with great caution towards Parker without getting on my legs, and soon cut loose all the lashings about him, when, after a short delay, he also recovered the partial use of his limbs. We now lost no time in getting loose the rope from Peters. It had cut a deep gash through the waistband of his woollen pantaloons and through two shirts, and made its way into his groin, from which the blood flowed out copiously as we removed the cordage. No sooner had we removed it, however, than he spoke, and seemed to experience instant relief—being able to move with much greater ease than either Parker or myself—this was no doubt owing to the discharge of blood.

We had little hope that Augustus would recover, as he evinced no signs of life, but, upon getting to him, we discovered that he had merely swooned from loss of blood, the bandages we had placed around his wounded arm having been torn off by the water; none of the ropes which held him to the windlass were drawn sufficiently tight to occasion his death. Having relieved him from the fastenings, and got him clear of the broken wood about the windlass, we secured him in a dry place to windward, with his head somewhat lower than his body, and all three of us busied ourselves in chafing his limbs. In about half an hour he came to himself, although it was not until the next morning that he gave signs of recognising any of us, or had sufficient strength to speak. By the time we had thus got clear of our lashings it was quite dark, and it began to cloud up, so that we were again in the greatest agony lest it should come on to blow hard, in which event nothing could have saved us from perishing, exhausted as we were. By good fortune it continued very moderate during the night, the sea subsiding every minute, which gave

us great hopes of ultimate preservation. A gentle breeze still blew from the N.W., but the weather was not at all cold. Augustus was lashed carefully to windward in such a manner as to prevent him from slipping overboard with the rolls of the vessel, as he was still too weak to hold on at all. For ourselves there was no such necessity. We sat close together, supporting each other with the aid of the broken ropes about the windlass, and devising methods of escape from our frightful situation. We derived much comfort from taking off our clothes and ringing the water from them. When we put them on after this they felt remarkably warm and pleasant, and served to invigorate us in no little degree. We helped Augustus off with his, and wrung them for him, when he experienced the same comfort.

Our chief sufferings were now those of hunger and thirst, and when we looked forward to the means of relief in this respect our hearts sunk within us, and we were induced to regret that we had escaped the less dreadful perils of the sea. We endeavoured, however, to console ourselves with the hope of being speedily picked up by some vessel, and encouraged each other to bear with fortitude the evils that might happen.

The morning of the fourteenth at length dawned, and the weather still continued clear and pleasant, with a steady but very light breeze from the N.W. The sea was now quite smooth, and as, from some cause which we could not determine, the brig did not lie so much along as she had done before, the deck was comparatively dry, and we could move about with freedom. We had now been better than three entire days and nights without either food or drink, and it became absolutely necessary that we should make an attempt to get up something from below. As the brig was completely full of water we went to this work despondingly, and with but little expectation of being able to obtain anything. We made a kind of drag by driving some nails which we broke out from the remains of the companion-hatch into two pieces of wood. Tying these across each other, and fastening them to the end of a rope, we threw them into the cabin, and dragged

them to and fro in the faint hope of being thus able to entangle some article which might be of use to us for food, or which might at least render us assistance in getting it. We spent the greater part of the morning in this labour without effect, fishing up nothing more than a few bedclothes which were readily caught by the nails. Indeed, our contrivance was so very clumsy that any greater success was hardly to be anticipated.

We now tried the forecastle, but equally in vain, and were upon the brink of despair, when Peters proposed that we should fasten a rope to his body, and let him make an attempt to get up something by diving into the cabin. This proposition we hailed with all the delight which reviving hope could inspire. He proceeded immediately to strip off his clothes with the exception of his pantaloons ; and a strong rope was then carefully fastened around his middle, being brought up over his shoulders in such a manner that there was no possibility of its slipping. The undertaking was one of great difficulty and danger ; for, as we could hardly expect to find much, if any, provision in the cabin itself, it was necessary that the diver, after letting himself down, should make a turn to the right, and proceed under water a distance of ten or twelve feet, in a narrow passage, to the storeroom, and return without drawing breath.

Everything being ready, Peters now descended into the cabin, going down the companion-ladder until the water reached his chin. He then plunged in, head first, turning to the right as he plunged, and endeavouring to make his way to the storeroom. In this first attempt, however, he was altogether unsuccessful. In less than half a minute after his going down we felt the rope jerked violently (the signal we had agreed upon when he desired to be drawn up). We accordingly drew him up instantly, but so incautiously as to bruise him badly against the ladder. He had brought nothing with him, and had been unable to penetrate more than a very little way into the passage, owing to the constant exertions he found it necessary to make in order to keep himself from floating up

against the deck. Upon getting out, he was very much exhausted, and had to rest full fifteen minutes before he could again venture to descend.

The second attempt met with even worse success; for he remained so long under water without giving the signal, that, becoming alarmed for his safety, we drew him out without it, and found that he was almost at the last gasp, having, as he said, repeatedly jerked at the rope without our feeling it. This was probably owing to a portion of it having become entangled in the balustrade at the foot of the ladder. This balustrade was, indeed, so much in the way that we determined to remove it if possible before proceeding with our design. As we had no means of getting it away except by main force, we all descended into the water as far as we could on the ladder, and giving a pull against it with our united strength, succeeded in breaking it down.

The third attempt was equally unsuccessful with the first two, and it now became evident that nothing could be done in this manner without the aid of some weight with which the diver might steady himself, and keep to the floor of the cabin while making his search. For a long time we looked about in vain for something which might answer this purpose, but at length to our great joy we discovered one of the weather-fore-chains so loose that we had not the least difficulty in wrenching it off. Having fastened this securely to one of his ankles, Peters now made his fourth descent into the cabin, and this time succeeded in making his way to the door of the steward's room. To his inexpressible grief, however, he found it locked, and was obliged to return without effecting an entrance, as, with the greatest exertion, he could remain under water not more, at the utmost extent, than a single minute. Our affairs now looked gloomy indeed, and neither Augustus nor myself could refrain from bursting into tears, as we thought of the host of difficulties which encompassed us, and the slight probability which existed of our finally making an escape. But this weakness was not of long duration. Throwing ourselves on our knees to God, we implored His aid in the many dangers

which beset us, and arose with renewed hope and vigour to think what could yet be done by mortal means towards accomplishing our deliverance.

CHAPTER X.

SHORTLY afterwards an incident occurred which I am induced to look upon as more intensely productive of emotion, as far more replete with the extremes first of delight and then of horror, than even any of the thousand chances which afterwards befell me in nine long years, crowded with events of the most startling, and, in many cases, of the most unconceived and unconceivable character. We were lying on the deck, near the companion way, and debating the possibility of yet making our way into the storeroom, when, looking towards Augustus, who lay fronting myself, I perceived that he had become all at once deadly pale, and that his lips were quivering in the most singular and unaccountable manner. Greatly alarmed, I spoke to him, but he made me no reply, and I was beginning to think that he was suddenly taken ill, when I took notice of his eyes, which were glaring apparently at some object behind me. I turned my head, and shall never forget the ecstatic joy which thrilled through every particle of my frame when I perceived a large brig bearing down upon us, and not more than a couple of miles off. I sprang to my feet as if a musket bullet had suddenly struck me to the heart; and, stretching out my arms in the direction of the vessel, stood in this manner, motionless, and unable to articulate a syllable. Peters and Parker were equally affected, although in different ways. The former danced about the deck like a madman, uttering the most extravagant rhodomontades, intermingled with howls and imprecations, while the latter burst into tears, and continued for many minutes weeping like a child.

The vessel in sight was a large hermaphrodite brig, of a Dutch build, and painted black, with a tawdry gilt figurehead. She had evidently seen a good deal of rough weather, and we supposed had suffered much in the gale which had proved so disastrous to ourselves, for her foretopmast was gone, and some of her starboard bulwarks. When we first saw her she was, as I have already said, about two miles off and to windward, bearing down upon us. The breeze was very gentle, and what astonished us chiefly was that she had no other sails set than her foresail and mainsail, with a flying jib—of course she came down but slowly, and our impatience amounted nearly to frenzy. The awkward manner in which she steered, too, was remarked by all of us, even excited as we were. She yawed about so considerably, that once or twice we thought it impossible she could see us, or imagined that, having seen us, and discovered no person on board, she was about to tack and make off in another direction. Upon each of these occasions we screamed and shouted at the top of our voices, when the stranger would appear to change for a moment her intention, and again hold on towards us—this singular conduct being repeated two or three times, so that at last we could think of no other manner of accounting for it than by supposing the helmsman to be in liquor.

No person was seen upon her decks until she arrived within about a quarter of a mile of us. We then saw three seamen, whom by their dress we took to be Hollanders. Two of these were lying on some old sails near the forecastle, and the third, who appeared to be looking at us with great curiosity, was leaning over the starboard bow near the bowsprit. This last was a stout and tall man, with a very dark skin. He seemed by his manner to be encouraging us to have patience, nodding to us in a cheerful although rather odd way, and smiling constantly, so as to display a set of the most brilliantly white teeth. As his vessel drew nearer, we saw a red flannel cap which he had on fall from his head into the water, but of this he took little or no notice, continuing his odd smiles and gesticulations. I relate these things and circumstances

minutely, and I relate them, it must 'be understood, precisely as they *appeared* to us.

The brig came on slowly, and now more steadily than before, and—I cannot speak calmly of this event—our hearts leaped up wildly within us, and we poured out our whole souls in shouts and thanksgivings to God for the complete, unexpected, and glorious deliverance that was so palpably at hand. Of a sudden, and all at once, there came wafted over the ocean from the strange vessel (which was now close upon us) a smell, a stench, such as the whole world has no name for—no conception of—hellish—utterly suffocating—insufferable, inconceivable. I gasped for breath, and turning to my companions perceived that they were paler than marble. But we had now no time left for question or surmise—the brig was within fifty feet of us, and it seemed to be her intention to run under our counter, that we might board her without her putting out a boat. We rushed aft, when, suddenly, a wide yaw threw her off full five or six points from the course she had been running, and as she passed under our stern at the distance of about twenty feet we had a full view of her decks. Shall I ever forget the triple horror of that spectacle? Twenty-five or thirty human bodies, among whom were several females, lay scattered about between the counter and the galley in the last and most loathsome state of putrefaction. We plainly saw that not a soul lived in that fatal vessel! Yet we could not help shouting to the dead for help! Yes, long and loudly did we beg, in the agony of the moment, that those silent and disgusting images would stay for us, would not abandon us to become like them, would receive us among their goodly company! We were raving with horror and despair—thoroughly mad through the anguish of our grievous disappointment.

As our first loud yell of terror broke forth it was replied to by something from near the bowsprit of the stranger, so closely resembling the scream of a human voice that the nicest ear might have been startled and deceived. At this instant another sudden yaw brought the region of the forecastle for a moment into view, and we beheld at once the origin of the

sound. We saw the tall stout figure still leaning on the bulwark, and still nodding his head to and fro, but his face was now turned from us so that we could not behold it. His arms were extended over the rail, and the palms of his hands fell outward. His knees were lodged upon a stout rope, tightly stretched, and reaching from the heel of the bowsprit to a cathead. On his back, from which a portion of the shirt had been torn, leaving it bare, there sat a huge sea-gull, busily gorging itself with the horrible flesh, its bill and talons deep buried, and its white plumage spattered all over with blood. As the brig moved farther round so as to bring us close in view, the bird, with much apparent difficulty, drew out its crimsoned head, and, after eying us for a moment as if stupefied, arose lazily from the body upon which it had been feasting, and flying directly above our deck hovered there a while with a portion of clotted and liver like substance in its beak. The horrid morsel dropped at length with a sullen splash immediately at the feet of Parker. May God forgive me, but now, for the first time, there flashed through my mind a thought, a thought which I will not mention, and I felt myself making a step towards the ensanguined spot. I looked upward, and the eyes of Augustus met my own with a degree of intense and eager meaning which immediately brought me to my senses. I sprang forward quickly, and with a deep shudder threw the frightful thing into the sea.

The body from which it had been taken, resting as it did upon the rope, had been easily swayed to and fro by the exertions of the carnivorous bird, and it was this motion which had at first impressed us with the belief of its being alive. As the gull relieved it of its weight, it swung round and fell partially over, so that the face was fully discovered. Never, surely, was any object so terribly full of awe! The eyes were gone, and the whole flesh around the mouth, leaving the teeth utterly naked. This, then, was the smile which had cheered us on to hope! this the—but I forbear. The brig, as I have already told, passed under our stern, and made its way slowly but steadily to leeward. With her and with her terrible crew

went all our gay visions of deliverance and joy. Deliberately as she went by, we might possibly have found means of boarding her, had not our sudden disappointment, and the appalling nature of the discovery which accompanied it, laid entirely prostrate every active faculty of mind and body. We had seen and felt, but we could neither think nor act until, alas ! too late. How much our intellects had been weakened by this incident may be estimated by the fact that when the vessel had proceeded so far that we could perceive no more than the half of her hull, the proposition was seriously entertained of attempting to overtake her by swimming !

I have since this period vainly endeavoured to obtain some clue to the hideous uncertainty which enveloped the fate of the stranger. Her build and general appearance, as I have before stated, led us to the belief that she was a Dutch trader, and the dresses of the crew also sustained this opinion. We might have easily seen the name upon her stern, and indeed taken other observations which would have guided us in making out her character, but the intense excitement of the moment blinded us to everything of that nature. From the saffron-like hue of such of the corpses as were not entirely decayed, we concluded that the whole of her company had perished by the yellow fever, or some other virulent disease of the same fearful kind. If such were the case (and I know not what else to imagine), death, to judge from the positions of the bodies, must have come upon them in a manner awfully sudden and overwhelming, in a way totally distinct from that which generally characterizes even the most deadly pestilences with which mankind are acquainted. It is possible, indeed, that poison, accidentally introduced into some of their sea-stores, may have brought about the disaster ; or that the eating some unknown venomous species of fish, or other marino animal, or oceanic bird, might have induced it—but it is utterly useless to form conjectures where all is involved, and will, no doubt, remain for ever involved in the most appalling and unfathomable mystery.

CHAPTER XI.

WE spent the remainder of the day in a condition of stupid lethargy, gazing after the retreating vessel until the darkness, hiding her from our sight, recalled us in some measure to our senses. The pangs of hunger and thirst then returned, absorbing all other cares and considerations. Nothing, however, could be done until the morning, and securing ourselves as well as possible, we endeavoured to snatch a little repose. In this I succeeded beyond my expectations, sleeping until my companions, who had not been so fortunate, aroused me at daybreak to renew our attempts at getting up provision from the hull.

It was now a dead calm, with the sea as smooth as I have ever known it—the weather warm and pleasant. The brig was out of sight. We commenced our operations by wrenching off, with some trouble, another of the forechains, and having fastened both to Peters' feet, he again made an endeavour to reach the door of the storeroom, thinking it possible that he might be able to force it open, provided he could get at it in sufficient time; and this he hoped to do, as the hulk lay much more steadily than before.

He succeeded very quickly in reaching the door, when, loosening one of the chains from his ankle, he made every exertion to force a passage with it, but in vain, the framework of the room being far stronger than was anticipated. He was quite exhausted with his long stay under water, and it became absolutely necessary that some other one of us should take his place. For this service Parker immediately volunteered; but, after making three ineffectual efforts, found that he could never even succeed in getting near the door. The condition of Angustus's wounded arm rendered it useless for him to attempt going down, as he would be unable to force the room open should he reach it, and it accordingly now devolved upon me to exert myself for our common deliverance.

Peters had left one of the chains in the passage, and I found, upon plunging in, that I had not sufficient balance to keep me firmly down. I determined, therefore, to attempt no more in my first effort than merely to recover the other chain. In groping along the floor of the passage for this I felt a hard substance, which I immediately grasped, not having time to ascertain what it was, but returning and ascending instantly to the surface. The prize proved to be a bottle, and o'er joy may be conceived when I say that it was found to be full of port wine. Giving thanks to God for this timely and cheering assistance, we immediately drew the cork with my penknife, and, each taking a moderate sup, felt the most indescribable comfort from the warmth, strength, and spirits with which it inspired us. We then carefully recorked the bottle, and by means of a handkerchief swung it in such a manner that there was no possibility of its getting broken.

Having rested a while after this fortunate discovery, I again descended, and now recovered the chain, with which I instantly came up. I then fastened it on and went down for the third time, when I became fully satisfied that no exertions whatever in that situation would enable me to force open the door of the storeroom. I therefore returned in despair.

There seemed now to be no longer any room for hope, and I could perceive in the countenances of my companions that they had made up their minds to perish. The wine had evidently produced in them a species of delirium, which, perhaps, I had been prevented from feeling by the immersion I had undergone since drinking it. They talked incoherently, and about matters unconnected with our condition, Peters repeatedly asking me questions about Nantucket. Augustus, too, I remember, approached me with a serious air, and requested me to lend him a pocket-comb, as his hair was full of fish-scales, and he wished to get them out before going on shore. Parker appeared somewhat less affected, and urged me to dive at random into the cabin, and bring up any article which might come to hand. To this I consented, and in the first attempt, after staying under a full minute, brought up a small leather

trunk belonging to Captain Barnard. This was immediately opened, in the faint hope that it might contain something to eat or drink. We found nothing, however, except a box of razors and two linen shirts. I now went down again, and returned without any success. As my head came above water I heard a crash on deck, and upon getting up saw that my companions had ungratefully taken advantage of my absence to drink the remainder of the wine, having let the bottle fall in the endeavour to replace it before I saw them. I remonstrated with them on the heartlessness of their conduct, when Augustus burst into tears. The other two endeavoured to laugh the matter off as a joke, but I hope never again to behold laughter of such a species : the distortion of countenance was absolutely frightful. Indeed, it was apparent that the stimulus, in the empty state of their stomachs, had taken instant and violent effect, and that they were all exceedingly intoxicated. With great difficulty I prevailed upon them to lie down, when they fell very soon into a heavy slumber, accompanied with loud stertorous breathing.

I now found myself, as it were, alone in the brig, and my reflections, to be sure, were of the most fearful and gloomy nature. No prospect offered itself to my view but a lingering death by famine, or, at the best, by being overwhelmed in the first gale which should spring up ; for in our present exhausted condition we could have no hope of living through another.

The gnawing hunger which I now experienced was nearly insupportable, and I felt myself capable of going to any lengths in order to appease it. With my knife I cut off a small portion of the leather trunk, and endeavoured to eat it, but found it utterly impossible to swallow a single morsel, although I fancied that some little alleviation of my suffering was obtained by chewing small pieces of it and spitting them out. Towards night my companions awoke, one by one, each in an indescribable state of weakness and horror, brought on by the wine, whose fumes had now evaporated. They shook as if with a violentague, and uttered the most lamentable cries for water. Their condition affected me in the most lively degree, at the

same time causing me to rejoice in the fortunate train of circumstances which had prevented me from indulging in the wine, and consequently from sharing their melancholy and most distressing sensations. Their conduct, however, gave me great uneasiness and alarm, for it was evident that unless some favourable change took place they could afford me no assistance in providing for our common safety. I had not yet abandoned all idea of being able to get up something from below, but the attempt could not possibly be resumed until some one of them was sufficiently master of himself to aid me by holding the end of the rope while I went down. Parker appeared to be somewhat more in possession of his senses than the others, and I endeavoured by every means in my power to arouse him. Thinking that a plunge in the sea-water might have a beneficial effect, I contrived to fasten the end of the rope around his body, and then, leading him to the companion-way (he remaining quite passive all the while), pushed him in, and immediately drew him out. I had good reason to congratulate myself upon having made this experiment, for he appeared much revived and invigorated, and upon getting out asked me in a rational manner why I had so served him. Having explained my object, he expressed himself indebted to me, and said that he felt greatly better from the immersion, afterward conversing sensibly upon our situation. We then resolved to treat Augustus and Peters in the same way, which we immediately did, when they both experienced much benefit from the shock. This idea of sudden immersion had been suggested to me by reading in some medical work the good effect of the shower-bath in a case where the patient was suffering from *mania a potu*.

Finding that I could now trust my companions to hold the end of the rope, I again made three or four plunges into the cabin, although it was now quite dark, and a gentle but long swell from the northward rendered the hulk somewhat unsteady. In the course of these attempts I succeeded in bringing up two case-knives, a three-gallon jug, empty, and a blanket, but nothing which could serve us for food. I continued my efforts after getting these articles until I was completely

exhausted, but brought up nothing else. During the night Parker and Peters occupied themselves by turns in the same manner; but nothing coming to hand, we now gave up this attempt in despair, concluding that we were exhausting ourselves in vain.

We passed the remainder of this night in a state of the most intense mental and bodily anguish that can possibly be imagined. The morning of the sixteenth at length dawned, and we looked eagerly around the horizon for relief, but to no purpose. The sea was still smooth, with only a long swell from the northward, as on yesterday. This was the sixth day since we had tasted either food or drink, with the exception of the bottle of port wine, and it was clear that we could hold out but a very little while longer unless something could be obtained. I never saw before, nor wish to see again, human beings so utterly emaciated as Peters and Augustus. Had I met them on shore in their present condition, I should not have had the slightest suspicion that I had ever beheld them. Their countenances were totally changed in character, so that I could not bring myself to believe them really the same individuals with whom I had been in company but a few days before. Parker, although sadly reduced, and so feeble that he could not raise his head from his bosom, was not so far gone as the other two. He suffered with great patience, making no complaint, and endeavouring to inspire us with hope in every manner he could devise. For myself, although at the commencement of the voyage I had been in bad health, and was at all times of a delicate constitution, I suffered less than any of us, being much less reduced in frame, and retaining my powers of mind in a surprising degree while the rest were completely prostrated in intellect, and seemed to be brought to a species of second childhood, generally simpering in their expressions, with idiotic smiles, and uttering the most absurd platitudes. At intervals, however, they would appear to revive suddenly, as if inspired all at once with a consciousness of their condition, when they would spring upon their feet in a momentary flash of vigour, and speak, for a short period, of their prospects, in a manner

altogether rational, although full of the most intense despair. It is possible, however, that my companions may have entertained the same opinion of their own condition as I did of mine, and that I may have unwittingly been guilty of the same extravagances and imbecilities as themselves—this is a matter which cannot be determined.

About noon Parker declared that he saw land off the larboard quarter, and it was with the utmost difficulty I could restrain him from plunging into the sea with the view of swimming towards it. Peters and Augustus took little notice of what he said, being apparently wrapped up in moody contemplation. Upon looking in the direction pointed out, I could not perceive the faintest appearance of the shore—indeed, I was too well aware that we were far from any land to indulge in a hope of that nature. It was a long time, nevertheless, before I could convince Parker of his mistake. He then burst into a flood of tears, weeping like a child, with loud cries and sobs, for two or three hours, when, becoming exhausted, he fell asleep.

Peters and Augustus now made several ineffectual efforts to swallow portions of the leather. I advised them to chew it and spit it out; but they were too excessively debilitated to be able to follow my advice. I continued to chew pieces of it at intervals, and found some relief from so doing; my chief distress was for water, and I was only prevented from taking a draught from the sea by remembering the horrible consequences which thus have resulted to others who were similarly situated with ourselves.

The day wore on in this manner, when I suddenly discovered a sail to the eastward, and on our larboard bow. She appeared to be a large ship, and was coming nearly athwart us, being probably twelve or fifteen miles distant. None of my companions had as yet discovered her, and I forbore to tell them of her for the present, lest we might again be disappointed of relief. At length, upon her getting nearer, I saw distinctly that she was heading immediately for us, with her light sails filled. I could now contain myself no longer, and pointed her

out to my fellow-sufferers. They immediately sprang to their feet, again indulging in the most extravagant demonstrations of joy, weeping, laughing in an idiotic manner, jumping, stamping upon the deck, tearing their hair, and praying and cursing by turns. I was so affected by their conduct, as well as by what I now considered a sure prospect of deliverance, that I could not refrain from joining in with their madness, and gave way to the impulses of my gratitude and ecstasy by lying and rolling on the deck, clapping my hands, shouting, and other similar acts, until I was suddenly called to my recollection, and once more to the extreme of human misery and despair, by perceiving the ship all at once with her stern fully presented towards us, and steering in a direction nearly opposite to that in which I had at first perceived her.

It was some time before I could induce my poor companions to believe that this sad reverse in our prospects had actually taken place. They replied to all my assertions with a stare and a gesture implying that they were not to be deceived by such misrepresentations. The conduct of Augustus most sensibly affected me. In spite of all I could say or do to the contrary, he persisted in saying that the ship was rapidly nearing us, and in making preparations to go on board of her. Some sea-weed floating by the brig, he maintained that it was the ship's boat, and endeavoured to throw himself upon it, howling and shrieking in the most heartrending manner, when I forcibly restrained him from thus casting himself into the sea.

Having become in some degree pacified, we continued to watch the ship until we finally lost sight of her, the weather becoming hazy, with a light breeze springing up. As soon as she was entirely gone, Parker turned suddenly towards me with an expression of countenance which made me shudder. There was about him an air of self-possession which I had not noticed in him until now, and before he opened his lips my heart told me what he would say. He proposed, in a few words, that one of us should die to preserve the existence of the others.

CHAPTER XII.

I HAD for some time past dwelt upon the prospect of our being reduced to this last horrible extremity, and had secretly made up my mind to suffer death in any shape or under any circumstances rather than resort to such a course. Nor was this resolution in any degree weakened by the present intensity of hunger under which I laboured. The proposition had not been heard by either Peters or Augustus. I therefore took Parker aside; and mentally praying to God for power to dissuade him from the horrible purpose he entertained, I expostulated with him for a long time, and in the most supplicating manner, begging him in the name of everything which he held sacred, and urging him by every species of argument which the extremity of the case suggested, to abandon the idea, and not to mention it to either of the other two.

He heard all I said without attempting to controvert any of my arguments, and I had begun to hope that he would be prevailed upon to do as I desired. But when I had ceased speaking, he said that he knew very well all I had said was true, and that to resort to such a course was the most horrible alternative which could enter into the mind of man; but that he had now held out as long as human nature could be sustained; that it was unnecessary for all to perish, when, by the death of one, it was possible, and even probable, that the rest might be finally preserved; adding that I might save myself the trouble of trying to turn him from his purpose, his mind having been thoroughly made up on the subject even before the appearance of the ship, and that only her heaving in sight had prevented him from mentioning his intention at an earlier period.

I now begged him, if he would not be prevailed upon to abandon his design, at least to defer it for another day, when some vessel might come to our relief; again reiterating every argument I could devise, and which I thought likely to have

influence with one of his rough nature. He said, in reply, that he had not spoken until the very last possible moment ; that he could exist no longer without sustenance of some kind ; and that therefore in another day his suggestion would be too late, as regarded himself at least.

Finding that he was not to be moved by anything I could say in a mild tone, I now assumed a different demeanour, and told him that he must be aware I had suffered less than any of us from our calamities ; that my health and strength, consequently, were at that moment far better than his own, or than that either of Peters or Augustus ; in short, that I was in a condition to have my own way by force if I found it necessary ; and that, if he attempted in any manner to acquaint the others with his bloody and cannibal designs, I would not hesitate to throw him into the sea. Upon this he immediately seized me by the throat, and drawing a knife, made several ineffectual efforts to stab me in the stomach ; an atrocity which his excessive debility alone prevented him from accomplishing. In the meantime, being roused to a high pitch of anger, I forced him to the vessel's side, with the full intention of throwing him overboard. He was saved from this fate, however, by the interference of Peters, who now approached and separated us, asking the cause of the disturbance. This Parker told before I could find means in any manner to prevent him.

The effect of his words was even more terrible than what I had anticipated. Both Augustus and Peters, who, it seems, had long secretly entertained the same fearful idea which Parker had been merely the first to broach, joined with him in his design, and insisted upon its immediately being carried into effect. I had calculated that one at least of the two former would be found still possessed of sufficient strength of mind to side with myself in resisting any attempt to execute so dreadful a purpose ; and with the aid of either one of them, I had no fear of being able to prevent its accomplishment. Being disappointed in this expectation, it became absolutely necessary that I should attend to my own safety, as a further

resistance on my part might possibly be considered by men in their frightful condition a sufficient excuse for refusing me fair play in the tragedy that I knew would speedily be enacted.

I now told them I was willing to submit to the proposal, merely requesting a delay of about one hour, in order that the fog which had gathered around us might have an opportunity of lifting, when it was possible that the ship we had seen might be again in sight. After great difficulty I obtained from them a promise to wait thus long; and, as I had anticipated (a breeze rapidly coming in), the fog lifted before the hour had expired, when, no vessel appearing in sight, we prepared to draw lots.

It is with extreme reluctance that I dwell upon the appalling scene which ensued; a scene which, with its minutest details, no after events have been able to efface in the slightest degree from my memory, and whose stern recollection will embitter every future moment of my existence. Let me run over this portion of my narrative with as much haste as the nature of the events to be spoken of will permit. The only method we could devise for the terrific lottery, in which we were to take each a chance, was that of drawing straws. Small splinters of wood were made to answer our purpose, and it was agreed that I should be the holder. I retired to one end of the hulk, while my poor companions silently took up their station in the other with their backs turned towards me. The bitterest anxiety which I endured at any period of this fearful drama was while I occupied myself in the arrangement of the lots. There are few conditions into which man can possibly fall where he will not feel a deep interest in the preservation of his existence; an interest momentarily increasing with the frailness of the tenure by which that existence may be held. But now that the silent, definite, and stern nature of the business in which I was engaged (so different from the tumultuous dangers of the storm, or the gradually approaching horrors of famine) allowed me to reflect on the few chances I had of escaping the most appalling of deaths—a death for the most appalling of purposes—every particle of that energy which

had so long buoyed me up departed like feathers before the wind, leaving me a helpless prey to the most abject and pitiable terror. I could not, at first, even summon up sufficient strength to tear and fit together the small splinters of wood, my fingers absolutely refusing their office, and my knees knocking violently against each other. My mind ran over rapidly a thousand absurd projects by which to avoid becoming a partner in the awful speculation. I thought of falling on my knees to my companions, and entreating them to let me escape this necessity; of suddenly rushing upon them, and, by putting one of them to death, of rendering the decision by lot useless—in short, of everything but of going through with the matter I had in hand. At last, after wasting a long time in this imbecile conduct, I was recalled to my senses by the voice of Parker, who urged me to relieve them at once from the terrible anxiety they were enduring. Even then I could not bring myself to arrange the splinters upon the spot, but thought over every species of finesse by which I could trick some one of my fellow-sufferers to draw the short straw, as it had been agreed that whoever drew the shortest of four splinters from my hand was to die for the preservation of the rest. Before any one condemn me for this apparent heartlessness, let him be placed in a situation precisely similar to my own.

At length delay was no longer possible, and, with a heart almost bursting from my bosom, I advanced to the region of the forecastle, where my companions were awaiting me. I held out my hand with the splinters, and Peters immediately drew. He was free—*his*, at least, was not the shortest; and there was now another chance against my escape. I summoned up all my strength, and passed the lots to Augustus. He also drew immediately, and he also was free; and now, whether I should live or die, the chances were no more than precisely even. At this moment all the fierceness of the tiger possessed my bosom, and I felt towards my poor fellow-creature Parker the most intense, the most diabolical hatred. But the feeling did not last; and at length, with a convulsive shudder, and closed eyes, I held out the two remaining splinters towards

him. It was full five minutes before he could summon resolution to draw, during which period of heartrending suspense I never once opened my eyes. Presently one of the two lots was quickly drawn from my hand. The decision was then over, yet I knew not whether it was for me or against me. No one spoke, and still I dared not satisfy myself by looking at the splinter I held. Peters at length took me by the hand, and I forced myself to look up, when I immediately saw by the countenance of Parker that I was safe, and that he it was who had been doomed to suffer. Gasping for breath, I fell senseless to the deck.

I recovered from my swoon in time to behold the consummation of the tragedy in the death of him who had been chiefly instrumental in bringing it about. He made no resistance whatever, and was stabbed in the back by Peters, when he fell instantly dead. I must not dwell upon the fearful repast which immediately ensued. Such things may be imagined, but words have no power to impress the mind with the exquisite horror of their reality. Let it suffice to say that, having in some measure appeased the raging thirst which consumed us by the blood of the victim, and having by common consent taken off the hands, feet, and head, throwing them, together with the entrails, into the sea, we devoured the rest of the body, piecemeal, during the four ever memorable days of the seventeenth, eighteenth, nineteenth, and twentieth of the month.

On the nineteenth, there coming on a sharp shower, which lasted fifteen or twenty minutes, we contrived to catch some water by means of a sheet which had been fished up from the cabin by our drag just after the gale. The quantity we took in all did not amount to more than half a gallon; but even this scanty allowance supplied us with comparative strength and hope.

On the twenty-first we were again reduced to the last necessity. The weather still remained warm and pleasant, with occasional fogs and light breezes, most usually from N. to W.

On the twenty-second, as we were sitting close huddled

together, gloomily revolving over our lamentable condition, there flashed through my mind all at once an idea which inspired me with a bright gleam of hope. I remembered that, when the foremast had been cut away, Peters, being in the windward chains, passed one of the axes into my hand, requesting me to put it if possible in a place of security, and that a few minutes before the last heavy sea struck the brig and filled her, I had taken this axe into the forecastle, and laid it in one of the larboard berths. I now thought it possible that, by getting at this axe, we might cut through the deck over the storeroom, and thus readily supply ourselves with provisions.

When I communicated this project to my companions, they uttered a feeble shout of joy, and we all proceeded forthwith to the forecastle. The difficulty of descending here was greater than that of going down in the cabin, the opening being much smaller, for it will be remembered that the whole framework about the cabin companion-hatch had been carried away, whereas the forecastle-way, being a simple hatch of only about three feet square, had remained uninjured. I did not hesitate, however, to attempt the descent; and, a rope being fastened round my body as before, I plunged boldly in, feet foremost, made my way quickly to the berth, and, at the very first attempt, brought up the axe. It was hailed with the most ecstatic joy and triumph, and the ease with which it had been obtained was regarded as an omen of our ultimate preservation.

We now commenced cutting at the deck with all the energy of rekindled hope, Peters and myself taking the axe by turns, Augustus's wounded arm not permitting him to aid us in any degree. As we were still so feeble as to be scarcely able to stand unsupported, and could consequently work but a minute or two without resting, it soon became evident that many long hours would be requisite to accomplish our task—that is, to cut an opening sufficiently large to admit of a free access to the storeroom. This consideration, however, did not discourage us, and working all night by the light of the moon, we

succeeded in effecting our purpose by daybreak on the morning of the twenty-third.

Peters now volunteered to go down, and having made all arrangements as before, he descended, and soon returned, bringing up with him a small jar, which to our great joy proved to be full of olives. Having shared these among us, and devoured them with the greatest avidity, we proceeded to let him down again. This time he succeeded beyond our utmost expectations, returning instantly with a large ham and a bottle of Madeira wine. Of the latter we each took a moderate sup, having learnt by experience the pernicious consequences of indulging too freely. The ham, except about two pounds near the bone, was not in a condition to be eaten, having been entirely spoiled by the salt water. The sound part was divided among us. Peters and Augustus, not being able to restrain their appetite, swallowed theirs upon the instant, but I was more cautious, and ate but a small portion of mine, dreading the thirst which I knew would ensue. We now rested a while from our labours, which had been intolerably severe.

By noon, feeling somewhat strengthened and refreshed, we again renewed our attempt at getting up provision, Peters and myself going down alternately, and always with more or less success until sundown. During this interval we had the good fortune to bring up altogether, four more small jars of olives, another ham, a carboy containing nearly three gallons of excellent Cape Madeira wine, and what gave us still more delight, a small tortoise of the Gallipago breed, several of which had been taken on board by Captain Barnard as the *Grampus* was leaving port, from the schooner *Mary Pitts*, just returned from a sealing voyage in the Pacific.

In a subsequent portion of this narrative I shall have frequent occasion to mention this species of tortoise. It is found principally, as most of my readers may know, in the group of islands called the Gallipagos, which indeed derive their name from the animal—the Spanish word Gallipago meaning a fresh-water terapin. From the peculiarity of their shape and action, they

have been sometimes called the elephant tortoise. They are frequently found of an enormous size. I have myself seen several which would weigh from twelve to fifteen hundred pounds, although I do not remember that any navigator speaks of having seen them weighing more than eight hundred. Their appearance is singular and even disgusting. Their steps are very slow, measured, and heavy, their bodies being carried about a foot from the ground. Their neck is long and exceedingly slender; from eighteen inches to two feet is a very common length, and I killed one where the distance from the shoulder to the extremity of the head was no less than three feet ten inches. The head has a striking resemblance to that of a serpent. They can exist without food for an almost incredible length of time, instances having been known where they have been thrown into the hold of a vessel and lain two years without nourishment of any kind—being as fat and in every respect in as good order at the expiration of the time as when they were first put in. In one particular these extraordinary animals bear a resemblance to the dromedary or camel of the desert. In a bag at the root of the neck they carry with them a constant supply of water. In some instances, upon killing them after a full year's deprivation of all nourishment, as much as three gallons of perfectly sweet and fresh water have been found in their bags. Their food is chiefly wild parsley and celery, with purslain, sea-kelp, and prickly pears, upon which latter vegetable they thrive wonderfully, a great quantity of it being usually found on the hillsides near the shore, wherever the animal itself is discovered. They are excellent and highly nutritious food, and have no doubt been the means of preserving the lives of thousands of seamen employed in the whale-fishery and other pursuits in the Pacific.

The one which we had the good fortune to bring up from the storeroom was not of a large size, weighing probably sixty-five or seventy pounds. It was a female and in excellent condition, being exceedingly fat, and having more than a quart of limpid and sweet water in its bag. This was indeed a

treasure; and falling on our knees with one accord, we returned fervent thanks to God for so seasonable a relief.

We had great difficulty in getting the animal up through the opening, as its struggles were fierce and its strength prodigious. It was upon the point of making its escape from Peters' grasp, and slipping back into the water, when Augustus, throwing a rope with a slip-knot around its throat, held it up in this manner until I jumped into the hole by the side of Peters, and assisted him in lifting it out.

The water we drew carefully from the bag into the jug, which, it will be remembered, had been brought up before from the cabin. Having done this, we broke off the neck of a bottle so as to form with the cork a kind of glass, holding not quite half a gill. We then each drank one of these measures full, and resolved to limit ourselves to this quantity per day as long as it should hold out.

During the last two or three days, the weather having been dry and pleasant, the bedding we had obtained from the cabin, as well as our clothing, had become thoroughly dry, so that we passed this night (that of the twenty-third) in comparative comfort, enjoying a tranquil repose, after having supped plentifully on olives and ham, with a small allowance of the wine. Being afraid of losing some of our stores overboard during the night, in the event of a breeze springing up, we secured them as well as possible with cordage to the fragments of the windlass. Our tortoise, which we were anxious to preserve alive as long as we could, we threw on his back and otherwise carefully fastened.

CHAPTER XIII.

JULY 24. This morning saw us wonderfully recruited in spirits and strength. Notwithstanding the perilous situation in which we were still placed, ignorant of our position, although certainly at a great distance from land, without more food than would last us for a fortnight even with great care, almost entirely without water, and floating about at the mercy of every wind and wave, on the merest wreck in the world, still the infinitely more terrible distresses and dangers from which we had so lately and so providentially been delivered caused us to regard what we now endured as but little more than an ordinary evil—so strictly comparative is either good or ill.

At sunrise we were preparing to renew our attempts at getting up something from the storeroom, when a smart shower coming on, with some lightning, we turned our attention to the catching of water by means of the sheet we had used before for this purpose. We had no other means of collecting the rain than by holding the sheet spread out with one of the forechain-plates in the middle of it. The water thus conducted to the centre was drained through in to our jug. We had nearly filled it in this manner, when, a heavy squall coming on from the northward, obliged us to desist, as the hulk began once more to roll so violently that we could no longer keep our feet. We now went forward, and, lashing ourselves securely to the remnant of the windlass as before, awaited the event with far more calmness than could have been anticipated or would have been imagined possible under the circumstances. At noon the wind had freshened into a two-reef breeze, and by night into a stiff gale, accompanied with a tremendously heavy swell. Experience having taught us, however, the best method of arranging our lashings, we weathered this dreary night in tolerable security, although

thoroughly drenched at almost every instant by the sea, and in momentary dread of being washed off. Fortunately, the weather was so warm as to render the water rather grateful than otherwise.

July 25. This morning the gale had diminished to a mere ten knot breeze, and the sea had gone down with it so considerably that we were able to keep ourselves dry upon the deck. To our great grief, however, we found that two jars of our olives, as well as the whole of our ham, had been washed overboard, in spite of the careful manner in which they had been fastened. We determined not to kill the tortoise as yet, and contented ourselves for the present with a breakfast on a few of the olives, and a measure of water each, which latter we mixed, half and half, with wine, finding great relief and strength from the mixture, without the distressing intoxication which had ensued upon drinking the port. The sea was still far too rough for the renewal of our efforts at getting up provision from the storeroom. Several articles, of no importance to us in our present situation, floated up through the opening during the day, and were immediately washed overboard. We also now observed that the hulk lay more along than ever, so that we could not stand an instant without lashing ourselves. On this account we passed a gloomy and uncomfortable day. At noon the sun appeared to be nearly vertical, and we had no doubt that we had been driven down by the long succession of northward and north-westerly winds into the near vicinity of the equator. Towards evening saw several sharks, and were somewhat alarmed by the audacious manner in which an enormously large one approached us. At one time, a lurch throwing the deck very far beneath the water, the monster actually swam in upon us, floundering for some moments just over the companion-hatch, and striking Peters violently with his tail. A heavy sea at length hurled him overboard, much to our relief. In moderate weather we might have easily captured him.

July 26. This morning, the wind having greatly abated, and not being very rough, we determined to renew our

exertions in the storeroom. After a great deal of hard labour during the whole day, we found that nothing further was to be expected from this quarter, the partitions of the room having been stove during the night, and its contents swept into the hold. This discovery, as may be supposed, filled us with despair.

July 27. The sea nearly smooth, with a light wind, and still from the northward and westward. The sun coming out hotly in the afternoon, we occupied ourselves in drying our clothes. Found great relief from thirst, and much comfort otherwise, by bathing in the sea, in this, however, we were forced to use great caution, being afraid of sharks, several of which were seen swimming around the brig during the day.

July 28. Good weather still. The brig now began to lie along so alarmingly that we feared she would eventually roll bottom up. Prepared ourselves as well as we could for this emergency, lashing our tortoise, water jug, and two remaining jars of olives as far as possible over to the windward, placing them outside the hull, below the main chains. The sea very smooth all day, with little or no wind.

July 29. A continuance of the same weather. Augustus's wounded arm began to evince symptoms of mortification. He complained of drowsiness and excessive thirst, but no acute pain. Nothing could be done for his relief beyond rubbing his wounds with a little of the vinegar from the olives, and from this no benefit seemed to be experienced. We did everything in our power for his comfort, and trebled his allowance of water.

July 30. An excessively hot day with no wind. An enormous shark kept close by the hulk during the whole of the forenoon. We made several unsuccessful attempts to capture him by means of a noose. Augustus much worse, and evidently sinking as much from want of proper nourishment as from the effect of his wounds. He constantly prayed to be released from his sufferings, wishing for nothing but death. This evening we ate the last of our olives, and found the water in our jug so putrid that we could not swallow it at all without

the addition of wine. Determined to kill our tortoise in the morning.

July 31. After a night of excessive anxiety and fatigue, owing to the position of the hulk, we set about killing and cutting up our tortoise. He proved to be much smaller than we had supposed, although in good condition—the whole meat about him not amounting to more than ten pounds. With a view of preserving a portion of this as long as possible, we cut it into fine pieces and filled with them our three remaining olive jars and the wine bottle (all of which had been kept), pouring in afterwards the vinegar from the olives. In this manner we put away about three pounds of the tortoise, intending not to touch it until we had consumed the rest. We concluded to restrict ourselves to about four ounces of the meat per day; the whole would thus last us thirteen days. A brisk shower, with severe thunder and lightning, came on about dusk, but lasted so short a time that we only succeeded in catching about half a pint of water. The whole of this by common consent was given to Augustus, who now appeared to be in the last extremity. He drank the water from the sheet as we caught it (we holding it above him as he lay, so as to let it run into his mouth), for we had now nothing left capable of holding water unless we had chosen to empty out our wine from the carboy or the stale water from the jug. Either of these expedients would have been resorted to had the shower lasted.

The sufferer seemed to derive but little benefit from the draught. His arm was completely black from the wrist to the shoulder, and his feet were like ice. We expected every moment to see him breathe his last. He was frightfully emaciated; so much so, that although he weighed a hundred and twenty-seven pounds upon his leaving Nantucket, he now did not weigh more than *forty or fifty at the farthest*. His eyes were sunk far in his head, being scarcely perceptible, and the skin of his cheeks hung so loosely as to prevent his masticating any food, or even swallowing any liquid, without great difficulty.

August 1. A continuance of the same calm weather with an oppressively hot sun. Suffered exceedingly from thirst, the water in the jug being absolutely putrid and swarming with vermin. We contrived, nevertheless, to swallow a portion of it by mixing it with wine—our thirst, however, was but little abated. We found more relief by bathing in the sea, but could not avail ourselves of this expedient except at long intervals, on account of the continual presence of sharks. We now saw clearly that Augustus could not be saved; that he was evidently dying. We could do nothing to relieve his sufferings, which appeared to be great. About twelve o'clock he expired in strong convulsions, and without having spoken for several hours. His death filled us with the most gloomy forebodings, and had so great an effect upon our spirits that we sat motionless by the corpse during the whole day, and never addressed each other except in a whisper. It was not until some time after dark that we took courage to get up and throw the body overboard. It was then loathsome beyond expression, and so far decayed, that, as Peters attempted to lift it, an entire leg came off in his grasp. As the mass of putrefaction slipped over the vessel's side into the water, the glare of phosphoric light with which it was surrounded plainly discovered to us seven or eight large sharks, the clashing of whose horrible teeth, as their prey was torn to pieces among them, might have been heard at the distance of a mile. We shrank within ourselves in the extremity of horror at the sound.

August 2. The same fearfully calm and hot weather. The dawn found us in a state of pitiable dejection as well as bodily exhaustion. The water in the jug was now absolutely useless, being a thick gelatinous mass; nothing but frightful-looking worms mingled with slime. We threw it out and washed the jug well in the sea, afterwards pouring a little vinegar in it from our bottles of pickled tortoise. Our thirst could now scarcely be endured, and we tried in vain to relieve it by wine, which seemed only to add fuel to the flame, and excited us to a high degree of intoxication. We afterwards endeavoured to relieve our sufferings by mixing the wine with sea-water; but

this instantly brought about the most violent retchings, so that we never again attempted it. During the whole day we anxiously sought an opportunity of bathing, but to no purpose; for the hulk was now entirely besieged on all sides with sharks—no doubt the identical monsters who had devoured our poor companion on the evening before, and who were in momentary expectation of another similar feast. This circumstance occasioned us the most bitter regret, and filled us with the most depressing and melancholy forebodings. We had experienced indescribable relief in bathing, and to have this resource cut off in so frightful a manner was more than we could bear. Nor, indeed, were we altogether free from the apprehension of immediate danger, for the least slip or false movement would have thrown us at once within reach of these voracious fish, who frequently thrust themselves directly upon us, swimming up to leeward. No shouts or exertions on our part seemed to alarm them. Even when one of the largest was struck with an axe by Peters, and much wounded, he persisted in his attempts to push in where we were. A cloud came up at dusk, but, to our extreme anguish, passed over without discharging itself. It is quite impossible to conceive our sufferings from thirst at this period. We passed a sleepless night, both on this account and through dread of the sharks.

August 3 No prospect of relief, and the brig lying still more and more along, so that now we could not maintain a footing upon deck at all. Busied ourselves in securing our wine and tortoise meat, so that we might not lose them in the event of our rolling over. Got out two stout spikes from the forechains, and, by means of the axe, drove them into the hull to windward within a couple of feet of the water; this not being very far from the keel, as we were nearly upon our beam-ends. To these spikes we now lashed our provisions, as being more secure than their former position beneath the chains. Suffered great agony from thirst during the whole day—no chance of bathing on account of the sharks, which never left us for a moment. Found it impossible to sleep.

August 4. A little before daybreak we perceived that the

hulk was heeling over, and aroused ourselves to prevent being thrown off by the movement. At first the roll was slow and gradual, and we contrived to clamber over to windward very well, having taken the precaution to leave ropes hanging from the spikes we had driven in for the provision. But we had not calculated sufficiently upon the acceleration of the impetus; for, presently the heel became too violent to allow of our keeping pace with it; and, before either of us knew what was to happen, we found ourselves hurled furiously into the sea, and struggling several fathoms beneath the surface, with the huge hull immediately above us.

In going under the water I had been obliged to let go my hold upon the rope; and finding that I was completely beneath the vessel, and my strength utterly exhausted, I scarcely made a struggle for life, and resigned myself, in a few seconds, to die. But here again I was deceived, not having taken into consideration the natural rebound of the hull to windward. The whirl of the water upwards, which the vessel occasioned in rolling partially back, brought me to the surface still more violently than I had been plunged beneath. Upon coming up, I found myself about twenty yards from the hulk, as near as I could judge. She was lying keel up, rocking furiously from side to side, and the sea in all directions around was much agitated, and full of strong whirlpools. I could see nothing of Peters. An oil-cask was floating within a few feet of me, and various other articles from the brig were scattered about.

My principal terror was now on account of the sharks, which I knew to be in my vicinity. In order to deter these, if possible, from approaching me, I splashed the water vigorously with both hands and feet as I swam towards the hulk, creating a body of foam. I have no doubt that to this expedient, simple as it was, I was indebted for my preservation; for the sea all around the brig, just before her rolling over, was so crowded with these monsters, that I must have been, and really was, in actual contact with some of them during my progress. By great good fortune, however, I reached the side of the vessel in safety, although so utterly

weakened by the violent exertion I had used that I should never have been able to get upon it but for the timely assistance of Peters, who now, to my great joy, made his appearance (having scrambled up to the keel from the opposite side of the hull), and threw me the end of a rope—one of those which had been attached to the spikes.

Having barely escaped this danger, our attention was now directed to the dreadful imminency of another—that of absolute starvation. Our whole stock of provision had been swept overboard in spite of all our care in securing it, and seeing no longer the remotest possibility of obtaining more, we gave way, both of us, to despair, weeping aloud like children, and neither of us attempting to offer consolation to the other. Such weakness can scarcely be conceived, and to those who have never been similarly situated will no doubt appear unnatural; but it must be remembered that our intellects were so entirely disordered by the long course of privation and terror to which we had been subjected, that we could not justly be considered at that period in the light of rational beings. In subsequent perils nearly as great, if not greater, I bore up with fortitude against all the evils of my situation, and Peters, it will be seen, evinced a stoical philosophy nearly as incredible as his present childlike supineness and imbecility—the mental condition mad-
the difference.

The overturning of the brig, even with the consequent loss of the wine and turtle, would not, in fact, have rendered our situation more deplorable than before, except for the disappearance of the bedclothes by which we had been hitherto enabled to catch rain-water, and of the jug in which we had kept it when caught, for we found the whole bottom, from within two or three feet of the bents as far as the keel, together with the keel itself, *thickly coverrd with large barnacles, which proved to be excellent and highly nutritious food.* Thus in two important respects the accident we had so greatly dreaded proved a benefit rather than an injury; it had opened to us a supply of provisions which we could not have exhausted, using it moderately, in a month, and it had greatly contributed to

our comfort as regards position, we being much more at our ease, and in infinitely less danger than before.

The difficulty, however, of now obtaining water blinded us to all the benefits of the change in our condition. That we might be ready to avail ourselves as far as possible of any shower which might fall, we took off our shirts, to make use of them, as we had of the sheets, not hoping, of course, to get more in this way, even under the most favourable circumstances, than half a gill at a time. No signs of a cloud appeared during the day, and the agonies of our thirst were nearly intolerable. At night Peters obtained about an hour's disturbed sleep, but my intense sufferings would not permit me to close my eyes for a single moment.

August 5. To-day a gentle breeze springing up carried us through a vast quantity of seaweed, among which we were so fortunate as to find eleven small crabs, which afforded us several delicious meals. Their shells being quite soft, we ate them entire, and found that they irritated our thirst far less than the barnacles. Seeing no trace of sharks among the seaweed, we also ventured to bathe, and remained in the water for four or five hours, during which we experienced a very sensible diminution of our thirst. Were greatly refreshed, and spent the night somewhat more comfortably than before, both of us snatching a little sleep.

August 6. This day we were blessed by a brisk and continual rain, lasting from about noon until after dark. Bitterly did we now regret the loss of our jug and carboy, for in spite of the little means we had of catching the water, we might have filled one, if not both of them. As it was, we contrived to satisfy the cravings of thirst by suffering the shirts to become saturated, and then wringing them, so as to let the grateful fluid trickle into our mouths. In this occupation we passed the entire day.

August 7. Just at daybreak we both at the same instant descried a sail to the eastward, and *evidently coming towards us!* We hailed the glorious sight with a long although feeble shout of rapture, and began instantly to make every signal in our

power, by flaring the shirts in the air, leaping as high as our weak condition would permit, and even by hallooing with all the strength of our lungs, although the vessel could not have been less than fifteen miles distant. However, she still continued to bear our hulk, and we felt that if she but held her present course she must eventually come so close as to perceive us. In about an hour after we first discovered her we could clearly see the people on her decks. She was a long, low, and rakish looking topsail schooner, with a black ball in her foretopsail, and had apparently a full crew. We now became alarmed, for we could hardly imagine it possible that she did not observe us, and were apprehensive that she meant to leave us to perish as we were—in act of fiendish barbarity, which, however incredible it may appear, has been repeatedly perpetrated at sea under circumstances very nearly similar, and by beings who were regarded as belonging to the human species.* In this instance, however, by the mercy of God, we

* The case of the brig *Polly* of Boston is one so much in point, and her fate in many respects so remarkably similar to our own, that I cannot forbear alluding to it here. This vessel, of one hundred and thirty tons burthen sailed from Boston, with a cargo of lumber and provisions, for Santa Cruz on the twelfth of December 1811, under the command of Captain Casneau. There were eight souls on board, besides the captain, the mate, four seamen, and the cook, together with a Mr. Hull, and a negro girl belonging to him. On the fifteenth, having cleared the shoal of George's, she sprung a leak in a gale of wind from the south east, and was finally capsized, but, the next going by the wind, she afterwards righted. They remained in this situation, without fire, and with very little provision, for the period of one hundred and eighty nine days (from December the fifteenth to June the twentieth), when Captain Casneau and Samuel Badger, the only survivors, were taken off the wreck by the *Fame* of Hull, Captain Featherstone, bound home from Rio Janeiro. When picked up they were in latitude 28° N., longitude 13° W., having drifted above two thousand miles! On the ninth of July the *Fame* fell in with the brig *Dromed*, Captain Perkins, who landed the two sufferers in Kennbeck. The narrative from which we gather these details ends in the following words—

"It is natural to inquire how they could float such a vast distance upon the most frequented part of the Atlantic, and not be discovered till this time. They were passed by more than a dozen sail, one of which came so

were destined to be most happily deceived, for presently we were aware of a sudden commotion on the deck of the stranger, who immediately afterwards run up a British flag, and, hauling her wind, bore up directly upon us. In half an hour more we found ourselves in her cabin. She proved to be the *Jane Guy* of Liverpool, Captain Guy, bound on a sealing and trading voyage to the South Seas and Pacific.

CHAPTER XIV.

THE *Jane Guy* was a fine-looking topsail schooner of a hundred and eighty tons burthen. She was unusually sharp in the bows and, on a wind in moderate weather, the fastest sailer I have ever seen. Her qualities, however, as a rough sea-boat, were not so good, and her draught of water was by far too great for the trade to which she was destined. For this peculiar service, a larger vessel, and one of a light proportionate draught, is desirable—say a vessel of from three to three hundred and fifty tons. She should be barque-rigged, and in other respects of a different construction from the usual South Sea ships. It is absolutely necessary that she should be well armed. She should have, say ten or twelve twelve-pound carronades, and two or three long twelves, with brass blunderbusses, and water-tight arm-chests for each top. Her anchors and cables should be of far greater strength than is required for any other species of trade and, above all, her crew should be numerous and efficient, not less, for such a vessel as I have described, than fifty or sixty able bodied men. The *Jane Guy* had a crew of thirty-five, all able seamen, *with them that they could distinctly see the people on deck and on the rigging looking at them, but, to the inexpressible disappointment of the starving and freezing men, they stifled the dictates of compassion, hoisted sail, and cruelly abandoned them to their fate.*

besides the captain and mate, but she was not altogether as well armed or otherwise equipped as a navigator acquainted with the difficulties and dangers of the trade could have desired.

Captain Guy was a gentleman of great urbanity of manner, and of considerable experience in the Southern traffic, to which he had devoted the greater portion of his life. He was deficient, however, in energy and, consequently, in that spirit of enterprise which is here so absolutely requisite. He was part owner of the vessel in which he sailed, and was invested with discretionary powers to cruise in the South Seas for any cargo which might come most readily to hand. He had on board, as usual in such voyages, beads, looking-glasses, tinder-works, axes, hatchets, saws, adzes, planes, chisels, gouges, gimlets, files, spoke-shaves, rasps, hammers, nails, knives, scissors, razors, needles, thread, crockeryware, calico, trinkets, and other similar articles.

The schooner sailed from Liverpool on the tenth of July, crossed the tropic of Cancer on the twenty-fifth, in longitude 20° W., and reached Sal, one of the Cape Verd Islands on the twenty-ninth, where she took in salt and other necessities for the voyage. On the third of August she left the Cap^o Verds and steered south-west, stretching over towards the coast of Brazil, so as to cross the equator between the meridians of twenty-eight and thirty degrees west longitude. This is the course usually taken by vessels bound from Europe to the Cape of Good Hope, or by that route to the East Indies. By proceeding thus they avoid the calms and strong contrary currents which continually prevail on the coast of Guinea, while in the end it is found to be the shortest track, as westerly winds are never wanting afterwards, by which to reach the Cape. It was Captain Guy's intention to make his first stoppage at Kerguelen's Land—I hardly know for what reason. On the day we were picked up the schooner was off Cape St. Roque, in longitude 31° W.; so that, when found, we had drifted probably, from north to south, *not less than five-and-twenty degrees!*

On board the *Jane Guy* we were treated with all the kind-

ness our distressed situation demanded. In about a fortnight, during which time we continued steering to the south-east, with gentle breezes and fine weather, both Peters and myself recovered entirely from the effects of our late privation and dreadful suffering, and we began to remember what had passed rather as a frightful dream from which we had been happily awakened, than as events which had taken place in sober and naked reality. I have since found that this species of partial oblivion is usually brought about by sudden transition, whether from joy to sorrow or from sorrow to joy—the degree of forgetfulness being proportioned to the degree of difference in the exchange. Thus, in my own case, I now feel it impossible to realize the full extent of the misery which I endured during the days spent upon the hulk. The incidents are remembered, but not the feelings which the incidents elicited at the time of their occurrence. I only know, that when they did occur, I *then* thought human nature could sustain nothing more of agony.

We continued our voyage for some weeks without any incidents of greater moment than the occasional meeting with whaling ships, and more frequently with the black or right whale, so called in contradistinction to the spermaceti. These, however, were chiefly found south of the twenty-fifth parallel. On the sixteenth of September, being in the vicinity of the Cape of Good Hope, the schooner encountered her first gale of any violence since leaving Liverpool. In this neighbourhood, but more frequently to the south and east of the promontory (we were to the westward), navigators have often to contend with storms from the northward, which rage with great fury. They always bring with them a heavy sea, and one of their most dangerous features is the instantaneous chopping round of the wind, an occurrence almost certain to take place during the greatest force of the gale. A perfect hurricane will be blowing at one moment from the northward or north-east, and in the next not a breath of wind will be felt in that direction, while from the south-west it will come out all at once with a violence almost inconceivable. A bright spot to the south-

ward is the sure forerunner of the change, and vessels are thus enabled to take the proper precautions.

It was about six in the morning when the blow came on with a white squall, and as usual from the northward. By eight it had increased very much, and brought down upon us one of the most tremendous seas I had then ever beheld. Everything had been made as snug as possible, but the schooner laboured excessively, and gave evidence of her bad qualities as a sea-boat, pitching her forecastle under at every plunge, and with the greatest difficulty struggling up from one wave before she was buried in another. Just before sunset the bright spot for which we had been on the look-out made its appearance in the south-west, and in an hour afterwards we perceived the little head-sail we carried flapping listlessly against the mast. In two minutes more, in spite of every preparation, we were hauled on our beam ends as if by magic, and a perfect wilderness of foam made a clear breach over us as we lay. The blow from the south-west, however, luckily proved to be nothing more than a squall, and we had the good fortune to right the vessel without the loss of a spar. A heavy cross sea gave us great trouble for a few hours after this, but towards morning we found ourselves in nearly as good condition as before the gale. Captain Guy considered that he had made an escape little less than miraculous.

On the thirteenth of October we came in sight of Prince Edward's Island, in latitude $46^{\circ} 53' S.$, longitude $37^{\circ} 46' E.$ Two days afterwards we found ourselves near Possession Island, and presently passed the islands of Crozet, in latitude $42^{\circ} 59' S.$, longitude $48^{\circ} E.$ On the eighteenth we made Kerguelen's or Desolation Island, in the southern Indian Ocean, and came to anchor in Christmas Harbour, having four fathoms of water.

This island, or rather group of islands, bears south-east from the Capo of Good Hope, and is distant therefrom nearly eight hundred leagues. It was first discovered in 1772 by the Baron de Kerguelen or Kerguelen, a Frenchman, who, thinking the land to form a portion of an extensive southern continent, carried home information to that effect, which produced much

excitement at the time. The Government, taking the matter up, sent the baron back in the following year for the purpose of giving his new discovery a critical examination, when the mistake was discovered. In 1777 Captain Cook fell in with the same group, and gave to the principal one the name of Desolation Island, a title which it certainly well deserves. Upon approaching the land, however, the navigator might be induced to suppose otherwise, as the sides of most of the hills, from September to March, are clothed with very brilliant verdure. This deceitful appearance is caused by a small plant resembling saxifrage, which is abundant, growing in large patches on a species of crumbling moss. Besides this plant there is scarcely a sign of vegetation on the island, if we except some coarse rank grass near the harbour, some lichen, and a shrub which bears resemblance to a cabbage shooting into seed, and which has a bitter and acrid taste.

The face of the country is hilly, although none of the hills can be called lofty. Their tops are perpetually covered with snow. There are several harbours, of which Christina's Harbour is the most convenient. It is the first to be met with on the north-east side of the island after passing the Cape François, which forms the northern shore, and by its peculiar shape serves to distinguish the harbour. Its projecting point terminates in a high rock, through which is a large hole, forming a natural arch. The entrance is in latitude $48^{\circ} 40' S.$, longitude $69^{\circ} 6' E.$ Passing in here, good anchorage may be found under the shelter of several small islands, which form a sufficient protection from all easterly winds. Proceeding on eastwardly from this anchorage you come to Wasp Bay, at the head of the harbour. This is a small basin, completely land-locked, into which you can go with four fathoms, and find anchorage in from ten to three, hard clay bottom. A ship might lie here with her best lower ahead all the year round without risk. To the westward, at the head of Wasp Bay, is a small stream of excellent water, easily procured.

Some seal of the fur and hair species are still to be found on Kerguelen's Island, and sea-elephants abound. The

feathered tribes are discovered in great numbers. Penguins are very plenty, and of these there are four different kinds. The royal penguin, so called from its size and beautiful plumage, is the largest. The upper part of the body is usually grey, sometimes of a lilac tint; the under portion of the purest white imaginable. The head is of a glossy and most brilliant black, the feet also. The chief beauty of the plumage, however, consists in two broad stripes of a gold colour, which pass along from the head to the breast. The bill is long, and either pink or bright scarlet. These birds walk erect, with a stately carriage. They carry their heads high, with their wings drooping like two arms, and as their tails project from their body in a line with the legs the resemblance to a human figure is very striking, and would be apt to deceive the spectator at a casual glance or in the gloom of the evening. The royal penguins which we met with on Kerguelen's Land were rather larger than a goose. The other kinds are the maccaroni, the jackass, and the rookery penguin. These are much smaller, less beautiful in plumage, and different in other respects.

Besides the penguin many other birds are here to be found, among which may be mentioned sea hens, blue petrels, teal, ducks, Port Egmont hens, shags, Cape pigeons, the nelly, sea-swallows, terns, sea-gulls, Mother Carey's chickens, Mother Carey's geese, or the great petrel, and lastly, the albatross.

The great petrel is as large as the common albatross, and is carnivorous. It is frequently called the break-bones, or osprey petrel. They are not at all shy, and when properly cooked are palatable food. In flying they sometimes sail very close to the surface of the water, with the wings expanded, without appearing to move them in the least degree, or make any exertion with them whatever.

The albatross is one of the largest and fiercest of the South Sea birds. It is of the gull species, and takes its prey on the wing, never coming on land except for the purpose of breeding. Between this bird and the penguin the most singular friendship exists. Their nests are constructed with great uniformity, upon

a plan concerted between the two species—that of the albatross being placed in the centre of a little square formed by the nests of four penguins. Navigators have agreed in calling an assemblage of such encampments *a rookery*. These rockeries have been often described, but as my readers may not all have seen those descriptions, and as I shall have occasion hereafter to speak of the penguin and albatross, it will not be amiss to say something here of their mode of building and living.

When the season for incubation arrives, the birds assemble in vast numbers, and for some days appear to be deliberating upon the proper course to be pursued. At length they proceed to action. A level piece of ground is selected, of suitable extent, usually comprising three or four acres, and situated as near the sea as possible, being still beyond its reach. The spot is chosen with reference to its evenness of surface, and that is preferred which is the least encumbered with stones. This matter being arranged, the birds proceed with one accord, and actuated apparently by one mind, to trace out, with mathematical accuracy, either a square or other parallelogram, as may best suit the nature of the ground, and of just sufficient size to accommodate easily all the birds assembled, and no more—in this particular seeming determined upon preventing the access of future stragglers who have not participated in the labour of the encampment. One side of the place thus marked out runs parallel with the water's edge, and is left open for ingress or egress.

Having defined the limits of the rookery, the colony now begin to clear it of every species of rubbish, picking up stone by stone, and carrying them outside of the lines, and close by them, so as to form a wall on the three inland sides. Just within this wall a perfectly level and smooth walk is formed, from six to eight feet wide, and extending around the encampment—thus serving the purpose of a general promenade.

The next process is to partition out the whole area into small squares exactly equal in size. This is done by forming narrow paths, very smooth, and crossing each other at right angles throughout the entire extent of the rookery. At each inter-

section of these paths the nest of an albatross is constructed, and a penguin's nest in the centre of each square; thus every penguin is surrounded by four albatrosses, and each albatross by a like number of penguins. The penguin's nest consists of a hole in the earth, very shallow, being only just of sufficient depth to keep her single egg from rolling. The albatross is somewhat less simple in her arrangements, erecting a hillock about a foot high and two in diameter. This is made of earth, seaweed, and shells. On its summit she builds her nest.

The birds take especial care never to leave their nests unoccupied for an instant during the period of incubation, or indeed until the young progeny are sufficiently strong to take care of themselves. While the male is absent at sea in search of food, the female remains on duty, and it is only upon the return of her partner that she ventures abroad. The eggs are never left uncovered at all—while one bird leaves the nest, the other nestling in by its side. This precaution is rendered necessary by the thievish propensities prevalent in the rookery, the inhabitants making no scruple to pilfer each other's eggs at every good opportunity.

Although there are some rookeries in which the penguin and albatross are the sole population, yet in most of them a variety of oceanic birds are to be met with, enjoying all the privileges of citizenship, and scattering their nests here and there, wherever they can find room, never interfering, however, with the stations of the larger species. The appearance of such encampments when seen from a distance is exceedingly singular. The whole atmosphere just above the settlement is darkened with the immense number of the albatross (mingled with the smaller tribes) which are continually hovering over it, either going to the ocean or returning home. At the same time a crowd of penguins are to be observed, some passing to and fro in the narrow alleys, and some marching with the military strut so familiar to them, around the general promenade-ground which encircles the rookery. In short, survey it as we will, nothing can be more astonishing than the spirit of reflection

evinced by these feathered beings, and nothing surely can be better calculated to elicit reflection in every well-regulated human intellect.

On the morning after our arrival in Christmas Harbour, the chief mate, Mr. Patterson, took the boats and (although it was somewhat early in the season) went in search of seal, leaving the captain and a young relation of his on a point of barren land to the westward, they having some business, whose nature I could not ascertain, to transact in the interior of the island. Captain Guy took with him a bottle, in which was a sealed letter, and made his way from the point on which he was set on shore towards one of the highest peaks in the place. It is probable that his design was to leave the letter on that height for some vessel which he expected to come after him. As soon as we lost sight of him we proceeded (Peters and myself being in the mate's boat) on our cruise around the coast, looking for seal. In this business we were occupied about three weeks, examining with great care every nook and corner, not only of Kerguelen's Land, but of the several small islands in the vicinity. Our labours, however, were not crowned with any important success. We saw a great many fur seal, but they were exceedingly shy, and with the greatest exertions we could only procure three hundred and fifty skins, in all. Sei elephants were abundant, especially on the western coast of the mainland, but of these we killed only twenty, and this with great difficulty. On the smaller islands we discovered a good many of the hair seal, but did not molest them. We returned to the schooner on the eleventh, where we found Captain Guy and his nephew, who gave a very bad account of the interior, representing it as one of the most dreary and utterly barren countries in the world. They had remained two nights on the island, owing to some misunderstanding on the part of the second mate in regard to the sending a jolly-boat from the schooner to take them off.

CHAPTER XV.

ON the twelfth we made sail from Christmas Harbour, retracing our way to the westward, and leaving Marion's Island, one of Crozet's group, on the larboard. We afterwards passed Prince Edward's Island, leaving it also on our left; then, steering more to the northward, made, in fifteen days, the islands of Tristan d'Acunha, in latitude 37° 8' S., longitude 12° 8' W.

This group, now so well known, and which consists of three circular islands, was first discovered by the Portuguese, and was visited afterwards by the Dutch in 1643, and by the French in 1767. The three islands together form a triangle, and are distant from each other about ten miles, there being fine open passages between. The land in all of them is very high, especially in Tristan d'Acunha, properly so called. This is the largest of the group, being fifteen miles in circumference, and so elevated that it can be seen in clear weather at the distance of eighty or ninety miles. A part of the land towards the north rises more than a thousand feet perpendicularly from the sea. A tableland at this height extends back nearly to the centre of the island, and from this tableland arises a lofty cone like that of Tenerife. The lower half of this cone is clothed with trees of good size, but the upper region is barren rock, usually hidden among the clouds, and covered with snow during the greater part of the year. There are no shoals or other dangers about the island, the shores being remarkably bold and the water deep. On the north-western coast is a bay, with a beach of black sand, where a landing with boats can be easily effected, provided there be a southerly wind. Plenty of excellent water may here be readily procured; also cod and other fish may be taken with hook and line.

The next island in point of size, and the most westwardly of the group, is that called the Inaccessible. Its precise situation is 37° 17' S. latitude, longitude 12° 24' W. It is seven or eight miles in circumference, and on all sides presents a forbidding and

precipitous aspect. Its top is perfectly flat, and the whole region is sterile, nothing growing upon it except a few stunted shrubs.

Nightingale Island, the smallest and most southerly, is in latitude $37^{\circ} 26' S.$, longitude $12^{\circ} 12' W.$ Off its southern extremity is a high ledge of rocky islets ; a few also of a similar appearance are seen to the north-east. The ground is irregular and sterile, and a deep valley partially separates it.

The shores of these islands abound, in the proper season, with sea-lions, sea-elephants, the hair and fur seal, together with a great variety of oceanic birds. Whales are also plentiful in their vicinity. Owing to the ease with which these various animals were here formerly taken, the group has been much visited since its discovery. The Dutch and French frequented it at a very early period. In 1790 Captain Patten, of the ship *Industry*, of Philadelphia, made Tristan d'Acrenha, where he remained seven months (from August 1790 to April 1791) for the purpose of collecting sealskins. In this time he gathered no less than five thousand six hundred, and says that he would have had no difficulty in loading a large ship with oil in three weeks. Upon his arrival he found no quadrupeds, with the exception of a few wild goats ; the island now abounds with all our most valuable domestic animals, which have been introduced by subsequent navigators.

I believe it was not long after Captain Patten's visit that Captain Colquhoun, of the American brig *Belsey*, touched at the largest of the islands for the purpose of refreshment. He planted onions, potatoes, cabbages, and a great many other vegetables, an abundance of all which are now to be met with.

In 1811 a Captain Haywood, in the *Nereus*, visited Tristan. He found there three Americans, who were residing upon the islands to prepare sealskins and oil. One of these men was named Jonathan Lambert, and he called himself the sovereign of the country. He had cleared and cultivated about sixty acres of land, and turned his attention to raising the coffee plant and sugar-cane, with which he had been furnished by the American Minister at Rio Janeiro. This settlement, however, was finally abandoned, and in 1817 the islands were taken

possession of by the British Government, who sent a detachment for that purpose from the Cape of Good Hope. They did not, however, retain them long; but, upon the evacuation of the country as a British possession, two or three English families took up their residence there independently of the Government. On the twenty-fifth of March 1824, the *Berwick*, Captain Jeffrey, from London to Van Diemen's Land, arrived at the place, where they found an Englishman of the name of Glass, formerly a corporal in the British artillery. He claimed to be supreme governor of the islands, and had under his control twenty-one men and three women. He gave a very favourable account of the salubrity of the climate and of the productiveness of the soil. The population occupied themselves chiefly in collecting sealskins and sea elephant oil, with which they traded to the Cape of Good Hope, Glass owning a small schooner. At the period of our arrival the governor was still a resident, but his little community had multiplied, there being fifty-six persons upon Tristan, besides a smaller settlement of seven on Nightingale Island. We had no difficulty in procuring almost every kind of refreshment which we required—sheep, hogs, bullocks, rabbits, poultry, goats, fish in great variety, and vegetables were abundant. Having come to anchor close in with the large island, in eighteen fathoms, we took all we wanted on board very conveniently. Captain Guy also purchased of Glass five hundred sealskins and some ivory. We remained here a week, during which the prevailing winds were from the northward and westward, and the weather somewhat hazy. On the fifth of November we made sail to the southward and westward, with the intention of having a thorough search for a group of islands called the Auroras, respecting whose existence a great diversity of opinion has existed.

These islands are said to have been discovered as early as 1762, by the commander of the ship *Aurora*. In 1790 Captain Mannel de Oyarvido, in the ship *Princess*, belonging to the Royal Philippine Company, sailed, as he asserts, directly among them. In 1794 the Spanish corvette *Atravida* went with the determination of ascertaining their precise situation, and in a

paper published by the Royal Hydrographical Society of Madrid in the year 1809, the following language is used respecting this expedition:—"The corvette *Aterrida* practised, in their immediate vicinity, from the twenty-first to the twenty-seventh of January, all the necessary observations, and measured by chronometers the difference of longitude between these islands and the port of Soledad in the Malvinas. The islands are three; they are very nearly in the same meridian; the centre one is rather low, and the other two may be seen at nine leagues distance." The observations made on board the *Aterrida* give the following results as the precise situation of each island. The most northern is in latitude $52^{\circ} 37' 24''$ S., longitude $47^{\circ} 43' 15''$ W.; the middle one in latitude $53^{\circ} 2' 40''$ S., longitude $47^{\circ} 55' 15''$ W.; and the most southern in latitude $53^{\circ} 15' 22''$ S., longitude $47^{\circ} 57' 15''$ W.

On the twenty-seventh of January 1820 Captain James Weddell, of the British navy, sailed from Staten Land also in search of the Auroras. He reports that having made the most diligent search, and passed not only immediately over the spots indicated by the commander of the *Aterrida*, but in every direction throughout the vicinity of those spots, he could discover no indication of land. These conflicting statements have induced other navigators to look out for the islands; and strange to say, while some have sailed through every inch of sea where they are supposed to lie without finding them, there have been not a few who declare positively that they have seen them, and even been close in with their shores. It was Captain Guy's intention to make every exertion within his power to settle the question so oddly in dispute.*

We kept on our course, between the south and west, with variable weather, until the twentieth of the month, when we found ourselves on the debated ground, being in latitude $53^{\circ} 15'$ S., longitude $47^{\circ} 58'$ W.—that is to say, very nearly upon

* Among the vessels which at various times have professed to meet with the Auroras may be mentioned the ship *San Miguel*, in 1769; the ship *Aurora*, in 1774; the brig *Pearl*, in 1779; and the ship *Dolores*, in 1790. They all agree in giving the mean latitude 58° S.

the spot indicated as the situation of the most southern of the group. Not perceiving any sign of land, we continued to the westward in the parallel of fifty-three degrees south, as far as the meridian of fifty degrees west. We then stood to the north as far as the parallel of fifty-two degrees south, when we turned to the eastward, and kept our parallel by double altitudes, morning and evening, and meridian altitudes of the planets and moon. Having thus gone eastwardly to the meridian of the western coast of Georgia, we kept that meridian until we were in the latitudo from which we set out. We then took diagonal courses throughout the entire extent of sea circumscribed, keeping a look-out constantly at the masthead, and repeating our examination with the greatest care for a period of three weeks, during which the weather was remarkably pleasant and fair, with no haze whatsoever. Of course we were thoroughly satisfied that, whatever islands might have existed in this vicinity at any former period, no vestige of them remained at the present day. Since my return home I find that the same ground was traced over, with equal care, in 1822, by Captain Johnson of the American schooner *Henry*, and by Captain Morrell in the American schooner *Wasp*—in both cases with the same result as in our own.

CHAPTER XVI.

It had been Captain Guy's original intention, after satisfying himself about the Auroras, to proceed through the Strait of Magellan, and up along the western coast of Patagonia; but information received at Tristan d'Acunha induced him to steer to the southward, in the hope of falling in with some small islands said to lie about the parallel of 60° S., longitude 41° 20' W. In the event of his not discovering these 'lands, he designed, should the season prove favourable, to push on towards

the Pole. Accordingly, on the twelfth of December, we made sail in that direction. On the eighteenth we found ourselves about the station indicated by Glass, and cruised for three days in that neighbourhood without finding any traces of the islands he had mentioned. On the twenty-first, the weather being unusually pleasant, we again made sail to the southward, with the resolution of penetrating in that course as far as possible. Before entering upon this portion of my narrative, it may be as well, for the information of those readers who have paid little attention to the progress of discovery in these regions, to give some brief account of the very few attempts at reaching the Southern Pole which have hitherto been made.

That of Captain Cook was the first of which we have any distinct account. In 1772 he sailed to the south in the *Resolution*, accompanied by Lieutenant Furneaux in the *Adventure*. In December he found himself as far as the fifty-eighth parallel of south latitude, and in longitude $26^{\circ} 57' E$. Here he met with narrow fields of ice, about eight or ten inches thick, and running north-west and south-east. This ice was in large cakes, and usually it was packed so closely that the vessels had great difficulty in forcing a passage. At this period Captain Cook supposed, from the vast number of birds to be seen, and from other indications, that he was in the near vicinity of land. He kept on to the southward, the weather being exceedingly cold, until he reached the sixty-fourth parallel, in longitude $38^{\circ} 14' E$. Here he had mild weather, with gentle breezes, for five days, the thermometer being at thirty-six. In January 1773 the vessels crossed the Antarctic circle, but did not succeed in penetrating much farther; for, upon reaching latitude $67^{\circ} 15'$, they found all farther progress impeded by an immense body of ice, extending all along the southern horizon as far as the eye could reach. This ice was of every variety, and some large floes of it, miles in extent, formed a compact mass, rising eighteen or twenty feet above the water. It being late in the season, and no hope entertained of rounding these obstructions, Captain Cook now reluctantly turned to the northward.

In the November following he renewed his search in the

Antarctic. In latitude $59^{\circ} 40'$ he met with a strong current setting to the southward. In December, when the vessels were in latitude $67^{\circ} 31'$, longitude $142^{\circ} 54' W.$, the cold was excessive, with heavy gales and fog. Here also birds were abundant; the albatross, the penguin, and the petrel especially. In latitude $70^{\circ} 23'$ some large islands of ice were encountered, and shortly afterwards the clouds to the southward were observed to be of a snowy whiteness, indicating the vicinity of field-ice. In latitude $71^{\circ} 10'$, longitude $106^{\circ} 54' W.$, the navigators were stopped, as before, by an immense frozen expanse, which filled the whole area of the southern horizon. The northern edge of this expanse was ragged and broken, so firmly wedged together as to be utterly impassable, and extending about a mile to the southward. Behind it the frozen surface was comparatively smooth for some distance, until terminated in the extreme background by gigantic ranges of ice mountains, the one towering above the other. Captain Cook concluded that this vast field reached the southern pole or was joined to a continent. Mr. J. N. Reynolds, whose great exertions and perseverance have at length succeeded in getting set on foot a national expedition, partly for the purpose of exploring these regions, thus speaks of the attempt of the *Resolution*:—“We are not surprised that Captain Cook was unable to go beyond $71^{\circ} 10'$, but we are astonished that he did attain that point on the meridian of $106^{\circ} 54'$ west longitude. Palmer’s Land lies south of the Shetland, latitude 64° , and tends to the southward and westward farther than any navigator has yet penetrated. Cook was standing for this land when his progress was arrested by the ice; which, we apprehend, must always be the case in that point, and so early in the season as the sixth of January—and we should not be surprised if a portion of the icy mountains described was attached to the main body of Palmer’s Land, or to some other portions of land lying farther to the southward and westward.”

In 1803 Captains Kreutzenstern and Lisiausky were despatched by Alexander of Russia for the purpose of circumnavigating the globe. In endeavouring to get south, they made

no farther than $59^{\circ} 58'$, in longitude $70^{\circ} 15' W.$ They here met with strong currents setting eastwardly. Whales were abundant, but they saw no ice. In regard to this voyage, Mr. Reynolds observes that if Kreuzenstern had arrived where he did earlier in the season he must have encountered ice; it was March when he reached the latitude specified. The winds prevailing, as they do, from the southward and westward, had carried the floes, aided by currents, into that icy region bounded on the north by Georgia, east by Sandwich Land and the South Orkneys, and west by the South Shetland Islands.

In 1822 Captain James Weddell, of the British navy, with two very small vessels, penetrated farther to the south than any previous navigator, and this, too, without encountering extraordinary difficulties. He states that although he was frequently hemmed in by ice *before* reaching the seventy second parallel, yet, upon attaining it, not a particle was to be discovered, and that upon arriving at the latitude of $74^{\circ} 15'$, no fields, and only three islands, of ice were visible. It is somewhat remarkable that, although vast flocks of birds were seen, and other usual indications of land, and although, south of the Shetlands, unknown coasts were observed from the masthead tending southwardly, Weddell discourages the idea of land existing in the polar regions of the south.

On the eleventh of January 1823 Captain Benjamin Morrell, of the American schooner *Wasp*, sailed from Kerguelen's Land with a view of penetrating as far south as possible. On the first of February he found himself in latitude $64^{\circ} 52' S.$, longitude $118^{\circ} 27' E.$ The following passage is extracted from his journal of that date:—"The wind soon freshened to an eleventh knot breeze, and we embraced this opportunity of making to the west; being, however, convinced that the farther we went south beyond latitude sixty-four degrees, the less ice was to be apprehended, we steered a little to the southward, until we crossed the Antarctic circle, and were in latitude $69^{\circ} 15' E.$ In this latitude there was *no field-ice*, and very few ice islands in sight."

Under the date of March fourteenth I find also this entry:

—“The sea was now entirely free of field-ice, and there were not more than a dozen ice islands in sight. At the same time the temperature of the air and water was at least thirteen degrees higher (more mild) than we had ever found it between the parallels of sixty and sixty-two south. We were now in latitude $70^{\circ} 14' S.$, and the temperature of the air was forty-seven, and that of the water forty-four. In this situation I found the variation to be $14^{\circ} 27'$ easterly per azimuth. . . . I have several times passed within the Antarctic circle, on different meridians, and have uniformly found the temperature, both of the air and the water, to become more and more mild the farther I advanced beyond the sixty-fifth degree of south latitude, and that the variation decreases in the same proportion. While north of this latitude, say between sixty and sixty-five south, we frequently had great difficulty in finding a passage for the vessel between the immense and almost innumerable ice islands, some of which were from one to two miles in circumference, and more than five hundred feet above the surface of the water.”

Being nearly destitute of fuel and water, and without proper instruments, it being also late in the season, Captain Morrell was now obliged to put back, without attempting any farther progress to the westward, although an entirely open sea lay before him. He expresses the opinion that, had not these overruling considerations obliged him to retreat, he could have penetrated, if not to the pole itself, at least to the eighty-fifth parallel. I have given his ideas respecting these matters somewhat at length, that the reader may have an opportunity of seeing how far they were borne out by my own subsequent experience.

In 1831 Captain Briscoe, in the employ of the Messieurs Enderby, whale-ship owners of London, sailed in the brig *Lively* for the South Seas, accompanied by the cutter *Tula*. On the twenty-eighth of February, being in latitude $66^{\circ} 30' S.$, longitudo $47^{\circ} 13' E.$, he descried land, and “clearly discovered through the snow the black peaks of a range of mountains running E.S.E.” He remained in this neighbourhood during

the whole of the following month, but was unable to approach the coast nearer than within ten leagues, owing to the boisterous state of the weather. Finding it impossible to make farther discovery during this season, he returned northward to winter in Van Diemen's Land.

In the beginning of 1832 he again proceeded southwardly, and on the fourth of February land was seen to the south-east in latitude $67^{\circ} 15'$, longitude $69^{\circ} 29' W.$ This was soon found to be an island near the headland of the country he had first discovered. On the twenty-first of the month he succeeded in landing on the latter, and took possession of it in the name of William IV., calling it Adelaide's Island, in honour of the English queen. These particulars being made known to the Royal Geographical Society of London, the conclusion was drawn by that body "that there is a continuous tract of land extending from $47^{\circ} 30' E.$ to $69^{\circ} 29' W.$ longitude, running the parallel of from sixty-six to sixty-seven degrees south latitude." In respect to this conclusion, Mr. Reynolds observes, "In the correctness of it we by no means concur; nor do the discoveries of Briscoe warrant any such inference. It was within these limits that Weddell proceeded south on a meridian to the east of Georgia, Sandwich Land, and the South Orkney and Shetland Islands." My own experience will be found to testify most directly to the falsity of the conclusion arrived at by the Society.

These are the principal attempts which have been made at penetrating to a high southern latitude, and it will now be seen that there remained, previous to the voyage of the *Jane*, nearly three hundred degrees of longitude in which the Antarctic circle had not been crossed at all. Of course a wide field lay before us for discovery, and it was with feelings of most intense interest that I heard Captain Guy express his resolution of pushing boldly to the southward.

CHAPTER XVII.

We kept our course southwardly for four days after giving up the search for Glass's Islands, without meeting with any ice at all. On the twenty-sixth, at noon, we were in latitude $63^{\circ} 23' S.$, longitude $41^{\circ} 25' W.$ We now saw several large ice islands, and a floe of field ice, not, however, of any great extent. The winds generally blew from the south east or the north east, but were very light. Whenever we had a westerly wind, which was seldom, it was invariably attended with a rain squall. Every day we had more or less snow. The thermometer, on the twenty-seventh, stood at thirty five.

January 1, 1828. This day we found ourelves completely hemmed in by the ice, and our prospects looked cheerless indeed. A strong gale blew during the whole forenoon from the north-east, and drove large cakes of the drift against the rudder and counter with such violence that we all trembled for the consequences. Towards evening, the gale still blowing with fury, a large field in front separated, and we were enabled, by carrying a press of sail, to force a passage through the smaller flakes into some open water beyond. As we approached this space we took in sail by degrees, and having at length got clear, lay to under a single reefed foresail.

January 2. We had now tolerably p'earant weather. At noon we found ourselves in latitude $69^{\circ} 10' S.$, longitude $42^{\circ} 20' W.$, having crossed the Antarctic circle. Very little ice was to be seen to the southward, although large fields of it lay behind us. This day we rigged some sounding-gear, using a large iron pot capable of holding twenty gallons, and a line of two hundred fathoms. We found the current setting to the north, about a quarter of a mile per hour. The temperature of the air was now about thirty-three. Here we found the variation to be $14^{\circ} 28'$ easterly per azimuth.

January 5. We had still held on to the southward without

any very great impediments. On this morning, however, being in latitude $73^{\circ} 15' E.$, longitude $42^{\circ} 10' W.$, we were again brought to a stand by an immense expanse of firm ice. We saw, nevertheless, much open water to the southward, and felt no doubt of being able to reach it eventually. Standing to the eastward along the edge of the floe, we at length came to a passage of about a mile in width, through which we warped our way by sundown. The sea in which we now were was thickly covered with ice islands, but had no field ice, and we pushed on boldly as before. The cold did not seem to increase, although we had snow very frequently, and now and then hail squalls of great violence. Immense flocks of the albatross flew over the schooner this day, going from southeast to north west.

January 7. The sea still remained pretty well open, so that we had no difficulty in holding on our course. To the westward we saw some icebergs of incredible size, and in the afternoon passed very near one whose summit could not have been less than four hundred fathoms from the surface of the ocean. Its girth was probably, at the base, three-quarters of a league, and several streams of water were running from crevices in its sides. We remained in sight of this island two days, and then only lost it in a fog.

January 10. Early this morning we had the misfortune to lose a man overboard. He was an American, named Peter Vredenburgh, a native of New York, and was one of the most valuable hands on board the schooner. In going over the bows his foot slipped, and he fell between two cakes of ice, never rising again. At noon of this day we were in latitude $78^{\circ} 30'$, longitude $40^{\circ} 15' W.$ The cold was now excessive, and we had hail squalls continually from the northward and eastward. In this direction also we saw several more immense icebergs, and the whole horizon to the eastward appeared to be blocked up with field-ice, rising in tiers, one mass above the other. Some driftwood floated by during the evening, and a great quantity of birds flew over, among which were noddies, petrels, albatrosses, and a large bird of a brilliant blue plumage. The

variation here per azimuth was less than it had been previously to our passing the Antarctic circle.

January 12. Our passage to the south again looked doubtful, as nothing was to be seen in the direction of the pole but one apparently limitless floe, backed by absolute mountains of ragged ice, one precipice of which arose frowningly above the other. We stood to the westward until the fourteenth, in the hope of finding an entrance.

January 14. This morning we reached the western extremity of the field which had impeded us, and, weathering it, came to an open sea, without a particle of ice. Upon sounding with two hundred fathoms, we here found a current setting southwardly at the rate of half a mile per hour. The temperature of the air was forty-seven, that of the water thirty-four. We now sailed to the southward without meeting any interruption of moment until the sixteenth, when, at noon, we were in latitude $81^{\circ} 21'$, longitude 42° W. We here again sounded, and found a current setting still southwardly, and at the rate of three-quarters of a mile per hour. The variation per azimuth had diminished, and the temperature of the air was mild and pleasant, the thermometer being as high as fifty-one. At this period not a particle of ice was to be discovered. All hands on board now felt certain of attaining the pole.

January 17. This day was full of incident. Innumerable flights of birds flew over us from the southward, and several were shot from the deck: one of them, a species of pelican, proved to be excellent eating. About midday a small floe of ice was seen from the masthead off the larboard bow, and upon it there appeared to be some large animal. As the weather was good and nearly calm, Captain Guy ordered out two of the boats to see what it was. Dirk Peters and myself accompanied the mate in the larger boat. Upon coming up with the floe, we perceived that it was in the possession of a gigantic creature of the race of the Arctic bear, but far exceeding in size the largest of these animals. Being well armed, we made no scruple of attacking it at once. Several shots were fired in quick succession, the most of which took

effect apparently in the head and body. Nothing disengaged, however, the monster threw himself from the ice, and swam, with open jaws, to the boat in which were Peters and myself. Owing to the confusion which ensued among us at this unexpected turn of the adventure, no person was ready immediately with a second shot, and the bear had actually succeeded in getting half his vast bulk across our gunwale, and seizing one of the men by the small of his back, before any efficient means were taken to repel him. In this extremity nothing but the promptness and agility of Peters saved us from destruction. Leaping upon the back of the huge beast, he plunged the blade of a knife behind the neck, reaching the spinal marrow at a blow. The brute tumbled into the sea lifeless, and without a struggle, rolling over Peters as he fell. The latter soon recovered himself, and a rope being thrown him, he secured the carcase before entering the boat. We then returned in triumph to the schooner, towing our trophy behind us. This bear, upon admeasurement, proved to be full fifteen feet in his greatest length. His wool was perfectly white, and very coarse, curling tightly. The eyes were of a blood red, and larger than those of the Arctic bear—the snout also more rounded, rather resembling the snout of the bull-dog. The meat was tender, but excessively rank and fishy, although the men devoured it with avidity, and declared it excellent eating.

Scarcely had we got our prize alongside, when the man at the masthead gave the joyful shout of "*land on the starboard bow!*" All hands were now upon the alert, and, a breeze springing up very opportunely from the northward and eastward, we were soon close in with the coast. It proved to be a low rocky islet, of about a league in circumference, and altogether destitute of vegetation, if we except a species of prickly pear. In approaching it from the northward, a singular ledge of rock is seen projecting into the sea, and bearing a strong resemblance to corded bales of cotton. Around this ledge to the westward is a small bay, at the bottom of which our boats effected a convenient landing.

It did not take us long to explore every portion of the island, but, with one exception, we found nothing worthy of our observation. In the southern extremity, we picked up near the shore, half buried in a pile of loose stones, a piece of wood, which seemed to have formed the prow of a canoe. There had been evidently some attempt at carving upon it, and Captain Guy fancied that he made out the figure of a tortoise, but the resemblance did not strike me very forcibly. Besides this prow, if such it were, we found no other token that any living creature had ever been here before. Around the coast we discovered occasional small floes of ice—but these were very few. The exact situation of this islet (to which Captain Guy gave the name of Bennet's Islet, in honour of his partner in the ownership of the schooner) is 82° 50' S. latitude, 42° 20' W. longitude.

We had now advanced to the southward more than eight degrees farther than any previous navigator, and the sea still lay perfectly open before us. We found, too, that the variation uniformly decreased as we proceeded, and, what was still more surprising, that the temperature of the air, and latterly of the water, became milder. The weather might even be called pleasant, and we had a steady but very gentle breeze always from some northern point of the compass. The sky was usually clear, with now and then a slight appearance of thin vapour in the southern horizon—this, however, was invariably of brief duration. Two difficulties alone presented themselves to our view; we were getting short of fuel, and symptoms of scurvy had occurred among several of the crew. These considerations began to impress upon Captain Guy the necessity of returning, and he spoke of it frequently. For my own part, confident as I was of soon arriving at land of some description upon the course we were pursuing, and having every reason to believe, from present appearances, that we should not find it the sterile soil met with in the higher Arctic latitudes, I warmly pressed upon him the expediency of persevering, at least for a few days longer, in the direction we were now holding. So tempting an opportunity of solving the great

problem in regard to an Antarctic continent had never yet been afforded to man, and I confess that I felt myself bursting with indignation at the timid and ill-timed suggestions of our commander. I believe, indeed, that what I could not refrain from saying to him on this head had the effect of inducing him to push on. While, therefore, I cannot but lament the most unfortunate and bloody events which immediately arose from my advice, I must still be allowed to feel some degree of gratification at having been instrumental, however remotely, in opening to the eye of science one of the most intensely exciting secrets which has ever engrossed its attention.

CHAPTER XVIII.

JANUARY 18. This morning * we continued to the southward, with the same pleasant weather as before. The sea was entirely smooth, the air tolerably warm and from the north-east, the temperature of the water fifty-three. We now again got our sounding-gear in order, and, with a hundred and fifty fathoms of line, found the current setting towards the pole at the rate of a mile an hour. This constant tendency to the southward, both in the wind and current, caused some degree of speculation, and even of alarm, in different quarters of the schooner, and I saw distinctly that no little impression had

* The terms *morning* and *evening*, which I have made use of to avoid confusion in my narrative, as far as possible, must not, of course, be taken in their ordinary sense. For a long time past we had no night at all, the daylight being continual. The dates throughout are according to nautical time, and the bearings must be understood as per compass. I would also remark, in this place, that I cannot, in the first portion of what is here written, pretend to strict accuracy in respect to dates, or latitudes and longitudes, having kept no regular journal until after the period of which this first portion treats. In many instances I have relied altogether upon memory.

been made upon the mind of Captain Guy. He was exceedingly sensitive to ridicule, however, and I finally succeeded in laughing him out of his apprehensions. The variation was now very trivial. In the course of the day we saw several large whales of the right species, and innumerable flights of the albatross passed over the vessel. We also picked up a bush, full of red berries, like those of the hawthorn, and the carcase of a singular-looking land animal. It was three feet in length, and but six inches in height, with four very short legs, the feet armed with long claws of a brilliant scarlet, and resembling coral in substance. The body was covered with a straight silky hair, perfectly white. The tail was peaked like that of a rat, and about a foot and a half long. The head resembled a cat's, with the exception of the ears—these were flapped like the ears of a dog. The teeth were of the same brilliant scarlet as the claws.

January 19. To-day, being in latitude $83^{\circ} 20'$, longitude $43^{\circ} 5'$ W. (the sea being of an extraordinarily dark colour), we again saw land from the masthead, and, upon a closer scrutiny, found it to be one of a group of very large islands. The shore was precipitous, and the interior seemed to be well wooded, a circumstance which occasioned us great joy. In about four hours from our first discovering the land, we came to anchor in ten fathoms, sandy bottom, a league from the coast, as a high surf, with strong ripples here and there, rendered a nearer approach of doubtful expediency. The two largest boats were now ordered out, and a party, well armed (among whom were Peters and myself), proceeded to look for an opening in the reef which appeared to encircle the island. After searching about for some time, we discovered an inlet, which we were entering, when we saw four large canoes put off from the shore, filled with men who seemed to be well armed. We waited for them to come up, and, as they moved with great rapidity, they were soon within hail. Captain Guy now held up a white handkerchief on the blade of an oar, when the strangers made a full stop, and commenced a loud jabbering all at once, intermingled with occasional shouts, in

which we could distinguish the words *Anamoo-moo!* and *Lama-Lama!* They continued this for at least half an hour, during which we had a good opportunity of observing their appearance.

In the four canoes, which might have been fifty feet long and five broad, there were a hundred and ten savages in all. They were about the ordinary stature of Europeans, but of a more muscular and brawny frame. Their complexion a jet black, with thick and long woolly hair. They were clothed in skins of an unknown black animal, shaggy and silky, and made to fit the body with some degree of skill, the hair being inside, except where turned out about the neck, wrists, and ankles. Their arms consisted principally of clubs, of a dark and apparently very heavy wood. Some spears, however, were observed among them, headed with flint, and a few slings. The bottoms of the canoes were full of black stones about the size of a large egg.

When they had concluded their harangue (for it was clear they intended their jabbering for such), one of them who seemed to be the chief stood up in the prow of his canoe, and made signs for us to bring our boats alongside of him. This hint we pretended not to understand, thinking it the wiser plan to maintain, if possible, the interval between us, as their number more than quadrupled our own. Finding this to be the case, the chief ordered the three other canoes to hold back, while he advanced towards us with his own. As soon as he came up with us he leaped on board the largest of our boats, and seated himself by the side of Captain Guy, pointing at the same time to the schooner, and repeating the words *Anamoo-moo!* and *Lama-Lama!* We now put back to the vessel, the four canoes following at a little distance.

Upon getting alongside, the chief evinced symptoms of extreme surprise and delight, clapping his hands, slapping his thighs and breast, and laughing obstreperously. His followers behind joined in his merriment, and for some minutes the din was so excessive as to be absolutely deafening. Quiet being at length restored, Captain Guy ordered the boats to be hoisted up as a necessary precaution, and gave the chief

(whose name we soon found to be *Too-wit*) to understand that we could admit no more than twenty of his men on deck at one time. With this arrangement he appeared perfectly satisfied, and gave some directions to the canoes, when one of them approached, the rest remaining about fifty yards off. Twenty of the savages now got on board, and proceeded to ramble over every part of the deck, and scramble about among the rigging, making themselves much at home, and examining every article with great inquisitiveness.

It was quite evident that they had never before seen any of the white race, from whose complexion indeed they appeared to recoil. They believed the *Jane* to be a living creature, and seemed to be afraid of hurting it with the points of their spears, carefully turning them up. Our crew were much amused with the conduct of Too-wit in one instance. The cook was splitting some wood near the galley, and by accident struck his axe into the deck, making a gash of considerable depth. The chief immediately ran up, and pushing the cook on one side rather roughly, commenced a half-whine, half-howl, strongly indicative of sympathy in what he considered the sufferings of the schooner, patting and smoothing the gash with his hand, and washing it from a bucket of sea-water which stood by. This was a degree of ignorance for which we were not prepared, and for my part I could not help thinking some of it affected.

When the visitors had satisfied, as well as they could, their curiosity in regard to our upper work, they were admitted below, when their amazement exceeded all bounds. Their astonishment now appeared far too deep for words, for they roamed about in silence, broken only by low ejaculations. The arms afforded them much food for speculation, and they were suffered to handle and examine them at leisure. I do not believe that they had the least suspicion of their actual use, but rather took them for idols, seeing the care we had of them, and the attention with which we watched their movements while handling them. At the great guns their wonder was redoubled. They approached them with every

mark of the profoundest reverence and awe, but forbore to examine them minutely. There were two large mirrors in the cabin, and here was the acme of their amazement. Too-wit was the first to approach them, and he had got in the middle of the cabin, with his face to one and his back to the other before he fairly perceived them. Upon raising his eyes and seeing his reflected self in the glass, I thought the savage would go mad, but upon turning short round to make a retreat, and beholding himself a second time in the opposite direction, I was afraid he would expire upon the spot. No persuasion could prevail upon him to take another look, but throwing himself upon the floor with his face buried in his hands, he remained thus until we were obliged to drag him upon deck.

The whole of the savages were admitted on board in this manner, twenty at a time, Too-wit being suffered to remain during the entire period. We saw no disposition to thievery among them, nor did we miss a single article after their departure. Throughout the whole of their visit they evinced the most friendly manner. There were, however, some points in their demeanour which we found it impossible to understand; for example, we could not get them to approach several very harmless objects, such as the schooner's sails, an egg, an open book, or a pan of flour. We endeavoured to ascertain if they had among them any articles which might be turned to account in the way of traffic, but found great difficulty in being comprehended. We made out, nevertheless, what greatly astonished us, that the islands abounded in the large tortoise of the Gallipagos, one of which we saw in the canoe of Too-wit. We saw also some *bucke de mer* in the hands of one of the savages, who was greedily devouring it in its natural state. These anomalies, for they were such when considered in regard to the latitude, induced Captain Guy to wish for a thorough investigation of the country, in the hope of making a profitable speculation in his discovery. For my own part, anxious as I was to know something more of these islands, I was still more earnestly bent on prosecuting the

voyage to the southward without delay. We had now fine weather, but there was no telling how long it would last, and being already in the eighty-fourth parallel, with an open sea before us, a current setting strongly to the southward, and the wind fair, I could not listen with any patience to a proposition of stopping longer than was absolutely necessary for the health of the crew and the taking on board a proper supply of fuel and fresh provisions. I represented to the captain that we might easily make this group on our return, and winter here in the event of being blocked up by the ice. He at length came into my views (for in some way hardly known to myself I had acquired much influence over him), and it was finally resolved that, even in the event of our finding *biche de mer*, we should only stay here a week to recruit, and then push on to the southward while we might. Accordingly we made every necessary preparation, and under the guidance of Too-wit got the *Jane* through the reef in safety, coming to anchor about a mile from the shore in an excellent bay, completely land-locked, on the south-eastern coast of the main island, and in ten fathoms of water, black sandy bottom. At the head of this bay there were three fine springs (we were told) of good water, and we saw abundance of wood in the vicinity. The four canoes followed us in, keeping, however, at a respectful distance. Too-wit himself remained on board, and upon our dropping anchor, invited us to accompany him on shore, and visit his village in the interior. To this Captain Guy consented, and ten savages being left on board as hostages, a party of us, twelve in all, got in readiness to attend the chief. We took care to be well armed, yet without evincing any distrust. The schooner had her guns run out, her boarding-nettings up, and every other proper precaution was taken to guard against surprise. Directions were left with the chief mate to admit no person on board during our absence, and in the event of our not appearing in twelve hours, to send the cutter with a swivel round the island in search of us.

At every step we took inland the conviction forced itself upon us that we were in a country differing essentially from

any hitherto visited by civilised men. We saw nothing with which we had been formerly conversant. The trees resembled no growth of either the torrid, the temperate, or the northern frigid zones, and were altogether unlike those of the lower southern latitudes we had already traversed. The very rocks were novel in their mass, their colour, and their stratification ; and the streams themselves, utterly incredible as it may appear, had so little in common with those of other climates, that we were scrupulous of tasting them, and indeed had difficulty in bringing ourselves to believe that their qualities were purely those of nature. At a small brook which crossed our path (the first we had reached) Too-wit and his attendants halted to drink. On account of the singular character of the water, we refused to taste it, supposing it to be polluted ; and it was not until some time afterwards we came to understand that such was the appearance of the streams throughout the whole group. I am at a loss to give a distinct idea of the nature of this liquid, and cannot do so without many words. Although it flowed with rapidity in all declivities where common water would do so, yet never, except when falling in a cascade, had it the customary appearance of *limpidity*. It was, nevertheless, in point of fact, as perfectly limpid as any limestone water in existence, the difference being only in appearance. At first sight, and especially in cases where little declivity was found, it bore resemblance, as regards consistency, to a thick infusion of gum-arabic in common water. But this was only the least remarkable of its extraordinary qualities. It was *not* colourless, nor was it of any one uniform colour—presenting to the eye as it flowed every possible shade of purple, like the hues of a changeable silk. This variation in shade was produced in a manner which excited as profound astonishment in the minds of our party as the mirror had done in the case of Too-wit. Upon collecting a basinful, and allowing it to settle thoroughly, we perceived that the whole mass of liquid was made up of a number of distinct veins, each of a distinct hue ; that these veins did not commingle ; and that their cohesion was perfect in regard to their own particles among themselves, and imper-

fact in regard to neighbouring veins. Upon passing the blade of a knife athwart the veins, the water closed over it immediately as with us, and also, in withdrawing it, all traces of the passage of the knife were instantly obliterated. If, however, the blade was passed down accurately between the two veins, a perfect separation was effected, which the power of cohesion did not immediately rectify. The phenomena of this water formed the first definite link in that vast chain of apparent miracles with which I was destined to be at length encircled.

CHAPTER XIX.

We were nearly three hours in reaching the village, it being more than nine miles in the interior, and the path lying through a rugged country. As we passed along, the party of Too-wit (the whole hundred and ten savages of the canoes) was momentarily strengthened by smaller detachments, of from two to six or seven, which joined us, as if by accident, at different turns in the road. There appeared so much of system in this that I could not help feeling distrust, and I spoke to Captain Guy of my apprehensions. It was now too late, however, to recede, and we concluded that our best security lay in evincing a perfect confidence in the good faith of Too-wit. We accordingly went on, keeping a wary eye upon the manœuvres of the savages, and not permitting them to divide our numbers by pushing in between. In this way, passing through a precipitous ravine, we at length reached what we were told was the only collection of habitations upon the island. As we came in sight of them, the chief set up a shout, and frequently repeated the word *Kleck-Klock*; which we supposed to be the name of the village, or perhaps the generic name for villages.

The dwellings were of the most miserable description imaginable, and, unlike those of even the lowest of the savage

races with which mankind are acquainted, were of no uniform plan. Some of them (and these we found belonged to the *Wampos* or *Tampos*, the great men of the land) consisted of a tree cut down at about four feet from the root, with a large black skin thrown over it, and hanging in loose folds upon the ground. Under this the savage nestled. Others were formed by means of rough limbs of trees, with the withered foliage upon them, made to recline at an angle of forty-five degrees against a bank of clay, heaped up, without regular form to the height of five or six feet. Others, again, were mere holes dug in the earth perpendicularly, and covered over with similar branches, these being removed when the tenant was about to enter, and pulled on again when he had entered. A few were built among the forked limbs of trees as they stood, the upper limbs being partially cut through, so as to bend over upon the lower, thus forming thicker shelter from the weather. The greater number, however, consisted of small shallow caverns, apparently scratched in the face of a precipitous ledge of dark stone resembling fuller's earth, with which three sides of the village were bounded. At the door of each of these primitive caverns was a small rock, which the tenant carefully placed before the entrance upon leaving his residence, for what purpose I could not ascertain, as the stone itself was never of sufficient size to close up more than a third of the opening.

This village, if it were worthy of the name, lay in a valley of some depth, and could only be approached from the southward, the precipitous ledge of which I have already spoken cutting off all access in other directions. Through the middle of the valley ran a brawling stream of the same magical-looking water which has been described. We saw several strange animals about the dwellings, all appearing to be thoroughly domesticated. The largest of these creatures resembled our common hog in the structure of the body and snout; the tail, however, was bushy, and the legs slender as those of the antelope. Its motion was exceedingly awkward and indecisive, and we never saw it attempt to run. We noticed also several animals very similar in appearance, but of greater length of

body, and covered with a black wool. There were a great variety of tame fowls running about, and these seemed to constitute the chief food of the natives. To our astonishment we saw black albatross among these birds in a state of entire domestication, going to sea periodically for food, but always returning to the village as a home, and using the southern shore in the vicinity as a place of incubation. There they were joined by their friends the pelicans as usual, but these latter never followed them to the dwellings of the savages. Among the other kinds of tame fowls were ducks, differing very little from the canvas-back of our own country, black gannets, and a large bird not unlike the buzzard in appearance, but not carnivorous. Of fish there seemed to be a great abundance. We saw during our visit a quantity of dried salmon, rock-cod, blue dolphins, mackerel, blackfish, skate, conger-eels, elephant-fish, mullets, soles, parrot-fish, leather jackets, gurnards, hake, flounders, paracntas, and innumerable other varieties. We noticed, too, that most of them were similar to the fish about the group of the Lord Auckland Islands, in a latitude as low as fifty-one degrees south. The *Gallipago* tortoise was also very plentiful. We saw but few wild animals, and none of a large size, or of a species with which we were familiar. One or two serpents of a formidable aspect crossed our path, but the natives paid them little attention, and we concluded that they were not venomous.

As we approached the village with Too-wit and his party, a vast crowd of the people rushed out to meet us, with loud shouts, among which we could only distinguish the everlasting *Anamoo-mon!* and *Lama-Lama!* We were much surprised at perceiving that, with one or two exceptions, these new-comers were entirely naked, the skins being used only by the men of the canoes. All the weapons of the country seemed also to be in the possession of the latter, for there was no appearance of any among the villagers. There were a great many women and children, the former not altogether wanting in what might be termed personal beauty. They were straight, tall, and well formed, with a grace and freedom of carriage not to be

found in civilised society. Their lips, however, like those of the men, were thick and clumsy, so that, even when laughing, the teeth were never disclosed. Their hair was of a finer texture than that of the males. Among these naked villagers there might have been ten or twelve who were clothed, like the party of Too-wit, in dresses of black skin, and armed with lances and heavy clubs. These appeared to have great influence among the rest, and were always addressed by the title *Wampoo*. These, too, were the tenants of the black skin palaces. That of Too-wit was situated in the centre of the village, and was much larger and somewhat better constructed than others of its kind. The tree which formed its support was cut off at a distance of twelve feet or thereabouts from the root, and there were several branchos left just below the cut, these serving to extend the covering, and in this way prevent its flapping about the trunk. The covering, too, which consisted of four very large skins fastened together with wooden skewers, was secured at the bottom with pegs driven through it and into the ground. The floor was strewed with a quantity of dry leaves by way of carpet.

To this hut we were conducted with great solemnity, and as many of the natives crowded in after us as possible. Too-wit seated himself on the leaves, and made signs that we should follow his example. This we did, and presently found ourselves in a situation peculiarly uncomfortable, if indeed not critical. We were on the ground, twelve in number, with the savages, as many as forty, sitting on their hams so closely around us that, if any disturbance had arisen, we should have found it impossible to make use of our arms, or indeed to have risen on our feet. The pressure was not only inside the tent, but outside, where probably was every individual on the whole island, the crowd being prevented from trampling us to death only by the incessant exertions and vociferations of Too-wit. Our chief security lay, however, in the presence of Too-wit himself among us, and we resolved to stick by him closely, as the best chance of extricating ourselves from the

dilemma, sacrificing him immediately upon the first appearance of hostile design.

After some trouble a certain degree of quiet was restored, when the chief addressed us in a speech of great length, and very nearly resembling the one delivered in the canoes, with the exception that the *Anamoo-moos!* were now somewhat more strenuously insisted upon than the *Lamu-Lamus!* We listened in profound silence until the conclusion of his harangue, when Captain Guy replied by assuring the chief of his eternal friendship and good-will, concluding what he had to say by a present of several strings of blue beads and a knife. At the former the monarch, much to our surprise, turned up his nose with some expression of contempt; but the knife gave him the most unlimited satisfaction, and he immediately ordered dinner. This was handed into the tent over the heads of the attendants, and consisted of the palpitating entrails of a species of unknown animal, probably one of the slim-legged hogs which we had observed in our approach to the village. Seeing us at a loss how to proceed, he began, by way of setting us an example, to devour yard after yard of the enticing food, until we could possibly stand it no longer, and convinced such manifest symptoms of rebellion of stomach as inspired his majesty with a degree of astonishment only inferior to that brought about by the looking-glasses. We declined, however, partaking of the delicacies before us, and endeavoured to make him understand that we had no appetite whatever, having just finished a hearty *dîner*.

When the monarch had made an end of his meal, we commenced a series of cross-questioning in every ingenious manner we could devise, with a view of discovering what were the chief productions of the country, and whether any of them might be turned to profit. At length he seemed to have some idea of our meaning, and offered to accompany us to a part of the coast where he assured us the *biche de mer* (pointing to a specimen of that animal) was to be found in great abundance. We were glad at this early opportunity of escaping from the oppression of the crowd, and signified our eagerness to pro-

ceed. We now left the tent, and, accompanied by the whole population of the village, followed the chief to the south-easterly extremity of the island, not far from the bay where our vessel lay at anchor. We waited here for about an hour, until the four canoes were brought round by some of the savages to our station. The whole of our party then getting into one of them, we were paddled along the edge of the reef before mentioned, and of another still farther out, where we saw a far greater quantity of *biche de mer* than the oldest seamen among us had ever seen in those groups of the lower latitudes most celebrated for this article of commerce. We stayed near these reefs only long enough to satisfy ourselves that we could easily load a dozen vessels with the animal if necessary, when we were taken alongside the schooner, and parted with Too-wit, after obtaining from him a promise that he would bring us in the course of twenty-four hours as many of the canvas back ducks and Gallipago tortoises as his canoes would hold. In the whole of this adventure we saw nothing in the demeanour of the natives calculated to create suspicion, with the single exception of the systematic manner in which their party was strengthened during our route from the schooner to the village.

CHAPTER XX.

THE chief was as good as his word, and we were soon plentifully supplied with fresh provision. We found the tortoises as fine as we had ever seen, and the ducks surpassed our best species of wild-fowl, being exceedingly tender, juicy, and well flavoured. Besides these, the savages brought us, upon our making them comprehend our wishes, a vast quantity of brown celery and scurvy-grass, with a canoe-load of fresh fish and some dried. The celery was a treat indeed, and the scurvy-* proved of incalculable benefit in restoring those of our

men who had shown symptoms of disease. In a very short time we had not a single person on the sick-list. We had also plenty of other kinds of fresh provision, among which may be mentioned a species of shell fish resembling the mussel in shape, but with the taste of an oyster. Shrimps, too, and prawns were abundant, and albatross and other birds' eggs with dark shells. We took in, too, a plentiful stock of the flesh of the hog which I have mentioned before. Most of the men found it a palatable food, but I thought it fishy and otherwise disagreeable. In return for these good things we presented the natives with blue beads, brass trinkets, nails, knives, and pieces of red cloth, they being fully delighted in the exchange. We established a regular market on shore, just under the guns of the schooner, where our barterings were carried on with every appearance of good faith, and a degree of order which their conduct at the village of *Klock-Klock* had not led us to expect from the savages.

Matters went on thus very amicably for several days, during which parties of the natives were frequently on board the schooner, and parties of our men frequently on shore, making long excursions into the interior, and receiving no molestation whatever. Finding the ease with which the vessel might be loaded with *biche de mer*, owing to the friendly disposition of the islanders, and the readiness with which they would render us assistance in collecting it, Captain Guy resolved to enter into negotiation with Too-wit for the erection of suitable houses in which to cure the article, and for the services of himself and tribe in gathering as much as possible, while he himself took advantage of the fine weather to prosecute his voyage to the southward. Upon mentioning this project to the chief, he seemed very willing to enter into an agreement. A bargain was accordingly struck, perfectly satisfactory to both parties, by which it was arranged that, after making the necessary preparations, such as laying off the proper grounds, erecting a portion of the buildings, and doing some other work in which the whole of our crew would be required, the schooner should proceed on her route, leaving

three of her men on the island to superintend the fulfilment of the project, and instruct the natives in drying the *biche de mer*. In regard to terms, these were made to depend upon the exertions of the savages in our absence. They were to receive a stipulated quantity of blue beads, knives, red cloth, and so forth, for every certain number of piculs of the *biche de mer* which should be ready on our return.

A description of the nature of this important article of commerce, and the method of preparing it, may prove of some interest to my readers, and I can find no more suitable place than this for introducing an account of it. The following comprehensive notice of the substance is taken from a modern history of a voyage of the South Seas.

"It is that *mollusca* from the Indian Seas which is known in commerce by the French name *bouche de mer* (a nice morsel from the sea). It I am not much mistaken, the celebrated Cuvier calls it *gasteropoda pulmonaria*. It is abundantly gathered in the coasts of the Pacific Islands, and gathered especially for the Chinese market, where it commands a great price, perhaps as much as the much-talked-of edible birds' nests, which are probably made up of the gelatinous matter picked up by a species of swallow from the body of these *mollusca*. They have no shell, no legs, nor any prominent part, except an *absorbing* and an *secretory*, opposite organs; but by their elastic wings, like caterpillars or worms, they creep in shallow waters, in which, when low, they can be seen by a kind of swallow, the sharp bill of which, inserted in the soft animal, draws a gummy and filamentous substance, which, by drying, can be wrought into the solid walls of their nest. Hence the name of *gasteropoda pulmonifera*.

"This *mollusca* is oblong, and of different sizes, from three to eighteen inches in length; and I have seen a few that were not less than two feet long. They are nearly round, a little flattish on one side, which lies next the bottom of the sea; and they are from one to eight inches thick. They crawl up into shallow waters at particular seasons of the year, probably for the purpose of gendering, as we often find them in pairs.

It is when the sun has the most power on the water, rendering it tepid, that they approach the shore ; and they often go up into places so shallow that, on the tide's receding, they are left dry, exposed to the heat of the sun. But they do not bring forth their young in shallow water, as we never see any of their progeny, and the full-grown ones are always observed coming in from deep water. They feed principally on that class of zoophytes which produce the coral.

"The *biche de mer* is generally taken in three or four feet water ; after which they are brought on shore, and split at one end with a knife, the incision being one inch or more, according to the size of the mollusca. Through this opening the entrails are forced out by pressure, and they are much like those of any other small tenant of the deep. The article is then washed, and afterwards boiled to a certain degree, which must not be too much or too little. They are then buried in the ground for four hours, then boiled again for a short time, after which they are dried, either by the fire or the sun. Those cured by the sun are worth the most, but where one picul (133½ lbs.) can be cured that way, I can cure thirty piculs by the fire. When once properly cured, they can be kept in a dry place for two or three years without any risk ; but they should be examined once in every few months, say four times a year, to see if any dampness is likely to affect them.

"The Chinese, as before stated, consider *biche de mer* a very great luxury, believing that it wonderfully strengthens and nourishes the system, and renews the exhausted system of the immoderate voluptuary. The first quality commands a high price in Canton, being worth ninety dollars a picul ; the second quality, seventy-five dollars ; the third, fifty dollars ; the fourth, thirty dollars ; the fifth, twenty dollars ; the sixth, twelve dollars ; the seventh, eight dollars ; and the eighth, four dollars ; small cargoes, however, will often bring more in Manilla, Singapore, and Batavia."

An agreement having been thus entered into, we proceeded immediately to land everything necessary for preparing the buildings and clearing the ground. A large flat space near

the eastern shore of the bay was selected, where there was plenty both of wood and water, and within a convenient distance of the principal reefs on which the *biche de mer* was to be procured. We now all set to work in good earnest, and soon, to the great astonishment of the savages, had felled a sufficient number of trees for our purpose, getting them quickly in order for the framework of the houses, which in two or three days were so far under way that we could safely trust the rest of the work to the three men whom we intended to leave behind. These were John Carson, Alfred Harris, — Peterson (all natives of London, I believe), who volunteered their services in this respect.

By the last of the month we had everything in readiness for departure. We had agreed, however, to pay a formal visit of leave-taking to the village, and Too-wit insisted so pertinaciously upon our keeping the promise, that we did not think it advisable to run the risk of offending him by a final refusal. I believe that not one of us had at this time the slightest suspicion of the good faith of the savages. They had uniformly behaved with the greatest decorum, aiding us with alacrity in our work, offering us their commodities, frequently without price, and never, in any instance, pilfering a single article, although the high value they set upon the goods we had with us was evident by the extravagant demonstrations of joy always manifested upon our making them a present. The women especially were most obliging in every respect, and, upon the whole, we should have been the most suspicious of human beings had we entertained a single thought of perfidy on the part of the people who treated us so well. A very short while sufficed to prove that this apparent kindness of disposition was only the result of a deeply-laid plan for our destruction, and that the islanders, for whom we entertained such inordinate feelings of esteem, were among the most barbarous, subtle, and bloodthirsty wretches that ever contaminated the face of the globe.

It was on the first of February that we went on shore for the purpose of visiting the village. Although, as said before,

we entertained not the slightest suspicion, still no proper precaution was neglected. Six men were left in the schooner, with instructions to permit none of the savages to approach the vessel during our absence, under any pretence whatever, and to remain constantly on deck. The boarding-nottings were up, the guns double-shotted with grape and canister, and the swivels loaded with canisters of musket balls. She lay, with her anchor apeak, about a mile from the shore, and no canoo could approach her in any direction without being distinctly seen and exposed to the full fire of our swivels immediately.

The six men being left on board, our shore party consisted of thirty-two persons in all. We were armed to the teeth, having with us muskets, pistols, and cutlasses, besides each a long kind of seaman's knife, somewhat resembling the bowie-knife now so much used throughout our western and southern country. A hundred of the black skin warriors met us at the landing for the purpose of accompanying us on our way. We noticed, however, with some surprise, that they were now entirely without arms; and upon questioning Too-wit in relation to this circumstance, he merely answered that *Mullett non we pa pu si*—meaning that there was no need of arms where all were brothers. We took this in good part, and proceeded.

We had passed the spring and rivulet of which I before spoke, and were now entering upon a narrow gorge leading through the chain of soapstone hills among which the village was situated. This gorge was very rocky and uneven, so much so that it was with no little difficulty we scrambled through it on our first visit to Klock-Klock. The whole length of the ravine might have been a mile and a half, or probably two miles. It wound in every possible direction through the hills (having apparently formed, at some remote period, the bed of a torrent), in no instance proceeding more than twenty yards without an abrupt turn. The sides of this dell would have averaged, I am sure, seventy or eighty feet in perpendicular altitude throughout the

whole of their extent, and in some portions they arose to an astonishing height, overshadowing the pass so completely that but little of the light of day could penetrate. The general width was about forty feet, and occasionally it diminished so as not to allow the passage of more than five or six persons abreast. In short, there could be no place in the world better adapted for the consummation of an ambuscade, and it was no more than natural that we should look carefully to our arms as we entered upon it. When I now think of our egregious folly, the chief subject of astonishment seems to be that we should have ever ventured, under any circumstances, so completely into the power of unknown savages as to permit them to march both before and behind us in our progress through this ravine. Yet such was the order we blindly took up, trusting foolishly to the force of our party, the unarmed condition of Too-wit and his men, the certain efficacy of our firearms (whose effect was yet a secret to the natives), and more than all to the long-sustained pretension of friendship kept up by these infamous wretches. Five or six of them went on before, as if to lead the way, ostentatiously busying themselves in removing the larger stones and rubbish from the path. Next came our own party. We walked closely together, taking care only to prevent separation. Behind followed the main body of the savages, observing unusual order and decorum.

Dirk Peters, a man named Wilson Allen, and myself, were on the right of our companions, examining, as we went along, the singular stratification of the precipice which overhung us. A fissure in the soft rock attracted our attention. It was about wide enough for one person to enter without squeezing, and extended back into the hill some eighteen or twenty feet in a straight course, sloping afterwards to the left. The height of the opening, as far as we could see into it from the main gorge, was perhaps sixty or seventy feet. There were one or two stunted shrubs growing from the crevices, bearing a species of filbert, which I felt some curiosity to examine,

and pushed in briskly for that purpose, gathering five or six of the nuts at a grasp, and then hastily retreating. As I turned, I found that Peters and Allen had followed me. I desired them to go back, as there was not room for two persons to pass, saying they should have some of my nuts. They accordingly turned, and were scrambling back, Allen being close to the mouth of the fissure, when I was suddenly aware of a concussion resembling nothing I had ever before experienced, and which impressed me with a vague conception, if indeed I then thought of anything, that the whole foundations of the solid globe were suddenly rent asunder, and that the day of universal dissolution was at hand.

CHAPTER XXI.

As soon as I could collect my scattered senses, I found myself nearly suffocated, and grovelling in utter darkness among a quantity of loose earth, which was also falling upon me heavily in every direction, threatening to bury me entirely. Horribly alarmed at this idea, I struggled to gain my feet, and at length succeeded. I then remained motionless for some moments, endeavouring to conceive what had happened to me, and where I was. Presently I heard a deep groan just at my ear, and afterwards the smothered voice of Peters calling to me for aid in the name of God. I scrambled one or two paces forward, when I fell directly over the head and shoulders of my companion, who, I soon discovered, was buried in a loose mass of earth as far as his middle, and struggling desperately to free himself from the pressure. I tore the dirt from around him with all the energy I could command, and at length succeeded in getting him out.

"As soon as we sufficiently recovered from our fright and surprise to be capable of conversing rationally, we both came

to the conclusion that the walls of the fissure in which we had ventured had, by some convulsion of nature, or probably from their own weight, caved in overhead, and that we were consequently lost for ever, being thus entombed alive. For a long time we gave up supinely to the most intense agony and despair, such as cannot be adequately imagined by those who have never been in a similar situation. I firmly believed that no incident ever occurring in the course of human events is more adapted to inspire the supremeness of mental and bodily distress than a case like our own, of living inhumation. The blackness of darkness which envelopes the victim, the terrific oppression of lungs, the stifling fumes from the damp earth, unite with the ghastly considerations that we are beyond the remotest confines of hope, and that such is the allotted portion of *the dead*, to carry into the human heart a degree of appalling awe and horror not to be tolerated never to be conceived.

At length Peters proposed that we should endeavour to ascertain precisely the extent of our calamity, and grope about our prison; it being barely possible, he observed, that some opening might be yet left us for escape. I caught eagerly at this hope, and arousing myself to exertion, attempted to force my way through the loose earth. Hardly had I advanced a single step before a glimmer of light became perceptible, enough to convince me that, at all events, we should not immediately perish for want of air. We now took some degree of heart, and encouraged each other to hope for the best. Having scrambled over a bank of rubbish which impeded our farther progress in the direction of the light, we found less difficulty in advancing, and also experienced some relief from the excessive oppression of lungs which had tormented us. Presently we were enabled to obtain a glimpse of the objects around, and discovered that we were near the extremity of the straight portion of the fissure, where it made a turn to the left. A few struggles more, and we reached the bend, when, to our inexpressible joy, there appeared a long seam or crack extend-

ing upward a vast distance, generally at an angle^{*} of about forty-five degrees, although sometimes much more precipitous. We could not see through the whole extent of this opening; but as a good deal of light came down it, we had little doubt of finding at the top of it (if we could by any means reach the top) a clear passage into the open air.

I now called to mind that three of us had entered the fissure from the main gorge, and that our companion, Allen, was still missing; we determined at once to retrace our steps and look for him. After a long search, and much danger from the farther caving in of the earth above us, Peters at length cried out to me that he had hold of our companion's foot, and that his whole body was deeply buried beneath the rubbish, beyond a possibility of extricating him. I soon found that what he said was too true, and that, of course, life had been long extinct. With sorrowful hearts, therefore, we left the corpse to its fate, and again made our way to the bend.

The breadth of the seam was barely sufficient to admit us, and after one or two ineffectual efforts at getting up, we began once more to despair. I have before said that the chain of hills through which ran the main gorge was composed of a species of soft rock resembling soapstone. The sides of the cleft we were now attempting to ascend were of the same material, and so excessively slippery, being wet, that we could get but little foothold upon them, even in their least precipitous parts; in some places, where the ascent was nearly perpendicular, the difficulty was of course much aggravated; and indeed for some time we thought it insurmountable. We took courage, however, from despair; and what, by dint of cutting steps in the soft stone with our bowie-knives, and swinging, at the risk of our lives, to small projecting points of a harder species of slaty rock which now and then protruded from the general mass, we at length reached a natural platform, from which was perceptible a patch of blue sky, at the extremity of a thickly-wooded ravine. Looking back now, with somewhat more leisure, at the passage through which we had thus far proceeded, we clearly saw, from the

appearance of its sides, that it was of late formation, and we concluded that the concussion, whatever it was, which had so unexpectedly overwhelmed us, had also at the same moment laid open this path for escape. Being quite exhausted with exertion, and indeed so weak that we were scarcely able to stand or articulate, Peters now proposed that we should endeavour to bring our companions to the rescue by firing the pistols which still remained in our girdles—the muskets as well as cutlasses had been lost among the loose earth at the bottom of the chasm. Subsequent events proved that, had we fired, we should have sorely repented it; but luckily a half suspicion of foul play had by this time arisen in my mind, and we forbore to let the savages know of our whereabouts.

After having reposed for about an hour we pushed on slowly up the ravine, and had gone no great way before we heard a succession of tremendous yells. At length we reached what might be called the surface of the ground, for our path hitherto, since leaving the platform, had lain beneath an archway of high rock and foliage, at a vast distance overhead. With great caution we stole to a narrow opening through which we had a clear sight of the surrounding country, when the whole dreadful secret of the concussion broke upon us in one moment and at one view.

The spot from which we looked was not far from the summit of the highest peak in the range of the soapstone hills. The gorge in which our party of thirty-two had entered ran within fifty feet to the left of us. But for at least one hundred yards the channel or bed of this gorge was entirely filled up with the chaotic ruins of more than a million tons of earth and stone that had been artificially tumbled within it. The means by which the vast mass had been precipitated were not more simple than evident, for sure traces of the murderous work were yet remaining. In several spots along the top of the eastern side of the gorge (we were now on the western) might be seen stakes of wood driven into the earth. In these spots the earth had not given way, but throughout

the whole extent of the face of the precipice from which the mass *had* fallen, it was clear, from marks left in the soil resembling those made by the drill of the rock-blaster, that stakes similar to those we saw standing had been inserted at not more than a yard apart, for the length of perhaps three hundred feet, and ranging at about ten feet back from the edge of the gulf. Strong cords of grape-vine were attached to the stakes still remaining on the hill, and it was evident that such cords had also been attached to each of the other stakes. I have already spoken of the singular stratification of these soapstone hills, and the description just given of the narrow and deep fissure through which we effected our escape from inhumanity will afford a further conception of its nature. This was such that almost every natural convulsion would be sure to split the soil into perpendicular layers or ridges running parallel with one another, and a very moderate exertion of art would be sufficient for effecting the same purpose. Of this stratification the savages had availed themselves to accomplish their treacherous ends. There can be no doubt that by the continuous line of stakes a partial rupture of the soil has been brought about, probably to the depth of one or two feet, when by means of a savage pulling at the end of each of the cords (these cords being attached to the tops of the stakes and extending back from the edge of the cliff) a vast leverage power was obtained, capable of hurling the whole face of the hill upon a given signal into the bosom of the abyss below. The fate of our poor companions was no longer a matter of uncertainty. We alone had escaped from the tempest of that overwhelming destruction. We were the only living white men upon the island.

CHAPTER XXII.

OUR situation, as it now appeared, was scarcely less dreadful than when we had conceived ourselves entombed for ever. We saw before us no prospect but that of being put to death by the savages, or of dragging out a miserable existence in captivity among them. We might, to be sure, conceal ourselves for a time from their observation among the fastnesses of the hills, and, as a final resort, in the chasm from which we had just issued ; but we must either perish in the long Polar winter through cold and famine, or be ultimately discovered in our efforts to obtain relief.

The whole country around us seemed to be swarming with savages, crowds of whom, we now perceived, had come over from the islands to the southwards on flat rafts, doubtless with a view of lending their aid in the capture and plunder of the *Jane*. The vessel still lay calmly at anchor in the bay, those on board being apparently quite unconscious of any danger awaiting them. How we longed at that moment to be with them ! either to aid in effecting their escape, or to perish with them in attempting a defence. We saw no chance even of warning them of their danger, without bringing immediate destruction upon our own heads, with but a remote hope of benefit to them. A pistol fired might suffice to apprise them that something wrong had occurred ; but the report could not possibly inform them that their only prospect of safety lay in getting out of the harbour forthwith—it could not tell them that no principles of honour now bound them to remain, that their companions were no longer among the living. Upon hearing the discharge they could not be more thoroughly prepared to meet the foe, who were now getting ready to attack, than they already were, and always had been. No good, therefore, and infinite harm, would result from our firing, and, after mature deliberation, we forbore.

Our next thought was to attempt a rush towards the vessel, to seize one of the four canoes which lay at the head of the bay, and endeavour to force a passage on board. But the utter impossibility of succeeding in this desperate task soon became evident. The country, as I said before, was literally swarming with the natives, skulking among the bushes and recesses of the hills, so as not to be observed from the schooner. In our immediate vicinity especially, and blockading the sole path by which we could hope to attain the shore in the proper point, were stationed the whole party of the black skin warriors, with Too-wit at their head, and apparently only waiting for some re-enforcement to commence his onset upon the *Jane*. The canoes, too, which lay at the head of the bay, were manned with savages, unarmed, it is true, but who undoubtedly had arms within reach. We were forced, therefore, however unwillingly, to remain in our place of concealment, mere spectators of the conflict which presently ensued.

In about half an hour we saw some sixty or seventy rafts, or flat boats, with outriggers, filled with savages, and coming round the southern bight of the harbour. They appeared to have no arms except short clubs, and stones which lay in the bottom of the rafts. Immediately afterwards another detachment, still larger, approached in an opposite direction, and with similar weapons. The four canoes, too, were now quickly filled with natives, starting up from the bushes at the head of the bay, and put off swiftly to join the other parties. Thus, in less time than I have taken to tell it, and as if by magic, the *Jane* saw herself surrounded by an immense multitude of desperadoes evidently bent upon capturing her at all hazards.

That they would succeed in so doing could not be doubted for an instant. The six men left in the vessel, however resolutely they might engage in her defence, were altogether unequal to the proper management of the guns, or in any manner to sustain a contest at such odds. I could hardly imagine that they would make resistance at all, but in this

was deceived ; for presently I saw them get springs upon the cable, and bring the vessel's starboard broadside to bear upon the canoes, which by this time were within pistol range, the rafts being nearly a quarter of a mile to windward. Owing to some cause unknown, but most probably to the agitation of our poor friends at seeing themselves in so hopeless a situation, the discharge was an entire failure. Not a canoe was hit or a single savage injured, the shots striking short and *ricocheting* over their heads. The only effect produced upon them was astonishment at the unexpected report and smoke, which was so excessive that for some moments I almost thought they would abandon their design entirely, and return to the shore ; and this they would most likely have done had our men followed up their broadside by a discharge of small arms, in which, as the canoes were now so near at hand, they could not have failed in doing some execution, sufficient at least to deter this party from a farther advance, until they could have given the rafts also a broadside. But, in place of this, they left the canoe party to recover from their panic, and, by looking about them, to see that no injury had been sustained, while they flew to the larboard to get ready for the rafts.

The discharge to larboard produced the most terrible effect. The star and double-headed shot of the large guns cut seven or eight of the rafts completely asunder, and killed, perhaps, thirty or forty of the savages outright, while a hundred of them at least were thrown into the water, the most of them dreadfully wounded. The remainder, frightened out of their senses, commenced at once a precipitate retreat, not even waiting to pick up their maimed companions, who were swimming about in every direction, screaming and yelling for aid. This great success, however, came too late for the salvation of our devoted people. The canoe party were already on board the schooner to the number of more than a hundred and fifty, the most of them having succeeded in scrambling up the chains and over the boarding-nettings even before the matches had been applied to the larboard guns.

Nothing now could withstand their brute rage. Our men were borne down at once, overwhelmed, trodden under foot, and absolutely torn to pieces in an instant.

Seeing this, the savages on the rafts got the better of their fears, and came up in shoals to the plunder. In five minutes the *Jane* was a pitiable scene indeed of havoc and tumultuous outrage. The decks were split open and ripped up; the cordage, sails, and everything moveable on deck demolished as if by magic; while, by dint of pushing at the stern, towing with the canoes, and hauling at the sides, as they swam in thousands around the vessel, the wretches finally forced her on shore (the cable having been slipped), and delivered her over to the good offices of Too-wit, who, during the whole of the engagement, had maintained, like a skilful general, his post of security and reconnaissance among the hills, but, now that the victory was completed to his satisfaction, descended to scamper down with his warriors of the black skin, and become a partaker in the spoils.

Too-wit's descent left us at liberty to quit our hiding-place and reconnoitre the hill in the vicinity of the chasm. At about fifty yards from the mouth of it we saw a small spring of water, at which we slaked the burning thirst that now consumed us. Not far from the spring we discovered several of the filbert bushes which I mentioned before. Upon tasting the nuts we found them palatable, and very nearly resembling in flavour the common English filbert. We collected our hats full immediately, deposited them within the ravine, and returned for more. While we were busily employed in gathering these, a rustling in the bushes alarmed us, and we were upon the point of stealing back to our covert, when a large black bird of the bittern species strugglingly and slowly arose above the shrubs. I was so much startled that I could do nothing, but Peters had sufficient presence of mind to run up to it before it could make its escape, and seize it by the neck. Its struggles and screams were tremendous, and we had thoughts of letting it go, lest the noise should alarm some of the savages who might be still lurking in the

neighbourhood. A stab with a bowie-knife, however, at length brought it to the ground, and we dragged it into the ravine, congratulating ourselves that, at all events, we had thus obtained a supply of food enough to last us for a week.

We now went out again to look about us, and ventured a considerable distance down the southern declivity of the hill, but met with nothing else which could serve us for food. We therefore collected a quantity of dry wood and returned, seeing one or two large parties of the natives on their way to the village, laden with the plunder of the vessel, and who, we were apprehensive, might discover us in passing beneath the hill.

Our next care was to render our place of concealment as secure as possible, and, with this object, we arranged some brushwood over the aperture which I have before spoken of as the one through which we saw the patch of blue sky, on reaching the platform from the interior of the chasm. We left only a very small opening, just wide enough to admit of our seeing the bay, without the risk of being discovered from below. Having done this, we congratulated ourselves upon the security of the position; for we were now completely excluded from observation as long as we chose to remain within the ravine itself and not venture out upon the hill. We could perceive no traces of the savages having ever been within this hollow; but, indeed, when we came to reflect upon the probability that the fissure through which we attained it had been only just now created by the fall of the cliff opposite, and that no other way of attaining it could be perceived, we were not so much rejoiced at the thought of being secure from molestation as fearful lest there should be absolutely no means left us for descent. We resolved to explore the summit of the hill thoroughly, when a good opportunity should offer. In the meantime we watched the motions of the savages through our loophole.

They had already made a complete wreck of the vessel, and were now preparing to set her on fire. In a little while we saw the smoke ascending in huge volumes from her main-

hatchway, and, shortly afterwards, a dense mass of flame burst up from the forecastle. The rigging, masts, and what remained of the sails caught immediately, and the fire spread rapidly along the decks. Still a great many of the savages retained their stations about her, hammering with largo stones, axes, and cannon balls at the bolts and other copper and iron work. On the beach, and in canoes and rafts, there were not less, altogether, in the immediate vicinity of the schooner, than ten thousand natives, besides the shoals of them, who, laden with booty, were making their way inland and over to the neighbouring islands. We now anticipated a catastrophe, and were not disappointed. First of all there came a smart shock (which we felt distinctly where we were, as if we had been slightly galvanized), but unattended with any visible signs of an explosion. The savages were evidently startled, and paused for an instant from their labours and yellings. They were upon the point of recommencing, when suddenly a mass of smoke puffed up from the decks, resembling a black and heavy thunder-cloud—then, as if from its bowels, arose a tall stream of vivid fire to the height apparently of a quarter of a mile—then there came a sudden circular expansion of the flame—then the whole atmosphere was magically crowded, in a single instant, with a wild chaos of wood, and metal, and human limbs—and, lastly, came the concussion in its fullest fury, which hurled us impetuously from our feet, while the hills echoed and re-echoed the tumult, and a dense shower of the minutest fragments of the ruins tumbled headlong in every direction around us.

The havoc among the savages far exceeded our utmost expectation, and they had now indeed reaped the full and perfect fruits of their treachery. Perhaps a thousand perished by the explosion, while at least an equal number were desperately mangled. The whole surface of the bay was literally strewn with the struggling and drowning wretches, and on shore matters were even worse. They seemed utterly appalled by the suddenness and completeness of their discomfiture, and made no efforts at assisting one another. At

length we observed a total change in their demeanour. From absolute stupor, they appeared to be all at once aroused to the highest pitch of excitement, and rushed wildly about, going to and from a certain point on the beach, with the strangest expressions of mingled horror, rage, and intense curiosity depicted on their countenances, and shouting at the top of their voices *Tekeli-li! Tekeli-li!*

Presently we saw a large body go off into the hills, whence they returned in a short time, carrying stakes of wood. These they brought to the station where the crowd was the thickest, which now separated so as to afford us a view of the object of all this excitement. We perceived something white lying upon the ground, but could not immediately make out what it was. At length we saw that it was the carcase of the strange animal with the scarlet teeth and claws which the schooner had picked up at sea on the eighteenth of January. Captain Guy had had the body preserved for the purpose of stuffing the skin and taking it to England. I remember he had given some directions about it just before our making the island, and it had been brought into the cabin and stowed away in one of the lockers. It had now been thrown on shore by the explosion; but why it had occasioned so much concern among the savages was more than we could comprehend. Although they crowded around the carcase at a little distance, none of them seemed willing to approach it closely. By and by the men with the stakes drove them in a circle around it, and, no sooner was this arrangement completed, than the whole of the vast assemblage rushed into the interior of the island, with loud screams of *Tekeli-li! Tekeli-li!*

CHAPTER XXIII.

DURING the six or seven days immediately following we remained in our hiding-place upon the hill, going out only occasionally, and then with the greatest precaution, for water and filberts. We had made a kind of pent-house on the platform, furnishing it with a bed of dry leaves, and placing in it three large flat stones, which served us for both fireplace and table. We kindled a fire without difficulty by rubbing two pieces of dry wood together, the one soft, the other hard. The bird we had taken in such good season proved excellent eating, although somewhat tough. It was not an oceanic fowl, but a species of bittern, with jet black and grizzly plumage, and diminutive wings in proportion to its bulk. We afterwards saw three of the same kind in the vicinity of the ravine, apparently seeking for the one we had captured ; but, as they never alighted, we had no opportunity of catching them.

As long as this fowl lasted we suffered nothing from our situation, but it was now entirely consumed, and it became absolutely necessary that we should look out for provision. The filberts would not satisfy the cravings of hunger, afflicting us, too, with severe gripings of the bowels, and, if freely indulged in, with violent headache. We had seen several large tortoises near the sea-shore to the eastward of the hill, and perceived they might be easily taken if we could get at them without the observation of the natives. It was resolved, therefore, to make an attempt at descending.

We commenced by going down the southern declivity, which seemed to offer the fewest difficulties, but had not proceeded a hundred yards before (as we had anticipated from appearances on the hill-top) our progress was entirely arrested by a branch of the gorge in which our companions had perished. We now passed along the edge of this for about a quarter of a mile, when we were again stopped by a precipice of immense depth,

and, ~~not~~ being able to make our way along the brink of it, we were forced to retrace our steps by the main ravine.

We now pushed over to the eastward, but with precisely similar fortune. After an hour's scramble, at the risk of breaking our necks, we discovered that we had merely descended into a vast pit of black granite, with fine dust at the bottom, and whence the only egress was by the rugged path in which we had come down. Toiling again up this path, we now tried the northern edge of the hill. Here we were obliged to use the greatest possible caution in our manœuvres, as the least indiscretion would expose us to the full view of the savages in the village. We crawled along therefore on our hands and knees, and occasionally were even forced to throw ourselves at full length, dragging our bodies along by means of the shrubbery. In this careful manner we had proceeded but a little way when we arrived at a chasm far deeper than any we had yet seen, and leading directly into the main gorge. Thus our fears were fully confirmed, and we found ourselves cut off entirely from access to the world below. Thoroughly exhausted by our exertions, we made the best of our way back to the platform, and throwing ourselves upon the bed of leaves, slept sweetly and soundly for some hours.

For several days after this fruitless search we were occupied in exploring every part of the summit of the hill in order to inform ourselves of its actual resources. We found that it would afford us no food, with the exception of the unwholesome filberts, and a rank species of scurvy-grass, which grew in a little patch of not more than four rods square, and would soon be exhausted. On the fifteenth of February, as near as I can remember, there was not a blade of this left, and the nuts were growing scarce; our situation therefore could hardly be more lamentable.* On the sixteenth we again went round the walls of our prison in hope of finding some avenue of escape, but to no purpose. We also descended the chasm in which we had been overwhelmed, with the faint expectation

* This day was rendered remarkable by our observing in the south several huge wreaths of the greyish vapour I have before spoken of. *

of discovering through this channel some opening to the main ravine. Here, too, we were disappointed, although we found and brought up with us a musket.

On the seventeenth we set out with the determination of examining more thoroughly the chasm of black granite into which we had made our way in the first search. We remembered that one of the fissures in the sides of this pit had been but partially looked into, and we were anxious to explore it, although with no expectation of discovering here any opening.

We found no great difficulty in reaching the bottom of the hollow as before, and were now sufficiently calm to survey it with some attention. It was indeed one of the most singular-looking places imaginable, and we could scarcely bring ourselves to believe it altogether the work of nature. The pit, from its eastern to its western extremity, was about five hundred yards in length when all its windings were threaded; the distance from east to west in a straight line not being more (I should suppose, having no means of accurate examination) than forty or fifty yards. Upon first descending into the chasm, that is to say for a hundred feet downward from the summit of the hill, the sides of the abyss bore little resemblance to each other, and apparently had at no time been connected, the one surface being of the soapstone and the other of marl, granulated with some metallic matter. The average breadth or interval between the two cliffs was probably here sixty feet, but there seemed to be no regularity of formation. Passing down, however, beyond the limit spoken of, the interval rapidly contracted, and the sides began to run parallel, although for some distance farther they were still dissimilar in their material and form of surface. Upon arriving within fifty feet of the bottom, a perfect regularity commenced. The sides were now entirely uniform in substance, in colour, and in lateral direction, the material being a very black and shining granite, and the distance between the two sides, at all points, facing each other, exactly twenty yards. The precise formation of the chasm will be best understood by means of a delineation taken

upon the spot ; for I had luckily with me a pocket-book and pencil, which I preserved with great care through a long series of subsequent adventure, and to which I am indebted for memoranda of many subjects which would otherwise have been crowded from my remembrance.

Figure 1.

This figure (see figure 1) gives the general outlines of the chasm, without the minor cavities, in the sides of which there were several, each cavity having a corresponding protuberance opposite. The bottom of the gulf was covered to the depth of three or four inches with a powder almost impalpable, beneath which we found a continuation of the black granite. To the right, at the lower extremity, will be noticed the appearance of a small opening ; this is the fissure alluded to above, and to examine which more minutely than before was the object of our second visit. We now pushed into it with vigour, cutting away a quantity of brambles which impeded us, and removing a vast heap of sharp flints somewhat resembling arrow-heads in shape. We were encouraged to persevere, however, by perceiving some little light proceeding from the farther end. We at length squeezed our way for about thirty feet, and found that the aperture was a low and regularly-formed arch, having a bottom of the same impalpable powder as that in the main chasm. A strong light now broke upon us, and, turning a short bend, we found

ourselves in another lofty chamber, similar to the one we had left in every respect, but longitudinal in form. Its general figure is here given. (See figure 2.)

Figure 2.

The total length of this chasm, commencing at the opening *a* and proceeding round the curve *b* to the extremity *d*, is five hundred and fifty yards. At *c* we discovered a small aperture similar to the one through which we had issued from the other chasm, and this was choked up in the same manner with brambles and a quantity of the white arrow-head flints. We forced our way through it, finding it about forty feet long, and emerged into a third chasm. This, too, was precisely like the first, except in its longitudinal shape, which was thus. (See figure 3.)

Figure 3.

Figure 5.

We found the entire length of the third chasm three hundred and twenty yards. At the point *a* was an opening about six feet wide, and extending fifteen feet into the rock, where it terminated in a bed of marl, there being no other

chasm beyond, as we had expected. We were about leaving this fissure, into which very little light was admitted, when Peters called my attention to a range of singular-looking indentures in the surface of the marl forming the termination of the *cul-de-sac*. With a very slight exertion of the imagination, the left, or most northern of these indentures might have been taken for the intentional, although rude, representation of a human figure standing erect, with outstretched arm. The rest of them bore also some little resemblance to alphabetical characters, and Peters was willing, at all events, to adopt the idle opinion that they were really such. I convinced him of his error, finally, by directing his attention to the floor of the fissure, where, among the powder, we picked up piece by piece, several large flakes of the marl, which had evidently been broken off by some convulsion from the surface where the indentures were found, and which had projecting points exactly fitting the indentures ; thus proving them to have been the work of nature. Figure 4 presents an accurate copy of the whole.

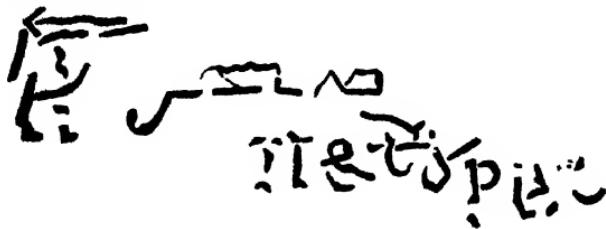

Figure 4.

After satisfying ourselves that these singular caverns afforded us no means of escape from our prison, we made our way back, dejected and dispirited, to the summit of the hill. Nothing worth mentioning occurred during the next twenty-four hours, except that in examining the ground to the eastward of the third chasm, we found two triangular holes of great depth, and also with black granite sides. Into these holes we did not think it worth while to attempt descending, as they had the appearance of mere natural wells, without

outlet. They were each about twenty yards in circumference, and their shape, as well as relative position in regard to the third chasm, is shown in figure 5, page 368.

CHAPTER XXIV.

ON the twentieth of the month, finding it altogether impossible to subsist any longer upon the filberts, the use of which occasioned us the most excruciating torment, we resolved to make a desperate attempt at descending the southern declivity of the hill. The face of the precipice was here of the softest species of soapstone, although nearly perpendicular throughout its whole extent (a depth of a hundred and fifty feet at the least), and in many places even overarching. After long search, we discovered a narrow ledge about twenty feet below the brink of the gulf; upon this Peters contrived to leap, with what assistance I could render him by means of our pocket-handkerchiefs tied together. With somewhat more difficulty I also got down, and we then saw the possibility of descending the whole way by the process in which we had clambered up from the chasm, when we had been buried by the fall of the hill—that is, by cutting steps in the face of the soapstone with our knives. The extreme hazard of the attempt can scarcely be conceived, but as there was no other resource we determined to undertake it.

Upon the ledge where we stood there grew some filbert bushes, and to one of these we made fast an end of our rope of handkerchiefs. The other end being tied round Peters's waist, I lowered him down over the edge of the precipice until the handkerchiefs were stretched tight. He now proceeded to dig a deep hole in the soapstone (as far in as eight or ten inches), sloping away the rock above to the height of a foot, or thereabout, so as to allow of his driving, with the butt of a

pistol) a tolerably strong peg into the levelled surface. I then drew him up for about four feet, when he made a hole similar to the one below, driving in a peg as before, and having thus a resting-place for both feet and hands. I now unfastened the handkerchiefs from the bush, throwing him the end, which he tied to the peg in the uppermost hole, letting himself down gently to a station about three feet lower than he had yet been, that is, to the full extent of the handkerchiefs. Here he dug another hole, and drove another peg. He then drew himself up, so as to rest his feet in the hole just cut, taking hold with his hands upon the peg in the one above. It was now necessary to untie the handkerchiefs from the topmost peg, with the view of fastening them to the second; and here he found that an error had been committed in cutting the holes at so great a distance apart. However, after one or two unsuccessful and dangerous attempts at reaching the knot (having to hold on with his left hand while he laboured to undo the fastening with his right), he at length cut the string, leaving six inches of it affixed to the peg. Tying the handkerchiefs now to the second peg, he descended to a station below the third, taking care not to go too far down. By these means (means which I should never have conceived of myself, and for which we were indebted altogether to Peters's ingenuity and resolution) my companion finally succeeded, with the occasional aid of projections in the cliff, in reaching the bottom without accident.

It was some time before I could summon sufficient resolution to follow him; but I did at length attempt it. Peters had taken off his shirt before descending, and this, with my own, formed the rope necessary for the adventure. After throwing down the musket found in the chasm, I fastened this rope to the bushes, and let myself down rapidly, striving, by the vigour of my movements, to banish the trepidation which I could overcome in no other manner. This answered sufficiently well for the first four or five steps; but presently I found my imagination growing terribly excited by thoughts of the vast

depth yet to be descended, and the precarious nature of the pegs and soapstone holes which were my only support. It was in vain I endeavoured to banish these reflections, and to keep my eyes steadily bent upon the flat surface of the cliff before me. The more earnestly I struggled *not to think*, the more intensely vivid became my conceptions, and the more horribly distinct. At length arrived that crisis of fancy, so fearful in all similar cases, the crisis in which we begin to anticipate the feelings with which we *shall* fall—to picture to ourselves the sickness, and dizziness, and the last struggle, and the half-swoon, and the final bitterness of the rushing and headlong descent. And now I found these fancies creating their own realities, and all imagined horrors crowding upon me in fact. I felt my knees strike violently together, while my fingers were gradually yet certainly relaxing their grasp. There was a ringing in my ears, and I said, "This is my knell of death!" And now I was consumed with the irrepressible desire of looking below. I could not, I would not, confine my glances to the cliff; and with a wild, indefinable emotion, half of horror, half of a relieved oppression, I threw my vision far down into the abyss. For one moment my fingers clutched convulsively upon their hold, while, with the movement, the faintest possible idea of ultimate escape wandered like a shadow through my mind—in the next my whole soul was pervaded with *a longing to fall*; a desire, a yearning, a passion utterly uncontrollable. I let go at once my grasp upon the peg, and, turning half round from the precipice, remained tottering for an instant against its naked face. But now there came a spinning of the brain; a shrill-sounding and phantom voice screamed within my ears; a dusky, fiendish, and filmy figure stood immediately beneath me; and, sighing, I sunk down with a bursting heart, and plunged within its arms.

I had swooned, and Peters had caught me as I fell. He had observed my proceedings from his station at the bottom of the cliff; and perceiving my imminent danger, had endeavoured to inspire me with courage by every suggestion he could devise; although my confusion of mind had been so great as to prevent

my hearing what he said, or being conscious that he had even spoken to me at all. At length, seeing me totter, he hastened to ascend to my rescue, and arrived just in time for my preservation. Had I fallen with my full weight, the rope of linen would inevitably have snapped, and I should have been precipitated into the abyss ; as it was, he contrived to let me down gently, so as to remain suspended without danger until animation returned. This was in about fifteen minutes. On recovery, my trepidation had entirely vanished ; I felt a new being, and, with some little further aid from my companion, reached the bottom also in safety.

We now found ourselves not far from the ravine which had proved the tomb of our friends, and to the southward of the spot where the hill had fallen. The place was one of singular wildness, and its aspect brought to my mind the descriptions given by travellers of those dreary regions marking the site of degraded Babylon. Not to speak of the ruins of the disrupted cliff, which formed a chaotic barrier in the vista to the northward, the surface of the ground in every other direction was strewn with huge tumuli, apparently the wreck of some gigantic structures of art ; although, in detail, no semblance of art could be detected. Scoriae were abundant, and large shapeless blocks of the black granite, intermingled with others of marl,* and both granulated with metal. Of vegetation there were no traces whatsoever throughout the whole of the desolate area within sight. Several immense scorpions were seen, and various reptiles not elsewhere to be found in the high latitudes.

As food was our most immediate object, we resolved to make our way to the sea-coast, distant not more than half a mile, with a view of catching turtle, several of which we had observed from our place of concealment on the hill. We had proceeded some hundred yards, threading our route cautiously between the huge rocks and tumuli, when, upon turning a corner, five savages sprung upon us from a small cavern, felling

* The marl was also black ; indeed, we noticed no light-coloured substance of any kind upon the island. *

Peters to the ground with a blow from a club. As he fell the whole party rushed upon him to secure their victim, leaving me time to recover from my astonishment. I still had the musket, but the barrel had received so much injury in being thrown from the precipice that I cast it aside as useless, preferring to trust my pistols, which had been carefully preserved in order. With these I advanced upon the assailants, firing one after the other in quick succession. Two savages fell, and one, who was in the act of thrusting a spear into Peters, sprang to his feet without accomplishing his purpose. My companion being thus released, we had no further difficulty. He had his pistols also, but prudently declined using them, confiding in his great personal strength, which far exceeded that of any person I have ever known. Seizing a club from one of the savages who had fallen, he dashed out the brains of the three who remained, killing each instantaneously with a single blow of the weapon, and leaving us completely masters of the field.

So rapidly had those events passed, that we could scarcely believe in their reality, and were standing over the bodies of the dead in a species of stupid contemplation, when we were brought to recollection by the sound of shouts in the distance. It was clear that the savages had been alarmed by the firing, and that we had little chance of avoiding discovery. To regain the cliff, it would be necessary to proceed in the direction of the shouts ; and even should we succeed in arriving at its base, we should never be able to ascend it without being seen. Our situation was one of the greatest peril, and we were hesitating in which path to commence a flight, when one of the savages whom I had shot, and supposed dead, sprang briskly to his feet, and attempted to make his escape. We overtook him, however, before he had advanced many paces, and were about to put him to death, when Peters suggested that we might derive some benefit from forcing him to accompany us in our attempt at escape. We therefore dragged him with us, making him understand that we would shoot him if he offered resistance. In a few minutes he was perfectly submissive, and ran by our sides as we pushed in among the rocks making for the sea-shore.

So far the irregularities of the ground we had been traversing hid the sea, except at intervals, from our sight, and when we first had it fairly in view it was perhaps two hundred yards distant. As we emerged into the open beach we saw, to our great dismay, an immense crowd of the natives pouring from the village, and from all visible quarters of the island, making towards us with gesticulations of extreme fury, and howling like wild beasts. We were upon the point of turning upon our steps, and trying to secure a retreat among the fastnesses of the rougher ground, when I discovered the bows of two canoes projecting from behind a large rock which ran out into the water. Towards these we now ran with all speed, and, reaching them, found them unguarded, and without any other freight than three of the large Gallipago turtles and the usual supply of paddles for sixty rowers. We instantly took possession of one of them, and forcing our captive on board, pushed out to sea with all the strength we could command.

We had not made, however, more than fifty yards from the shore before we became sufficiently calm to perceive the great oversight of which we had been guilty in leaving the other canoe in the power of the savages, who by this time were not more than twice as far from the beach as ourselves, and were rapidly advancing to the pursuit. No time was now to be lost. Our hope was at best a forlorn one, but we had none other. It was very doubtful whether, with the utmost exertion, we could get back in time to anticipate them in taking possession of the canoe, but yet there was a chance that we could. We might save ourselves if we succeeded, while not to make the attempt was to resign ourselves to inevitable butchery.

The canoe was modelled with the bow and stern alike, and in place of turning it around we merely changed our position in paddling. As soon as the savages perceived this they redoubled their yells, as well as their speed, and approached with inconceivable rapidity. We pulled, however, with all the energy of desperation, and arrived at the contested point

before more than one of the natives had attained it. This man paid dearly for his superior agility, Peters shooting him through the head with a pistol as he approached the shore. The foremost among the rest of his party were probably some twenty or thirty paces distant as we seized upon the canoe. We at first endeavoured to pull her into the deep water, beyond the reach of the savages, but finding her too firmly aground, and there being no time to spare, Peters, with one or two heavy strokes from the butt of the mi-ket, succeeded in dashing out a large portion of the bow and of one side. We then pushed off. Two of the natives by this time had got hold of our boat, obstinately refusing to let go, until we were forced to despatch them with our knives. We were now clear off, and making great way out to sea. The main body of the savages, upon reaching the broken canoe, set up the most tremendous yell of rage and disappointment conceivable. In truth, from everything I could see of these wretches, they appeared to be the most wicked, hypocritical, vindictive, bloodthirsty, and altogether fiendish race of men upon the face of the globe. It is clear we should have had no mercy had we fallen into their hands. They made a mad attempt at following us in the fractured canoe, but finding it useless, again vented their rage in a series of hideous vociferations, and rushed up into the hills.

We were thus relieved from immediate danger, but our situation was still sufficiently gloomy. We knew that four canoes of the kind we had were at one time in the possession of the savages, and were not aware of the fact (afterwards ascertained from our captive) that two of these had been blown to pieces in the explosion of the *Jane Guy*. We calculated, therefore, upon being yet pursued as soon as our enemies could get round to the bay (distant about three miles) where the boats were usually laid up. Fearing this, we made every exertion to leave the island behind us, and went rapidly through the water, forcing the prisoner to take a paddle. In about half an hour, when we had gained probably five or six miles to the southward, a large fleet of the flat-bottomed

canoes or rafts were seen to emerge from the bay, evidently with the design of pursuit. Presently they put back, despairing to overtake us.

CHAPTER XXV.

WE now found ourselves in the wide and desolate Antarctic Ocean, in a latitude exceeding eighty-four degrees, in a frail canoe, and with no provision but the three turtles. The long Polar winter, too, could not be considered as far distant, and it became necessary that we should deliberate well upon the course to be pursued. There were six or seven islands in sight belonging to the same group, and distant from each other about five or six leagues, but upon neither of these had we any intention to venture. In coming from the northward in the *Jane Guy* we had been gradually leaving behind us the severest regions of ice—this, however little it may be in accordance with the generally received notions respecting the Antarctic, was a fact experience would not permit us to deny. To attempt, therefore, getting back would be folly—especially at so late a period of the season. Only one course seemed to be left open for hope. We resolved to steer boldly to the southward, where there was at least a probability of discovering other lands, and more than a probability of finding a still milder climate.

So far we had found the Antarctic, like the Arctic Ocean, peculiarly free from violent storms or immoderately rough water; but our canoe was at best of frail structure, although large, and we set busily to work with a view of rendering her as safe as the limited means in our possession would admit. The body of the boat was of no better material than bark—the bark of a tree unknown. The ribs were of a tough osier, well adapted to the purpose for which it was used. We had fifty feet room from stem to stern, from four to six in breadth,

and in depth throughout four feet and a half—the boats thus differing vastly in shape from those of any other inhabitants of the Southern Ocean with whom civilised nations are acquainted. We never did believe them the workmanship of the ignorant islanders who owned them, and some days after this period discovered, by questioning our captive, that they were in fact made by the natives of a group to the south-west of the country where we found them, having fallen accidentally into the hands of our barbarians. What we could do for the security of our boat was very little indeed. Several wide rents were discovered near both ends, and these we contrived to patch up with pieces of woollen jacket. With the help of the superfluous paddles, of which there were a great many, we erected a kind of framework about the bow, so as to break the force of any seas which might threaten to fill us in that quarter. We also set up two paddle-blades for masts, placing them opposite each other, one by each gunwale, thus saving the necessity of a yard. To these masts we attached a sail made of our shirts—doing this with some difficulty, as here we could get no assistance from our prisoner whatever, although he had been willing enough to labour in all the other operations. The sight of the linen seemed to affect him in a very singular manner. He could not be prevailed upon to touch it or go near it, shuddering when we attempted to force him, and shrieking out *Tekeli-li!*

Having completed our arrangements in regard to the security of the canoe, we now set sail to the south-south-east for the present, with the view of weathering the most southerly of the group in sight. This being done, we turned the bow full to the southward. The weather could by no means be considered disagreeable. We had a prevailing and very gentle wind from the northward, a smooth sea, and continual daylight. No ice whatever was to be seen : *nor did I ever see one particle of this after leaving the parallel of Bennett's Islet.* Indeed, the temperature of the water was here far too warm for its existence in any quantity. Having killed the largest of our tortoises, and obtained from him not only food, but a copious supply of water,

we continued on our course, without any incident of moment, for perhaps seven or eight days, during which period we must have proceeded a vast distance to the southward, as the wind blew constantly with us, and a very strong current set continually in the direction we were pursuing.

*March 1.** Many unusual phenomena now indicated that we were entering upon a region of novelty and wonder. A high range of light grey vapour appeared constantly in the southern horizon, flaring up occasionally in lofty streaks, now darting from east to west, now from west to east, and again presenting a level and uniform summit—in short, having all the wild variations of the Aurora Borealis. The average height of this vapour, as apparent from our station, was about twenty-five degrees. The temperature of the sea seemed to be increasing momentarily, and there was a very perceptible alteration in its colour.

March 2. To-day, by repeated questioning of our captive, we came to the knowledge of many particulars in regard to the island of the massacre, its inhabitants and customs—but with these how can I now detain the reader? I may say, however, that we learned there were eight islands in the group—that they were governed by a common king, named *Tsalemoun* or *Psalemoun*, who resided in one of the smallest of the islands; that the black skins forming the dress of the warriors came from an animal of huge size to be found only in a valley near the court of the king—that the inhabitants of the group fabricated no other boats than the flat-bottomed rafts; the four canoes being all of the kind in their possession, and these having been obtained by mere accident from some large island in the south-west—that his own name was Nu-Nu—that he had no knowledge of Bennett's Islet—and that the appellation of the island we had left was *Tsalal*. The commencement of the words *Tsalemoun* and *Tsalal* was given with a prolonged hissing sound, which we found it impossible to imitate, even after

* For obvious reasons I cannot pretend to strict accuracy in these dates. They are given principally with a view to perspicuity of narration, and as set down in my pencil memoranda.

repeated endeavours, and which was precisely the same with the note of the black bittern we had eaten upon the summit of the hill.

March 3. The heat of the water was now truly remarkable, and its colour was undergoing a rapid change, being no longer transparent, but of a milky consistency and hue. In our immediate vicinity it was usually smooth, never so rough as to endanger the canoe; but we were frequently surprised at perceiving, to our right and left, at different distances, sudden and extensive agitations of the surface; these we at length noticed were always preceded by wild flickerings in the region of vapour to the southward.

March 4. To-day, with the view of widening our sail, the breeze from the northward dying away perceptibly, I took from my coat pocket a white handkerchief. Nu-Nu was seated at my elbow, and the linen accidentally flaring in his face, he became violently affected with convulsions. These were succeeded by drowsiness and stupor, and low murmurings of Tekeli-li! Tekeli-li!

March 5. The wind had entirely ceased, but it was evident that we were still hurrying on to the southward, under the influence of a powerful current. And now, indeed, it would seem reasonable that we should experience some alarm at the turn events were taking—but we felt none. The countenance of Peters indicated nothing of this nature, although it wore at times an expression I could not fathom. The Polar winter appeared to be coming on—but coming without its terrors. I felt a numbness of body and mind—a dreaminess of sensation—but this was all.

March 6. The grey vapour had now arisen many more degrees above the horizon, and was gradually losing its greyness of tint. The heat of the water was extreme, even unpleasant to the touch, and its milky hue was more evident than ever. To-day a violent agitation of the water occurred very close to the canoe. It was attended, as usual, with a wild flaring up of the vapour at its summit, and a momentary division at its base. A fine white powder, resembling ashes—

but certainly not such—fell over the canoe and over a large surface of the water, as the flickering died away among the vapour and the commotion subsided in the sea. Nu-Nu now threw himself on his face in the bottom of the boat, and no persuasions could induce him to arise.

March 7. This day we questioned Nu Nu concerning the motives of his countrymen in destroying our companions; but he appeared to be too utterly overcome by terror to afford us any rational reply. He still obstinately lay in the bottom of the boat; and, upon our reiterating the questions as to the motive, made use only of idiotic gesticulations, such as raising with his forefinger the upper lip, and displaying the teeth which lay beneath it. These were black. We had never before seen the teeth of an inhabitant of Tsalal.

March 8. To-day there floated by us one of the white animals whose appearance upon the beach at Tsalal had occasioned so wild a commotion among the savages. I would have picked it up, but there came over me a sudden listlessness, and I forbore. The heat of the water still increased, and the hand could no longer be endured within it. Peters spoke little, and I knew not what to think of his apathy. Nu-Nu breathed, and no more.

March 9. The whole ashy material fell now continually around us, and in vast quantities. The range of vapour to the southward had arisen prodigiously in the horizon, and began to assume more distinctness of form. I can liken it to nothing but a limitless cataract, rolling silently into the sea from some immense and far-distant rampart in the heaven. The gigantic curtain ranged along the whole extent of the southern horizon. It emitted no sound.

March 21. A sullen darkness now hovered above us—but from out the milky depths of the ocean a luminous glare arose, and stole up along the bulwarks of the boat. We were nearly overwhelmed by the white ashy shower which settled upon us and upon the canoe, but melted into the water as it fell. The summit of the cataract was utterly lost in the dimness and the distance. Yet we were evidently approaching it with a

hideous velocity. At intervals there were visible in its wide, yawning, but momentary rents, and from out these rents, within which was a chaos of flitting and indistinct images, there came rushing and mighty, but soundless winds, tearing up the unkindled ocean in their course.

March 22 The darkness had materially increased, relieved only by the glare of the water thrown back from the white curtain before us. Many gigantic and pallidly white birds flew continuously now from beyond the veil, and their scream was the eternal *Tekeli-ley!* as they retreated from our vision. Hereupon Nu-Nu stirred in the bottom of the boat, but upon touching him we found his spirit departed. And now we rushed into the embraces of the cat-boat, where a chasm threw itself open to receive us. But there arose in our pathway a shrouded human figure, very far larger in its proportions than any dweller among men. And the hue of the skin of the figure was of the perfect whiteness of the snow.

N O T E

The circumstances connected with the sudden and distressing death of Mr. Pyn are already well known to the public through the medium of the daily press. It is said that the few remaining chapters which were to have completed his narrative, and which were retained by him, while the above were in type for the purpose of revision, have been irrecoverably lost through the accident by which he perished himself. This, however, may prove not to be the case, and the papers, if ultimately found, will be given to the public.

No means have been left untried to remedy the deficiency. The gentleman whose name is mentioned in the preface and who, from the statement there made, might be supposed able to fill the vacuum, has declined the task—this for satisfactory reasons connected with the general inaccuracy of the details afforded him, and his disbelief in the entire truth of the latter portions of the narration. Peters, from whom some information might be expected, is still alive, and a resident of Illinois, but

cannot be met with at present. He may hereafter be found, and will no doubt afford material for the conclusion of Mr. Pym's account.

The loss of two or three final chapters (for there were but two or three) is the more deeply to be regretted, as it cannot be doubted they contained matter relative to the Pole itself, or at least to regions in its very vicinity—and as, too, the statements of the author in relation to the regions may shortly be verified or contradicted by means of the governmental expedition now preparing for the Northern Ocean.

On one point in the narrative some remarks may well be offered, and it would afford the writer of these appendices much pleasure if what he may here observe should have a tendency to the credit, in my degree, upon the very singular pages now published. We allude to the chasms found in the island of Tealil, and to the whole of the figures upon pages 367, 368, 369.

Mr. Pym has given the figures of the basins without comment, and speaks decidedly of the *initials* found at the extremity of the most easterly of these chasms as having but a fanciful resemblance to alphabetical characters, and, in short, as being positively *not such*. This assertion is made in manner so simple, and sustained by a species of demonstration so conclusive, viz. the fitting of the projections of the fragments found among the dust into the indentures upon the wall, that we are forced to believe the writer in error, and no reasonable reader should suppose otherwise. If it is the facts in relation to *all* the figures are most singular (especially when taken in connection with statements made in the body of the narrative), it may be as well to say a word or two concerning them all—this, too, the more especially as the facts in question have beyond doubt engaged the attention of Mr. Poe.

Figure 1, then, figure 2, figure 3, and figure 5, when conjoined with one another in the precise order which the chasms themselves presented, and when deprived of the small lateral branches or arches (which, it will be remembered, served only as a means of communication between the main chambers, and were of totally distinct character), constitute an Ethiopian verbal root—the root "To be shady"—whence all the inflections of shadow or darkness.

In regard to the "left or most northwardly" of the indentures in figure 4, it is more than probable that the opinion of Peters was correct, and that the hieroglyphical appearance was really the work of art, and intended as the representation of a human form. The delineation is before the reader, and he may, or may not, perceive the resemblance suggested, but the rest of the indentures afford strong confirmation of Peters's idea. The upper range is evidently the Arabic verbal root

"To be white," whence all the inflections of brilliancy and whiteness. The lower range is not so immediately perspicuous. The

NOTE.

characters are somewhat broken and disjointed; nevertheless, it cannot be doubted that, in their perfect state, they formed the full Egyptian word **TT&TYPHC**, "The region of the South." It should be observed that these interpretations confirm the opinion of Peters in regard to the "most northwardly" of the figures. The arm is outstretched towards the south.

Conclusions such as these open a wide field for speculation and exciting conjecture. They should be regarded, perhaps, in connection with some of the most faintly-detailed incidents of the narrative, although in no visible manner is this chain of connection complete. Tekeli-Hif was the cry of the affrighted natives of Tsalal upon discovering the carcass of the white animal picked up at ~~the~~. This also was the shuddering exclamation of the captive Tsalalian upon encountering the white materials in possession of Mr. Pym. This also was the shriek of the swift flying, white, and gigantic birds which issued from the very *white* curtain of the south. Nothing white was to be found at Isild, and nothing elsewise in the subsequent voyage to the region beyond. It is not impossible that "Tsalal," the appellation of the island of the chasms, may be found, upon minute philological scrutiny, to betray either some allusion with the chasms themselves, or some reference to the Ethiop in characters so my steriously written in their writings.

"I have graven it within the hill, and my vengeance upon the dust within the rock."
